

**Limitations:** The adverse event and product problem reports contained in this record are not necessarily causally related to (caused by) the reported product, nor do they mean the product was defective. Consumer complaints involving animal foods are received by FDA through voluntary reporting systems. Not all reports undergo follow up actions by FDA; however, each report received is important to FDA as part of our ongoing surveillance efforts related to pet food safety. Trends in reporting can provide an early warning of emerging safety issues of concern.

Other limitations:

- For any given report, there is no certainty that the reported pet food caused the adverse event. The adverse event(s) reported may be more related to an underlying disease, condition, or concomitantly administered medication.
- The report narratives are provided in the form in which we received them, the quality of the information provided about the adverse event/product problem is dependent on the quality of the information received from the veterinarian and/or pet owner.
- Adverse event report numbers should not be used to calculate incidence rates or measures of relative risk. It is not data from a controlled study, and there is no accurate way to know the true size of the population exposed to a product, nor the true population affected with an adverse event.
- Adverse event data should not be used to compare the safety of different products. Many factors can influence reporting, and products that are more widely distributed or sold in greater volume may have more reporting than those with limited distribution or sales. Products for which there has been recent publicity may experience more reporting for a period of time afterwards. Underreporting is also common with adverse event reporting systems.

<a href="#">EON-89431</a>	4/30/2012 20:45	Waggin Tails Chicken Jerky Treats	(b) (6) was given these treats on and off for several days. At midnight on (b) (6) she vomited a large amount. The day progressed and she grew more and more lethargic. By the time I brought her to the vet at 3:00 PM on (b) (6), she was so sick that she needed to be euthanized.	6	Years	Pinscher - Miniature	Dog	8	Pound
<a href="#">EON-89430</a>	4/30/2012 19:45	Nutro Natural Choice Lamb and Rice Small Bites	(b) (6) started with diarrhea early Monday morning (April 23) and threw up 6 times by mid afternoon. She did not seem to feel bad, so we let her stomach rest and she did not eat that day. She did not want her breakfast Tuesday morning (she had not eaten in over 36 hours) and still had diarrhea so I took her in to be checked. The only thing the vet could find was some unusual bacteria in her stool. We went home with meds and she still seemed to feel pretty good. I just fed her chicken and rice the rest of that day. Wed. morning she had half chicken/rice and half Neutro dry dog food. I was gone for most of the afternoon. When I got home, (b) (6) was very weak, could hardly walk, and was drooling excessively...laying in a puddle. I had to carry her to the car and rushed to the animal hospital. The bacteria was gone, her temp was normal, her blood work was normal, but an X-ray showed that her stomach appeared very full. It was 6pm by then so they decided to wait and do exploratory surgery the next morning to check for a blockage in the intestine. I carried her back home and she became so lethargic during the evening that I was afraid that she would not make it through the night. Surgery Thursday morning showed that there were no blockages and we still had no idea what had made her so sick. The IV fluids seemed to help her feel better and I picked her up Friday, the 27th. I have been racking my brain to think of what could have possibly happened. Two separate people wondered if it could be her dog food. After the second person mentioned it Friday (27th) it started to make sense. The previous week, I had decided to change brands and bought a bag of Neutro lamb and rice on Wednesday the 18th. I had gradually been mixing it with her old food since the 19th or 20th. She did not eat much Saturday (21st) or Sunday (about half her usual amount). Monday is when she started to get sick. We had tried to offer her food Monday night, but she refused it. I googled Neutro dog food after getting her back home Friday and was shocked to read the the same exact thing has been happening to numerous other dogs. The accounts were identical to our experience. It was like I could have written most of them. Some dogs have died. I couldn't believe how many cases there are and the food is still being sold!	22	Months	Collie - Rough-haired	Dog	63	Pound

<a href="#">EON-89297</a>	4/30/2012 3:00	Waggin Train	My dog (b) (6) who was a Pomeranian which by the way is not listed above has been getting these Waggin Train treats for two years, she developed an intense thirst, unable to eat and vomiting and excessive urination, much like the problems I have been reading about on the internet. Her problems became so severe that I had to take her to the vets and she had to be Euthanized. My other female Pom (b) (6) has been showing the same signs and I have stopped giving her these treats but is still not recovered.	15	Years	Mixed (Dog)	Dog	12	Pound
<a href="#">EON-89296</a>	4/29/2012 14:45	Exer-Hides Rawhide Bones	(b) (6), our Border Collie, has a dog chew after every evening feeding. On Thurs. 4/26 she threw up her meal and dog chew fragments. This alarmed us as she has never vomited since we've owned her. On Fri. 4/27 the episode was repeated and I began to suspect that the Chinese-manufactured chews were contaminated. On Sat. evening 4/28 we fed her but withheld the chews. She had no adverse reaction, nor any since. Nor did she have a reaction to her morning feeding on the same days when she does not get a chew treat.  The product is: Exer-Hides Rawhide Bones 14-count pack sold by Walmart in (b) (6). We have kept the opened pack for analysis.	6	Years	Collie - Border	Dog	50	Pound

<a href="#">EON-89295</a>	4/29/2012 13:45	Pedigree with chopped beef meaty ground dinner	<p>I am concerned that there are two different quality levels for Pedigree dog food; one for ¿high-end¿ retail outlets, and a second, lower quality - to the point of contamination - for discount outlets such as Walmart.</p> <p>We have been purchasing Pedigree brand canned dog food from a grocery store for several years, and then switched to buying it from Walmart recently . After starting on the Walmart-purchased Pedigree, our dog became increasingly lethargic and disoriented. She slept far more than was her norm and became difficult to rouse, even for feeding, She had a difficult time getting up, walking in a straight line, and even finding her food dish. She became increasingly unresponsive to being called, as if she had gone deaf, and when being walked on a leash, would walk into walls, closed doors, etc., as if completely blind.</p> <p>Without suspecting the Pedigree dog food as the problem, we fed her some ham scraps instead of her normal Pedigree, and showed rapid improvement within hours of the change. She ate the ham scraps for two meals, and showed almost complete recovery within a day. We then resumed feeding her Pedigree, and she showed an equally rapid relapse into her lethargic, non-responsive and confused state. After two days back on Pedigree, we made the connection between the Pedigree and our dog¿s declining state, and switched her to another brand of dog food Again we noticed a rapid recovery within 24 hours and almost complete recovery after two days.</p>	14	Years	Spitz - American Eskimo Dog	Dog	31	Pound
<a href="#">EON-89294</a>	4/29/2012 13:00	Purina Dog Chow	<p>Last year, in June, within an hour of feeding my dog Purina Dog Chow she had multiple seizures and was rushed to the vet, this has happened on 3 more seperate occasions over the past year and I have finally discovered what I believe to be the cause of the seizures. Each time she had a seizure it was after feeding her the green bag of Purina Dog Chow that I had bought at Walmart as a result of the store (WalMart) being out of her usual dog food. Just this past Friday I purchased a small bag and fed her dinner that evening and breakfast the next morning and within 3-4 hours she was having another seizure. I am sure it was the Purina Dog Chow.</p>	4	Years	Retriever - Labrador	Dog	68	Pound

<a href="#">EON-89293</a>	4/29/2012 11:00	Natural Balance L.I.D. Duck & Potato Small Breed Bites	I had been feeding the 2 dogs that weigh 3.5 & 4.5 lbs., Natural Balance Duck & Potato Small Breed food for about 4 or 5 months with no incidents. I noticed the food changed color on the next to the last bag I purchased. I took this bag back and bought a smaller bag, which seemed to be ok. I noticed my dogs were starting to be fussy eaters. They didn't seem to have much energy and didn't enjoy playing as much like they used to. I almost finished this bag of food and went to purchase another bag and when I got it home I saw a complete difference in the coloration of the food, it was much darker than the previous bag. After eating from this bag once they would not eat it again. Both dogs had started having small, black, sticky stools and I knew there was something definitely wrong. I called the manufacturer because I wanted to make them aware I thought there was a problem. They gave me all kinds of reasons why the color changed and that the lot had been approved, not accepting there was a problem. I went to Consumeraffairs.com and saw many complaints on Natural Balance dog food, from recently. They all stated how it looked like the food had changed and their pets had the same symptoms as mine. I am taking my dogs to the vet tomorrow. The last bag I purchased has a lot number of NBWO303C1XC best buy date 22 MAY 2013.	1	Years	Terrier - Yorkshire	Dog	4	Pound
<a href="#">EON-89292</a>	4/29/2012 10:00	Milo's Kitchen Homestyle Chicken Jerky	Weakness, nausea, loss of appetite; Took to vet cost was over \$200 unable to detect issue thru blood and urine tests. Was given several medications. Was not aware of the issue with the Chicken Jerky because they were still on the grocer's shelves. Until today, the issues have begun again, and noted that the jerky was a product of china, so I did the research and found that there have been other related issues reported. This item needs to be removed from the grocer's shelves immediately...	7	Years	Shepherd Dog - German	Dog	134	Pound
<a href="#">EON-89278</a>	4/28/2012 22:45	Wagon Trail Chicken Jerky Tenders	(b) (6) was rushed to the emergency hospital with a temperature of 105, edema, polyarthritis and was in the hospital for three days, given antibiotics and fluids. He is presently home and attempting to recover. There were no health issues prior to this incident. The tests given by the vet did not show any significant levels of Lyme, Rocky Mountain SPotted Fever, or lupus. Cultures done showed no presence of bacteria. I gave Sam a couple of the CHinese Wagon Trail strips every day. Now he is fighting for his life. Please take these off the shelves. I do not wish for anyone or any pet to go through this type of pain.	6	Years	Retriever - Labrador	Dog	95	Pound
<a href="#">EON-89259</a>	4/28/2012 12:15	Waggin' Train Wholesome Chicken Jerky Tenders	(b) (6) began having diarrhea and uncontrollable, violent vomiting. He was hypersalivating and clearly in pain. I rushed him to the vet's office where he was diagnosed with acute pancreatitis. He was later transferred to an overnight facility where he was kept for treatment. Follow up tests confirm the initial diagnosis and other potential contributing factors were ruled out.	5	Years	Chihuahua	Dog	14	Pound

<a href="#">EON-89258</a>	4/28/2012 11:15	Waggin Train Chicken & Duck Jerky	I have a Siberian Husky, and for 2-3 years, I've been feeding him treats from the Waggin Train Line, specifically the Chicken and Duck Jerky treats. A few months ago, I noticed he wasn't well, leaking urine, etc. I took him to his Vet and after several tests, it came back that he had Chronic Kidney Disease/Failure. The vet said we can either 1. put him down or 2. control the disease. Since he has been apart of our family for many years and we love him like a child, and despite the huge medical bills we were going to face with we opted for option 2. (b) (6) (our dog's name) went through 2 days of Kidney Dialysis and was sent home on a strict diet of special pet food, supplements and drugs. It's cost us thousands of dollars since, but worth every penny if it meant saving his life. I didn't know about the damaging effect of these pet treats until a friend sent me a link about your investigation. If there is anything I can do to prevent this from happening to anyone else's beloved pet, I would like to help. Thank you. (b) (6)						
<a href="#">EON-89254</a>	4/27/2012 21:15	Waggin Train Jerky Tenders	We were feeding our dogs chicken jerky treats as they were supposedly all natural. Three of the dogs have died, two with confirmed kidney problems. I wish I had known these treats were a problem.	5	Years	Beagle	Dog	35	Pound
<a href="#">EON-89252</a>	4/27/2012 21:00	savory Prime Chicken Chip - a - roos	Dog presented with sporadic, moderate diarrhea.	18	Months	Treeing Feist	Dog	28	Pound
<a href="#">EON-89251</a>	4/27/2012 20:45	Savory Prime Chicken Chip - a - roos	Dog had severe sudden onset illness. She was normal at 7:00 AM. At 4:00 PM she was critical. She initially presented with severe diarrhea, vomiting, lethargy, blood clotting issues and shock. She was immediately taken to local veterinarian. Ultra sound, xray, blood tests were inconclusive. She had major organ system involvement. She was stabilized after approximately 2 hours and sent to an Emergency Vet. Hospital and was cared for by an internal Medicine Specialist. She spent 2 nights admitted to Vet. Hospital where she steadily improved. Unfortunately, the diagnosis was unknown. However, there was a strong suspicion of some type of poisoning. All the normal agents seen in accidental poisonings, such as rodenticide, household cleaners, antifreeze etc. were ruled out by staff at Vet. clinic. After being released from the hospital, the dog was slowly put back on a normal diet. Although there was not a repeat of this severe illness, she and another dog in the household, did have periods of intermittent diarrhea and vomiting. During this entire time, the dog was sporadically fed the treats in question. Finally, the dog was taken off all commercial food and every 2 weeks a new food type was added. The dog has been normal for one month since the chicken treats have been eliminated from the dog's diet.	2	Years	Treeing Feist	Dog	30	Pound
<a href="#">EON-89242</a>	4/27/2012 18:45	Wagon Train Chicken Jerky	Mr reports lethargy and decrease appetite. Bloodwork revealed severe anemia	9	Years	Terrier - Boston	Dog	26	

Key	Created	Product Name	Description	Age	Age UOM	Breed	Species	Weight	Weight UOM
<a href="#">EON-89229</a>	4/27/2012 16:00	Waggin Train Wholesome Chicken Jerky Tenders	we fed her chicken jerky by Waggin Train. She became very thirsty, lethargic and urinated a lot more than usual. She was eating less as well. Unfortunately, she also swallowed a ball, and it got stuck in her stomach. She vomited for 2 days and we took her to the vet who then did an xray - which is how we discovered the ball and also blood tests. The blood tests showed her liver, pancreas, and kidneys to all be failing. She then had surgery to remove the ball and her pancreas is healing. Right now the creatonin is still high and we are treating her blood glucose which is also high. this dog has never been sick. She swims 45 minutes every day with me. She is friendly, outgoing and helathy. Now she is tired and slow. She is slowly getting better, but we are not sure oif her kidneys will ever get completely better. We have her on fluids, at first we did it intraveinously, and now we do it with a needle through the skin once a day. She take 1/2 bag of fluids every day. We hope and pray she can get through this. Our vet told us it is a miracle that she is alive today as bad as her system was when we took her in to them.	8	Years	Retriever - Chesapeake Bay	Dog	56	Pound
<a href="#">EON-89219</a>	4/27/2012 15:00	Exer-Hides munchy rawhide sticks	My husband found a large piece of metal in an Exer-Hide dog chew just as he was about to give it to my pet. It was purchased at Walmart on March 23, 2012. Walmart in (b) (6) pulled the brand they had on their shelves and processed a recall claim. In order to process the recall they insisted they needed the original item but I have photos and video. I spoke with someone representing Walmart today from a 3rd party claims company. 04/27/12. I am concerned for the animals if this isn't recalled soon! It may already be too late.						
<a href="#">EON-89186</a>	4/27/2012 11:00	Milo's Chicken Jerky Treats	diarrhea started Mon. night, slept a lot Tuesday, perked up yesterday, eating and drinking ok, just noticed the blood in stool today. no vomiting, unable to bring sample has not gone since made appt. this morning. Acting normal. No change in diet or treats. Does not feed table food and nothing could get into outside as in confined area outside per owner. Feeds Purina Dog Chow. Has been feeding Milo's Chicken Jerky Treats.	5	Years	Boxer (German Boxer)	Dog	66	Pound
<a href="#">EON-89180</a>	4/27/2012 3:00	Waggin Train Brand Country Ham, Beefeaters Brand Chicken Fillets	Patient developed acute onset vomiting, diarrhea and anorexia around Wednesday, April 18, 2012 and was presented to (b) (6) on Thursday, April 19, 2012. The housemate was presented just prior and diagnosed with pancreatitis. Both dogs had been fed Waggin Train Country Ham 28oz bag Lot#W1CA4752A while (b) (6) aslo ate Beefeaters Brand Chicken Fillets Lot# YAD0038/F132B1E3, both were not expired. (b) (6) has been hospitalized since and treated for pancreatitis, renal tubular acidosis, acute kidney failure, disseminated intravascular coagulopathy, aspiration pneumonia and possible acute lung injury.	8	Years	Mixed (Dog)	Dog	10	Kilogram
<a href="#">EON-89179</a>	4/26/2012 22:15	Blue Life Protection Formula Natural Chicken and Brown Rice Recipe Senior	My dog has had severe bloody diarrhea since eating this food. Feces has been tested twice and was negative. I gave her rice and chicken, which stopped her diarrhea, but it resumed after starting her back on the food product.	14	Years	Beagle	Dog	31	Pound

<a href="#">EON-89130</a>	4/26/2012 10:00	Dried Chicken treats waggin train and others	I can't believe what I am reading about Chicken jerky treats just today. 2 years ago,we have waggin train chicken jerky (and other brands) to our baby, (b)(6) every day in the afternoon. We could not figure out what was making him so sick. He had terrible diarrhea, all over the place, went to the vet, did all kinds of tests, changed all kinds of food, did everything known and spent alot of money-which is fine. NEVER did we think the Chicken jerky treats were the problem and we kept giving them to him. We thought it was just dehydrated chicken. It didn't stop. It is a miracle that it didn't kill him. One day, I thought maybe we should stop giving him the chicken jerky. He loved it too. We quit giving it to him and he has never had any of the symptoms again, the horrible diarrhea, increased urination and thirst. I read this today and couldn't believe it. All along it was the chicken jerky and now some dogs have died. People who love their dogs, have them and treat them as their babies and best friends. We don't want them to be sick or die. The FDA should be responsible for stopping bad food fo people and our animals. If it is from China or anywhere, ban it already. America needs to stop being cheap and buying anything from China. That is what has hurt our economy in the first place. Aot of dog food is not good for our dogs because of the byproducts they are allowed to be put in it, is just as awful. Help the animals already. Forget who is making the money and protect our babies. Someone needs to stand up. When (b)(6) had this problem, I researched dog food and could have a PhD in it by now. I even buy (b)(6) dog food from a company in New Zealand because of the purity. Some people may just buy Ole' roy dog food, but they should at least be informed by a rating system if it has unsavory items in the food. At least warn people, we can have a warning for music but not for the food we feed our animals. I think most people would rather pay more for their animals food. If they only knew what I now know, they would never feed their animals the products that the are using right now. It is terrible what can be in dog food, it isn't right and it needs to be regulated. I have a Sheltie that died in vain due to kidney failure because I didn't know the food I was feeding her was terrible for her. Please help all of us that love our cats and dogs. Thank God my baby didn't die.	3	Years	Lhasa Apso	Dog	19	Pound

<a href="#">EON-89113</a>	4/26/2012 9:15	Friskies Classic Pate "Mixed Grill"	I feed my cat 1/4 5.5oz can of pate style wet food, once daily @6:00 PM. 5 days ago I opened this particular can, prepared his quarter portion and served in his cleaned fish bowl. He anxiously approached the bowl, hesitated, then ate a small amount, then became nauseous and vomited. He returned later to see if there was any change, he shook his head and left the room without finishing his food. He refused to eat the consecutive portions in days following, at which time I looked closely into the container; there was a whitish slime developing within on the remaining quarter. I disposed of the remaining contents. I opened a different can and he ate anxiously and kept it down with a cat smile. This has reoccurred many times in past year with varying results. I've found that similar results occur when using many of their Pates occasionally. UPC# 050000421541 "Mixed Grill"; "Best by: Dec 2013"; (stamped "13541157 L63852137"). He will only eat their Pate Style meals. If he sniffs, shakes his head and leaves the bowl I know it's bad product. He usually gives me a 'can't you smell that nasty crap' look . Occasionally I do smell something bad upon opening a can, but then I have a fish & seafood allergy with which I become bilious.	24	Months	Domestic Shorthair	Cat	10	Pound
<a href="#">EON-89104</a>	4/26/2012 3:00	Waggin Train Wholesome Big Blasts	After giving my dogs the treats both dogs developed diarrhea. The day before I had purchased the treats, a fecal exam was perfumed as part of their annual check up and results came back as healthy stools. Not suspecting the dog treats immediately I gave them again, for four days. Once I noticed the correlation, I stopped giving the treats. My older dog, (b) (6) does not go to the dog park or have any other issues but since is now on his second set of medicines in an attempt to stop his chronic diarrhea. Metronitizol usually fixes his stomach issue and that made no difference. He's on an anti-diarrhea medicine to circumvent the uncontrollable liquid feces. Hopefully the current round of medicines works.	10	Years	Weimaraner	Dog	68	Pound
<a href="#">EON-89103</a>	4/25/2012 22:45	Waggin' Train Jerky Tenders - Chicken Dog Treats	After giving approximately 2 bags over the course of 2 months my dogs became lethargic and one lost weight (boxer lost 10 pounds). They both had diarrhea, vomiting, lack of appetite, gas, and abnormal amounts of drool. Their stomachs made horrible gargling noises and they were in obvious pain.	7	Years	Boxer (German Boxer)	Dog	66	Pound
<a href="#">EON-89102</a>	4/25/2012 22:45	Science Diet Feline z/d Prescription	Diarrhea, refused to eat canned food. I am unable to upload photos of the product because I'm using an iPad. The first can of food looked fine but the second can looks like a fungus or mushroom is attached to about a third of the surface. It is totally disgusting. If you email me I can send you a photo of that open can of cat food.as well as the product code from the bottom of the can. All of the product was returned to the Scaredy Cat Clinic where it was purchased.	10	Years	Abyssinian cat	Cat	8	Pound
<a href="#">EON-89101</a>	4/25/2012 21:45	Waggin Train Wholesome Chicken Jerky Tenders - Low Fat	(b) (6) and (b) (6) 6 yr MN Bluetick Coonhound 74 pounds / healthy prior) ate an estimated 7/8 of a 40 oz bag of Waggin Train Wholesome Chicken Jerky Tenders-lowfat the morning of 4/20/2012 while the owner was away from the house. When the owner returned in 3 to 6 hours the pets were drinking large amounts of water. They presented to our hospital and had elevated BUN and creatinine levels (3 x higher than previous routine lab tests). They were treated with IV fluids for the next 3 days and the kidney values had returned to normal at that time (4/23/2012). They are scheduled for further testing on 4/26/2012.	9	Years	Mixed (Dog)	Dog	56	Pound

<a href="#">EON-89099</a>	4/25/2012 17:00	Waggin Train Cowboy Steaks	My dog has had problems with vomiting and diarrhea on and off for several months and it seems to be related to the waggin tales pet treats. I opened a new bag yesterday and she was up all night.	5	Years	Chihuahua	Dog	7	Pound
<a href="#">EON-89097</a>	4/25/2012 16:45	Waggin Train Wholesome Chicken Jerky Tenders	My dog was getting one Waggin Tails chicken jerky treat after her night walk until I used up the whole pound bag I had bought. That was from about mid Feb to mid March. She started drinking a lot more and peeing a lot more with accidents in the house beginning after she started having the treats. It seemed she got better when I ran out of treats. Then I bought some when my check came the beginning of April. I had only fed her a couple when she became very lethargic and had trouble breathing. My daughter told me she had just heard that the treats I was giving her caused these symptoms, so I stopped giving them to her and took her to the vet. She did not improve with treatment and on (b) (6) I took her back to the vet thinking she had to be put down. He gave her medication and sent her home with me to see if she could try and improve. She died that afternoon.	11	Years	Shepherd Dog - Australian	Dog	35	Pound
<a href="#">EON-89027</a>	4/24/2012 16:00	Waggin' Train Wholesome Chicken Jerky Tenders	(b) (6) woke up Sunday, vomiting clear liquid. As the day progressed she continued to vomit and refused food. By the evening the fluid turned a bright yellow. There had been not change in diet. Her favorite treats are "Waggin Train Chicken jerky treats. She was given one treat per day as recommended on the product label. On Sunday night I called the emergency vet in our area who did not seemed overly concerned since was still active and consuming water. By Monday the condition had not improved so I scheduled an appointment with her regular vet. She was given a full blood panel, physical and x-rays. There were no blockages and her abdominal exam was normal. We are still waiting on the results of the blood testing. (b) (6) was given fluids and 2 anti-nausea medications and sent home with a special diet and more anti-nausea medication. It was the vet who alerted me to the concerns with chicken jerky treats. It is a little suspicious since I had just opened a new bag purchased at Sam's Club with only 2 servings used.	2	Years	Chihuahua	Dog	11	Pound
<a href="#">EON-89019</a>	4/24/2012 14:15	Waggin' Train Wholesome Western Grill Assorted Dog Treats	(b) (6) ate 8 treats. I took him to the vet the next day and he was diagnosed with trouble breathing, and water on the lungs, and the vet prescribed him Aminophylline 200mg. (1/2 tablet twice daily) as well as Lasix 12.5mg (1 tablet twice daily). I was unaware of any warnings about the chicken treats and continued to feed them to him. He continues to see the vet on a regular basis, and his medications are Lasix 12.5mg (1 tablet twice daily), Aminophylline 100mg (1/2 tablet twice daily), Enalapril 5mg (1 tablet daily). As of April 18, 2012 I am no longer allowing him to eat the chicken treats. My other dog wouldn't eat them at all.	10	Years	Dachshund - Standard Smooth-haired	Dog	25	Pound

<a href="#">EON-89018</a>	4/24/2012 13:45	waggin train chicken strips?	(b) (6) had the waggin trail dog treats chicken strips two days before i noticed diarrhea. She does not usually have these treats. She had diarrhea in the morning. when i arrived home from work i found diarrhea mixed with quite a bit of blood on the kitchen floor. i called my vet (b) (6) at (b) (6) I was told to bring the dog right in. she was diagnosed with a bacterial infection which the dr felt was from the treats. She was given an anitbiotic shot and sent home on two meds. she is a senior dog and this was very upsetting because she has always been in good health and is treated like a member of the family. I was not aware of the warnings about this dog treat. I do limit the type of treats she gets and check for made in usa. I feel this company should recall these treats. If (b) (6) had been a smaller dog or in poor health the out come may have been worse. So far the vet bill has been \$230.	12	Years	Mixed (Dog)	Dog	75	Pound

