COVID-19 & Flu Home Test
Nucleic Acid Amplification Test (NAAT)
For individuals with signs and symptoms of Respiratory Tract Infection including COVID-19

What is COVID-19 & Flu A & B?
The two most common types of influenza are Flu A & B. This test tests for both of these types of flu. If the test is positive for either influenza A (Flu A) or influenza B (Flu B), the tested individual has the virus.

While seasonal influenza viruses are detected year-round in the United States, flu viruses typically circulate during the fall and winter during what’s known as the flu season.

How accurate is this test?
The Lucira by Pfizer COVID-19 & Flu Home Test was compared to an FDA-authorized known high sensitivity SARS-CoV-2 PCR test and an FDA-clarified known high sensitivity influenza A & B PCR test. Please refer to the IFU at www.lucirahealth.com/IFU for complete data.

Can this test detect new SARS-CoV-2 variants and Flu strains?
Pfizer performs routine surveillance of emerging SARS-CoV-2 and Influenza strains and will continue to monitor the situation with emerging variants. A technical brief that lists SARS-CoV-2 variants and flu strains to which the Lucira test is reactive is available at lucirahealth.com.

What will help me use the nasal swab correctly?
Rotating the swab 5 times around the inside walls of both nostrils is very important to the test working properly.

What are the known and potential risks and benefits of this test?
Potential risks include:
- Possible discomfort during sample collection.
- Possible incorrect test results.

Potential benefits include:
- The results, along with other information, can help the healthcare provider make informed recommendations about your care.
- The results of this test may help limit the spread of COVID-19 and flu to the family of the tested individual and others in your community.

What if the display shows an invalid test result?
This means something with the test did not work properly. If the test has any invalids, the Positive and Negative lights will be blinking when the test is done in 30 minutes. If the test shows an invalid result, please retest or contact Pfizer at 1-888-LUCIRA-4 (582-4724). Contact Pfizer if result is invalid upon retesting.

Instructions - Start Here

Choose a location to do this test where it can sit UNDISTURBED for 30 minutes.
Please read all instructions carefully before you begin.
Do not insert batteries into test unit until ready to perform test.
Keep test box to use for Lucira Connect.
Make sure your test kit contains: 2 AA batteries, test unit (pouch 1), sample vial (pouch 2), swab (labeled 3), and plastic disposal bag.
Wash and dry hands.

Set Up Test
When ready to begin test, open test unit pouch 1.
Open battery door and insert batteries. Check that Ready light is on.
Open sample vial pouch 2.

Swab Both Nostrils
For this test to work properly, it is important to swab BOTH nostrils.
Remove swab and hold with handle end. Do not set swab down.
Tilt head back and gently insert swab tip until it is fully inside your nostril and you must resistance.
Once swab tip is fully inside nostril, roll the swab 5 times around the inside walls of your nostril. The swab should be touching the walls of the nostril as you rotate.
Repeat swab step in other nostril.
Rotate 5x in BOTH nostrils.
Make sure to roll inside walls to collect a good sample.

Stir Swab and Run Test
Insert swab into the sample vial until it touches the bottom.
Mix sample by stirring around the sample vial 15 times.
Discard swab.

Read Result
Ready light will continue blinking while the test is running.
Positive results may display before the test is done running.
Results may be positive for more than one virus.
Ready light will turn off and all results for COVID-19, Flu A, and Flu B will display in 30 minutes when test is done.

Example Result: Positive for COVID-19 & Flu A; Negative for Flu B.
You must wait until the Ready light has stopped blinking, indicating this test is complete, to interpret results.

POSITIVE Results
Positive results light up on the right
COVID-19 Positive
Flu A Positive
Flu B Positive

NEGATIVE Results
Negative results light up on the left
COVID-19 Negative
Flu A Negative
Flu B Negative

INVALID Results
Positive and Negative lights flash if result is Invalid

If you test POSITIVE
It is very likely you have COVID-19 (if the test result is positive for COVID-19) or Flu (if the result is positive for Flu A or Flu B) and it is important to be under the care of a healthcare provider. It is likely you will be asked to isolate yourself at home to avoid spreading the virus to others. There is a very small chance that this test can give a positive result that is wrong (a false positive). Your healthcare provider will work with you to determine how best to care for you based on your test results along with medical history and your symptoms.

If you test NEGATIVE
A negative result means the virus that causes COVID-19 (if you test negative for COVID-19) or Flu A (if you test negative for Flu A) & Flu B was not found in your sample. However, it is possible for this test to give a negative result that is incorrect (a false negative) in some people with COVID-19 or Flu. This means you could possibly still have COVID-19 or Flu even though the test is negative. If this is the case, your healthcare provider will consider the test result with all other aspects of your history such as symptoms and possible exposures to decide how to care for you. It is important you work with your healthcare provider to help you understand the next steps you should take.

If the test is INVALID
An invalid result means something with the test did not work properly. If the test result is invalid, the positive and negative lights on the device will be blinking/flashing. If your test shows an invalid result, reset or contact Pfizer at 1-888-LUCIRA-4 to obtain a free replacement test.

Dispose of Test Kit
After use remove the batteries, place the test unit in plastic disposal bag and dispose all test kit materials in trash. Do not allow the test unit to come into contact or be disposed of with bleach, as harmful gases could be emitted as a result.

Lucira Connect is a website that helps you:
• Create a sharable digital record of your test result
Use your smartphone camera to scan the QR code on the top of the test unit or on the sticker on the back of the box to begin at luciraconnect.com
