The Lucira by Pfizer COVID-19 & Flu Home Test is only for use under the Food and Drug Administration’s Emergency Use Authorization (EUA) and is intended for non-prescription use by non-healthcare professionals to detect SARS-CoV-2, influenza A, and influenza B viral nucleic acid. This test is authorized for non-prescription home use with anterior nasal swab samples from individuals aged 14 years or older and/or, as applicable, for an adult lay user testing another individual aged 14 years or older. It is important to roll the swab around the inside walls of both nostrils. You want the swab to be touching and rubbing around the inside walls as you rotate. Rotating the swab 5 times around the inside walls of both nostrils is very important for the test to work properly.

What is influenza A & B? & Flu Home Test was compared to an FDA-cleared known high sensitivity SARS-CoV-2 PCR test and an FDA-cleared known high sensitivity Influenza A and B PCR test. Please refer to the IFU at www.lucirahealth.com/IFU for complete data.

Can this test detect new SARS-CoV-2 variants and flu strains? & Flu Home Test performs routine surveillance of emerging SARS-CoV-2 and influenza strains and will continue to monitor the situation with emerging variants. A technical brief that lists SARS-CoV-2 variants and flu strains to which the Lucira test is reactive is available at lucirahealth.com.

Frequently Asked Questions

Please Read Instructions On Reverse

Rotating the swab 5 times around the inside walls of both nostrils is very important for the test to work properly.

What if the display shows an invalid test result? This means something with the test did not work correctly. The results, along with other information, can help the healthcare provider make informed recommendations about your care.

The results of this test may help limit the spread of COVID-19 and flu to the family of the tested individual and others in your community.

What is influenza A & B? The two most common types of influenza are influenza A & B. This test uses positive and negative lights to indicate whether the test is working properly.

What if I miss a step? Please follow each step carefully. This test only works if you follow each step.

What will help me use the nasal swab correctly? How do I make sure I am getting a good sample? It is important to roll the swab around the inside walls of both nostrils. You want the swab to be touching and rubbing around the inside walls as you rotate.

For individuals with signs and symptoms consistent with respiratory infection including COVID-19, influenza A & B, or by calling Pfizer at 1-888-LUCIRA-4 (582-4724).

For Over-The-Counter (OTC) Use

For In Vitro Diagnostic (IVD) Use

This test is authorized for non-prescription home use with anterior nasal swab samples from individuals aged 14 years or older and/or, as applicable, for an adult lay user testing another individual aged 14 years or older. It is important to roll the swab around the inside walls of both nostrils. You want the swab to be touching and rubbing around the inside walls as you rotate.

5x Intended Use

For non-prescription use by non-healthcare professionals to detect SARS-CoV-2, influenza A, and influenza B viral nucleic acid. This test is authorized for non-prescription home use with anterior nasal swab samples from individuals aged 14 years or older and/or, as applicable, for an adult lay user testing another individual 14 years or older.
Instructions - Start Here

- Choose a location to do this test where it can sit UNDISTURBED for 30 minutes.
- Please read all instructions carefully before you begin.
- Do not insert batteries into test unit until ready to perform test.
- Keep test box to use for Lucira Connect.
- Make sure your test kit contains: 2 AA batteries, test unit (pouch 1), sample vial (pouch 2), swab (labeled 3), and plastic disposal bag.
- Wash and dry hands.

1 Set Up Test

- When ready to begin test, open test unit pouch 1.
- Open battery door and insert batteries. Check that Ready light is on.
- Open sample vial pouch 2.

2 Swab Both Nostrils

- REMOVE sample vial seal
- then GENTLY set in test unit but do NOT push the vials down.

3 Stir Swab and Run Test

- Insert swab into the sample vial until it touches the bottom.
- Mix sample by stirring around the sample vial 15 times.
- Discard swab.

4 Read Result

- Ready light will continue blinking while the test is running.
- Positive results may display before the test is done running.
- Results may be positive for more than one virus.
- Ready light will turn off and all results for COVID-19, Flu A, and Flu B will display in 30 minutes when test is done.

Example Result: Positive for COVID-19 & Flu A; Negative for Flu B.

You must wait until the Ready light has stopped blinking, indicating the test is complete, to interpret results.

- Normally, the test should take 15-20 minutes.
- Wait 30 minutes.

Note: Keep vial away from children. Avoid contact with eyes and skin. If contact occurs, rinse with water. If irritation persists, seek medical attention.

1 Adults must swab children 2 years or older.

Lucira Connect is a website that helps you:

- Create a shareable digital record of your test result.
- Use your smartphone camera to scan the QR code on the top of the test unit or on the sticker on the back of the box to begin at luciraconnect.com
- If you test POSITIVE

It is very likely you have COVID-19 (if the test result is positive for COVID-19), or Flu (if the test result is positive for Flu A or Flu B) and it is important to be not at home if you are feeling sick. It is likely you will be asked to isolate yourself at home to avoid spreading the virus to others. There is a very small chance that this test can give a positive result that is wrong (a false positive). Your healthcare provider will work with you to determine how best to care for you based on your test results along with medical history and your symptoms.

- If you test NEGATIVE

A negative result means the virus that causes COVID-19 (if you test negative for COVID-19 or Flu A) or Flu (if you test negative for Flu A and Flu B) was not found in your sample. However, it is possible for this test to give a negative result that is incorrect (a false negative) in some people with COVID-19 or Flu A. This means you could possibly still have COVID-19 or Flu even though the test is negative. If this is the case, your healthcare provider will consider the test result with all other aspects of your history such as symptoms and possible exposures to decide how to care for you. It is important you work with your healthcare provider to help you understand the next steps you should take.

- If the test is INVALID

An invalid result means something with the test did not work properly. If the test result is invalid, the positive and negative results may show on the device will be blinking/flashing. If your test shows an invalid result, visit or contact Pfizer at 1-888-LUCIRA-4 to obtain a free replacement test.

5 Dispose of Test Kit

After use remove the batteries, place the test unit in plastic disposal bag and dispose of all test kit materials in trash. Do not allow the test unit to come into contact or be disposed of with bleach, as harmful gases could be emitted as a result.