<a href="#">EON-89003</a>	4/23/2012 20:45	Smokehouse Brand Pizzle Stix. 6 pack medium	I fed one, 3 inch Pizzle stick to each dog from a new package made by Smokehouse on Saturday, April 14th. 24 hours later both dogs became ill, with diarrhea and vomiting. Isabel symtoms were much worst. I took (b) (6) to the vet and upon returning home, within 10 minutes she had blood in her diarrhea and I took her to the emergency. Both dogs had to have fluids, anti-nausea shots and pills and antibioe negative. They are indoor dogs on a controlled diet and my vet and I are convinced that the pizzle sticks are the cause. I believed that my one dog was going to die, she was that sick. Please get this recalled! I make a point to by made in the USA so this should not have happened. My vet diagnosed them with food poisoning.	8	Years	Terrier - Toy Fox	Dog	17	Pound
<a href="#">EON-89001</a>	4/23/2012 19:00	Purina Friskies Party Mix Cheezy Craze Chrunch Cat Treats	All three cats vomited about 30 minutes after consuming the Friskies Party Mix treats. The oldest cat, (b) (6) continued to projectile vomit the next two days and refused to eat. My husband and I took her to the vet. The vet thought the cat might have been posioned. (b) (6) is our inside cat so this made little sense. The vet gave fluid under the skin, antibiotic shot and pain medicine. She also gave us special food to give to (b) (6) and sent us home with more IV fluids for the cat. The price was over 100 dollars at the vet and I could have lost my favorite cat. (b) (6) did not consume anything else but her regular dry food and the Friskies party mix treats. I know of no other reason why she have been so sick. All 3 cats seem to be fine now. But we don't know if there was damage done to the cats organs.	12	Years	Mixed (Cat)	Cat	9	Pound

<a href="#">EON-88854</a>	4/22/2012 12:15	Waggin Train Wholesome Jerky Tenders Chicken Dog Treats	Upon giving the dog the chicken treats, two at a time, the first evening she started behaving differently. She was lethargic and didn't move much. The following evening I gave her two more, and I noticed the next day, she had zero bowel movements. She was drinking more, and again was lethargic. I remember placing the treats in the refrigerator, because I was short on shelf space. I forgot about the treats for a few nights, and upon giving her two more three days later, her behavior changed once again. She began eating grass, not eating, and not making any bowel movements. I failed to correlate the "Waggin train" jerky tenders with her symptoms. The next evening I gave her two more. The following morning she laid in the grass and would not move; she ate the grass, was extremely lethargic, and her energy levels had diminished. Today, I found, on cnn.com, indications that owners were having problems with tainted products. I checked in my refrigerator, and there it was - the exact same package, manufacturer, product name and "Made in China," label. I have not changed my dog's diet, and thankfully the cats seems to not have consumed any pieces she might have left behind. This Waggin Treats Chicken Dog Treats bag is labeled as a 24 ounce bag, and presently contains more than 90% of the original packaged product. It is sitting in my refrigerator, and will remain closed. My dog is currently resting on a chair next to the window, and will be brought to the Veterinarian on Monday. She is not showing signs of renal failure, but her glucose levels are way-off. Based on the veterinarian journals, textbooks and websites, she is stable, and will not be consuming any more of this product.	3	Years	Collie - Border	Dog	33	Pound
<a href="#">EON-88853</a>	4/21/2012 22:15	Waggin Train Wholesome Chicken Jerky Tenders	Severe vomiting and diarrhea this morning...took the dog to the vet. Vet asked if anything had changed in her diet in the past day or so...the only change was that our groomer gave (b) (6) Waggin Train chicken jerky treats the day prior. After multiple tests...and \$500 later...we contacted the groomer and had her send us a picture of the treat package. We then went on line to research if anything was posted regarding concerns with this particular product. Came to realize there is a lot of concern regarding chicken jerky dog treats from China...of which Waggin Train is one of the three leading brands. We have a follow up in the morning with the vet.	5	Years	Other Canine/dog	Dog	13	Pound

<a href="#">EON-88850</a>	4/21/2012 20:45	Waggin Train Jerky Tenders chicken dog treats	Given a partial Wagon Train Chicken Tender @ approx. 2am on 04/21/2012. At 5:30am puppy began crying to go outside to go to the bathroom - had a soft BM. At approx. 8:30am the puppy started having lethargy, vomiting and loose stools. By 10:45am he vomited four to five time and had a liquid, bloody stool. He was taken to the vet and tested negative for parvo virus. He is still lethargic and under obsrvation at home. After checking online I found the recall regarding the Wagon Train Chicken Tender treats, and I am concerned because his symptoms are consistent with the online reports. I do still have the treats and will keep them in case they need testing.	4	Months	American Pit Bull Terrier	Dog	31	Pound
<a href="#">EON-88849</a>	4/21/2012 20:45	Waggin' Train Apple and Chicken Wraps, Waggin' Train Cowboy Steaks	On Monday 4-16-2012 I purchased Waggin Train Apple and Chicken wraps and Cowboy Steaks at Target. That evening my dog was given each treat. On Tuesday he was given more of each treat. Tuesday evening he had violent vomiting several times in the house which he rarely does. Wednesday morning there were more piles of vomit from over night. I have never purchased this brand of treats before, so I stopped giving them to him in case they were upsetting his stomach. I also noticed that he drinks a lot more water that usual.	8	Years	Beagle	Dog	52	Pound
<a href="#">EON-88848</a>	4/21/2012 20:45	Kibbles 'N Bits Original Dog food	After feeding my dogs Kibbles 'N Bits Original Dry Dog Food, 40 lb for a number of years, (b) (6) (and one other dog) started having seizures. I had numerous tests done trying to diagnose the problem but to no avail. Then, after talking to a veterinary dietician, it was suggested that a poor quality dog food could cause such problems in dogs. I stopped feeding my dogs the Kibbles 'N Bits and replaced it with a higher quality dog food. Immediately, the seizures stopped in both dogs and never returned.  Since my six dogs are all house dogs, and since two of my six dogs began experiencing seizures while on the Kibbles 'N Bits diet, I am one hundred percent convinced that the poor nutritional quality of this dog food was the cause of the seizures.	5	Years	Spaniel - Cocker American	Dog	32	Pound
<a href="#">EON-88847</a>	4/21/2012 20:45	Waggin trail chicken jerky and Canyon Creek chicken jerky	(b)(6) became sick vomiting bloody diarrhea, would not eat drink became lethargic, this all started early morning by 11 am I took her in to vet where they immediately put an IV n as she was dehydrated, she spent the day there and I picked her up at 700 pm she had to wear a diaper for 2 days as she continued to have blood squirting from rectum. She was given high does of antibiotics and worming meds and 2 days of holding her in my arms. We were unsure of the cause until I realized I had given her new treats I had never given her before. they were Canyon Creek AND waggin train chicken jerky that I had purchased from the (b)(6) Dollar store. <a href="#">EON-88503</a>	4/18/2012 11:30	Waggin Train Jerky Tenders	He consumed 1-1/2 (40oz) bags of the Waggin Train Chicken Jerky Tenders, over a 1 month period. He stopped eating his kibble. I tried several other soft kibble food to get him to eat something. Would eat very few other treats. Very lethargic, struggled to get him up when I get home. He drank less water. He always drank a lot of water. Had diarrhea several times over several days. I stopped feeding him the Jerky Tenders about 4 days ago. He has been more alert and active, as well as eating better. Purchased the Jerky Tenders at Sam's Club in (b) (6) on 3-12-12 & 4-4-12.	13	Years	Rottweiler	Dog	85	Pound
<a href="#">EON-88490</a>	4/18/2012 10:00	Milos Kitchen Chicken Jerky Treats	Was giving Milos Chicken Jerky treats from Publix.(b) (6) stopped eating completely not even mcdonalds or wendys food, just wouldn't eat, urinating excessively, vomiting. Took her to vet and had spaded thinking that would help, had run out of treats, started slowly getting better. Bought more treats and gave treats again, dog stopped eating again, urinating excessively again, vomiting again. Finally got it, quit the treats, she started eating again in 3 days. Still urinating a lot, been 2 weeks, but not more vomiting and is eating like normal, playing, being happy. I think she may have been permanently harmed, but at least she is eating again.  I will never give her treats again from CHINA! She almost died, and I hope she is out of trouble.	18	Months	Havanese	Dog	12

<a href="#">EON-88460</a>	4/17/2012 21:15	Waggin Train Chicken jerky Tenders	Fed Waggin Train Chicken jerky from a new bag on Wednesday. On thursday (b)(6) has some shaking and was not eating. He was drinking alot of water all day. During the night on Thursday 2 of the dogs became ill and I woke to vomiting. The younger male, (b)(6) continued to vomit all day. (b)(6), the 4 yr old female stopped by afternoon (b)(6) was taken to the vet Sat AM because he was very unwell. Xray showed he had not ingested a forgein body. Blood was drawn and sent to the lab. The vet kept him for a few hours. He was given in injected and sent home with meds to stop the vomiting which worked. he was able to keep a small amount of water down every 15 minutes. He didn't eat, didn't move but wanted to lay on the cold tile floor and would walk back to it every time I moved him. In the morning the vet called with test results. She said I had to bring him in, he was critical. His kidneys, liver and pancreas will shutting down. I elected to take him to our old vet that had an overnight attendant since he was to be kept overnight. The vet said he was very critical and not to expect a good outcome. Before I was able to reach my house after leaving him there, he had died. THIS IS A SECOND REPORT BECAUSE NO ONE HAS BEEN ABLE TO LOCATE THE FIRST ONE	2	Years	Lhasa Apso	Dog	33	Pound

<a href="#">EON-88366</a>	4/17/2012 11:45	Canyon Creek Ranch Natural Duck tenders	<p>(b)(6) had a laceration on her leg. When I took her in for stitches a urinalysis was done &amp; the results came back with elevated creatinine level. Several months later, I took her back and the level was still elevated, but even higher.</p> <p>I had (b)(6) tested during a checkup and her creatinine level was also elevated.</p> <p>With both girls having elevated creatinine levels, I I evaluated their diet &amp; stopped giving the jerky treats. I had been giving them a jerky treat every night &amp; also used them for training &amp; while showing them. Since I've stopped giving the treats, (b)(6) level is now back to the 'high normal' range and (b)(6) is still elevated but not as high as before.</p>	3	Years	Shepherd (unspecified)	Dog	95	Pound
<a href="#">EON-88361</a>	4/17/2012 11:15	Waggin Train Chicken Jerky, Kingdom Pets Chicken Jerky	<p>(b)(6) had a seizure on 10/29/11. My husband was with her at the time and thought she was dying. I came home and my husband told me what happened. I am very experienced with canine diabetes (b)(6) ' littermate (b)(6) had diabetes and I took care of her for 7 years) so I suspected low blood sugar since my husband forgot to feed her that morning. I feed her right away and then measured her blood sugar using a OneTouch Ultra Mini device. It came back 60 mg/dL. I knew this was much to low so I continued to feed her. I watched her closely over the next 2 days and she seemed to be recovered. I was surprised because (b)(6) had been very healthy her whole life. I suspected she was developing diabetes in her older years but I tested her blood periodically after that and it was in normal range, sometimes on the low end of normal. I just figured that as people/dogs get older they have to be more careful about eating at regular intervals. In the months that followed I did notice increased thirst, unexplained weight loss and infrequent vomiting(bile). Again I attribute this to her having an empty stomach or her older age. Feeding her more frequently seemed to help. I did take her to the Vet for what appeared to be arthritis as she was having trouble walking. Her blood work came back in normal range (March 2012) and her xrays showed spondylosis of spine. Between her back problems and other symptoms that were obviously causing her to suffer, we had her euthanized on (b)(6). Anyway, it may just be that she was having symptoms of old age, but in hindsight I find it hard to accept that prior to 10/29/11 she was in excellent health and then just out of the blue had a seizure. Both my dogs ate chicken jerky sold at Costco (current brand they sell is Kingdom Pets). Of course my pet (b)(6) had diabetes so I never suspected anything other than that. (b)(6) died in Nov 2010. On occasion I would run out of jerky treats from costco and would pick up a smaller sized bag from a store closer to me, until I could get to Costco again. The other brand they occasionally ate was Waggin' Train Chicken Jerky.</p>	14	Years	Dalmatian	Dog	45	Pound

<a href="#">EON-88318</a>	4/16/2012 18:45	Kingdom Pets Duck Jerky	House sitting for a month while parents while on a cruise. They had bought a large bag of jerky treats from Costco before leaving to give to the dogs each day. My dog (b) (6), Yorkshire Terrier, and their dog (b) (6), Belgium Malinois, got a treat each day. Because of (b) (6) size I tore off a small piece, maybe an inch at most, from (b) (6) jerky strip. This was the first time I gave (b) (6) any type of jerky dog treat. I was very particular as to what he was allowed to eat. I figured since my parents had been given them to their new dog and no ill effects had occurred it would be alright. Within the first two weeks I noticed a change in (b) (6). He seemed very quiet but I figured it was just because we were not at home. He also had a few unexpected accidents (urine) which was very uncommon for him. Again, figured it was a different environment for him. Then after another few weeks more changes. More accidents began to happen and not much energy or barking and he started pacing. I was starting to wonder what was going on with him. It just didn't seem like (b) (6). I decided to leave as soon as my parents returned because on this day he was not barking at all, pacing and going in circles to the left only. I took him to the after returning home on the following Tuesday when he did not return to his normal self. The vet could not figure out what was wrong as it he seemed to have unusual symptoms that just did not fit together. They did blood & urine work ups as well as putting him under for x-rays and to check his ear for a foreign object. Still a mystery. I took him a few more times and then to the Pet ER after 4 month and going down hill faster. Still a mystery but both vets talked about neurological issues. The ER vet referred me to (b) (6) who I spoke with and made an appointment. Being a 3 hour drive and the appointment for April 2nd but being over a week away I ended up canceling the appointment as he was really bad and there was no point now. I had to euthanize him on (b) (6) since he had no quality of life and was suffering so badly.	5	Years	Terrier - Yorkshire	Dog	3	Pound
<a href="#">EON-88311</a>	4/16/2012 17:15	Blue Superior Food Natural Chicken and Brown Rice	I started the dog on the Blue Buffalo food on (b) (6). <a href="#">EON-88168</a>	4/16/2012 9:45	Freebirds Chicken Apple Wedges	<p>I purchased a bag of Freebirds Chicken and Apple Wedges from Costco in early April 2012. The package lists the ingredients as just chicken and apple, states that the product is free of all additives, hormones, melanmine, etc. I began feeding my dog 2 or 3 treats per day. After about 3 days, she began having blood in her urine and vomiting. I called the vet for an anitibiotic thinking she had a bladder infection.</p> <p>At this point, my children and I left for a week's vacation, and my husband did not feed her any of the apple chicken treats and all of the symptoms went away. She finished her antibiotic and we thought that was the end of the problem.</p> <p>I returned from my trip on Saturday, April 14, 2012. On Sunday at about 12 pm, I fed my dog three of the apple chicken treats. At 4 pm, she began panting heavily and pacing, and then vomited the treats. I took her outside and she now has blood in her urine again.</p>	12	Years	Retriever - Golden	Dog		
<a href="#">EON-88160</a>	4/15/2012 13:00	Milo's Kitchen	(b) (6) was eating a variety of canned and dry foods, I had not given much thought to her food. The one thing she consistently eaten from April until November was Milos Kitchen dried chicken jerky. I am certain of these dates because we brought a younger dog into our home in April. The younger dog stared obedience training and was given Milos kitchen sausage treats to motivate her to pay attention. A friend told me about the chicken jerky warning, I immediately discontinued feeding and discarded these treats. However my dog had begun declining in health during this time. She was becoming increasingly lethargic, and began vomiting in February. I took her to the vet when the vomiting began and was schocked to hear how much weight she had lost. The vet took blood tests and confirmed that her liver was failing. She had to be euthanized within 3 days of this discovery.	14	Years	Mixed (Dog)	Dog	50	Pound
<a href="#">EON-88159</a>	4/15/2012 10:00	Milo's Kitchen home-style dog treats Chicken Jerky	Dog was taken to vet on 3/7/12 and treated with antibiotics. A tick carried disease was suspected. In a few days the dog was much better. About two weeks into the antibiotic treatment (Doxycycline tablets) Milo dog treats were given to the dog. Dog was given "Milo's Kitchen home-style dog treats Chicken Jerky....Best if used by 05 18 13 ..... package #: 1328HV A. The dog became very ill, lethargic, vomiting and blood in urine. On 3/26/12, the dog was taken to the vet. The dog was treated with Carafate tablets, amoxicillin tablets, Famotidine tablets, a Prednisone injection and a special diet of CNM K-9 dog food was started. A link was not made to the Milo treats at that time. In a few days the dogs health improved. On 4/12/12, the dog was taken to the vet for a follow-up examination. The dog now appears to be back in good health. A potential link to the Milo treats was discussed at that time.	13		Mixed (Dog)	Dog	60

<a href="#">EON-87927</a>	4/11/2012 17:45	Waggin' Train Chicken Jerky Tenders	<p>I had been feeding the dog Waggin' Train Chicken Jerky Tenders as a treat. His regular food was Exceed, purchased from Sam's Club. The Waggin' Train treats were also purchased from Sam's Club. The dog was a trained protection dog and was an indoor dog, except for relieving himself. I maintained all required vaccinations for the dog from our local veterinary. I had been feeding the Waggin' Train treats to my dog for about a year.</p> <p>Around August 2011, the dog became semi-lethargic and seemed to be in pain in the kidney area. He did not eat much and only wanted to sleep. I took him into the veterinary's clinic and it was thought to be an infection. I was given antibiotics to give to the dog along with a pain suppressant. He responded well and within three days appeared to be normal. However, after the dosage of antibiotics ceased, he rapidly became ill and unable to control his bowel movements. His coat of hair was losing its luster and he could barely walk.</p> <p>I returned to the veterinary in September 2011. Within the one month time span from his August visit, he unexplainably developed a tumor that was nearly the size of a softball. The tumor was the direct cause of his rapid decline. There was no viable option except to put the dog down to relieve his pain and suffering.</p> <p>I attribute the illness and rapid development of the tumor to the tainted Waggin' Train treats, but I have no way of proving it.</p>	11	Years	Shepherd Dog - German	Dog	90	Pound

<a href="#">EON-87916</a>	4/11/2012 16:45	Canyon Creek Ranch - chicken tenders	We always bought our chicken strips at Costco but they did not carry that brand that we usually bought last fall and we bought the Canyon Creek Ranch ones instead. He had about 3 per week and we noticed changes in him in February but did not associate it with the strips. By early March he was drinking much more water and this was very noticeable to the point that we were concerned. On March 5th our dog became very lethargic, had diarrhea and definitely not himself and we took him to the vet - while we were there she noted that his gums and tongue went very pale and she panicked and ran some tests on him and we left him there all day. The next day we had to bring in a urine sample and he had an ultrasound. We took him home and the vet kept in touch with us. He was ordered prednisone and flagyl and a week later our little darling dog went anemic in an instant, lost control of his kidneys three times in less than 10 minutes and then his breathing became labored and he passed away in our arms. He was only 11 and healthy as a horse until early this year. We then heard from a friend who told us about the Canyon Creek Ranch strips and we are very concerned that our dog's health may have been a result of eating these strips so we are submitting a complaint regarding this product.	11	Years	Mixed (Dog)	Dog	20	Pound

<a href="#">EON-87869</a>	4/11/2012 10:15	Waggin Train Apple & Chicken Wraps	My dog became less alert, no energy, lethargic then woke up in the middle of the night and had urinated on his bed an extreme amount for his size. I took him to our vetrenarian as soon as they opened, they did blood work and said it showed signs of kidney failure. His kidney enzymes were elevated and there was trace blood in the urine. He has been with the vet for 3 days now and must stay 1 more day to have his kidneys totally flushed with IVs. Upon researching I found an FDA caution on Chicken Jerky products online and when checking his treats found some Wagon Trail treats made in China.	9	Years	Schnauzer - Miniature	Dog	30	Pound
<a href="#">EON-87866</a>	4/11/2012 3:00	Canyon Creek Ranch Brand Natural Chicken Tenders	(b) (6) started excessive and frequent pukings. The pukings were not associated with his eating nor any other specific activity or time of day. The puke was an extremely viscous clear mucus and not stomach bile or some other known internal bodily fluid.  The problem got progressively worse through December into the new year with the episodes of puking increasing to a regular 3-4 times per day with some days as many as 12 episodes in 24 hours.  Our basset hound was also affected, but in a different manner. At this same time he started experiencing severe bloating which our vet prescribed to food reactions and moved us to a prescription food. This food has had NO effect and this dog has eaten nothing but this food since.	9	Years	Newfoundland	Dog	130	Pound
<a href="#">EON-87865</a>	4/10/2012 23:00	DINGOS RAWHIDE TREATS WITH MEAT FILLING, Canyon Creek jerk chicken	My dog lost her apertite and started to vomitt after dinner. We were giving her DINGOS and Canyon Creek chicken strips made in China  I took her to the vet and went over what we were feeding. Stopped giving her the treats made in China and the vomitting went away  Since then we have given her only treats made in USA and she has not had a problem	6	Years	Retriever - Labrador	Dog	85	Pound

<a href="#">EON-87776</a>	4/9/2012 16:15	Milo's Kitchen Beef Jerky, Nilo's Kitchen Beef Sausage Slices, Kingdom Pets, Milo's Kitchen Chicken Meatballs	On March 1, 2012 (b) (6) began vomiting up most of the food she ate. After a few days we took her to the vet and she had blood tests done. There was no elevated white blood cell count, however, her liver enzymes were extremely elevated. We put her on a diet of mostly human baby food and a small amount of dry food. (We stopped giving her all dog treat products as soon as she became ill.) She continued to sporatically vomit for four weeks and after a few weeks her liver enzymes did decrease, but were still extremely high. An ultrasound showed no abnormalities in her liver. She continues on a very limited diet and hasn't vomited for over a week. We are waiting for the results of more recent blood work.	5		Terrier (unspecified)	Dog	15	
<a href="#">EON-87749</a>	4/9/2012 15:45	Milos Kitchen Chicken jerky treats	<p>I purchased Milos Kitchen chicken jerky strips at my local Walmart and Stater Bros as a treat for my (b) (6) ... These were the same jerky treats that I found out were made in China and should not have been on the shelves for consumers to purchase. I did some research on the internet regarding this treat and the news I read was horrifying. It seems that some animals that were given these treats became very ill shortly after eating them. The diagnosis that I got from my vet was Kidney disease and he couldn't explain why she was so sick...well I told him she had been given this as a treat. The vet said he heard about this but this was the first case ever brought to him with my suspicions of her becoming ill from these treats and he couldn't rule the possibility out that she may have become ill from them!</p> <p>The vet ran many tests and she was given a weeks course of IV to try and flush her kidneys and to stabilize her condition. We spent \$\$\$\$ for (b) (6) but we got the news from the vet that there is nothing more than could be done for her and the only option is to put her down.</p> <p>I am furious and heartbroken. There is a warning and recall, why are these treats still on store shelves? Do you have any idea how heartsick we are to have to watch our beloved (b) (6) die because of something we gave her as a treat..unknowingly poisoning our dog with this trash? I know it won't help my beloved (b) (6) but please do something so these treats are taken off the shelves.</p> <p>I don't want another dog lover to go through this pain and suffering.</p> <p>I feel we are entitled to some sort of compensation for this tragic series of events and the pain and suffering of our beloved (b) (6) and our family has had to endure for the past 2 weeks. It is horrific knowing that had you not purchased this trash and fed it to your dog they would still be healthy today. Nothing will bring her back to us. It sickens me...I am angry... some may feel that oh well this is just a dog but NO (b) (6) is our family and I resent anyone saying that.</p> <p>PLEASE take this off the shelves.....</p> <p>Regards (b) (6)</p>	6	Years	Beagle	Dog	35	Pound

<a href="#">EON-87616</a>	4/8/2012 12:45	Kingdom Pets All Natural Ingredients Chicken Jerky	(b) (6) was on a strict diet of Science Diet WD dry and wet food. We gave him 2 -3 chicken jerky treats a day that we purchased from Costco. On Thursday evening (March 29) (b) (6) was fine and went to bed following our normal routine. On Friday morning (March 30), (b) (6) acted very peculiar and we took him to the vet where he was diagnosed as severely dehydrated. They ran lots of blood tests and saw that his liver enzymes were very high and they also suspected a urinary tract infection. He was given fluids and antibiotics. We brought him home that evening where he would not eat or drink. He sought out dark spaces as if he were ready to die. We took him to the emergency clinic early Saturday morning where they did additional blood work and abdominal X-rays. They observed that his liver was extremely enlarged. They kept him overnight and he showed no improvement and continued to refuse to eat. We visited him on Sunday afternoon and he seemed to not even know us. We realized he was in significant pain just breathing as he grunt with each breath. After consulting with the vet it was determined that something catastrophic had happened internally and we made the decision to euthanize him.	9	Years	Terrier - Cairn	Dog	26	Pound

<a href="#">EON-87608</a>	4/7/2012 12:45	Kingdom Pets Chicken Jerky (Item 169728 next to UPC Code)	About a week after opening a new bag of Kingdom Pets Chicken Jerky treats and occasionally feeding to the dogs, both dogs became extremely anxious and even paranoid. Both panted heavily if in a car whereas previously they simply curled up and slept or looked out the window when in a car. After a week of use, one of them became paranoid within minutes after receiving a treat. He would slink around the house with tail down and wanted to hide in closets or under desks and tables. If he wasn't under something he would slink around looking at the ceiling like he was afraid it would fall on him. All this was completely abnormal behavior that we had never seen before. His symptoms would lessen after a few hours but then resurfaced within minutes of feeding even a small piece of the jerky. We're not certain but it seemed as if they drank more water when they were acting anxious. We finally concluded it might be the jerky and stopped feeding it. We have seen no evidence of anxiety or paranoid behavior since. Both dogs seem to be mostly back to normal after about a week on non-use.	2	Years	Terrier - Tibetan	Dog	25

