A. BACKGROUND AND OVERVIEW

The Food and Drug Administration (FDA) The Orthopaedics/AM program within the Division of Applied Mechanics, Office of Science Engineering Laboratories, Center for Devices and Radiological Health, has a requirement for a Tension/Compression Loading Device compatible with FDA in-house Scanco microCT scanner to allow simultaneous loading and imaging of medical devices (such as screws) and standard coupons. This equipment will be used in FDA research projects to understand and investigate internal material/lattice deformation and strains under discrete load increments up to failure. This method is the only known way to obtain internal structural deformations. The device shall directly interface with FDA current microCT machine manufactured by Scanco.

Traditional methods such as digital image correlation or direct imaging with cameras can only obtain surface strains and are not able to measure internal strains and deformations. This is a limitation as device failure can occur within the internal structure and is not necessarily limited to the outer surface. This device will allow FDA to more comprehensively validate FDA finite element models, understand intricate regular or stochastic lattice mechanics of 3D printed devices, and develop associated regulatory science tools.

Objectives

The purpose of this requirement is to get a Tension/Compression Loading Device which is 100%

compatible with the existing Scanco microCT 100 scanner.

B. SPECIFICATIONS

The Vendor shall indicate if the minimum salient characteristics have been met to be considered responsive for this requirement. This statement of work covers the delivery, installation, warranty on a new instrument(s). Operation of the instrument shall be inclusive of the installation completion.

- 1.11 Power input: 100-120VAC
- 1.12 Computer Software that is installed on PC laptop (Windows 10) and can interface with the device via the external holder and allow to pre-set a force on the sample. The software should allow for: force/displacement control, stress/strain control, data chart display and recording of data time scheduler for testing.
- 1.13 Scanco MicroCT 100 interface control software upgrade to control device during scanning, which is compatible with OpenVMS operating system of Scanco MicroCT 100 (Serial Number: 09113000)
- 1.14 Accessories: Adapters/fixtures for tensile testing of metallic screws and standard test coupons, Adapters/fixtures for compression testing of bone, analogue bone, 3d-printed test coupons.