<a href="#">EON-87605</a>	4/7/2012 3:00	Waggin' Train WHOLESOME CHICKEN JERKY TENDERS	These treats made my Pit bull (b) (6) so sick.. Pits are an extremely hearty breed but these treats brought him to his knees. I noticed within hours of feeding him these treats that he started having diarrhea I could not figure out at first what was causing it I thought he must have eaten something crazy but would not have thought it was his "treats" that were making him sick but I stopped feeding him the treats right away because I didn't know what it was that was making him sick so I made sure to only feed him his regular dog food mixed with rice to try and get him back to normal. It took about two days for him to get back to normal. Still not realizing it was the treats that had made him sick, we ran through a bunch of the tricks he does and I rewarded him with these Chicken Jerky treats within an hour he was vomiting and having diarrhea again at that point I knew it had to be the treats. I still have the bag, I was so pissed I almost threw them in the trash, but then I realized that I should get them tested and have them incase I need to be able to prove that it was the treats that were making him sick. I hope this helps and that whoever reads this does so before it is to late as it is now obvious to me that many dogs have died from eating these poisonous treats.	2	Years	Pit Bull	Dog	60	Pound

<a href="#">EON-87467</a>	4/5/2012 18:15	Waggin Trails Chicken Jerky Treats	<p>I gave 3-4 Waggin Trails Chicken Jerky treats to my dog fresh out of a new bag purchased from Walgreens. She became extremely ill, with symptoms of food poisoning, by the end of the day. She had extreme vomitting and diarrhea. Her symptoms were so severe she was put in the care of her veterinarian for a full week. I immediately suspected the chicken jerky treats and threw out the rest of the bag. She eventually recovered from the vomitting / diarrhea after a week, but her health rapidly declined in the next month. She was suddenly no longer able to control her bowel movements as well.</p> <p>This event happened in 2005, and I have been haunted ever since by the decision to put her to sleep. I recall that at the time I contacted the FDA and made a report, but do not have record of it. I am absolutely horrified to learn that this particular brand / treat is making headlines today for killing many other dogs. What is the pouint of reporting a problem if nothing is done about it?</p> <p>I am refiling my report so that you can understand that this product has been killing dogs for over five years now and still it is available in the stores. The company should be helds accountable.</p>	14	Years	Retriever - Labrador	Dog	64	Pound

<a href="#">EON-87319</a>	4/4/2012 22:00	Waggin Train Chicken Jerkey treats	Apx. October or November 2010 we began to give our dog (b) (6) Waggin Train Chicken Jerkey treats. A short time later he began to loose weight had vomiting and diarrhea and really not feeling well. I took him to our regular vet. He gave him steroids to make him want to eat and changed his diet to a high calorie diet. After blood work he was found to have renal failure. When he was not getting any better we took him to another vet in (b) (6) for treatment. We began home dialysis and after a couple months lost him to the disease. (b) (6) was very picky and when he liked these treats we made sure to have them for him. We never understood how such a happy healthy dog became so sick so quick and it baffled the vets also. I saw a report about these treats and it only made sense. The timeline of him starting to eat these treats to getting sick is all there. The sad part is that when he was so sick and getting dialysis we were giving him these treats as a good boy to the painful treatment he got twice a day. On (b) (6) he had a prolonged seizure and never really woke fully from it. I rushed him to the vet and had to euthanize him.	9	Years	Terrier - Yorkshire	Dog	6	Pound

<a href="#">EON-86912</a>	4/3/2012 17:45	Waggin Trail Jerky Tenders and Chicken Jerky	Have fed the dog Kirkland foods and treats form Costco for her whole life. She had been losing weight drinking water, urinating, started vomiting for about 4 weeks when she started to have no energy and not eating. Took her to the vet and ws told that her kidneys were about 10%. She died that night. Turns out the kirkland chicken tneders form China are suspected of many animal deaths.	7	Years	Retriever - Golden	Dog	55	Pound
<a href="#">EON-86909</a>	4/3/2012 15:45	Waggin Train Chicken Jerky Tenders Waggin' Train Duck Jerky Tenders	My dog has been eating Waggin train chicken and duck treats for about 2 years. I use these as treats when he is a good boy. I do not give him the whole chicken breast, it is broken in pieces so he averages about 1 piece a day. About a month ago (b) (6) started vomiting every couple of days once a day. Two weeks ago he started with diarrhea along with the vomiting. Last week he vomited and had diarrhea everyday for 3 days and the 3rd day he became lethargic, he was drinking excessively but would vomit after drinking, he would not eat for the 3 days either. I brought him to the vet who put him on medicated food. he would still not eat and the symptoms became worse. I brought him to another vet who x-rayed him, gave him an iv treatment as he was majorly dehydrated and gave him a shot of antibiotics. It has been four days since that treatment and he has finally drank some chicken broth and held it down. I had to force feed him water until today. I heard of the warning this week of the treats from China and think that you need to do more than a warning these must be recalled.	3	Years	Shih Tzu	Dog	12	Pound
<a href="#">EON-86903</a>	4/3/2012 14:45	Loving Pet Gourmet All Natural Premium Chicken Breast	Gave (b) (6) the jerky chicken strips & thought he might have got it caught in his throat as he developed a very harsh cough. Brought him to the vet, & they placed him on an antibiotic - Clavamox 375 mg q12h for 7 days. There was nothing caught in his throat.	8	Years	Collie - Border	Dog	65	Pound
<a href="#">EON-86837</a>	4/2/2012 20:45	Waggin Train Wholesome Chicken Jerky Tenders	We were feeding (b) (6) the Waggin Tails Chicken Jerky treats regularly (every day) 2-3 a day. She started urinating in the house and seemed to have a bladder infection. We took her to the doctor after several infections and finally changed doctors to have a kidney ultasound. We thought maybe she was having a reaction to the treats so we quit them at that time. The vet said she was in some sort of kidney failure where the kidneys were not producing enough proteins. He put her on a human pill and fish oil pills. He said she would have to be on them the rest of her life and she may not live as long. It could decrease her life span by a year or two. We are thankful we stopped giving her the treats before it was too late.	6	Years	Spaniel - Springer English	Dog	160	Pound

<a href="#">EON-86747</a>	4/2/2012 3:00	Waggin Train Chicken Jerky Treats	In February 2012 I purchased Waggin Train Chicken Jerky Treats for my lab. After eating a couple treats over the span of a few days, he became very ill, vomitting the treats. After identifying that the treats were causing his sickness I stopped giving them to him but he continued to vomit multiple times a day for 2 weeks. He also appeared to have kidney issues as he was incredibly thirsty and unable to control his bladder. The symptoms seemed to have gone away but after I recently learned of the treats being under FDA investigation he will receive a full check up from the vet.	4	Years	Retriever - Labrador	Dog	90	Pound
<a href="#">EON-86746</a>	4/2/2012 3:00	Nutro Natural Choice Lamb Meal and Rice Formula	On March 21 2012 I purchased a 30 pound bag of Nutro Natural Choice Lamb and Rice dog food and began feeding it to both of my dogs the next morning. On Sunday April 1st, (b) (6) threw up twice. Because my other dog, (b) (6) had been vomiting I stopped giving him the Nutro food and began feeding him chicken and rice to soothe his stomach. He has not thrown up since. As quickly as I could, I got the bag of food and returned it to Petsmart where I purchased and told them what was going on. I also was searching online to see if there had been a recall of this product or any Nutro product and came across the Consumer Affairs website and was absolutely appalled at what I was reading. Many people seemed to be going through the same thing with their dogs, by their own descriptions, and sadly it seems like a lot of dogs died because of the food, so it seems. I am so distraught about this and I am hoping that my dogs were not affected as those others pet owners dogs were. I hope that an investigation is launched because there is something in this food that is making a lot of dogs very sick.	1	Years	Mixed (Dog)	Dog	18	Pound

<a href="#">EON-86744</a>	4/1/2012 18:45	Waggin Train Yam Good Wholesome Chicken wrapped yams	Within 1 to 2 hours after eating one dog treat, he became ill, vomiting. Was lathargic the rest of the day.	8		Other Canine/dog	Dog	75	
<a href="#">EON-86743</a>	4/1/2012 15:45	Canyon Creek Ranch Brand Chicken Tenders	My dog, (b) (6) , vomited on March 27,2010. That morning he did not eat his dog food for breakfast, so I put it into the refrigerator to save for his dinner, which he still did not eat. That next morning, my other dog vomited also. He refused food also. I kept trying to figure out what was in common. They ate different crunchies but the same canned food and I also give them salmon oil for hairballs. That day was when I heard on Good Morning America about the Milo's chicken treats and Waggin' Train chicken treats. I knew we had bought those treats within the past 3 weeks. I had been giving them the chicken jerky ones and alternating with other beef treats for a week or two. But when I checked, the chicken ones were a company called Canyon Creek Ranch. However, upon looking closer at the package, I found out they are made by Waggin' Train and also in China. A light went off in my head: (b) (6) had about 3 or 4 days over the 3 week period where he refused to eat and was a little lethargic. I remember the last time when we gave him one of those treats he refused to eat his next 2 meals. I called the vet and they told me to discontinue feeding the treats and call for an appointment if either dog showed worsening symptoms. So far they have both been better and no other issues have arose. I have not had to actually make a vet appointment for either dog. I was also in our backyard and noticed the dogs had diarrhea also. Both dogs had been drinking water a little more excessively than normal and the other dog, (b) (6)l, the day of vomiting, needed to use the restroom more than often.	8	Years	Collie - Rough-haired	Dog	158	Pound

<a href="#">EON-86740</a>	4/1/2012 3:00	Waggin Train Wholesome Western Grill Assorted Dog Treats	About two months ago we purchased our first bag of "Waggin Train Wholesome Western Grill" dog treats. Although they were purchased at a Meijer store in (b) (6) this product is widely sold across Canada as well through Walmart, Costco, Petco dollar stores etc. They are all distributed from different areas but their point of origin and manufacture is China. We started noticing subtle changes and thought he had the flu. He was lethargic, vomiting, had difficulty climbing stairs, would walk like he was intoxicated and began having accidents urinating on the floor. Unknown what it was we cut off everything but his regular organic Canadian made food and started pushing fluids on him. It took about two weeks but he finally came back around. We thought he just went through a virus. When he began to feel better, when offered one of these treats to him but he turned his nose up to them and never ate one again. We went back to giving him carrots etc. He seems to be much improved now... onto our next dog.... (b) (6) which is who became extremely ill. Since (b) (6) was no longer eating them (b) (6) was getting the rest of the bag as a daily treat. Approx March 17th, 2012 we noticed that he was not drinking very much, was not eating well, began to vomit and sway his head like he was extremely dizzy. He was having lots of urination accidents so remembering what happened with (b) (6) I took him to the vet right away. Up admission he was hypothermic, had an elevated BUN, elevated creatinine, dehydrated and was in acute renal failure. The vet gave him a few liters of fluid boluses as well antibiotics and steroids I believe to restart his kidney function. He almost died. I have since come across hundreds and hundreds of complaints about these products online and the (b) (6) put out a warning not to feed these to pets. I think both sides of the border need to be made aware because dogs ARE CLEARLY DYING from these treats.	7	Months	Terrier - Jack Russell	Dog	10	Pound
<a href="#">EON-86739</a>	3/31/2012 22:45	Arm & Hammer Natural Double Duty Clumping Litter	(b) (6) had 3 kittens. I never had problems with this litter until she had the kittens and they were nursing. Over a few days, from using the litter box after the kittens suckled, a film developed over her nipples that completely covered them and the kittens were unable to get any milk. It took me a while to get the slime off of (b) (6) nipples as it is slippery and soapy and not easy to get off from the cat litter. Had I not noticed it, the kittens would have died from not being able to suckle any of her milk as the nipples became completely covered. I switched litter for the time being until the kittens are weaned. I have no problems with Tidy Cat clumping litter. The Arm & Hammer is fine as long as a cat is not nursing kittens.. once nursing, it can be fatal for the kittens due to no access to the milk. This litter needs to have a warning that is large put on it.	2	Years	Domestic Mediumhair	Cat	7	Pound
<a href="#">EON-86735</a>	3/31/2012 21:15	wagon train jerky tenders chicken dog treats	I feed both of my dogs wagon train chicken strip and wagon train sweet potato dog treats for the past several months. I began to notice severe weight loss and increased urination and water consumption over the last month. This week, after several days of vomiting once a day I took them both to the vet. The are both in renal failure and after reading about similar stories associated with these treats, I believe they are the most probable cause of my dogs sudden kidney failures.	13	Years	Other Canine/dog	Dog	6	Pound

<a href="#">EON-86734</a>	3/31/2012 17:45	Eukanuba Senior 7+ Maintenance	Fed dog Eukanuba Senior 7+ Maintenance kibble--because regular food was not in stock. (Every so often I switch from Iams to Eukanuba and have never had a problem before). Mon 19 Mar 12 gave small amt. Eukanuba with old food but accidentally gave new food full strength at pm feeding. Had diahrea next am 20 Mar 12, but otherwise attitude normal. Gave old food w/small amount of Eukanuba in next feeding. Stools firm again within a day or so. Fri am he puked and ate it (may have given Eukanuba full stregnth as it had been transferred into container). Sat am would not eat food mixed with Eukanuba. Sprinkled a bit of EFA oil on food. He ate and puked withing 15 minutes. Obviously not feeling well. Originally thought adverse reaction was do to feeding new food full strength but not sure. Also, it is possible that he ate someting he was not supposed to--looked like a small bit of bark in vomit but not sure.	12	Years	Unknown	Dog	72	Pound
<a href="#">EON-86733</a>	3/31/2012 15:45	Milo Chicken Jerky	I purchased the Milo Chicken Jerky on (b) (6) and through the night and the very next day on (b) (6) my dog was vomiting constantly, drinking water and vomiting it right back up, staggering and disoriented. The vet was closed so I took him to the vet (b) (6) and he asked me if he could have been poisoned and I told him "no" because he stays in the house and we have a fenced in back yard when he goes out. The vet did a blood test and gave me meds to stop him from vomiting. The vet called me later on that afternoon (b)(6) and told me that my dogs kidneys were shutting down and that I needed to think about putting him down if he did not get any better. (b) (6) my dog continued to be sick through the night and on (b) (6) my dog died at home. I was unaware of any recall of the Milo chicken jerky until I saw it posted on Facebook (b) (6) 2012!!! FOUR MONTHS LATER!!! I had fed him the Milo Chicken Jerkey that was bought on (b) (6) 2011. I want to be informed of any decisions, court decisions, law suits etc. made in this matter. I have paid out of pocket and gladly I might add, a lot of money to get my baby better. But the money is NOT my loss! He was a member of our family and this was un called for, it should NEVER have happened. He was a healthy YOUNG Rat Terrier with not health problems at all. He has been killed by the neglect of these manufacturers of POISON. I no longer have my baby, only a grave to remind me of what happened those 3 days in (b) (6) 2011. Please do what you can so that these dogs and their owners can receive justice that they deserve.	6	Years	Terrier - Rat	Dog	26	Pound
<a href="#">EON-86725</a>	3/30/2012 16:00	Milo's Kitchen Chicken Jerky - home-style dog treats	My friend took (b) (6) to his house over the weekend because I was out of town. When I came back, my friend told me that (b) (6) couldn't get enough of the "Milo's Kitchen Chicken Jerkys" so he brough me an extra container for her to have. The following day I noticed (b) (6) pooping and throwing up in the house which was very weird to me and immediately I was worried. The next day I started to find blood in her stool. I immediately suspected the new treats, since that was the only change which could have caused this problem. After a week she recovered.	5		Bichon Frise	Dog	7	Kilogram

<a href="#">EON-86705</a>	3/30/2012 13:00	Alpo, Most all dog foods contain "by products" this list could go on & on., Cesar, Pedigree	<p>A growing number of veterinarians state that the processed pet food (kibbles and canned food) is the main cause of illness and premature death in the modern dog and cat. The FDA will not allow by-products or 4D (dead, diseased, disabled, dying) animals to be sold into the human food chain because they know we would get many diseases from these already dead or dying animals and die ourselves. But they allow these animals to be sold to commercial pet food companies and used in pet food. An average size dog should live for 27 years - unless you don't feed them healthy food! The average life span of a mid-size dog in the USA is about 12.8 years. It's so sad and such a shame that our beloved pets are dying far too soon due to poor nutrition such as this.</p> <p>My question to you is what is going to be done about this? I plan to push this as well as several others until we get answers. I have also created a petition on this at the following address &amp; have collected several signatures...</p> <p><a href="http://www.change.org/petitions/fda-stop-the-fda-from-allowing-the-illegal-processing-of-dogpet-food">http://www.change.org/petitions/fda-stop-the-fda-from-allowing-the-illegal-processing-of-dogpet-food</a></p> <p>I just put my date of birth in the date the problem started because this has been going on well before I was born.</p>						
<a href="#">EON-86702</a>	3/30/2012 12:45	Milos Kitchen Chicken Jerky Treats	<p>(b) (6) consumed Milo's kitchen chicken treats the few days preceding illness.</p> <p>(b) (6) presented with lethargy, vomiting, diarrhea, excessive water intake, anorexia, lab results indicate elevated kidney &amp; liver values.</p>	9	Years	Sheepdog - Shetland	Dog	30	Pound
<a href="#">EON-86683</a>	3/30/2012 11:45	Doctors Foster and Smith Health Snax Dog Snacks Sweet Potatoes Fries	<p>about 6 weeks post surgery (b) (6) started to eat less and drink/pee =more. About 8 weeks post-op, she stopped eating completely (even her favorite treats) and was drinking and peeing much more than usual. She was getting lethargic and lost 3.5 pounds. We took her back to the vet who checked her thoroughly and he found low kidney BUN levels, normal blood sugar, but high glucose in her urine. Thinking it might have been bacterial, he put her on another round of antibiotics. After two weeks, she still was not eating much, still drinking/peeing a lot - on re-check still had high urine glucose, so diagnosis of Fanconi Disease was made</p> <p>On checking the FDA site, I found the warning about the Chinese Chicken jerky treats and Fanconi - I have been feeding my dog sweet potato treats from Fosters/Smith for 3-4 years, and when I checked the container I found they were made in China!</p> <p>My concern is that is not just chicken jerky made in China, but perhaps other treats made there that could be affecting the kidneys of our dog friends!!!</p>	5	Years	Spaniel - King Charles Cavalier	Dog	14	Pound
<a href="#">EON-86682</a>	3/30/2012 11:30	Milo's Kitchen home-style dog treats	<p>I bought the Milo's kitchen jerky treats the week of February 27th 2012. I gave them to (b)(6) once or twice a day starting February 28th. On the evening of March 1, she had a couple of episodes of vomiting. This continued on March 2nd with diarrhea. On March 3rd, she had to be taken to the animal hospital since she was still vomiting and began to have bloody diarrhea. She also defecated a large amount of bloody liquid. <a href="#">EON-86681</a>	3/30/2012 10:15	Wagon Train Turkey Jerkey	Started to have the runs, throwing up, not eating or drinking, took them both to the vet and test showed an increase levels for kidney and pancreas, After a week they had to be put down. They were both put down 2 weeks apart. After this all happened I saw a news report about a dog illness related to Chicken Jerky for Dogs, made in CHINA. We looked at our bag and it was the brand that we have been giving to our dogs. I looked it on line and found that the symptoms were the same as listed above. It also indicted that the FDA issued a warning but did not recall the items. There was not enough evidence to recall it. I am not sure why how many family pets must die, loved one must die before it is enough. Since then I have heard 2 other pets that have been put down for the same reasons. If the vets are aware, not asking about, and knowing then they are not reported and it may seem that there are not a lot of pets dying from this but in reality there are. The United States have standards that they must as here to for these products (I hope) but I know China doesn't. We need to RECALL the Item, and stop buying from a CHINA who has no standards. If this is happening to our loved ones think about what is happening to us.	14	Years	Terrier - Fox Smooth	Dog	19	Pound
<a href="#">EON-86674</a>	3/29/2012 23:45	Waggin Train Chicken Jerky	Our formally healthy 11 year old border collie was given these treats for approx 3 days before onset of symptoms which were the following: bloody diarrhea, bloody vomiting, and lethargy, drooling and slight elevated temperature. We took her to the animal hospital on 3/28/12 as she was becoming more ill by the minute. They immediately admitted her and started her on iv fluids and antibiotics. she was given an ultrasound today and it found abnormalities in the liver but no other organs. The doctor is assuming the worst at this point. We consented to having a liver biopsy done today and we are currently waiting on the results of this test. I had no idea why she had become so ill but a friend suggested the jerky treats and so we started researching and were astounded at the number of cases so similar to our pets that had also consumed the treats. I called back down to the animal hospital to let the Vet know of our findings and immediately filed a complaint with the manufacturer of the treats and they were very familiar with the issues but stated FDA couldn't find any issues as their website states as well. They took our information and then I decided I really needed to file a report with your agency. We are hopeful our pet will recover but she is still very ill and in the hospital accumulating thousands of dollars in vet bills.	11	Years	Collie - Border	Dog	72	Pound

<a href="#">EON-86671</a>	3/29/2012 20:45	Wagon Train Jerky Tenders	<p>My dog has always been healthy. I have given her the Wagon Train Chicken Jerky treats for around 1-2 years. Bought them at Sam's Club and Walmart. I have 2 dogs yet she was the only one that would eat these treats. On November 7, 2011 she began twitching and was unable to walk normally. This lasted about 10 mins. I went and spoke with the vets at a local animal hospital that afternoon and they said that according to the video I had taken of it, it appeared that she was having petite mal seizures. They said that if she had another one to bring her in and they would do blood tests. I did not observe another episode like this until the week before Thanksgiving. I called and was told that the visit would cost me around \$300 with blood tests and medicine. I was not able to afford that, so I began asking around for another vet that would allow me to pay the balance out. I was referred to (b) (6) at the (b) (6) Animal Hospital in (b) (6). I made an appointment for Nov. 26th. At the visit, the vet asked if (b) (6) had gotten into any poison that I knew of. I told her no. All my cleaners are pet safe and she is only outside when I am. Blood tests were done and they told me that quite a few of her levels were elevated. I am in the process of retrieving the test results from the office and will gladly send in a copy to you. The vet said that she was dehydrated and according to the test results going into kidney failure. She was also given fluids at the vet. She did not show any other signs until (b) (6) I woke up and she was having what appeared to be a grand mal seizure; total loss of muscle control and bows, unresponsive. I had to sit on the floor with her and lean her against me so that she would not ram her head into the walls. Being the only income in the house I had to leave and go to work. When I left she had stopped convulsing and was responsive, but did not want to get up and walk anywhere. I put her in the kitchen with towels and blankets lining the kitchen to minimize the amount of harm she could cause herself. When I got home she was lying in a contorted position on the floor still convulsing. I knew that the best thing for her would be to put her down. I called and found out that they wanted to charge me \$250 to have her euthanized because it was after 5 pm. I did not have that money. I called my mom and she was unable to help me out also. I had no choice but to sit on my couch, hold my dog while she continuously convulsed. She eventually bit her tongue and was bleeding all over my couch. Then she got to the point</p>	11	Years	Mixed (Dog)	Dog	9	Pound

			<p>eventually bit her tongue and was bleeding all over my couch. Then she got to the point where she began drowning in her own saliva. This was one of the most horrible things I have ever had to witness. Eventually, I could not mentally take watching her like this any longer. I laid her down in the crate and put a blanket over the crate. I took my other dog to bed with me. Around (b) (6) I got up to check on her and she had passed. I had go into work late on (b)(6) so that i could take her body to be disposed of.</p> <p>At the time, I felt like I had accept that her symptoms and death as being caused from an unknown illness. I do not have any children and my dogs are my kids. I knew that one day she would die, but not so suddenly and uncontrollably. I had to be medicated from the anxiety of this event and began experiencing chest pains from the stress of losing her. Over these last few months, I have slowly healed. Today a friend of mine posted on Facebook to not feed your dog the Wagon Train treats because they were causing Kidney failure. When I saw that post I felt sick to my stomach. It was the missing puzzle piece. I had given her these treats within the 3 months prior to her death.</p>						
<a href="#">EON-86640</a>	3/29/2012 16:45	Waggin Train Chicken Jerky	I recieved a bag of Waggin Train Chicken jerky in a 25 lb bag of Beneful Healthy Weight Dog food as a free sample. I gave 2 strips to my dog. Within a day, she began to vomit, became excessivley thirsty, and very lethargic with weak legs. I brought her to the vet, her sugar was 500 and her pancreas was inflamed, her kidney and liver tests showed elevations. She passed away despite aggressive supportive care.	7	Years	Retriever (unspecified)	Dog	96	Pound

<a href="#">EON-86569</a>	3/28/2012 21:00	Waggin Train I Yam What I Yam	<sup>(b) (6)</sup> was pregnant and due to deliver on March 28th. One week prior to this date my other irish setter <sup>(b) (6)</sup> became ill with vomiting & bloody diarrhea. I have filed a report on him as well. On March 27th <sup>(b) (6)</sup> wouldn't eat her evening meal and an hour later began vomiting. She then went into labor that night. She was progressing until about 2 am when she slowed way down. I took her outside at 5 am and she had explosive bloody water from her rectum. She continued to vomit all night approximately every 1-2 hours and continued until I took her into the vet at 8 am. When we got there she actually had blood coming from her rectum. We did a progesterone level and it was 1.5 - too low to maintain a viable pregnancy and told us that she should be in labor. But...she was exhausted and couldn't contract. We had to do an emergency c-section and found NO reason for her to not have whelped except for the fact that she had been ill for the 12-24 hours prior to this.	2	Years	Setter - Irish Red	Dog	61	Pound

<a href="#">EON-86463</a>	3/28/2012 4:00	Kingdom Pets	My dog had seizures when he was 5 and it never happened before. I took him to the vet and he was hospitalized for 4 days but the vet couldn't figure out what's going on. I took him to many vets but no one could dignose exactly what's going on. Then he got better but had seizures occasionally. Meanwhile, I kept on feeding him the chicken jerky made in China that I thought it's supposed to be the safest dog treat since it says no artificial colors or flavors, no by-products, and it's made from lean chicken beast. However, my dog vomitted many times last year when he had chicken jerky. After I stopped feeding him the chicken jerky, he didn't vomit anymore. I didn't know the news about the chicken jerky made in China until I saw it from PetMD. I was so shocked that I think not only my dog's vomit was directly related to the chicken jerky as I experimented, but also the seizures was related to the chicken jerky too. I feel so sorry that I kept on feeding my poor dog the terrible chicken jerky that made him suffer for years. I still have some leftover and the pack that I bought from Costco if you need me to send it to you.

<a href="#">EON-86462</a>	3/28/2012 3:00	OI Roy: Kibbles chunks and chews (savory beef and chicken flavors)	<p>I have a very healthy 8 year old german shorthair pointer. She spent many years in the Arizona desert, and though she has always had an unending bowl of food, she ate some really horrible things she found while exploring the desert. You all know how dogs are, if it smells horrible they want to sniff it, eat it, roll in it... she indulged too frequently.</p> <p>So my dog can handle some bad stuff. So, I was visiting my parents who had just bought a new bag of dog food (OI Roy). They have two dogs, and during my visit one of their dogs became very sick. They figured their 11 year old weimeraier was reacting to an allergy from the food, though this was unusual. They decided not to feed the new food to their dogs and were going to throw it away! Being a broke college student living on a budget I requested that I take the food for my dog. They were apprehensive, as they thought there might be something wrong with the food. I insisted, reminding them that my dog had encountered much worse things, and they agreed and gave me the food (instead of throwing away 50 lb of food) I began to feed my dog the food when I returned home. At first everything seemed fine, and I had no aprehesion to begin with, so it was no surprise to me. However, after about a week on the new food my dog (b) (6) began to act sick. Surprisingly each day she ate all her food, but she began puking a few times a day. For the first day or two I didn't respond, but when the condition persisted I became worried. I still didn't think it was the food, I didn't think that store bought food could rival some of the unhealthy things I'd seen her otherwise consume. After about four days of progressive puking I was becoming very concerned, and changed her food. Her condition deteriorated. Around day 6 of puking I recognized blood in her puke. Clearly red, undigested blood! This told me that her stomach was bleeding. I immediately put her on a holistic , home cooked diet. I was so concerned about her condition that I was fearing for her life, she was puking every few hours and there was fresh blood in it every time. She became so sick. After a few days on my home cooked, healthy, light diet (b) (6) began to recover. I know that it was the food that hurt her! It scares me that food bought at the local grocery nearly killed my dog. I can only assume that if I'd continued to feed her that food she would have gotten worse, and she didn't have much left anyhow. Scary!!! I love my dog like a child and I'm so glad I was able to figure out what was hurting her, but worried about the cause. I have saved the food and intend to have it tested. I will be contacting OI Roy today.</p>	8	Years	Other Canine/dog	Dog	60	Pound

			<p>lymphopenia/eosinopenia-partial stress leukogram, elevated ALT-hepatic damage, proteinuria-glomerular disease vs UTI, neck pain (mild)-infectious vs inflammatory vs spurious, and low grade heart murmur-flow vs CM. Unfortunately, the treatment was ineffective and she was diagnosed with kidney failure. There were no other options to help her to get better. She was lethargic and very sick so we had to stop the suffering and we decided to put her down. There was no cause to explain her sickness but she did not have any diseases from birth. The only correlation to explain her illness and clinical symptoms of severe kidney failure is from the Milo's Kitchen chicken jerky treats that are made in China, and the vet agreed with this conclusion.</p> <p>(b) (6)</p> <p></p> <p>This was a very emotionally disturbing situation that could have been prevented if the treats were no longer being sold in stores. We will always remember our loving and beautiful dog but she lived a life that was way too short due to a treat made in China that caused kidney failure and eventual death. This needs to be stopped immediately before other dogs are harmed. Please consider seriously researching this compliant to save other animals. If you need any other information, please contact us.</p>						
<a href="#">EON-86427</a>	3/27/2012 18:00	Waggin' Train Pork Skin and Liver Treats	<p>We fed our dog 3 rawhide/liver treats on Sunday afternoon. Within hours the dog started having diarrhea. Our dog was obviously uncomfortable and did not show any interest in food or water. This occurred hourly until we went to the vet the next day. The vet administered an IV and 1 bag of fluid to help restore the dog's health. She is still very lethargic today and the vet said that it would take a few days to recover and require a special diet.</p> <p>The only change in diet for this dog over a 3 month period was the addition of these rawhide treats.</p>	6	Months	Other Canine/dog	Dog	43	Pound

<a href="#">EON-86402</a>	3/27/2012 12:00	Waggin' Train Chik'n Biscuits	(b) (6) started having what I call seizures. He would become lethargic, he would throw up and then have a seizure. He would yelp in pain and then flop around on the floor like having a seizure, then he could not stand up on his own. After taking him to the veterinarian, they could find nothing wrong without doing expensive bloodwork. After talking about it, we discovered the only thing we had been doing different was feeding him new treats we had purchased at Target, called "Waggin' Train Chik'n Biscuits". After we discontinued feeding (b) (6) these treats, he started improving and the seizures stopped. After researching this product online, I found that numerous pet owners had dogs that became ill and/or died from eating these treats. I was appalled to find out that these treats had not been recalled and that they were still being sold. The manufacture's website even states that nothing is wrong with their product and they are still selling them. Here's what the website says: "The safety and efficacy of our products is our top priority, and our consumers can and should continue to feed Waggin' Train treats with total confidence." These treats are killing dogs and must contain Melamine, Diethylene glycol or some other poison from the research I have done. They should be recalled immediately and tested again for foreign chemicals before more dogs are injured or killed by this product.	7	Years	Dachshund (unspecified)	Dog	8	Pound
<a href="#">EON-86395</a>	3/27/2012 10:00	Waggin Trail Chicken Jerkey Treats	Spring & Summer of 2011 I started to treat my 3 dogs to Waggin Trail chicken jerky. They all loved them. My oldest dog who was 18 died this past summer; but I believe these treats was not the cause of his death. And my 9 year old Dachshund seems to be unaffected by these treats; however, he is on 3 different meds for his seizures. However, my 7 year old Shih Tzu who was 6 at the time I started giving them to him was in excellent health. I noticed in late fall of 2012 that he started drinking lots of water and had a decreased appetite. Of course I took him to my vet and they ran blood tests on him. The tests came back and his creatinine was extremely high. He was diagnosed with Kidney Failure on 12/4/2011. At first we were giving him fluids every day. Now it is every 3rd day. Kidney Failure of course isn't cureable. We are keeping him comfortable and he is eating & drinking as normal. (b) (6) was a healthy dog prior to eating these chicken jerky treats. I really feel they contributed to his Kidney Failure.	7	Years	Shih Tzu	Dog	18	Pound

<a href="#">EON-86382</a>	3/27/2012 3:00	Waggin Train Wholesome Big Blast	<p>Within a few days of consuming my dog became lethargic and her stool began becoming soft. She was drinking a lot more water and frequently urinating and pooping. Within a week of consuming her soft stools turned into diarrhea. Additionally, I noticed prior to going to bed, her body temperature appeared to elevate. The only thing that changed in her diet was the new treat I had given her, which I have since taken from her and stopped giving her.</p>	2	Minutes	Chihuahua	Dog	9	Pound
<a href="#">EON-86381</a>	3/26/2012 22:45	Waggin' Train Jerky Tenders	<p>(b) (6) was vomiting and had bloody diarrhea for 24 hours. I took him to the Vet and he was subsequently hospitalized for 2 days with severe dehydration.</p>	3	Years	Dachshund - Miniature	Dog	11	Pound
<a href="#">EON-86376</a>	3/26/2012 21:45	Canyon Creek Ranch Natural Chicken Tenders	<p>I recently have seen on the internet that Canyon Creek Ranch treats may be causing kidney problems and even death to dogs because of an unknown component in them. My dog has had an almost full bag of these treats. Last week (b) (6) started urinating blood. I took him to my vet and they did xrays and blood work. The test came back that he had crystals in his urine. So now my dog is on 2 medications and prescription dog food to help clear up these crystals.</p>	6	Years	Terrier - Fox (unspecified)	Dog	32	Pound
<a href="#">EON-86335</a>	3/26/2012 18:00	Various chicken jerky treats	<p>I am contacting to ask you if you have considered excessive taurine as a potential trigger for renal failure in dogs compromised or dead dogs after their consumption of the chicken jerky treats manufactured in China? I was the breeder of a pup that I placed in a home about ten years ago who got a hold of cat food, and ate a pretty significant quantity. At that time, I was a veterinary technology student at Wilson College. I told the owner to get the pup to a vet due to the potential of renal problems in relation to the high taurine levels he had consumed. The veterinarian DID find disturbing renal values upon exam-related blood work. The puppy recovered with proper care, and survived in good health until just last month when he succumbed to cancer.</p>

<a href="#">EON-86300</a>	3/26/2012 14:00	Wagon Train Chicken Jerky Dog Treats	My healthy 7 year old black lab mix dog became suddenly very ill in January, 2012. She was hospitalized Jan 24th, 26th & 27th, given blood tests, x-rays, IV antibiotics, fluids and pain meds. She was diagnosed with an undetermined intestinal illness/liver illness on Jan. 27th, 2012 that seemed to come out of no where. She continued to deteriorate and was finally put to sleep on (b) (6). My husband and I went over everything the dogs had eaten being as my black lab acted as though she had been poisoned even though our 10 year old yellow lab is fine. The ONLY difference was in treats. Our yellow lab wouldn't touch the Wagon Train Chicken Jerky treats, she turned her nose up at them and so our black lab was the only one that ate that entire package in January, right when she got very sick. I thought maybe she had eaten too many treats and would get better, she didn't, she got worse and I took her to the vet. Then today I heard about the possible tainted dog treats, AND THEY WERE THE EXACT BRAND THAT MY BLACK LAB ATE. THE WAGON TRAIN, CHICKEN JERKY TREATS, BOUGHT AT DOLLAR GENERAL STORE IN (b) (6) IN LATE DECEMBER, 2011-EARLY JANUARY, 2012. My husband and I KNOW that this is what happened to (b) (6), please do something about this. There are more dogs suffering out there, please recall these treats, please don't let any other dogs die like my (b) (6) had to.	7	Years	Retriever - Labrador	Dog	70	Pound
<a href="#">EON-86286</a>	3/26/2012 10:30	Canyon Creek Ranch Chicken Tenders	Developed severe diarrhea and vomiting. Stopped eating and drinking. <a href="#">EON-86280</a>	3/26/2012 5:30	No package label but from Best Bully Sticks . com (internet)	(miniature dachshund) ate chicken strips from Best Bully Sticks . com and had 3 days of diarrhea and now 1 day of vomiting. They were new and advertised as made in USA and were a special sale. They came in a clear plastic bag with no lettering. I looked on their website today and saw the clear bag chicken strips under made in USA products, but also the clear bag chicken strips were listed in a different category as well. They stated in the description that these chicken strips are made by their reputable partner company, but they are sourced from China. I sent them an e-mail about my dog getting sick and now I see that they have removed the photo and description from the made in USA section. The photo and description are still in the regular chicken strip category. I feel I was misled into believing that these chicken strips were made in the USA and not sourced from China, because if I knew they were from China I wouldn't have bought them. I will be taking my dog to the vet tomorrow.	5	Years	Dachshund - Miniature	Dog	17	Pound
<a href="#">EON-86279</a>	3/25/2012 17:45	waggin train jerky tenders	My dog was given chicken jery treats and started drinking excessive water. He started having accidents in the house, which has never happened and has had a decreased appetite. I immediately, on March 20th took him into the vet at did lab work. The results showed glucose in his urine.The blood tests showed low alkaline phosphotase and two differnt bacteria in his in urine. He was put on clavamox two times a day with no improvement. I waited six days, and made an appointment with an internal medicine diagnostician, and only then was I told about the chicken tender treats, and then I immediately took him off of them and made own treats. He has now begun eating, but is still drinking excessively and having accidents. I want this product off the shelves and will continue to pursue this issue until this goal is met!	4	Years	Terrier - Jack Russell	Dog	25	Pound
<a href="#">EON-86278</a>	3/25/2012 15:45	Nutro Max Large Breed Adult Natural Chicken Meal & Rice Recipe For Adult Dogs 50 lbs. & Over	Purchased Nutro Max Large Breed Adult Natural Chicken Meal & Rice Recipe on 3/24/2012 from the local Petco. <a href="#">EON-86275</a>	3/24/2012 17:15	Smart Puppy Proactive Health, Natural Chicken Fillets Waggin' Train Wholesome Chicken Jerky Tenders	After giving our dog the product he had all kinds of reactions reactions, but mostly vomiting and diarrhea. He stopped eating and his eyes were yellow from jaundice. He's been in the hospital on fluids and medications, but we don't know if he will survive. If so, he will still have to be on a special food and medications for the rest of his life due to the liver damage!	8	Years	Retriever - Labrador	Dog	45	Pound
<a href="#">EON-86274</a>	3/24/2012 16:00	Waggin Train Chicken Jerky Treats	We had been giving the dogs Waggin Train Chicken Jerky treats that we bought in a large bag from Sam's Club in (b) (6) for about 6 months. The treats were stored at room temperature in the bag and we would give 1-3 jerky strips to our dogs daily. The treats always looked like dried chicken and were in no way discolored or had an odor. (b) (6) was in normal health up to this point per prior vet appointments and routine urineanalysis. We would give our dogs cut carrots and Charlee Bears for treats as well as the chicken jerky. She was not taking any medication or supplements at the time. We scheduled (b) (6) for a teeth cleaning for April 26, 2011. Prior to the procedure the vet ran bloodwork and it came back that there was a problem with her kidneys. The vet described it as kidney insufficiency. Her creatine levels were 2.3 and BUN was 50. The level of protein in her urine was 3.7, where a normal level is less than .5. I had found an article about chicken jerky treats from China causing kidney failure and asked our vet about it. She suggested we immediately stop giving the chicken jerky. I threw the bag with the remaining treats away.	6	Years	Brittany	Dog	38	Pound

<a href="#">EON-86273</a>	3/24/2012 14:45	Milo's Kitchen home style dog treats chicken jerky	January 6, 2012 my dog collapsed outside in the morning after going out to go to the bathroom and could not move or respond to voice or touch. I carried him inside and laid him on the sofa on a blanket and covered him up because he was shaking or shivering, he could only move his eyes.Later in the day,he got up to walk and was unstable on his legs and stood for a very long time like he was in a trance.he then started to have diarrhea and vomiting, then a decreased appetite, we were having a hard time getting him to eat anything,for the diarrhea we tried to feed him sweet potatos, but the diahrrhea continued,he would eat Milos chicken jerky which we had been giving him in the past, March 2, 2012 he had another episode,he collapsed outside. I just recently came across the article of the tainted chicken jerky treats that we had been feeding him. He has lost a considerable amount of weight in the past 2 months, he drinks alot, but will only eat cooked burgers and cooked chicken tenders that we make for him, he will no longer eat his dry food.I no longer give him the milos jerky treats, but I believe the damage has already been done. He sleeps alot and eats alot less, and continues to lose weigt and has a hard time getting around.I just thought I would report it if it helps. I do have some of the pakages from the jerky still.						
<a href="#">EON-86270</a>	3/24/2012 12:45	Fancy Feast Elegant Medley Wild Salmon Florentine	3 days of vomiting and severe diarrhea followed ingestion of Fancy Feast Wild Salmon Florentine (Elegant Medley), Lot no. 1278116OL3FV22100. <a href="#">EON-86222</a>	3/22/2012 12:45	California Natural Lowfat Rice Lamb Small Bites dog food	I have 2 dogs. (b) (6) is 8 years old and (b) (6) is 3 years old. Both are spayed females in excellent health, current on veterinary health checks and vaccines. Both of my dogs have eaten California Natural Low Fat Lamb and Rice for several years without issue. I bought a 30# bag from Agrifeed Pet Supply in (b) (6) on Feb 21, 2012. This is where I normally buy my dog food. Unfortunately I did not keep the bag after emptying it into a sanitary air-tight storage container. The UPC is 751485393544. My older dog immediately began experiencing digestive issues. Discomfort in the abdomen, excessive gas, nausea and vomiting. I took her off the food for a few days and fed her a bland diet. She improved and became her normal healthy happy self again. I put her back on the dog food. Immediately she began to have issues again. My younger dog began to have the same symptoms. I stopped the food and fed a bland diet for a few days. I put both dogs back on the food and they immediately exhibited the same symptoms again. The younger dog began to refuse her food. She has never done this before. My older dog started to act lethargic. I stopped feeding them the food with the newer symptoms they exhibited. I called the pet food store and they reported to me that several people had called them with the same complaint. I called my vet and obtained medical advise/treatment for my dogs. I called Natura, the manufacturer of my dogs' food and they told me that they had no complaints other than mine. They advised that since I did not retain the lot number or the date the product was made that they could not do anything except send me a coupon for a replacement bag. My dogs are not outside ever by themselves. They do not eat treats or human food. They do occasionally eat grass from my fenced in yard. We do not use chemicals of any kind in our yard. We do not use harmful chemicals inside our home.	8	Years	Mixed (Dog)	Dog		
<a href="#">EON-86220</a>	3/22/2012 11:45	waggin trail chicken jerky	all of a sudden he began vomitting and having diareah with blood everywhere, took him to the emeregency clinic in (b) (6) , and they diagnosed him with high glucose, took him to his regular vet and we had to start him on insulin for high glucose of over 300 and now it is running in the 193 mark even with the glucose, he has had sugar in his urine each time i take him in every two weeks since the initial emergency run in january. He is also having siezure activity. he was eating 2 or 3 of the waggin trail chicken jerky a day for the last year or so.	8	Years	Poodle - Medium size	Dog	16	Pound
<a href="#">EON-86219</a>	3/22/2012 10:45	Royal Canan German Shepherd	As soon as we started feeding him from a newly purchased bag he got sick. Severe diarrhea. <a href="#">EON-86215</a>	3/22/2012 3:00	Waggin Train Chicken Jerkey Treats	(b) (6) is my parent's dog. He was fed Waggin Tails chicken jerkey and in 2011 became ill with the symptoms listed on FDA's warning about chicken jerkey treats - vomiting, diarrhea with blood, drinking a lot of water, lethargic. At the time we did not connect the illness to the chicken jerkey treats. He recovered and later became ill again. I saw online about the jerkey treat warnings and called my mom. She had just started feeding him the treats again. She immediately stopped and he is okay. Although his health has not been as good since these episodes. I fear his kidneys have been damaged. It is extremely concerning to me that he could have died from this. I understand you are investigating - can you please make them provide to the public the exact process that goes into making these treats? i have heard they soak the chicken in some type of radiation. Please don't stop looking into this - it is obvious there is a problem and will continue. Now that so many people have reported, something needs to be done.	9	Years	Unknown	Dog	25	Pound

<a href="#">EON-86211</a>	3/21/2012 21:00	Waggin' Train Wholesome Chicken Jerky Tenders	<p>We purchased Waggin' Train Chicken Jerky as a "special" treat to be used for training our dog. Over the course of a weekend, we gave her a total of 3 or so full treats, split into small pieces to be used as a reward. On Monday, March 12, in the evening she became ill and began having diarrhea and vomiting. This continued the following day. She also was not eating and had very little to drink. On Wednesday she improved somewhat and was able to eat 1 meal, but the diarrhea continued. On Thursday she was no longer eating or drinking, the vomiting became worse, and there was blood in her stool.</p> <p>I brought (b) (6) to the veterinarian at noon on Thursday, where she was given IV fluids, blood tests were performed, and she was kept overnight for two nights. She was diagnosed with hemorrhagic gastroenteritis and has responded well to the IV fluids. She is now home and has been on a special diet for gastrointestinal problems. Given the unknown cause of hemorrhagic gastroenteritis and the Waggin' Train treats being the only change to her diet prior to her illness, I feel there is a very good possibility her illness was related to these treats.</p>	6	Years	American Pit Bull Terrier	Dog	45	Pound
<a href="#">EON-86209</a>	3/21/2012 20:45	Canyon Creek Ranch - Chicken Stix	(b) (6) never gets table food. That night he was given normal dinner of Kibbles and Bits/dry dog food, a handful of Purina Moist and Meaty Chopped burger, and a Canyon Creek Ranch Chicken Stix (1). That night about midnight he vomited up the entire dinner. He had no appetite for 36 hours, drank lots of water, his balance climbing stairs was off, eyes were glassy, was a bit lethargic, and the following day had slight diarrhea.	9	Years	Spaniel - Cocker American	Dog	34	Pound
<a href="#">EON-86208</a>	3/21/2012 19:15	Natural Chicken Fillets Waggin' Train Wholesome Chicken Jerky*Tenders Chicken Dog Treats	<p>Noticed significant weight gain - gained 8 pounds on 40 lb dog in 2 months. Became very lathargic and bloated. Full physical including blood work in September 2011 and 40 pounds - same weight level for years. Frequent need to drink and urinate.</p> <p>We were so concerned about her health that we schedule a special appoinment with the Vet. Upon recommendation of Vet discontinued the Chicken Jerky from her diet and she lost over 3 pounds the 1st week, became more energetic again and water intake and constant need to urinate have returned to normal (much less frequent).</p>	10	Years	Portuguese Water Dog	Dog	44	Pound

<a href="#">EON-86144</a>	3/20/2012 17:45	Milo's Kitchen Chicken Jerky	<p>(b) (6) was running in our yard, barking at the kids, and acting completely normal. Literally overnight, from one day to the next, she had no appetite, and was lethargic. Her symtoms hit all at once and unfortunately this was on a Friday. Over the weekend she had some very dark diarrhea and some vomiting. She also drank a lot. We took her to the vet on Monday. He examined her and once she tested positive for heart worm disease he looked no further. The meds he gave us were all for treatment of the heart worm disease. He told us to try to get her to eat and bring her back in a few days for her first injection. Over the next couple of days we were able to get her to eat but barley. We took her back to the vet later in the week and he again told us to feed her anything she would eat and come back on Monday. She never made it to Monday. The day after putting her down I happened across an article on MSN about chicken jerky treats from China. It was like a light bulb going off. (b) (6) had every symptom described in the attricle including (towards the end) blood in her vomit. In our case the product is Milos Kitchen. We have 2 bags, both almost full. The code on both bags is 1019HV A. We gave (b) (6) these treats just before the dramatic change. I realize (b) (6) was 14 and had heart worm disease but the suddenness combined with the perfect match of symtoms really makes me wonder. Our regular vet and the emergency vet (where we put her down) have records and xrays. We have both bags of the product. I wanted to file this in case any of this might be useful to you.</p>	14		Mixed (Dog)	Dog	62	Pound

<a href="#">EON-86143</a>	3/20/2012 16:15	Chicken Soup for the Dog Lover's Soul Adult Brand Dog Food, Chicken Soup for the Dog Lover's Soul for Adult Dog Brand	After one day of feeding dog with new bag of the same brand of dog food he was on since puppyhood, he developed explosive bloody diarrhea. He was taken to pet emergency hospital and was given antibiotic/anti-diarrheal med, pepcid, probiotics, and subcutaneous fluids. All blood work-up and x-rays were normal. We told the Vet. that he started a new bag of dog food, same brand, and it looked different and was different in size from the contents of old bag. We returned the suspect dog food and purchased another bag, different lot number. One week later, started new bag of dog food with homecooked food at 25% ratio. The next day he got sick again with bloody diarrhea. Took him to our Vet. and he was examined, put back on medication again, feeding him with a homecooked bland diet. Our Vet. agreed the dog food looked different (in size and color) from previous dog food we had left over. Our Vet. suspects that he did not tolerate something in the dog food. Now, our dog is on homecooked meals until he recovers. We returned the second suspect bag to the pet store.	22	Months	Schnauzer - Miniature	Dog	16	Pound

<a href="#">EON-86137</a>	3/20/2012 15:45	Milo's Kitchen	(b) (6) was given chicken cutlets and currently has some sort of unknown kidney stones or bladder infection. She was on antibiotics for 10 days and had blood in her urine. She is currently having a urine culture done and X-rays to help diagnose her. It has cost \$350 so far, and the estimates are increasing daily.	2		Schnauzer (unspecified)	Dog	20	
<a href="#">EON-86133</a>	3/20/2012 15:15	WAGGIN TRAIN CHICKEN WRAPPED SWEET POTATOE TREATS	THE DOG ATE A WAGGIN TRAIN BRAND CHICKEN WRAPPED SWEET POTATO TREAT. IATER THAT DAY SHE BEGAN TO VOMIT IN LARGE AMOUNTS. TOOK HER TO THE VET AND SHE WAS IN LIVER FAILURE. AS OF MARCH 20,2012 SHE IS IN CRITICAL CONDITION. I DO NOT KNOW IF SHE WILL LIVE.	8	Years	Shih Tzu	Dog	20	Pound
<a href="#">EON-86131</a>	3/20/2012 15:00	Avoderm Natural Indoor Hairball Care Formula	A friend gave us a bag of Avoderm dry cat kibble, saying her cats wouldn't eat it. At first (b) (6) liked it, but after a week he became picky about his kibble and insisted on a different one each day (we also had bags of Purina, Meow Mix, and Goodlife Recipe); that is, he wouldn't eat the same brand two days in a row. After two weeks he stopped eating. After several days he was taken to a vet, where tests showed an elevated level of liver enzymes and bilirubin. He was hospitalized with hepatic lipidosis, fed nasally but did not respond, and died after five days We have now become a foster home for a cat rescue society, which is boarding with us a 2-month old female kitten called (b) (6), which has been with us for 4 days, eating both canned and dry (Avoderm) food. Last night Shelby stopped eating both kinds of food and has not resumed. We have notified the society, taken away the Avoderm and replaced it with another brand.	11	Years	Domestic Shorthair	Cat	14	Pound

<a href="#">EON-86106</a>	3/20/2012 11:45	waggin train yam good wholesome chicken wrapped yams	shopping at wal-mart picked up some waggin train dog treats fed them to my dog for 3 days and she started getting sick vomiting lathargic would not eat waited a couple of days and it got worse.took her to the vet and he said her kidneys were shutting down.they kept her overnight waiting to hear out come. .this is only thing i gave her out of her daily diet that was different.	9	Years	Akita	Dog	16	Pound
<a href="#">EON-86105</a>	3/20/2012 11:45	Milo's Kitchen	with no previous symptoms or warning, (b) (6) began to have seizures. Emergency vet care blood work and xray ruled out toxins or tumors. I did not give her any jerky treats for a couple of days after the initial seizure since she was vomiting. I started to give the jerky treats again and she began to have less severe seizures but recovered quickly. Additional emergency vet visit again did not show any medical reasons. Just after this last visit we saw the article about the jerky jerky issue. I immediately stopped giving the treats and she has not had any seizures or medical issues since then. My vet was not convinced but we were. I had been giving (b) (6) these treats fairly regularly over the previous 2 years without incident, one or two chicken jerky strips every couple of days. For the most part I was buying both Waggin Train and Canyon Creek. The last purchase of these was Milo's Kitchen. I was about half way through the bag when she began to get sick. I threw away the package so I do not have any specific product information. I no longer buy nay pet food made in China.	6	Years	Collie - Border	Dog	36	Pound
<a href="#">EON-86096</a>	3/20/2012 11:32	Waggin Train Jerky Tenders - Chicken	(b) (6) was a long-time lover of the Waggin Tails Chicken Jerky. In June 2011 he became sick and was diagnosed with liver failure. He passed away in July 2011. Only in the last couple of months has information about the issues with chicken jerky from China surfaced, at least for me, and after reading an article about the most common medical problems, well, (b) (6) exhibited every one of them. Had I known earlier the vet may have been able to take a different course of treatment that could possibly have saved him. This was a pet that I had had since he was 7 weeks old. I was heartbroken at his loss. And now I live with the guilt that I may have in some way contributed to his suffering and death. Please don't make other owners go through this. Recall the products until extensive testing can be done on them. At the very least make them post a waring on the packaging.	14	Years	Mixed (Dog)	Dog	45	Pound
<a href="#">EON-86095</a>	3/20/2012 11:32	Salix Raw hides 100pk sticks beef	I usually give a rawhide chew to my dog every night at bedtime and she enjoys them very much. I've done so for many years now, but I usually purchase the PetCo brand. On this occasion, I had purchased a new brand (Salix raw hide 100pk beef flavored sticks) from a (b) (6) . I just gave my dog ONE of them and she had severe diarrhea all night long and most of the following day. She is only fed one brand of food and she does not eat table scraps so I know that the only "new" thing was the new brand of rawhide sticks. My dog does NOT suffer from diarrhea frequently (maybe a mild episode once a year?) and this episode was the worse we've ever seen. I returned the package to the original place of purchase, but noted the information on the package: lot # A011024 (it was hard to read), exp. 04/2014. I tried to find a contact phone number or email for the company (Salix), but was unable to locate one. Based on an internet search, it looks like the company is based in Florida, US.	13	Years	Retriever - Golden	Dog	62	Pound

<a href="#">EON-86094</a>	3/20/2012 11:31	Waggin' Train Wholesome Chicken Jerky Tenders	Started feeding him Waggin' Train Chicken Jerky Treats instead of Paul Newman Crackers for 6 months starting in January 2011. He started exhibiting diarrhea in April and that is when I took him to his vet. The vet performed an exam, blood test, fecal test and changed his diet. His diarrhea continued and we kept changing his diet, assuming it may be an allergy. We settled on the Paul Newman's Organic Dog Food, a food he used to eat a couple years ago. He was still eating the jerky since it was chicken and we thought he couldn't be allergic to that since by then he has been eating them for 5 months. I stopped giving him the treats in May 2011, the time I had to move to (b) (6) but I couldn't bring him with me so I left him with my parents. They assumed since I used to give him the chicken treats, they started buying the same brands to feed him. They called me in June that he was not feeling well and I took him to the vet but further tests were negative. In November 2011, he collapsed and had a severely swollen abdomen and we took him to an ER and we did \$1000 of tests...all negative. We stopped all store bought treats but continued to feed him the Paul Newman's Dog Food. Since we stopped the treats, he recovered (no lethargy, no collapsing, no excessive urination/thirst, diahrrhea, blood in the stools, vomiting,). We had learned that he may have sustained permamnent damage to his digestive system and must eat several small meals/day. We have not fed him a treat since he got sick	9	Years	Terrier - Jack Russell	Dog	13	Pound

<a href="#">EON-86092</a>	3/20/2012 11:31	Waggin Tails	We purchased Waggin Tails jerky treats at our local Walmart. After a day or so (b) (6) appetite began to wane. Next she began vomiting everything, including water, which was very, very unusual for her as she was rarely - if ever - sick. Within a week she was in kidney failure at which point our vet advised us that there was nothing else he could do, she was not going to improve and to take her home and decide how we wanted to proceed. We could not watch her suffer. Within 3 weeks of presenting she was dead. I have just recently become aware of of this treat connection and have absolutely no doubt in my mind that I have now found the cause of her "mystery" illness.	11	Years	Terrier (unspecified)	Dog	38	Pound
<a href="#">EON-86091</a>	3/20/2012 11:31	Greenies	Gave pets a Greenie treat each on Monday night March 12th around 9:00 pm. At 12:30 am, we awoke to both of our female dogs vomiting. Our male dog started throwing up at around 4:40 am. They all three vomited for hours until they no longer could vomit. We took to vet where they were given anti-nausea medication, but they did not improve. We took them emergency vet clinic at 5:00 in the morning where one was x-rayed to see if they found blockage. They did not. All were taken to regular vet as soon as they opened for further treatment. The dogs were on IV treatment for 2-3 days and did not eat for 4 days. I beleive the treats to be tainted. It was a brand new bag and my animals have eaten this brand before with no problems. I cannot think of any other factors that would have made my dogs so ill. We believe our pets would have died without treatment	2	Years	Terrier - Jack Russell	Dog	10	Pound

<a href="#">EON-86086</a>	3/20/2012 11:30	Waggin Train Chicken Jerky Treats	<p>Back in the summer of 2010, I came home from work and took the dogs out to go relieve themselves. Since it was a hot day we came directly back inside (not more than 10 minutes outside) &amp; we would walk later on once the sun had gone down. I gave the dogs a chicken jerky treat and put a movie in to watch. By the end of the movie (2 hours tops) (b) (6) had vomitted and had diarrhea. She would not stand and when I made her stand she walked as if she was drunk. She was, obviously, very lethargic. I took (b) (6) to the emergency vet where they ran her vitals and administered medicine. The vet said her system was "tanking" and it was like she had been poisoned. I told him they hadn't picked up anything when we were outside and the only thing she had to eat was the chicken jerky I gave them once to twice a day.</p> <p>(b) (6) ended up going back to the vet 2 more times that summer season for similar problems. None of her reactions were as bad as the first, but they were almost the same symptoms. I was never instructed that the jerky may be a problem. However, since I first read about the possibility of tainted jerky from brands like Waggin Train (the brand we used) I've since begun making most of their own treats, or buying treats from the store that are made in the USA only.</p> <p>The other dog was not affected, but she was a good 20-30 pounds heavier and old of age. She was on a lot of medicine already and so any ailments she had I always contributed to her being old and medicated.</p> <p>I want to report the problem so that my situation is on record. I do not have (b) (6) exact medical history with me as I report this, but would be happy to provide you with it if you need. (b) (6) has always been in good health otherwise. I will list her condition as Recovered Completely, but it took a while to get there.</p>	3	Years	Mixed (Dog)	Dog	33	Pound

<a href="#">EON-86084</a>	3/20/2012 11:30	Nutro Natural Choice Crunchy Treats with real carrots or apples	On 3/10/12 I purchased dog food and two 10 oz bags of snacks from Pet Smart (b) (6). The snacks were Nutro Natural Choice Crunchy Treats w/real carrott and one w/real blueberry. I already had part of a bag w/real apples. I store them in a Tupperware container. I emptied the bag with the carrots in with the remaining apple flavor. Within a week I had maggots in the container. These are small bags and I have two small dogs so I go thru treats pretty fast. Now this may not have anything to do with it, but about a month and a half to two months ago, from the same store, I purchased a box of lams puppy biscuits and they had maggots also. I returned them for a refund. I threw away the bag on this latest purchase so this is the only information I can provide. I would hate it if I lost my dogs over this.						
<a href="#">EON-86082</a>	3/20/2012 11:30	Dogswell Happy Hips Chicken Breast Dogswell Mellow Mut Chicken Breast Dogswell Breathies Chicken Breast	I would give (b) (6) a chicken jerky treat when I left the house. Upon returning home, there would be a huge mess of diarrhea. The diarrhea was sometimes brown and sometimes yellow, but there was always thick mucus in it.	12	Hours	Shepherd Dog - German	Dog	75	Pound
<a href="#">EON-86081</a>	3/20/2012 11:30	Wagon Train Chicken Jerkey	(b) (6) developed severe vomiting with diarreah. She had pain in her abdomen and her body kept shaking.	3	Years	Chihuahua	Dog	10	Pound
<a href="#">EON-85897</a>	3/19/2012 3:00	Taste of the Wild Wetlands Canine Formula, Taste of the Wild High Prairie Canine Formula	<p>My husband and I are the owners of a pet food &amp; supplies store in (b) (6) called (b) (6). On 3/15/2012, the owners of (b) (6) in nearby (b) (6), advised us that one of their customers returned a 15# bag of Taste of the Wild High Prairie dog food because of a foul smell. We subsequently opened some of our bags (5# and 30#) and found that the food smelled quite awful -- like overcooked motor oil or twice-baked barnyard. Other pet food stores in the area reported the same smelly problem in all three bags sizes, with the following three date codes seemingly affected: 12 FEB 2013, 22 FEB 2013, 06 MAR 2013.</p> <p>We contacted (b) (6) at the (b) (6), who advised us to remove all product from our shelves and to also contact the FDA (b) (6) District Office's Complaint Coordinator and report the problem. On 3/16/2012 a field inspector from the (b) (6) came to our store and collected two unopened 5# bags of TOTW High Prairie for testing (date code 12 FEB 2013).</p> <p>Subsequently, on 3/17/2012, we were informed that a customer returned a 30# bag of Taste of the Wild Wetlands dog food (date code 20 FEB 2013) to (b) (6) (nearby pet food store) because her dog had gotten sick after eating it. The store owners said the returned bag smelled just like the foul-smelling bags of the High Prairie variety. We subsequently poked a hole in a 5# bag of Taste of the Wild Wetlands in our stock (same date code: 20 FEB 2013), and discovered it had the same foul smell as the High Prairie bags.</p> <p>We have forwarded information to the (b) (6) and the FDA (b) (6) District Office's Complaint Coordinator about this second variety of foul-smelling TOTW and are awaiting further instruction.</p>						
<a href="#">EON-85896</a>	3/19/2012 3:00	Welcome Home Dry Duck Jerky	Dog received 8 to 10 treats for several days prior to being kenneled whereupon she developed diarrhea for one week. I was out of town and was called to do a parasite check which was negative. My dog had about \$100 lab bill and when the parasite check was negative they wanted to do approx. \$700 of labs and meds. Her diarrhea ended when I took her home on Mar 6. She never has diarrhea.	13	Years	Mixed (Dog)	Dog	67	Pound

<a href="#">EON-85885</a>	3/18/2012 3:00	Smokehouse	(b) (6) was jumping from a foot stool to the sofa, collided with my Chinese Crested dog and fell to the tile floor, twisting her left hind leg. We took her to our vet who did x-rays and ruled out fracture. Three days later, her left inner thigh was badly bruised and severe swelling to her lower leg. We returned to the vet and blood and urine tests revealed elevated kidney levels. The fall and the elevated kidney levels are coincidental. The cause of the bruising to thigh and swelling of the lower leg remain undiagnosed. However, in this process, the vet asked me if I give my dogs chicken jerky treats and we do. Our dogs love them so we buy them by the case since we have three dogs. And, yes, I do give them more than the recommended serving per day. I'm not sure how much but probably 4 per dog per day. We have not done blood and urine tests on the other two dogs yet.	12	Years	Hound - Italian	Dog	16	Pound
<a href="#">EON-85884</a>	3/17/2012 21:00	Milo's Chicken Chicken Jerky Treats	I had purchased chicken jerky as treats. Within a few weeks she began vomiting, had diarrhea, loss of appetite. The only thing she would eat is the chicken jerky - Milo's Kitchen. I searched the internet to see if I could find anything out. I read about chicken jerky chicken making pets sick. I immediately stopped giving her the jerky treats and disposed of the rest of the package. I took her to the vet and they ran a multitude of tests. I still haven't rec'd the test results for Fanconi Syndrome, but the other tests came back good. Within a few days of stopping the treats she began to eat her regular food again and stopped vomiting.	2	Years	Mixed (Dog)	Dog	14	Pound

<a href="#">EON-85879</a>	3/17/2012 14:45	Waggin' Train country ham, Waggin' Train wholesome chicken jerky tenders chicken dog treats, Waggin' Train jerky tenders ham	I started giving my at the time 11 year-old male German Sheperd "Waggin' Train" dog treats in early 2011. There are 3 varieties I've given my dog: jerky tenders chicken, jerky tenders ham, and country ham. I give him about 3-5 pieces everyday. Ever since he started eating these treats, he began to have diarrhea periodically, sometimes accompanied by vomitting. The diarrhea alway has a sudden onset, and is very severe. My dog has to go as often as 6 times a night. The stool is always watery. The vomit is always yellow in color and appears foamy. For the one year my dog had the Waggin' Train treats, he rapidly lost ~20 lbs. He has developed hip and joint problems. He has difficulty walking now, and he falls often. He exhibits lethargy. During his waking hours, he moans and cries, indicating to me that he is in pain.	12	Years	Shepherd Dog - German	Dog		
<a href="#">EON-85878</a>	3/17/2012 14:00	Tail Waggon Treats	<p>Our dogs was given 2 of the Tail Waggon Chicken Jerky Treats.</p> <p>Yellow diarrhea throughout the day and night for 3 days. <a href="#">EON-85876</a>	3/17/2012 10:45	Waggin Train Jerky Tenders	She is actually a schnoodle Schnauzer/Poodle mix. We gave her 2-3 chicken jerky treats every day, for a couple of years. She started having siezures, we took her to our vet who tested her and said her liver enzymes were elevated and she was dehydrated. We stopped giving her the chicken chews and she fully recovered in about two weeks and has had no signs of any problems since, and that was approx. 1 year ago. The other symptom she had was chronic diarrhea every day for years until we stopped giving her the treats and her diarrhea also resolved	5	Years	Poodle (unspecified)	Dog	12	Pound
<a href="#">EON-85875</a>	3/17/2012 3:30	Lick Your Chops Treat Umms	<p>I took a trip to Portland where I purchased both a new brand of dog food (Taste of the Wild, made by the same manufacturer as his previous reliable dog food, Premium Edge) and a new kind of dog treat (Lick Your Chops Treat Umms, which are a bit of sweet potato wrapped in chicken jerky. These treats are made in China.) to get through our extended visit. During the visit my dog became a little lethargic, which I originally attributed to him missing home. When we returned home I retained the dog treats to use as rewards periodically. (b) (6) became more lethargic, and acted depressed. I attributed this to him missing his best dog friend, who has temporarily moved out of town. About a week after having been home and a few days after using the last treat, I noticed (b) (6) straining to urinate. When I looked he was passing blood instead of urine. I took him to the vet immediately, where he had a urine sample taken and tested for bacterial infection and possible stones. No harmful bacteria were found, some struvite crystals were found. The vet did not leave complete information on my voicemail, the dog was taken in for x-rays a few days later, and ended up with a vet who does not usually see him. No abnormalities were found on the x-ray, but the dog continued to be lethargic and sick. Further discussion with my preferred veterinarian revealed that his urine Ph had been 8.5. I addressed the problem with a complete change of diet and by pushing liquids on him (in the form of chicken broth and heavily watered down wet dog food) and a powdered additive to his food intended to reacidify his personal Ph. Prior to the veterinary visit where he had the x-ray he stopped drinking water altogether. About a month of extremely watered down wet food gradually moving to unwatered wet food and now a new type of kibble, and he has finally gotten his health back. He is playing again, drinking and urinating normally and seems to be happier.</p> <p>I did not know about potential problems with chicken treats from China until a few days ago from today. I saw a warning poster at my local dog self-wash place and something clicked. The poster described a lot of the symptoms that my dog exhibited that had previously been just scary and a little mysterious. I am not 100% certain that it was the treats that caused the problem since we also had changed his food simultaneously, however since the food came from the same company that manufactured his previously regular food *and* there are known problems with some chicken jerky treats from China, I am about 90% certain that the treats were what caused the problem. I have not yet had a chance to update my veterinarian about my suspicions. I believe he has recovered completely, but I have chosen "recovering" below as I am still a little nervous about a relapse. I am never going to give him treats made outside of the US again.</p>	1	Years	Akita	Dog	90	Pound

<a href="#">EON-85872</a>	3/16/2012 23:15	Waggin' Train	On the night of 3/14/12 she puked multiple times about 30 minutes after consuming 1 treat. She continued to the next day by not eating and only drinking water, she is also very lethargic and will not move at all, even for water. She had to be carried outside and peed where she was placed. She had diarrhea that night as well. She was also very hot. We took her to the vet on 3/16/12 and had IV fluids hooked up to her for 3 hours. She was prescribed medication ( .25 Metronidazole 250mg Tablet 2x daily and .25 Sucralfate 1gm Tablet 2x daily) Sadly I do not have the money to be able to have her tested throughly, the vet wanted to do an internal organ screening, blood work, and urine analysis but for now we are doing the treatment plan without being diagnosed. She did perk up and was moving around after the IV fluids but is now back to not moving and still has not eaten anything, this only 2 hours later.	10	Years	Dachshund - Miniature	Dog	14	Pound
<a href="#">EON-85871</a>	3/16/2012 22:00	Healthy Select chicken breast strip treats.	This may be nothing as my other dog did not react but I fed them both Healthy Select chicken breast strips. I read that they were not from China so I thought it was Ok and maybe they are. Maybe a week or so after purchase and them eating the treats my one dog became lethargic and was falling on his hind legs. I took him to the vet and the vet put him on anitbiotics. Hes since been to the vet again with a slight fever and another round of antibiotics. He has lost 13 lbs. 63 to 50 and is drooling and has abnormal bowel movements and sometime seems to want to vomit but doesnt. He got sick on Jan 23 and still isnt well but a bit better than a few weeks ago. I should have went with my gut feeling as the jerkey is brittle and dry. Again maybe nothing but wanted to make a report. I purchased them at Petco.	10	Years	Mixed (Dog)	Dog	63	Pound

<a href="#">EON-85773</a>	3/16/2012 11:15	Waggin Train Jerky Tenders	<p>I can't say this is because of the jerky treats, but given the known issues with Waggin Train chicken jerky I wanted to report it. Our dog typically eats 1-2 jerky treats daily and has been for some time. Recently he developed an irregularly shaped balding spot on one of his sides. It's not symmetrical and shows no other signs of issue. He acts normally, has normal eating, activity levels, and pooping habits.</p> <p>Regardless of the hair-loss cause, I also wanted to report this in case the specific lot of Waggin Train treats could be added to the investigation. I've read that the FDA is encouraging people to report and potentially submit products for testing. We currently have the following jerky treats/lots in our possession:  Waggin Train Chicken Jerky, Lot # W1NJ127A  Cadet Duck Breast Treats, # 08 15 2013 148. 4 (no other ID on the packing).</p>	2	Years	Bulldog	Dog	70	Pound
<a href="#">EON-85770</a>	3/16/2012 3:00	Waggin Train Wholesome Chicken Jerky Tenders	<p>we received a sample package of Waggin Train wholesome chicken jerky tenders in a bag of Beneful dog food. We gave one piece each to both of our dogs in the morning and another piece to both dogs in the afternoon late Jan/early Feb. (b) (6) our male dog got sick on 2/7/12 and we took him to the emergency vet as he was very lathergic and vomited. He was given blood test and x-rays and placed on IV for dehydration, antiboitics and steriods for increased WBC and renal insufficiency. We did a follow-up visit to our regular vet and continued on Antibiotics and steriods for two weeks and slowly weened him off of the Steriods. On 3/10/12 we purchased another bag of beneful dog food and again received a sample of the Waggin Train wholesome chicken Jerky treats. As before we gave each dog one piece in the morning and one piece in the afternoon. On Sunday 3/11/12 (b) (6) was acting normal all morning then suddenly walked into the bedroom, laid down, had a seizure and died within minutes. We never had a chance to call the vet or to get him any help.</p>	5	Years	Great Pyrenees	Dog	131	Pound
<a href="#">EON-85769</a>	3/16/2012 3:00	Milo's Kitchen Chicken Jerky	<p>I purchased Milo's Kitchen chicken jerky for my dogs. Due to the size of the jerky, I only gave it to my Rottweiler. Sometime later, I believe the same day he became ill and vomited and had very loose stool. He seemed ill, but my other dog was fine. The only difference in the two was that he ate the jerky. When I opened the package it smelled bad, but I chalked it up to being a dog treat. I thought that maybe the treat was too rich for him and I did not give him any more. Subsequently, about a month later I read that chicken jerky was making dogs sick. I did not see Milo's kitchen on the list, but had a feeling it made him sick. Sure enough, it is now on the list. I guarantee you that this treat made my dog sick, I knew it immediately. I do not know the actual date so the dates below are a guess.</p>	3	Years	Rottweiler	Dog	80	Pound

<a href="#">EON-85765</a>	3/16/2012 3:00	Milo's Kitchen Home-Style Dog Treats (Beef Sausage Slices with Rice)	I have the most pick-e-ist dog ever. He is just a little 2lb dog, almost a year old, so he's still basically a puppy. I have went through so many different kinds of dog treats, from different flavors, to textures, brands, etc. I finally found one that he absolutely loves. Milo's Kitchen Home style Dog Treats made by Del Monte. Due to the cost of them, I just cut them in smaller pieces and give him maybe 2 quarters of a piece a day. He has been eating these for around 3 months, but over the last 2 weeks, he has been acting very sick, decreased appetite, not aggressive and not playful like a puppy of his age should be, and like he normally was a few months ago. I was driving to work this morning and heard on the radio that they were doing a recall on the pacific dog treats he eats! I freaked out. Researched the side affects and found out that all of symptoms he was having were the same side effects other pet owners were experiencing with their dogs with the same exact treats! I want the FDA to help me and other pet owners take these treats completely off the shelves! Many pet owners were not so lucky and their pets actually had kidney failure and passed away; And I tell Del Monte what, if something serious like that were to happen to my dog, I would have sued the company! You can never replace a pet, nobody can put a price on my dog. I love him as if he was my own child! Please help me/us with this concern!						
<a href="#">EON-85764</a>	3/15/2012 23:15	Milo's Kitchen Chicken Jerky Strips Dog Treats	I have bought Milo's Kitchen Chicken treats in the pass and noticed that some of my dogs became sick and vomited shortly after eating them. I stopped giving the treat to them for several weeks following this incident. Again I started giving them the treats but this time the 10 year old became very ill, vomiting, sleeping all the time, little movement and not wanting to eat or drink. I became very worried when it seemed she would not go to the restroom. I then told my husband she acted like her kidneys were shutting down. Her eyes looked as if she was sick. This dog had been very healthy and never had a health problem. A very playful dog. Then another one of my dogs started vomiting. I now became very worried. It just happened my sister called me and she has the same type of dogs and I told her what was going on. She asked me what treats I was giving to them, and when I told her Milo's, she then told me to go to the internet and look up contaminated dog treats. I put this all together and realized their symptons were what was described on the internet. Luckily I haven't given them this treat now for over 4 days and the 10 year old is now eating and starting to get back on her feet. The other dogs seemed to recover. I hope they don't have upcoming issues due to this product. I returned product to the store and gave them a copy of what the FDA had printed on their web site.	10212	Years	Shih Tzu	Dog		Pound

<a href="#">EON-85761</a>	3/15/2012 22:45	Waggin Train Jerky Tenders	Dog started vomiting with diarrhea for several days and was lethargic. We took him to Vet ((b) (6)) - blood tests and sonigram were done - slightly enlarged pancreas w/ slightly low glucose levels - thought the dog had a mild case of pancreatitis. Dog was placed on anti-vomiting / anti-diarrhea meds. Dog stopped eating but would still drink water. 2 days later the dog would not eat or drink anything. We took dog back to ((b) (6)) where he was administered hydrating IV. He remained at ((b) (6)) for 2 days. Dog was not eating or drinking & was extremely lethargic. Dog was transferred to ((b) (6)) where he was admitted to the ICU for 2 days. Dog was placed on hydrating IV, more blood tests and another sonigram. Diagnosis was "equivocal evidence of mild pancreatitis but the diagnosis is open with no other remarkable findings". Report indicates no conclusive evidence of pancreatitis or other underlying disease noted on ultrasound. Doctors could not see anything that would cause dog to be in the current condition. ((b) (6)) vets put in esophagostomy feeding tube - dog came home. It has now been 6 days since dog has been home. Dog has eaten 3 small pieces of chicken and 2 nuggets of dog food but nothing else. Initially dog drank a little water but is not drinking water anymore. Dog is not quite as lethargic but can't make it up a full flight of stairs by himself. He just turned 1 year old and was, before this, a bundle of energy.	1	Years	Maltese	Dog	10	Pound

<a href="#">EON-85752</a>	3/15/2012 20:45	wagon trails chicken jerky treat	(b) (6) was given a wagon's tails chicken jerky treat and he vomited a little after eating, about an hour, in the evening. He acted like his stomach was bothering him and he was laying down a lot. I did not think much of it because it has happened in the past and he was fine the next day. the next morning he got up and i saw phlegm on bedroom floor with a little blood in it. (b) (6) was laying in the hallway when i left the bedroom and as i was talking to him he got up and staggered away from with blood dripping from his rectum. i followed in my wheelchair and saw him lay down on the rug in the livingroom and now coagulated blood was draining from his rectum. I called my vet to let him know i was bringing him in and put my leg on and grabbed (b) (6). At this point he was limp in my arms. In the car he was in shock, barely breathing and i thought he had died. We get the the vet and they start triaging him to get him stable, they put oxygen on him, got an iv started and brought him back, i almost put him down but they were able to bring him back, he then spent the next three days in the icu at the (b) (6). he had acute hemmoragic gastritis and they said it was a close call and i got him in in time. I also talke to my neighbor about this and her golden retriever would throw up after eating chicken jerky treats also but it never got as bad As it did for (b) (6). they no longer give the treat to their dog either.	10	Years	Terrier - Boston	Dog	25	Pound
<a href="#">EON-85751</a>	3/15/2012 20:15	Milos kitchen chicken jerky, Milos kitchen Chicken Meatballs	I had bought Milos Kitchen Chicken meatballs,as well as Milos kitchen chicken jerky within 2 weeks prior to her going into sudden kidney failiure. About a week after eating, she began lack of appitite and less energy. about a week after that she had vomiting occasionally. 2/08/12 she began more frequent vomiting and less activity/ lethargy. She was rushed to the vets on (b) (6) thinking it was a stomach bug,and was diagnosed with kidney failure and had to be put to sleep.	8	Years	Terrier - Jack Russell	Dog	20	Pound
<a href="#">EON-85750</a>	3/15/2012 20:15	Freshies Supreme Green Dental Bones	The kind of dental bones I got for (b) (6) are Freshies Supreme Green Dental Bones by Waggin' Train and I think they made her deathly ill. I had given her 4 of them on different days ( I purchased them on 2/26) and nothing happened but this time on 3/4/12 I gave her one in the evening and around 4 a.m. she threw up and the vomit was full of green chunks like these bones. After throwing up she had bloody stool and this continued until the morning when I took her to the vet, she had another bloody stool there so they kept her to put her on IV so she would not get dehydrated. When I got home I looked at the back of the package and read they are made in China. I called the Waggin' Train people and they took a report on it and even called my Vet for details of her treatment, they said they are gonna send an envelope for me to enclose a couple of the bones to research them. Really scary and now I am not going to give (b) (6) any more treats at all. Just her dog food from now on. that's all. (b) (6) spent a whole day at the vet and in the evening she had to stay at the hospital and the next day at the vet until 3 p.m. (cost was \$515.21) all this because I thought these green chew bones would be good for her teeth.	3	Years	Schnauzer - Miniature	Dog	20	Pound

<a href="#">EON-85730</a>	3/15/2012 15:45	Nutro Max Chicken Meal & Rice Adult	I have been feeding both of my Boxers Nutro Max brand dry dog food for over three years. On Thursday, March 8th, I purchased a new 35 lb. bag of the Nutro Max Chicken and Rice food at Pet Smart in (b) (6) (I plan to notify the store manager in person this weekend as well as via e-mail to their headquarters)--although it was the same type I have been buying, the shape and color of the nuggets of food appeared different. I assumed they had changed something. By Friday evening, both dogs had terrible gas the male, (b) (6), was vomiting. Both dogs were lethargic on Saturday morning--did not even greet us in the morning, which you know is unusual for dogs. We stopped feeding them the food on Saturday morning and instead prepared white rice, chicken, and mixed with canned vegetables. The female's energy improved by Sunday evening; however, my 3 year old male was then vomiting the bland diet. He was throwing up undigested food all the way to Tuesday. Wednesday morning, March 14, 2011, he vomited large amounts of blood (I have pictures). I took him to the Veterinarian that morning; bloodwork and X-Rays revealed acute pancreatitis. He has since had to be on IV fluids and anti-biotics and we will not know if he is out of the woods until perhaps this weekend. I am convinced it was this food; both dogs experienced trouble just after eating it. Unfortunately, I do not have the packaging, as I store the food in a plastic covered container in my kitchen. Additionally, I paid cash for it, so I do not have my receipt. However, when I go to Pet Smart I am hopeful that they can pull a record of the transaction as I used my "Pet Perks" membership card when making the purchase.	3	Years	Boxer (German Boxer)	Dog	84	Pound

<a href="#">EON-85662</a>	3/14/2012 19:45	Milo Chicken Jerky	I am concerned with the product that Del Monte makes for pets. The Milo Chicken Jerky. It was brought to may attention that there may be a problem with this product. My uncle comes to visit every Sunday arriving with Milo Chicken Jerky(thinking it was all natural) to give to my dog as a treat. A few hours after receiving the jerky she would become sick. I would blame it on excitement, without knowing the numerous reports with the FDA on these dog treats. If it was a product that was making children sick the product would be recalled immediately. Once I heard there may be a problem with these treats I went online immediately and found that these treats have been reported to the FDA since 2007. Do we just ignore this problem because it is a pet problem. WHAT IS BEING DONE????						
<a href="#">EON-85661</a>	3/14/2012 19:45	Milo's Kitchen home-style dog treats Chicken Jerky	Both dogs ate Milo's Kitchen Chicken Jerky treats. Within 6 hours both dogs developed severe diarrhea; one of them vomited. Diarrhea lasted at least 2 days.	9	Years	Collie - Bearded	Dog	72	Pound

<a href="#">EON-85652</a>	3/14/2012 18:15	DOGSWELL Happy Hips Chicken Breast	I gave pieces of DOGSWELL chicken jerky (the one for joint care) to my dogs for about 3-4 weeks as a treat. (b) (6) consumed the most because the treats were high protein and low calorie, and at age 10 we were watching her weight. One morning she refused to eat breakfast. I assumed she had an intestinal infection but her stool was normal. She vomited 2-3 times, so I took her to our vet. An ultrasound showed inflamed pancreas and bloodwork showed values for phosphorus and creatinine extremely high and BUN elevated. After 4 days on IV fluids, the kidney numbers had gotten worse, not better, although (b) (6) was eating well and was active. We brought her home on Azodyl, aluminum hydroxide, Pepcid, and Science Diet KD dry and canned. But her numbers continued to rise. I began subcutaneous fluids twice a week, then every other day, then daily if needed. She had good days with no vomiting, but she was very tired and often refused food of any kind. On February (b) (6) she seemed extremely subdued; on the (b) (6), after she vomited multiple times, refused food and liquids, and was clearly feeling very bad, we had her euthanized at a well-known and highly rated emergency clinic.	10	Years	Mixed (Dog)	Dog	37	Pound

<a href="#">EON-85649</a>	3/14/2012 17:45	Waggin Trails	(b) (6) awoke one morning without an appetite. I immediately took him to the Vet, because he was a voracious eater. I knew he was ill. The Vet did some tests and found he had cancer of the spleen. I have never heard of dogs getting this type of cancer so I thought that if an unusually large amounts of dogs were dying of a cancer of the spleen and they were all eating Waggin Trails chicken treats then this information may be relevant.	11	Years	Retriever - Labrador	Dog	68	Pound
<a href="#">EON-85648</a>	3/14/2012 17:45	Milo's Kitchen Chicken Jerky Strips Dog Treats	Crated and heavily supervised puppy was given a complete clean bill of health from her doctor on March 3, 2012. Shopping that night, my husband and I picked up the large bag of Milo's Chicken Jerky treats. Every night, one hour after her dinner we would give her one piece to snack on while when we sat down to relax for the night. March 9th she stopped eating all meals and had diarrhea. Tried giving her homemade chicken and brown rice over the weekend; she would eat it but vomited it up completely undigested NINE hours later accompanied with more diarrhea. Took her to the doctor on March 12th who examined her and did x-rays. No blockage thankfully and no fever, however her stomach lining was swollen drastically from a "largely irritating substance". Two injections and an unexpected \$325 bill later, we're sent home with two antibiotics in hopes it will bring down the inflammation and she will heal. Last night was her first meal of again chicken and rice - hoping for recovery. Ironically read the article about Milo's jerky treats the day of the doctor visit and promptly threw them away as precaution.	6	Months	Hound - Pharaoh	Dog	30	Pound

<a href="#">EON-85645</a>	3/14/2012 16:45	Waggin Train Wholesome Chicken Jerky Tenders	the day after giving him about 4 of the Jerkey Treats he was sick to his stomach and ended up throwing up. we took him to the vet and they thought he had pancreatitits. We could not afford the \$1000 test to see if it was positive so opted to take him home with just pain medicine. He slowly got better in about a week. The only other thing he had eaten was his regular food and some home cooked roasted chicken. I had the Jerkey Treats in the back of my mind as I had heard stories about dogs getting sick but I thought I had bought mine from a reputable company (Costco) so I thought they would have taken the treats off the shelf if there was the slightest concern.	2	Years	Retriever - Labrador	Dog	70	Pound
<a href="#">EON-85644</a>	3/14/2012 16:45	Waggin Tails Chicken Jerkey	For about two years, after I discovered they just loved it, every night I gave each of my three unrelated miniature schnauzers one piece of chicken jerkey purchased at Costco. The brand was Waggin Tails. Beginning in February 2011, then June, and then July, each one developed diabetes. The oldest, (b) (6) , finally had to be put down as he also then went blind and lost his hearing. The other two are alive, one is blind, one also now has pancreatitis. They each require two insulin injections each day. They were in excellent health and have always been fed only good quality dog food. There is NO diabetes in their history per the breeder. the breeder is well known and shows and sells dogs all over the world. She would not misrepresent her puppies. We have had each one since a puppy.	8	Years	Schnauzer - Miniature	Dog	22	Pound
<a href="#">EON-85643</a>	3/14/2012 16:15	Waggin Train Chicken Jerky Tenders	Other then being mildly hypoglycemic, (b) (6) was a relatively healthy dog. We started giving her Wagging Tails chicken jerky (which we buy from Costco) in mid-2009. We also gave this treat to our other dog, (b) (6) , but since she barely ate it, (b) (6) would also eat her share of the treats. It wasn't until June 2009 that we noticed (b) (6) suddenly started acting sick. She would constantly pee and it would smell like ammonia. She also started drinking a lot of water, but we weren't alarmed as we didn't know this could be a sign of disease. It wasn't until she suddenly started becoming fatigued and moping around did we realize something was serious. We immediately brought her to the vet who said she already had advanced stages of renal failure. They tried to treat it at the emergency hospital for four days but suggested that because of her intense suffering, we should put her to sleep. We did not want to do it but we saw she was deteriorating rapidly and was in so much pain that she no longer would eat or acknowledge us and hid under the table.	10	Years	Other Canine/dog	Dog	10	Pound
<a href="#">EON-85642</a>	3/14/2012 16:00	Waggin Train	(b) (6) started acting lethargic during the day. By evening he was shaking and hiding and running a fever. I took him to the vet in the middle of the night. They put him on fluids and antibiotics. For three days we thought we were going to lose him. They never narrowed it down to any one thing. The chicken jerky was the only thing I had done different. (b) (6) is a picky eater and he just happened to like the chicken jerky treats. It cost me \$1800.00 to try and save him. The vet and I discussed food poison. She said it was a possibility.	7	Years	Terrier - Yorkshire	Dog	8	Pound

<a href="#">EON-85641</a>	3/14/2012 16:00	Waggin Train Wholesome Chicken Jerky Tenders	She was fine and on Saturday morning she was given a Jerky treat after coming in from going out to go to the bathroom. Within several hours she began throwing up and by 11:00 pm that evening she began panting very heavily and having problems breathing. I rushed her to an emergency clinic where they kept her for 2 days because they were unable to determine what was wrong with her. I then transferred her to another animal hospital on Monday morning March 12, 2012. They determined that her heart was in V tach and they could not determine what the cause of it was. After giving her several injections of Lidocaine 2% and Procainamide HCL 100mg/ml they were not able to get her to get a regular heartbeat and she was having labored breathing and after several hours of an IV drip of Lidocaine the vet said that he was concerned with brain damage and multiple organ damage since her heart was only fluttering and not pumping for so long and he highly recommended that she be euthanized. We waited awhile longer hoping and praying that she would come out of it but she did not so we had no choice but to have her euthanized.	14	Years	Mixed (Dog)	Dog	63	Pound
<a href="#">EON-85640</a>	3/14/2012 15:45	Pup-Peroni Original Beef Flavor	We bought two bags of Pup-Peroni from Petsmart on January 9, 2012. We noticed shortly after that he started to pee in the front yard more and just thought he might be marking his territory. By mid January he didn't seem to have his normal energy level. By end of January my dog started seeming lethargic and began peeing more than usually and vomiting. His condition worsened and on February 3rd we took him to an emergency vet with what we thought could be a bladder infection. The vet told us and showed us his xray that his bladder was full of urine and he was unable to evacuate it. A catheter was placed to help him evacuate the urine and blood tests were ordered. His white blood cells were slightly elevated which to them indicated an infection so they gave him antibiotics and fluids and kept him over night. The next day I received a call from the vet stating his urine had turned dark red and his kidneys were failing and his prostate was slightly inflamed. They said the prostate could be why he was unable to evacuate his urine but were not sure and also said that they couldn't determine what was making him sick so suddenly (he had a vet visit in late May 2011 for a rabies shot and check up so I could kennel him while I was out of town and was healthy then). The said my only options were a specialist which would cost me a few thousand or more or to euthanize him. We couldn't pay for a specialist and didn't want him to suffer so we agreed to put him down.	8	Years	Cattle Dog - Australian (blue heeler, red heeler, Queensland cattledog)	Dog	65	Pound

<a href="#">EON-85638</a>	3/14/2012 15:00	Approx Milo Organic Chicken Jerky Treats	<p>We gave (b) (6) a chicken jerky treat. Was the first time she ever had this product. About 24 hours later she developed a dangerously high fever and seizure symptoms. We brought her to the ER, as it was a Sunday.</p> <p>I purchased Milo's chicken jerky organic treats for my golden only once at a (b) (6) on (b) (6), because I had a coupon. I am not sure of the exact date or timeframe, but I could easily get this information from the emergency services vet she saw. Within 24 hours she had developed a very high fever and was lethargic and developed some troubling seizure type behavior. I brought her to the ER. Her temp was over 105. I told them the only thing I had given her differently was the chicken jerky. They examined her and put her on antibiotics. She recovered very well over the next several days. The DAY AFTER I brought her in I saw the article on msnbc about chicken jerky. I called and discussed this event with the ER vet, and also my own vet. They were not aware of the problem. I was able to retrieve the bag, with product inside, from the ER vet, b/c I had brought it with me. I kept it for a time, but when I read that the affected products were all mfg in China, I discarded it. I was concerned someone in the house gave her another treat accidentally. I'm sorry I wish I had more information. As stated above, I do know where I bought it, and I can get you the exact date. (b) (6) was otherwise perfectly healthy, and should have become quite ill. It was very scary. She was smoking hot to the touch and seizing. My children were very upset.</p>	18	Months	Retriever - Golden	Dog	75	Pound

<a href="#">EON-85635</a>	3/14/2012 14:45	Waggin' Train Wholesome Chicken Jerky Tenders, VitaLife Plus Healthy Hips & Joints Chicken Tenders	<p>In addition to dry dog food from a reputable US company, (b) (6) seemed to love chicken jerky treats. We provided them several times a day to supplement her evening feeding of dog food. The primary ones provided were chicken jerky tenders from the brand Waggin' Train. This continued for at least 5 or more years. She slowly became less and less active, preferring to lay around much of the day. We felt this was due to advancing age and her hip problems. We even changed the treats to VitaLife Plus Healthy Hips &amp; Joints Chicken Jerky on occasion due to the addition of Glucosamine and Chondroitin in their treats. However, (b) (6) favorites were the Waggin' Train ones so they continued to be the primary treat.</p> <p>In late January of 2012, (b) (6) began to become very sedamentary and seemed to be in pain whenever she moved. She also began to drink extremely large volumes of water and developed runny and bloody stools. We took her to our veterernarian, (b) (6) with (b) (6) , on 01/27/2012. He was puzzled with her symptoms initially, but blood work and later examination showed that her kidneys were shutting down. The plan of treatment was to flush fluids though the kidneys and see if he could revive them. This continued through the weekend and he called me over the weekend to let me know the "numbers" were somewhat improving on the kidneys, but still unacceptable and he needed to keep her for a few more days. On Monday morning, 01/30/2012, he called and told me that her kidneys were shutting down and she was slowly and painfully dieing. He suggested my wife and I get to his office as soon as possible to see her before she died. We did go and observed her painfully trying to stand up for us but being too weak to do so. He showed us that her tongue was turning white due to decay of the skin on the tongue. We could see her pain and asked him to please euthanize her so that her pain would cease. He did as we requested.</p> <p>An autopsy was done and he felt that some toxin destroyed her kidneys and sent the kidneys and other information to (b) (6) for analysis. The results showed massive kidney failure, but the toxin was not identified, as far as I know. He was going to try and speak with the Doctor at the University for additional information.</p>	9	Years	Chihuahua	Dog	10	Pound
			<p>Yesterday I was shocked to open an article on MSN.com that discussed the illnesses and deaths attributed to Waggin' Train and other brands of chicken jerkey treats. It appears that these were attributed specifically to kidney failures due to heavy metals and/or other problems with these treats, which for the first time I discovered were made in China. Although there was discussion that your agency had put out some sort of notice of possible problems with these in the fall of 2011, neither my wife nor I had heard or read any information on this situation. We would certainly have discontinued giving these had we known. Whether stopping at that point after years of consumption might have enabled her survival of the damage is anyone's guess.</p> <p>These products were purchased almost every time from Wal-Mart stores.</p>

<a href="#">EON-85634</a>	3/14/2012 14:45	waggin train jerky treats	Upon reading the article of the problem with the Waggin Train dog treats, I realized what happed to (b) (6) in November 2011 was possibly a result of ingesting these treats. The week of November 12th or so I purchased the usual 40+ lbs of Purina Dog Chow at our local Walmart and discovered upon opening it there was a pack of the Waggin Train Jerky treats located inside. I do not remember which day around the week of November 27th I gave these treats to my two dogs. On Sunday November 27th, both dogs appeared to be fine then about 5:00 p.m. I heard (b) (6) crying and he was having difficulty getting up and appeared to be in pain in his hind area. On Monday morning November 28, 2011 he was still sick and we had to lift him to get him in the car and take him to the vet. He was examined by our vet with blood drawn and xrays, the only conclusion that could be arrived at was a possible intestinal infection. (b) (6) was given antibiotics and other medication and came home. By Tuesday he was able to get up and down some but was still sick. He remained lethargic and I had to physically feed him the next three days and give him his medicine as prescribed by the vet. Finally by Friday, December 2 or so he appeared to be on the mend. By Saturday he was starting to eat on his own and finally started getting up from his bed and laying in the yard with our other dog. I feel certain that in light of his symptoms and what I have been reading regarding these dog treats, this may have been the cause of his mysterious sudden illness. I am thankful he has recovered and I feel that if these treats are the result of these types of problems then measures should be taken to withdraw these products from the shelf. (b) (6) is a large dog and our other dog, his sister, who ingested these treats is larger than he is, which may explain why she did not get sick herself and why he was able to recover. It is my understanding the smaller dogs who have ingested these products and fallen ill have not been able to fight off the illness and the results have been fatal. I pray the more information acquired about this will result in permanent measures being taken to keep this from happening again.	7	Years	Mixed (Dog)	Dog	75	Pound
<a href="#">EON-85627</a>	3/14/2012 14:15	Milo's Kitchen Chicken Jerky	But we bought a ton of Milo's chicken jerky treats months ago because they were a new product and we got a great deal on them with coupons. We give our dog 1 per day as a treat. We bought them because he has a sensitive stomach and they were all natural with few ingredients. Our dog for some random reason has been throwing up since October. Sometimes weekly, daily, it depends.  I was not aware of this problem until I read the article on MSNBC.com yesterday. But issues have been reported since November. I've been potentially poisoning my dog since then. WE still have 5 bags of these treats. We will throw them away! I hope our dog does not get kidney issues or die and i hope these products get recalled.	11	Years	Beagle	Dog	135	Pound
<a href="#">EON-85623</a>	3/14/2012 14:00	Dogswell Happy Hips Chicken Breast Glucosamine and Chondroitin	I gave both dogs the Happy Hips chicken jerky treats in November, 2011. By Thanksgiving (b) (6) was sick. He lost weight, became weak, drank and urinated more frequently and was throwing up with little to no appetite. Both dogs saw their vet the last week in October and were deemed healthy for their ages with no unusual findings. Took him to the vet the first week in December where they ran blood and chem panels and diagnosed him with acute renal disease. My vet was baffled about what could have possibly sent him into an acute renal situation so suddenly.	13	Years	Terrier - Yorkshire	Dog	8	Pound

<a href="#">EON-85622</a>	3/14/2012 14:00	¿Canyon Creek Ranch (Nestle Purina) ¿Milo¿s Kitchen	Please start making pet food companies plainly label where the food is coming from.. I will not buy anything imported from China due to the health issues it gives my dog. I try to limit the amout of by product. I give her sweetpotatoes or yams and duck. she has has multiple skin issues and allergies type shedding... once I removed Canyon Creek duck/yam treats and started using products made in the US.. all issues have stopped. These products are still on the shelves... very misleading						
<a href="#">EON-85621</a>	3/14/2012 14:00	Waggin Train Jerky Treats Duck Dog Treats	(b) (6) ate duck and chicken treats from Costco for the last 4 or 5 years. As of late, she had increased her consumption of them from one or two in the morning to begging for them, often successfully, constantly. This winter she began to show signs of illness, I thought she had been injured jumping out of our truck. In January she was refusing food and mostly sleeping, for a couple of weeks before I took her to the vet. I was told she was in the advanced stages of kidney failure. The vet kept her for 2 days to administer tests and IV fluids. She had to be revived at one point, I was told. I took her home after she was stabilized. She was still unable to eat much and mostly slept. She was very weak/shaky and in a fragile condition. I was given an IV kit and instructed to give her fluids every other day, which I did several times. She lived another 6 weeks approximately after that. She never recovered fully after that.	12	Years	Crossbred Canine/dog	Dog	12	Pound
<a href="#">EON-85617</a>	3/14/2012 13:45	Canyon Creek Ranch Brand Home Style Ham	(b) (6) became sick within 3-5 hours after having a single slice (about 1.5 x 3") piece of Canyon Creek Ranch Homestyle Ham product. Symptoms included trembling, severe pain reaction to light touch, yelping and lethargy. Subsequently, he was treated the following day at a veterinarian's office (b) (6) The veterinarian did blood work, but levels appeared normal. The dog eventually recovered after being given IV fluids, but remained weakened. Since that time, there have been several more occurrences of a less severe nature, though still characterized by pain sensitivity, lack of desire to eat, and lethargy.	3	Years	Shepherd Dog - Australian	Dog	50	Pound
<a href="#">EON-85609</a>	3/14/2012 13:15	Petshoppe chicken jerky premium chicken dog treats	I had been giving the dog a particular brand of chicken jerky and decided to try another brand I found in Walgreens. The brand is Petshoppe premium chicken dog treats. I only give the dog one treat in early afternoon per day. By the next morning (b) (6) had a very bad case of diarrhea and lethargy. He was also urinating much more frequently. It was probably a week before I realized he began getting sick only after I began giving him this product. I discontinued use and he has been getting better slowly.	4	Years	Shih Tzu	Dog	18	Pound
<a href="#">EON-85608</a>	3/14/2012 13:15	Waggin' Train Jerky Tenders	Dog was adopted in June 2010. His kidney function was evaluated in July 2010 and serum creatinine was normal. We fed Waggin' Train Jerky Treats at the rate of approximately 2 treats per day. In April 2010, his serum creatinine was noted to be above the normal range. Serum creatinine was remeasured a few months later, and remained high. Approximately January 2012, we ceased feeding the Waggin' Train Jerky Treats, or any other jerky treats.	10	Years	Beagle	Dog	40	Pound

<a href="#">EON-85604</a>	3/14/2012 13:00	kingdom pets chicken jerky	(b) (6) would not eat, was very withdrawn & went into extreme pain in hindquartes -tried to vomit . She was treated with antibiotics & improved to some degree. At that time I again fed her the chicken jerky treats (not knowing of course!) she was sick again within a matter of 5 days. she went back to the veterinary,back on antibiotics for almost 2months! Almost to the point of being dead -I saw on the news about the chicken jerky making dogs sick. continued with the antibiotics & she pulled thru. called the vet & the store where we bought the product.	5		Cattle Dog - Australian (blue heeler, red heeler, Queensland cattledog)	Dog	70	
<a href="#">EON-85598</a>	3/14/2012 12:45	Chicken Jerky	(b) (6) got chicken jerky as a Christmas gift. Because he loved it so much, I started giving him a strip each morning prior to leaving for work. He eventually got to the point of having accidents in the house every day. At first I could not figure out what was upsetting his stomach. I tried changing his food and limited the number of treats he got every day. I was still giving him his chicken jerky in the morning. It was not until I took away the chicken jerky that his stomach settled down and he has not had any issues since.	5	Years	Terrier - Cairn	Dog	15	Pound
<a href="#">EON-85597</a>	3/14/2012 12:45	Milo's Kitchen home-style dog treats	I purchased a brand new puppy from a very well respected breeder from New York. I paid \$1,800 for this pup and another \$300 to have it shipped to me. I received this puppy on March 4, 2012 from the (b) (6) . Starting right away, I began to use Milo's chicken strips to reward him for his potty training. By Wednesday, March 7, I started getting a little concerned about them so I withdrew them and went to Petco and purchased different training treats. On Thursday, March 8th, he began to act lethargic and sickly. That is when the vomiting began. He continued to throw up and could no longer hold down fluids or food. I took him to my vet on Friday, March 8th. They were very concerned for his health. They took Xrays and ultrasound looking for a possible blockage of his stomach. The could find nothing so they sent him home with special food and told me if he threw up anymore to call them in the morning. I slept with him that night and he continued to throw up and no hold anything down. In the morning I contacted my vet again to inform them he was still not doing well. They were very concerned for his health and suggest the emergency clinic in (b) (6) . I took him there on Saturday morning. When they got him, he was severely dehydrated and very very sick. They immediately put an IV in him and started fluids. Did Xrays and other blood work. After a nights stay in basically "intensive care", he was doing better the following day. He was able to return to our home on Sunday, March 11th. I am convinced beyond any doubt that the chicken strips are what made my pet deathly ill. He is doing much better now. Still has some weight to gain but I believe he will make a full recovery. In this process of saving my Standard Schnauzer, I have approximately \$1,920 in veterinary bills. I hope someone will be able to have these pulled from the shelves as soon as possible. If you want to contact me, please feel free to at any time. Thank you!	11	Weeks	Schnauzer (unspecified)	Dog	10	Pound

<a href="#">EON-85596</a>	3/14/2012 12:45	waggin train wholesome chicken jerky tenders	In January 2012 I woke up to find my 4 year old Dacshund had been extremely ill during the night. He was extrmeley nausiated. He had thrown up several times and he had diarhea. this dog has not used the bathroom in the house in over three years. I had my mother take him to the vet and she diagnosed him with a kidney infection and put him on antibiotics. He took the entire round of antibiotics and seemed fine. Approximately a week after finishing his antibiotics i woke up one morning to find the same thing. He had been sick during the night. My mother again took him to the vet and she said that maybe he had a pancreatic infection and put him on some stronger antibiotics and some steroids to help build his immune system. While on these drugs he even bit my father. he has never even threatened to bite let alone someone that has been around him his whole life. He seems to be doing well now. I have wondered what caused all these pblems then today I read on the msn homepage about waggin train jerky treats causing kidney problems. This dog has eaten waggin train products on a regular basis for about 3 years. I came home earlier and threw two bags of these treats away. I have been purchasing these in a price range of about a dollar and ounce only to find out that this almost killed the family pet. I am very disappointed and very upset over this. I will also be contacting the company. Thanks for your time. (b) (6)	4	Years	Dachshund - Standard Smooth-haired	Dog	28	Pound
<a href="#">EON-85587</a>	3/14/2012 12:30	Milo Chicken Jerky Treats and Wagon Train Chicken Jerky Treats	We had been feeding (b) (6) Milo Chicken Jerky treats and Waggon Train Chicken Jerky treats for over 2 years - on Feb 10th,2012 (b) (6) acted as if she was ill - I took her to the vet and they felt that she might have a urinary infection - provided IV steroids and antibiotic, and oral antibiotics and sent her home. Blood work was performed but had to be sent out - results were due back on that Monday (b) (6) grew progrssively worse over the weekend and we rushed her to emergency vet care Sunday afternoon where she died within 15 minutes of arriving. She had totally juandiced and was in systemic shock according to the emergency vet.	3	Years	Wild Dog	Dog	92	Pound

<a href="#">EON-85586</a>	3/14/2012 12:30	Sorry return package to Costoc	<p>On February 3rd, 2012, I took (b) (6) into the vet (b) (6) ) to get her teeth cleaned. When they tested her blood, they found her liver level were in the high 400's. They took more tests and sent them into the lab; the results from the lab showed her levels were even higher, but she did not test positive for any of the liver diseases. They put her on antibiotic and a pill for liver disease.</p> <p>Once we found out her liver levels were so high, we took her off the Chinese chicken treats that we purchased from Costco. And, spoke to a manager at the store to inform them of this concern. Not sure if there was any follow up. She was eating at least one of the chicken treat a day, sometimes even two a day. Her brother also had higher than normal liver rates, but still in the lower to mid 100's. As he is double her size and it didn't affect him.</p> <p>After four weeks, March 6th, 2012; her livers levels have return to the low to mid 100's.</p> <p>In our investigation around the (b) (6) area; we could not find a lot of pet stores selling US brand, and those few US brands that we did find -charge an amazing amount for their treats. This is a very serious issue and I believe we need to take a more active approach to banning these treats.</p>	5	Years	Chihuahua	Dog	6	Pound

<a href="#">EON-85545</a>	3/14/2012 10:45	Waggin Train Jerky Tenders	<p>The dog is a registered maltpool (didn't see listed above). While I'm saddened to see what has happened with the product, I am just glad to know what was the cause of what happened to him. (b) (6) was perfect before this started. He began acting so bizarre early last fall. He couldn't sleep. He would just lay down at night and get right back up. He would walk all over the room then try to go back to sleep, but would immediately get back up. When getting up on the bed, he would just walk around in circles. He walked around like he was confused all day. When he finally could get to sleep it was like he died. As soon as he got back up, it started again. This is odd....when that happened, he also started pawing at things - like a cat! He did this for about 6-8 weeks and we honestly thought we may have to put him down. He was miserable! Since that time, he has began having bowel movements in the house. He never had those before. It's sad, because we take him out at the same times, give him the same food, etc. He also has occasionaly "leaks" which he never had before.</p> <p>I ended up taking him to his vet. She thought maybe he need prozac. But that made the problem MUCH WORSE. So we took him off that.</p> <p>He is able to rest now and isn't walking around confused anymore. However, the pawing, indoor bowel movements, and occasional "leaks" still occur.</p> <p>NOTE: my other dog, (b) (6), is a registered cockapoo. He is 12 and weighs 16 pounds. He was given the same product. However, he didn't eat them as much. He also acted strange during that time and also being urinating in the house. HE NEVER did this before. He is now fine. However, we now have both dogs in our room overnight to avoid problems. However, (b) (6) still will "leak" occasionally at night.</p> <p>These issues may not be related to this product. But they had them on a regular basis. However, when I saw the report back the first of the year, I quit giving them Wagon Train products and switched to another brand that was not listed.</p> <p>ALL DATES ARE ESTIMATES. With 4 kids, my dad having a brain tumor, and the holidays, keeping up with the dogs was further down on my list. Hope this helps you with your research.</p>	4	Years	Mixed (Dog)	Dog	8	Pound

<a href="#">EON-85543</a>	3/14/2012 10:30	Waggin' Train Wholesome Chicken Jerky Tenders	I had been feeding my 2 dogs the Waggin' Train Wholesome Chicken Jerky Tenders for the last year or so. We purchased the large bag every 2 weeks from our local Wal-Mart in (b) (6) (b) (6) (who ate more than his share of these) had never been sick a day in his life. 5 weeks ago, he stopped eating, was very lethargic, and was vomiting and sleeping a lot. After a few days of this, I figured it wasn't a lizard or something he ate in the yard, and took him to our vet. The vet reported that he had, what he considered, "stomach tumours like he's never seen in any dog that has come into his practice, and his kidney's were shutting down." (b) (6) had to be put to sleep right away; he'd just turned 13 in January. In the beginning of the year I'd heard on the news that these treats were bad and pets everywhere were being sickened by them, so I did not purchase them again. However, I have to wonder, how could such a healthy animal suddenly present with massive stomach cancer and kidney failure out of nowhere? Did these treats play a part in him becoming so ill in such a short time? I do not have lot #'s or any of that information now; it's too late. But I thought I should report this since he was eating them and then became gravely ill. And of course, we are completely devastated by his loss.	13	Years	Other Canine/dog	Dog	80	Pound
<a href="#">EON-85542</a>	3/14/2012 10:30	Waggin Tail Chicken Jerkey	Our family dog (b) (6) suddenly became lethargic, unable to eat, and under her eyes was swollen. My mother took her to the vet and went through a battery of tests. The next day they said her calcium levels were extremely high and so they scheduled an ultrasound. The next day they called my mother and told her that she has kidney failure. Now she is back at my mothers house but is only getting worse. She won't eat. She no longer wants to go for a walk, which was a daily thing for her. I believe this was caused by the treats she's been fed over the past couple of years. Waggin Tail chicken jerkey. Her symptoms sound just like so many other poor dogs who suffered through this. I hope that these "treats" will be recalled as soon as possible. Before more dogs are lost.	9		Mixed (Dog)	Dog		
<a href="#">EON-85532</a>	3/14/2012 9:45	Breathies Chicken Breast Jerky Treats with Mint and Parsley by Dogswell	I gave my 22 lb. dog 1 Dogswell Breathies Chicken Strip on 2/25/12 in the early evening, and 1 strip the next morning, around 10 am. By evening, he had non-stop diarrhea and vomiting, which continued for 2 days, with a third day of residual sluggishness. There had been no changes in my dogs diet (he gets the same half can of Wellness brand wet dog food--duck flavor--every day, and he had been given no other treats or scraps. I threw away the product and wrote to the store I had purchashed them from to make them aware of a potential problem.	7	Years	Poodle (unspecified)	Dog	22	Pound
<a href="#">EON-85527</a>	3/14/2012 9:30	Waggin Train Jerky Tenders	Some vomitting, off their food but still drinking water	4	Years	Shih Tzu	Dog	15	Pound
<a href="#">EON-85526</a>	3/14/2012 9:15	Waggin' Tails Chicken Jerky	Shortly after we began giving my 6 year old Pomeranian Waggin' Tails Chicken Jerky she began to exhibit signs of being ill. She first began with increased thirst and urination. She then lost control of her bladder and was unable to keep her food down. At that point she was taken to our vet and when labs were drawn it was determined that she was in severe renal failure. We took her to a specialist who told us that she was too far gone at that point and it was best to euthanize her. She went from a healthy 7-8lbs to about 4lb within a 2-4 week period. At the end of her life she was in pain and she was suffering. She died a horrible death.	6	Years	Spitz - German Pomeranian	Dog	7	Pound

<a href="#">EON-85522</a>	3/14/2012 8:00	Wagon Train Jerky Tenders	The only treats we ever fed our dogs is a milk bone and the Wagon Train Jerky Tenders. We would give them about One pcs a day. Two Sundays ago we were down to the end of the bag and we gave them the last of the bag which was a couple of small pcs. well a day later my male had diarrhea on Monday and then the following night he vomited several times all over the room and kept vomiting until 5:30am. We noticed that he had accident in the hallway and my wife went to clean it up and noticed blood. That morning we took him for a walk and he continued to poop pure blood and no poop. The diarrhea didn't even had a stool smell. Called the Vet that morning. He was admitted Tuesday and had to stay until Thursday afternoon. The condition was called Hemorrhagic Pancreatic with gastroenteritis causing him severe vomiting and diarrhea. Not to mention we almost lost him and a bill of over \$900.00. Even after taking him home he still had diarrhea for several days. Finally yesterday the 12th of March is when the stool became full.	11	Years	Spaniel - King Charles Cavalier	Dog	21	Pound
<a href="#">EON-85518</a>	3/14/2012 3:30	Waggin Train Wholesome Chicken Jerky Tenders	She began throwing up for no known reason	1	Years	Mixed (Dog)	Dog	18	Pound
<a href="#">EON-85517</a>	3/14/2012 3:01	Kingdom Pets Chicken Jerky	We have fed our dog Chicken Jerkey as a treat once a day for about two years. They are always purchased at Costco and in the past months Costco changed brands and since then our dog has had three events of vomiting and just this past time she had vomiting and dyaria. I read the article about the problem with chicken jerky on a friends facebook page. I hadn't heard this before now. I have thrown out all treats from china, and hope this will be made more well known to pet owners.	7	Years	Shih Tzu	Dog	12	Pound
<a href="#">EON-85516</a>	3/14/2012 3:01	Waggin Train Chicken Jerky Treats	<p>First, I must state that I only give my dog food that I make. It is good enough that I would even eat it.</p> <p>I make her a mixture brown rice, chicken, vegetables, and oats.</p> <p>I added Waggin' Train Chicken Jerky treats to her diet and she started feeling very lethargic, and would not eat.</p> <p>I started giving these once a week for the past 5 to 6 weeks. This week we gave her treats two days in a row.</p> <p>The next day she threw up. She threw up a couple of weeks ago too which I thought was strange. When we would give her the treat she would get 3 pieces for her 90lb weight. This is definitely making her sick. She has not been her normal self.</p> <p>I even took her into the vet a few weeks ago to have her blood drawn to see if there was anything wrong. They could not see anything from the blood panel results.</p> <p>Please investigate this problem. She is a great example of being a dog who is on great high quality food, so a controlled substance, and then we gave her treats which she has reacted very negatively towards.</p> <p>The quality control on this product is NOT good. Random batch testing needs to be done.</p>	10	Years	Retriever - Golden	Dog	90	Pound

<a href="#">EON-85515</a>	3/14/2012 3:01	Waggin' Train Wholesome Chicken Jerky Tenders	The last few weeks before I had to put her down, she was vomiting constantly, she stopped eating most of her food, she was almost exhausted in a 5 minutes walk at the point of not moving at all, because of those reactions we took her to the vet for a check up, the doctor said when dogs get sick they eat anything to mitigate the discomfort they feel, so, my dog eat a rock and that's when the doctor thought it was something more serious, after he removed the rock noticed her kidney wasn't working right, after a few days of fluids and not improvement the doctor told us her kidney were shutting down that's why she wasn't getting any better.	11	Years	Mixed (Dog)	Dog	50	Pound
<a href="#">EON-85514</a>	3/14/2012 3:01	Waggin Train Jerk Tenders	Vomitting, diaharria bloody stool, not willing to eat any thing for tree days.	10	Years	Chihuahua	Dog	10	Pound
<a href="#">EON-85513</a>	3/14/2012 3:01	Waggin Trail Jerky Tenders Duck Dog Treats, Waggin Train Chicken Jerky Treats	All three of my dogs have been eating the Waggin Train Chicken Jerky Treats that I purchase from Wal-Mart, Walgreens and Petsmart. There have been no issues until this year. In January, my Lhasa, (who was in very good health for her age, and only has some disc issues in her back) Became lethargic, and began throwing up and having diarrhea..she would not eat, but did drink water.. she began sleeping excessively and had no interest in anything.... I took her to the Vet, and she was tested, and the Vet informed me she had liver disease. Her count was in excess of 1000. The Vet gave me some medication and I put her on a different diet, and stopped all Chicken Jerky treats.. she has improved, until this week. I gave her some of the Jerky Treats and she has been throwing up several times per day. She's not eating, and is very sleepy.. Not as bad as it was, but definitely sick again. This began within a day or two of feeding her the treat. Also, my Schnauzer who is about 6 years old and ate the treats.. also began throwing up... and my mini-poodle has thrown up, but he is not as bad as the other two dogs.	13	Years	Lhasa Apso	Dog	15	Pound
<a href="#">EON-85512</a>	3/14/2012 3:00	chicken-flavored meatballs	<div>(b)(6)</div> was given chicken-flavored meatballs purchased at a Big Lots by his dog sitter in our absence. When we returned home, one night later he was in some distress--almost seizure-like event. Took him to the vet the next day and vet diagnosed - through blood work - salmonella caused by the chicken-flavored treats. He ran a 105 degree fever for two days. I never knew that you could feel a dog's fever by feeling his forehead.  He was given an antibiotic shot and two prescriptions for antibiotics. Did not do any good and had to be hospitalized and put on an IV. His throat was so sore that he could not swallow and drooled. He also could not bark. He was so sick that if he were a cat he would have lost at least two of his lives.	10	Years	Beagle	Dog	26	Pound
<a href="#">EON-85511</a>	3/14/2012 3:00	Milo's Homestyle Chicken Meatballs	Dog began to retain unusual amount of fluids which had to be drained with follow up visit again for extreme fluid retention. On one visit 2 liters of fluid were drained. Veterinarian ordered some tests, took x-rays, etc. but could not reach conclusive diagnosis other than our dog was retaining fluid. She was placed on medication which did not provide relief and eventually began vomiting, had difficulty breathing and moving about. She eventually reached the point where just sitting up and attempting to walk brought on bouts of vomiting.

<a href="#">EON-85510</a>	3/14/2012 3:00	Waggin Train Jerky Treats	The only specifics I can give is that the Waggin Train Jerky Treats were a favorite of my dog and she had them many times over the past 2-3 years. About 3-4 months ago I noticed that she would have blood in her stool. I figured she wasn't chewing them well or they weren't digesting properly and causing issues so I stopped giving them to her. Yesterday I took my dog to the vet and she was having liver/kidney problems and I ended up having to put her down. I just read the report about these treats on msnbc.com today and I feel very much like they are connected. I will follow up with my vet tomorrow and give them the information as well even though it is too late	8	Years	Hound (unspecified)	Dog	66	Pound
<a href="#">EON-85509</a>	3/14/2012 3:00	Chuck Waggin Chicken Jerky Treats	(b) (6) was a very healthy 4 year old Bracco Italiano until I started feeding him the waggin train chicken jerky treats that I purchased at Costco. First of all the FDA needs to ask, "how can chicken be so inexpensive"? I get plastic products from China..but food...chicken...really? These were the only treats that (b) (6) received. In April he started throwing up and dripping blood from his penis. The vets could not figure out the cause for the symptoms in an other wise healthy dog. There was not history of kidney failure or illnesses with any of his siblings or the blood line. His blood line included World Champions including his Mom. The vet recommended that (b) (6) be neutered and perhaps that would stop the bleeding from his penis after being on antibiotics for a few weeks with no improvements. When the vet went to neuter (b) (6) it was found that he was in kidney failure. He was immediately hospitalized to try and flush the kidneys but there was no improvement. I took (b) (6) to the (b) (6) hospital to see if anything could be done. The vets there also were puzzled by how a 4 year old dog could be kidney failure. My instincts told me it was the Waggin Train treats and I am glad other consumers are coming forward to put the pieces of the puzzle together. An otherwise healthy 4 year old male dog does not just develop kidney failure. Sadly, I lost (b) (6) to kidney failure 3 months later after spending \$15,000 in vet bills over \$3 treats!!!! I am certain it is these treats that took the life of my beloved friend and companion and I only hope that the FDA has the balls to do something about it! It would be nice to see our Government stand up for our pets! I would be happy to share all medical reports!	4	Years	Pointing Dog - Italian	Dog	80	Pound
<a href="#">EON-85508</a>	3/14/2012 3:00	Canyon Creek Ranch Brand Natural Chicken Tenders	In january of 2012, our young dog experienced lack of appetite (he refused even treats, which was very unusual, he normally guards his food), vomiting, diarrhea, lethargy, weight loss. He used to love the chicken jerky, ate 4-5 pieces per day as a reward. But he began to refuse them and so we knew something was wrong. Took him to the vet and she ran some tests, including xrays and bloodwork, barium series; she said he had ileus but due to unknown cause. Blood work appeared normal and barium series showed no blockage. After 4-5 days, he still would not eat and was deteriorating; the vet did exploratory abdominal surgery and found no blockage, but took an intestinal biopsy, which later suggested inflammatory cell infiltrate and enlarged/swollen lymph nodes, and the vet diagnosed it as inflammatory bowel disease. (b) (6) has since recovered and only eats a special veterinary prescription diet ( Purina EN) and is doing well. But eats no treats at all, only the prescribed food. The treats he ate were Canyon Ranch brand, lot number G1CA5144A.	15	Months	Terrier (unspecified)	Dog	55	Pound

<a href="#">EON-85507</a>	3/14/2012 3:00	Canyon Creek Ranch Banana & Chicken Wraps (also purchased their chicken/apple and chicken/PBJ treats), Waggin Train Jerky Tenders	Symptoms ranged from vomiting and indications of nausea (lip-smacking, repeated swallowing) and subsequent diarrhea, sometimes bloody, to the addition of shivering/shaking, crying/whining, obvious weakness and lengthy sleeping. He also would not eat anything, and consumed very little water. I've taken him to the vet several times over the last two years; he was in very serious condition, and the last time he was admitted into the animal hospital for a total of about 30 hours. Extensive tests were performed, but no definitive conclusions were reached. (About \$2000 total in vet bills over the last two years.) I was beginning to suspect it might be these chicken treats, and then saw the article on the MSNBC website. In the beginning, about two years ago, I'd purchased only the "Waggin Train" treats from Costco, and about a year ago I stopped giving him those. I then gave him the "Canyon Creek Ranch" chicken/banana, chicken/apple and chicken/PBJ treats. (Beginning about a year ago.) At first the "Canyon Creek" treats didn't seem to upset him, but one day I'd given him several because we were out away from home for a long time and he was hungry, and he was sick for several days afterward with similar symptoms.	5	Years	Poodle - Miniature	Dog	20	Pound
<a href="#">EON-85506</a>	3/13/2012 23:45	Wagon Trail chicken jerky	I just read an article about potential problems from these jerky treats and want to express that I have been feeding them to my dog for the whole time since 2007 and have no adverse problems. I have followed the package instructions. I also, do not feed any other type of treat to my dog. Check what other treats are being fed to these dogs as well as whether they are feeding other things or leaving food out where it can go rancid. Please do not remove these from the stores.						
<a href="#">EON-85505</a>	3/13/2012 23:45	Nutro Natural Choice Venison Meal and Whole Brown Rice Formula	We have been feeding (b) (6) Nutro Natural Choice Venison Meal and Brown Rice Formula for several years. We opened a new bag of dog food on March 7, 2012. She seemed to be nauseated.  Over the past weekend, she was increasingly ill -- vomiting, lethargic, uncomfortable. We took her in to the vet yesterday (3/12), and the x-ray revealed no foreign body. An ultrasound showed free fluid in the abdomen and an irritated pancreas.  (b) (6) is spending her second night at the vet's office while they stabilize her and determine the cause of her pancreatitis. I am concerned that the food may be the culprit.	9	Years	Retriever - Labrador	Dog	67	Pound
<a href="#">EON-85504</a>	3/13/2012 23:15	Kingdom Pets Chicken Jerky	Shortly after we got our dog, he began throwing up, for two years he randomly vomited. After two and 1/2 years, of this and not being able to find a solution, he started with bloody diarrhea, and we stopped all food. We gave him a liquid diet, then rice, and slowly introduced food, adding one snack at a time. The only thing we never added back was the Kingdom Pets Chicken Jerky, which he had been getting intermittantly as a snack since shortly after we got him. We had adopted another dog several months before, and she immediately threw up after having this same snack, so we knew she had a problem with it.	4	Years	Mixed (Dog)	Dog	100	Pound

<a href="#">EON-85503</a>	3/13/2012 23:15	Waggin' Train Wholesome Chicken Jerky Tenders Chick Dog Treats	<p>After feeding our dog, (b) (6) , Waggin' Train Wholesome Chicken Jerky Tenders (Chicken Dog Treats), we noticed loose, runny stool in his bowel movements. Normal bowel movements for (b) (6) are solid. His bowel movements were more frequent and appeared painful.</p> <p>We took (b) (6) to the veterinarian and he was prescribed Metronidazole (250 mg) -- the doctor then bumped him up to 500 mg on our next refill because he was not improving after the first week of doses. We are now finishing his refill doses.</p>	3	Years	Boxer (German Boxer)	Dog	58	Pound
<a href="#">EON-85502</a>	3/13/2012 23:00	Trader Joe's Beef Liver Begging Treats for Dogs	After purchasing Trader Joe's Beef Liver Begging Treats for Dogs, our little dog, (b) (6) , began throwing up within a day. The vomiting reached 10 times, so we brought her to the vet, where she started vomiting and expelling blood. Her blood pressure dropped to critical levels. They hooked her up to 3 IVs and gave her medication to raise her blood pressure. She's still in the hospital after 2 days. Her blood pressure has finally started to stabilize and the vomiting has stopped. Trader Joe's Beef Liver was the ONLY new food item introduced to her diet. And she almost died. The doctors and nurses said they'd never seen this much blood from such a little dog. They are currently trying to ween her off the stabilizing medicines to see if she can maintain the blood pressure on her own, so we don't know if she's going to make it. The doctors don't know what caused this dire state, but they said their best guess was an extreme allergic reaction or poison. Since these treats are the only new dietary item, I feel it's important to raise a flag on Trader Joe's Beef Liver Begging Treats. I hope my dog survives, and I hope no other dog has to go through what she's been through.	2	Years	Chihuahua	Dog	13	Pound
<a href="#">EON-85501</a>	3/13/2012 22:45	waggin train jerky tenders-chicken	(b) (6) is a dog that thrives on taking her morning walks with me every morning. Because she has had gas so much we decided to take her off beef and do turkey and chicken. We were giving her beggin strips. About 7 months ago we changed to waggin trains chicken jerkey because we were not doing the beef. For the past severa months, she has deveoped a neurologica jerk as if she is having a stroke, or a seizure. To make a long story short, last week we went for our morning walk and she was no where to be found. (we live in the country) All of a sudden she came running down the street with an unsual cough (life a person with copd). she was so happy to see me, but as she approached, she fell out, could nto get her balance, turned over as if she was stroking out. She looked at me as if to say .."what is happening to me?" i grabbed her up, ran back home with her in my arms because i thought she was going to die on me. My husband took her to the vet hospital. they could not find anything wrong and could not pinpoint the problem. our vet asked many questions trying to narrow it down. one question asked was had she beeb given anything toxic or eaten anything toxic? we , at the time said no. she is very finigy and only eats little ceasars, purina one and an occassional treat-chicken waggin train. we were so glad to see this article on msn becaues we have been baffled by this sudden onset of our dog. she continues to have these jerks everyday. please keep us informed via emal or telephone. we are praying that (b) (6) pulls out of this. we will call our vet tomorrow and alert them as to this unidentified illness so that they can put their pet owners on alert. for now we will hold on to the bags...because we have two..but we will never give her another one of these treats..ever. we just hope she pulls through. We tried differnt methods from IV treatment and finally made the call to put her to sleep.	15	Years	American Pit Bull Terrier	Dog	54	Pound
<a href="#">EON-85499</a>	3/13/2012 22:45	WAGGIN TRAIN Jerky Tenders(Wholesome Chicken)	Both dogs are in perfect health. One is 1.5 yrs and the other is 2.5 years old. They have eaten bones, treats, dog food and no problems. They both see a vet regularly and have had no problems, EVER. Until we gave them Waggin Train chicken jerky. After a 1-2 weeks of them having the jerky, both dogs were throwing up on a regular basis. We took them to the vet and had many tests done to see if they had a parasite, etc. Nothing was found. We stopped giving the dogs the treats and after a week, no more throwing up. I'm sorry, but if anyone says these treats are not dangerous, I will tell them they are lying. There is nothing normal about 2 healthy dogs throwing up every day. And when we took the Waggin Train treats out of their diet & gave them regular milk bones, both dogs were back to being fine. THERE IS SOMETHING WRONG WITH THESE TREATS!!!!!!	1	Years	Spaniel - King Charles Cavalier	Dog	25	Pound
<a href="#">EON-85498</a>	3/13/2012 22:15	Waggin Train PBJ	I gave (b) (6) a couple of Waggin Train treats before bedtime. He woke me up twice by throwing up in the bed. Later in the day, he threw up 3 more times. He acted lathargic and refused to eat or drink the whole day. He is usually very active but all he wanted to do was lay down all day. I was going to call the vet the next day he seemed back to his normal self the next day.	4	Years	Schnauzer (unspecified)	Dog	25	Pound
<a href="#">EON-85497</a>	3/13/2012 22:15	Waggin Train Jerky Tenders, Milo's Kitchen	dog started vomiting and had blood in stool. Took dog to vet and they initially treated her for a parasite and started her on medication. Her fecal sample came back negative and she continued to vomit and became lethargic. Took her back to the vet and they ran x-rays which came back clear and did a blood test. The results of the blood test indicated kidney failure. Took her to a specialist hospital and was admitted and put on 24 hour a day IV fluid. After a week, it was determined that her kidneys could not be saved and her counts were not coming down and she was put to sleep.	8	Years	Mixed (Dog)	Dog	40	Pound
<a href="#">EON-85496</a>	3/13/2012 22:15	Milo Chicken Jerkey	My dog was given Milo chicken jerkey treats and loved them. Had a couple on second day and on the 3rd day. I noticed that my dog had a "very gaseous gastrointestinal tract awhile after eating on each on the 3 days. All his other food and treats were the usual ones. I therefore gave no more Milo treats, and there has been no recurrence. I am quite strict about buying safe and healthy foods, but on this occasion I allowed for "processed in China". I am grateful that my dog is healthy, and I have returned to never buying foods processed outside the USA.	10	Years	Basset - Artesian Norman	Dog	55	Pound
<a href="#">EON-85495</a>	3/13/2012 22:00	Waggin Train Wholesome Chicken Jerky Tenders	He developed a kidney/bladder infection. He was given antibiotics but they didn't help. He refused to eat his regular food (chicken and rice and chicken FreshPet). He began drinking water excessively and has had frequent accidents in the house (we have a doggy-door and he has never done this before) The vet gave him a different kind of antibiotic and we are waiting to see if this helps. He is still drinking a lot of water and peeing a lot. He was tested for diabetes which came back negative. He is eating again but refuses to touch any made with chicken.	16	Years	Mixed (Dog)	Dog	50	Pound

<a href="#">EON-85493</a>	3/13/2012 21:45	Waggin Trails Chicken Fillets	We were alarmed when our perfectly healthy dog awoke in the night numerous times with unexplained bloody discharge/diarrhea. We took her to the vet twice and they did an exam, including a rectal exam and UTI testing to find nothing. Described that she must have some type of irritation to our intestines on the second visit. Originally, we suspected a UTI because she had more like bloody discharge. She was given the same dog food she had been eating her entire life, and nothing else except we had just started her second bag of the Waggin Train Chicken Fillet Dog treats purchased at Sam's Club. She had no exposure to unsupervised time outside where she could have eaten other things. During the few months in between the bag of treats she had no incidents. As soon as we started the second bag of treats, it happened again. Total problematic events was 4 times. I started to do some internet research and came across one of the first articles published about the possibility of chicken treats causing incidents, and immediately stopped giving the treats to the dog. She had no further incidents and seems to be in good health, although we've had no doctor's assessment since making this change. We believe the first bag was purchase at Sam's Club in (b) (6) in March or April 2011, and the second bag was purchase at Sam's Club (b) (6) in July or August, 2011. We have no doubt that these treats caused these adverse health problems.	2	Years	Retriever - Golden	Dog	35	Pound

<a href="#">EON-85484</a>	3/13/2012 21:00	Waggin' Train Wholesome Chicken Jerky Tenders	<p>We began feeding our dog Waggin Train chicken treats shortly after we got him in July of 2006. We fed these treats to him daily up until November of 2011 when I came across an article online regarding mysterious illnesses in dogs. I have summarized (b) (6) battle with renal failure below and have supporting vet and lab results that track the progression of his kidney disease since diagnosed in July of 2010. (b) (6) was about 4 years old when we determined that kidney disease was what was causing his weight loss and passed away a couple months before he would have turned 6.</p> <p>We took our dog into the vet on 7/21/2010 because we were concerned about weight loss that he was having. We noticed that his spine had become more pronounced over the last 4 to 6 weeks. Prior to this visit our dog had been healthy and active. There were not any alarming signs to the vet that anything was wrong, but to be safe our vet suggested having a more comprehensive test performed. The test results showed that (b) (6) was having a significant protein loss in his urine. (b) (6) ) prescribed Enalapril and that we monitor and recheck the urine periodically. (b) (6) adjusted and added medications as (b) (6) disease worsened.</p> <p>The protein loss continued with other symptoms and complications. On 7/20/2011 (b) (6) recommended we see an internal specialist. We took (b) (6) to (b) (6) on 7/21/2011 and saw (b) (6) for an unltrasonud and additional testing to determine what was causing the renal failure.</p> <p>(b) (6) and (b) (6) were unable to find a cause of the progressing renal failure and continued to correspond with one another and recommend additional testing. (b) (6) condition continued to worsen. We began to have trouble getting (b) (6) to eat sufficient quantities of food and he continued to lose weight, became larthargic, and occasionally vomitted. (b) (6) food was switched to KD diet that was specially formulated for kidney problems. Over time he stopped eating this food and the vet recommended a homeade kidney diet.</p>	5	Years	Mixed (Dog)	Dog	57	Pound
			<p>On 1/15/2011 we rushed (b) (6) to the emergency (b) (6) because he had bloody/watery stool and vomit. (b) (6) was severely dehydrated and hospitalized for three days. We were able to bring him home on 1/17/2011. (b) (6) condition began to worsen in early February and he did not have enough energy to do normal functions anymore. He was more lethargic and the little food he was eating he vomitted hours later. Towards the end, the food that he vomitted six to eight hours later looked completely undigested. The last couple of days he would yelp in pain when touched. On (b) (6) after consulting our vet we ended (b) (6) suffering.</p>

<a href="#">EON-85483</a>	3/13/2012 21:00	Canyon Creek Ranch Apple & Chicken Wraps	We received Canyon Creek Ranch Jerky Apple Treats as a Christmas gift for our dog. Around mid January I had begun feeding them to my dog one each morning before I went to work. Within a few days my dog began not eating. He would go about 3 days without eating (a dog who normally eats 6 cups of food a day) until (I believe) he was hungry enough he would eat a meal or two. In the meantime he was vomiting bile, drinking excessive amounts of water, and lethargic. He was given antacids and anti nausea medication which in the first week did not help him. In the height of his illness he vomited 6 times in 2.5 days without eating. When we noticed his illness we had ceased all additonal food (treats) while we tried to figure out what was wrong with him. Upon returning to our vetrinarian we had taken a stool sample which our vet indicated was negative of any findings, had an x ray to rule out bowel obstruction, also negative, and sent blood panels out to a private lab, which had no findings. We switched our dog to rice and boiled hamburger diet. We maintained this diet for 2 weeks as he slowly began improving. (In that time the treats were stopped as well). It was then that I heard and researched the treats we had given him and discovered he had most of the symptoms of Fanconi syndrome. A urinalysis was never done so high blood sugar could not have been detected. My dog has luckily since recovered with no seeming long term effects or damage. (Possibly due to young age, 2, and larger size?)	2	Years	Retriever - Labrador	Dog	79	Pound
<a href="#">EON-85482</a>	3/13/2012 21:00	Canyon Creek Chicken Tenders. Boots and Barkley Chicken Sticks Waggon Train	On a weekly basis I purchased various Chicken Treats for my 3 dogs (Waggon Train/Canyon Creek/Boots and Barkley) The first dog (b) (6) became ill last year and the vet thought it was Rat Poison, but we dont use any poison at our home. she started to bleed from her rectum. extremely dehydrated and shaking uncontrollably . After lots of shots and antibiotics and several doctor visits over 2 weeks she began to show improvment. That was in 2011. The same duplication happened in Jan 2012 with my two males after eating the treats they began to bleed through their rectum's, It was at that time I started to think of what they eat daily and the only thing that made sense was the treats. The same treatment was done for my two male's it was a long and paining process but I have taken my pets off of all China products and haven't had any issues, they have gained their weight back. I did let the store manager in Pet Smart and Target know what had happened but no reaction so far.	4	Years	Terrier - Yorkshire	Dog	5	Pound
<a href="#">EON-85481</a>	3/13/2012 21:00	Purina One SmartBlend Maturity Dog Food	(b) (6) was being fed Purina One Active Maturity, and he stopped eating it when he was halfway through with a bag. He continued to eat table food. He started having liquid diarrhea around the same time. His owners called me (his veterinarian) about ~1.5 weeks later, and I recommended that he come in. I prescribed Metronidazole, which the owner never picked up. He declined over ~2 weeks (owner did not pursue treatment at that time). He presented on a Monday morning for euthanasia. His owner reported that things had progressed to the point that by the weekend (b) (6) he was not eating anything, was vomiting bile, having diarrhea, and could not walk.	12	Years	Pit Bull	Dog	90	Pound

<a href="#">EON-85480</a>	3/13/2012 21:00	WAGGIN TRAIN YAM GOOD WHOLESOME CHICKEN WRAPPED YAMS	(b) (6) developed diarrhea and vomiting for two days. We were concerned about dehydration and took her to the local Pet Smart Clinic due to her Vet being closed on the weekend. The Clini Vet gave (b) (6) fluids because she was becoming dehydrated due to the vomitng and diarrhea. They also put her on a fat free dog food diet. It probably took three more days until she was back to normal. The diarrhea had gotten so bad she was bleeding at times. We could not figure out what the problem was because they tested her and found no sign of parasites or worms. The symptoms just appeared. We had bought Waggin Train Yam Good Chicken Wrapped Yams. I was not aware of the recall until today, March 13, 2012.	4	Years	Mixed (Dog)	Dog	11	Pound
<a href="#">EON-85479</a>	3/13/2012 21:00	Waggin' Train Chicken Tenders Chicken Dog Treats 97% Fat Free	I purchased a 48 oz (3 lb) bag of Waggin' Train Chicken Tender treats from Costco in October. I had previously fed them to my dog intermittently for over a year. The bag fell on the floor while we were not at home and she ate at approximately a pound of treats. She fell ill within a week despite over \$600 of treatment including antibiotics and saline drips, her liver failed and she had to be euthanized on my wife's birthday. I am 100% convinced that those treats killed my dog!	10	Years	Terrier - Fox Smooth	Dog	22	
<a href="#">EON-85478</a>	3/13/2012 20:45	Dogswell VITALITY ChickenBreast with Flaxseed & Vitamins	Every time I gave my dog one of these treats, he vomited - no exceptions.	8	Years	Puli	Dog	30	Pound
<a href="#">EON-85477</a>	3/13/2012 20:45	Waggin's Train	When my seven year old Lab, (b) (6) started acting different, I started to look up things that could possibly have went wrong. After weeks of her acting very strange, I went to let her outside to go play and do her business, when she got up, she was limping. I wasnt that considered about her limping, I just figured that her arthitus was bothering her, but then her back and hips went out. After doing some research about this event, I found that she could have had a stroke or could have bone cancer. About a week or two before she started to act like this, I fed her the "Waggin' Train" chicken flavored treats. After a day of her not being able to walk at all, I took her to the vet and they said that their was nothing to do and that they had no clue what had happened to my poor dog. They then put her down. And now thanks to Waggin' Train, I have no compainion or buddy to look forward to coming home to. Mind you that im only a young teenager who loved this dog to death and cant believe she is gone.	7	Years	Retriever - Labrador	Dog	65	Pound

<a href="#">EON-85470</a>	3/13/2012 20:00	Waggin' Train Jerky Tenders	(b) (6) appetite slowly started decreasing in late October 2011. After a few days he would not eat his food at all. He slowed down on drinking water and was basically curled up on his bed most of the time. (b) (6) is normally a very active dog, and is always interested in eating. It was clear that something was dreadfully wrong. So I took him to the vet, they did numerous tests including blood tests and an ultra sound. The results showed there was sludge in his gall bladder and his liver enzymes were way out of line. Over the course of 2 weeks (b) (6) lost 10 lbs. He had a surgical consult and we considered exploratory surgery, but decided to just wait a while, this seemed drastic. We were making boiled chicken/rice and he still would not eat much. We had stopped giving him any treats(including chicken jerky) because he was having such trouble digesting. (b) (6) was prescribed Denamarin to support the liver, and Tramadol for pain. We switched his food to canned low fat food and he ate for a few days then stopped again. When (b) (6) lost 18 lbs we took him to an Internist, they did another ultrasound. This also proved inconclusive and they thought that surgery was going to be our best option. We wanted to wait until after the x-mas holiday so we just wanted to keep him comfortable. Ursodial was prescribed to aid his gallbladder. Slowly (b) (6) began to get better. He started eating his dry food again and has stayed on his meds. He has gained 6 lbs and no longer needs his pain meds. While we are grateful our pet is getting better, it has taken 4 months to get to where we are and he is not out of the woods. We have spend about \$2500 in vet bills and medicines.	10	Years	Retriever (unspecified)	Dog	65	Pound

<a href="#">EON-85465</a>	3/13/2012 19:00	Waggin Train Chicken Jerky Tenders	<p>Fed one Waggin Train Jerky treat from bag just opened that morning per dog on Wednesday 02/29/12 at about 10AM. (b) (6) aka (b) (6) ate less dinner that evening. Did not eat normal lams dog biscuits that night. Thursday AM ate almost no scrambled eggs with other dogs. (b) (6) also was slightly less interested in the same food. Dinner had consisted of organic chicken thigh, a little organic brown rice, some organic carrots. Do not think (b) (6) at dinner on Thursday at all, (b) (6) maybe a little. Sometime after 11pm on Thursday and before 4am both dogs began to vomit. (b) (6) 3 times between 4 &amp; 6am then she stopped. (b) (6) conitnued to vomit a large amount of mucous all day. he could not keep anything down but he keep drinking water. (b) (6) did not eat but was drinking and seemed better.</p> <p>Saturday 6AM (b) (6) was still vomiting if he drank water. He was taken to the vet in the morning. he was mildly dedhydrated. Blood tests were taken. He stayed a few hours, was given a shot to stop vomiting and medication to take home. He was about to drink 2-3 oz of water every 15 minutes from 4pm untill 1AM. I could not afford to have him stay at the vet overnight.</p> <p>At about 9Am vet (b) (6) called and said (b) (6) was very ill and needed to be brought back in. I determined that I would take him to the vet near our home that we normally use since they have staff on all night. (b) (6) died before they could even start on IV. They tried CPR but were unable to start his heart. His organs has shut down.</p>	20	Months	Mixed (Dog)	Dog	33	Pound
<a href="#">EON-85464</a>	3/13/2012 19:00	Waggin Train Chicken Strips	<p>Both of my dogs started throwing up and had constant runny contined diarreaaha. They became lathargic and stopped eating. The larger dog almost died as he would steal the small dogs strips and eat his own so he was the sickest of the two. He would go to the vet and after being on IVs for several days would improve and go home. After being at home a few days it would start all over again. I noticed they became sick after they would resume eating the strips so I withheld the strips and they got better. The larger dog now has to eat a special food for his digestive system due to the damage done by the chemicals in the strips. My co-worker's small poodle went thru the same senario - visits, IV's, etc. Last trip to the vet her liver had stopped working. Our government needs to stop allowing these to be sold.</p>	4	Years	Terrier - Yorkshire	Dog	6	Pound

<a href="#">EON-85460</a>	3/13/2012 18:15	Dingo Meat in the Middle Rawhide Chew	(b) (6) started with symptoms of an urinary infection. The infection seemed to clear up and then come back. She also has loss of appetite which eventually led to us running bloodwork. This is when we discovered she had kidney disease of unknown origin. Following this her appetite decreased dramatically and she progressed into kidney failure.	4	Years	Corgi - Welsh Pembroke	Dog	30	Pound
<a href="#">EON-85459</a>	3/13/2012 18:00	Milo's Kitchen & Waggin Train Jerky	Our Yellow Lab was in perfect health when suddenly in September, 2011, he started to show lethargic behavior and wouldn't drink or eat. We took him to our Vet and she said he was extremely dehydrated with complete kidney failure and that we immediately had to take him to emergency care to hydrate him with fluids for a couple of days which cost close to \$5000. We then brough him home and he seemed to recover after a month or so but by the end of November the same symptoms re-appeared and we took him to our Vet again and she said that his kidney was failing but we should try and feed him and give him as much water as possible. Within a month, he was in so much pain and would neither eat or drink or was capable of walking that we decided to put him down to stop his suffering. A week or two after that I read an article in MSNBC about tainted chicken and beef jerky from China causing dealth and kidney failure in dogs. I also bought Wagginz Train jerky treats at Whole Foods and Milo's Chicken Jerky at Ralphs. I told Ralph's about what happened but they refused to take Milo's off their shelves. You can confirm all this with our Vet, (b) (6). Within three months our perfectly healthy Lab who never had any prior problems completely deteriorated.	7	Years	Retriever - Labrador	Dog	90	Pound
<a href="#">EON-85458</a>	3/13/2012 18:00	Milo's Kitchen - Chicken Jerky	Every time I gave a small piece (1/3 of 1 chicken strip) of Milo's Kitchen Chicken Jerky to my dog he would become violently sick to his stomach / throwing up and lathargic. I had given him these treats for a long time with no problem, but then with the last bag this started and I ceased. Stomach is still sensitive, but not sure if due to strips.	3	Years	Havanese	Dog	10	Pound
<a href="#">EON-85457</a>	3/13/2012 18:00	Waggin' Train Jerky Tenders	Dog became diabetic, had multiple health issues and died after being given these treats for probably 4-5 months.	11	Years	Spitz - American Eskimo Dog	Dog	20	Pound

<a href="#">EON-85453</a>	3/13/2012 17:45	Canyon Creek Ranch Natural Chicken Tenders	<p>My dog,(b) (6), who is a pit bull and black lab mix (age 7.5) became very ill November 2011 with a serious case of Pancreatitis. His health has always been exceptional and resilient with no pre-existing conditions; he has attended the same vet clinic (multiple doctors) for his whole life, so the records of his health are in one system. His weight before and after the illness is classified as "ideal" and his health record spotless. In November, he became violently ill and his weight slid from 71 to 61 pounds. At the time, he started eating Canyon Creek Ranch Natural Chicken Tenders dehydrated chicken jerky treats from the 30-oz (907g, red) "bag"-style package. The symptoms were loose, bloody stool, vomiting of undigested food, and dehydration. The symptoms appeared within 2 weeks of my starting to feed him the treats. I would give him three strips each morning as an "after breakfast treat." I am certain that they caused his illness because I've since stopped feeding him these treats and his condition has improved. The treats were the only change to his diet at the time--he was also eating Evo Weight Management low fat dry food at the time, which he had been eating for years. He was fine. Enter the treats, and two weeks later he's sent to the emergency room twice!</p> <p>Connect the dots as I have? Since the illness, at the vet's direction, I switched (b) (6) from Evo dry food to Hill's i/d Gastrointestinal Health prescription formula wet and dry food (a 75%/25% mix, respectively). His health has recovered to full pre-illness state. Unfortunately, I returned the unused portion of the jerkies I had to the store where I bought them: the (b) (6) Petsmart. I didn't think to retain the packaging such as to obtain the lot number, nor do I have any of the product left. I did not notice a foul odor or color, and my dog loved eating them. There was nothing visibly wrong with the packaging, nor was a foreign object present in the treats. His vet is (b) (6) . The blood test done after his second rush to the emergency room confirmed pancreatitis.</p>	7	Years	Mixed (Dog)	Dog	71	Pound

<a href="#">EON-85450</a>	3/13/2012 17:45	Waggin' Train Wholesome Chicken Jerky Tenders	The beginning of January of this year 2012 my husband,dog, and I were visiting family in Bladenboro, NC. We were out of treats that we had brought so we went to the local Wal-Mart to buy some. My mother had seen the Waggin' Train Brand of treats Chicken Jerky Tenders and so thats what we decided to buy since our dog loves treats of this nature. They were stored at Room Temperature and kept in the sealed plastic bag that they came in. We opened them the next morning once we had taken our dog outside. After that and about 5 times throughout the day our dog had vomitted and had diarrhea. Also she would not eat or drink anything else. Our dog is very healthy and in the four years we have had her she has only vomitted one other time from eating to fast so we were alarmed to the sickness that had taken her over. We ruled out every factor and decided it was the treats and immediately threw them out. I refused to give her anymore. Now since the beginning of January till now she has been fine and I am convinced it was the Waggin' Train Chicken Jerky Tenders that made her so ill. Needless to say being worried we cut our trip short with family and returned to (b)(6) two days after when we felt our dog could make the trip home.	4	Years	Pit Bull	Dog	40	Pound
<a href="#">EON-85449</a>	3/13/2012 17:15	Kingdom Pets Chicken Jerky	He began throwing up and got diarrhea and after a couple of days blood showed up in his diarrhea. We took him to the vet with a stool sample and the vet said there was a high level of bacteria in his stool. The vet said it was likely the problem came from something the dog had eaten. The vet prescribed antibiotics.	1	Years	Dobermann	Dog	83

<a href="#">EON-85448</a>	3/13/2012 17:00	Wagon Train Chicekn & Jerky Treat Wagon Train Chicken & Apple Treats Wagon Train Apples & Yams Treats.	(b) (6) began getting Wagon Train treats in or around September of 2011. We thought they were healthy for her and good for her b/c they contained ONLY the best ingredients and not a lot of fillers. Her worst bout of illness came when she started to feel bad in late December early January, after losing weight, seeming depressed and her stomach making terrible noises we took her to the vet. There we were told that her right kidney was compeltely gone, had shut down and had to come out. She had right kidney removal on February 13, 2012. They also found sever pancreatits at the time. After the surgery she seemed to be recovering, then a week to 2 weeks ago she started to declined once again,her stomach making the same noises and she was in a great deal of pain. She died by ehthanization on (b) (6) . We could not bare ti see her in the pain she was in. She had a bout of illness back in the spring of 2011 but overcame that illness, thrived, gained weight and seemed to be ok until this past December. Her previous illness was not the same as this time. Something was definately different, the kidney was one thing but something else was wrong.	3	Years	Terrier - Yorkshire	Dog	6	Pound
<a href="#">EON-85447</a>	3/13/2012 17:00	Milo's Kitchen Chicken Jerky	We fed Milo's "natural" chicken jerky as occasional treats (1-3 a day) for a period of a few weeks last fall. My dog lost his appetite and was vomiting, and would not eat his regular food during this time. No other changes to his diet were made, and he does not have access to food outside (he stays indoors except when on walks) or human food. When I read the notice last November, I promptly stopped feeding the treats and he returned to normal in a few days.	2	Years	Retriever - Labrador	Dog	70	Pound

<a href="#">EON-85443</a>	3/13/2012 16:46	Waggin' Train Wholesome chicken Jerky Treats	This is just an observation concerning the Waggin Train chicken Jerky Treats. There is a white packet inside the packages labelled " deoxidizer do not eat". Often these packets are very warm and almost hot even quite awhile after I've opened the package. This may not mean anything but I am sending this information to see if it will help in any way to find out what is causing the illness that reports say may be linked to these treats. My dogs eat these treats every day and have had no problems. I buy them at Sams in the 40 oz bags. Thank you and please disregard this if it is not of any help.						
<a href="#">EON-85442</a>	3/13/2012 16:46	Dogswell Veggie Life "Vitality" Chicken and Apple with Flaxseed and Vitamins	Hemorrhaging from the rectum and vomiting. Preliminary diagnosis: gastroenteritis. Dog did not improve with initial treatment. Further testing revealed a "contamiment". In reviewing dog's daily intake, the jerky treat was deemed the obvious source. Dog is presently being treated with an EN food and anitbiotics as of March 13, 2012.	6	Years	Terrier - Silky	Dog	8	Pound

<a href="#">EON-85441</a>	3/13/2012 16:45	Waggin Train Jerky Tenders	I have two dogs, one is a Yorkshire Terrier and one is a mixed breed. My mother has a Yorkshire/Poodle mix, and my grandmother had two Shiz Tzus. We have all fed our dogs the Waggin Train brand of chicken and duck treats for several years. My grandmother's two Shiz Tzus became ill at the beginning of January 2012. (b) (6) is only two years old and (b) (6) was about 13. They both had severe diaherria and vomiting. My grandmother took them to the vet and he told her to give the Pepto Bismol. (b) (6) ended up getting better after a few weeks of constant diaherria and vomiting, but (b) (6) continued to get worse and ended up passing away at the beginning of March 2012. (b) (6) my mom's Poodle/Yorkshire mix was the next one to come down with the illness, she had diaherria and vomiting for a week. My mom took her to the vet, too and they had her give her Pepto Bismol as well. She became better in about a week. My dog (b) (6) became violently about two weeks ago. She threw up everything she ate or drank and had bad diaherria. There were clots of blood in her diaherria. She had it four about five days. Then last week (b) (6) had bad diaherria. They all seem to be better now with the exception of (b) (6) death. All bags of the Waggin Train treats were purchased at Wal-Mart in (b) (6) or Sam's Club in (b) (6). I still have about a quarter of the bag left, but will not be giving it to my dogs any longer. I don't remember the exact dates the products were bought. I suspect the treats caused the illness because that is the only common denominator in all five dogs.	4	Years	Terrier - Yorkshire	Dog	12	Pound
<a href="#">EON-85440</a>	3/13/2012 16:45	Waggin' Train Wholesome Chicken Jerky Tenders	On February 23, 2012, (b) (6), a Bouvier des Flandres, began acting more sedate than his normal energetic self. By February 25, 2012, Henry was vomitting and was not willing to sit or lie down. His body began to shake, and he was taken to the vet. Upon arrival at the animal hospital, (b) (6) temperature was taken, which read slightly above normal. Because of concerns that he may have eaten something that was causing a blockage of the intestine, x-rays were done of his abdomen. Nothing out of the ordinary was visible. The vet also ran blood work which came back with an extremely elevated white blood cell count, predominantly NEU (29.24K/mL) and MONO (4.68 K/mL). Additionally, the blood work showed elevated ALT (120 U/L) and ALKP (475 U/L). Henry was injected with penicillin and was sent home with antibiotics (Clavamox). For 3 days Henry received only white rice and Metamucil. By February 29, 2012, Henry was put back on his regular diet of 5-6 cups of Nature's Domain Salmon and Sweet Potato dry kibble with 1/2 cup of ground beef and vegetables per day. He also received about 1-2 Waggin' Train Chicken Jerkey treats per day. On March 6, 2012, (b) (6) was having difficulty deficating. He was taken back to the vet where he was diagnosed with an enlarged prostate. He was sent home with Prednisone and Trimethoprim-sulfa. He is still taking these medications and although he is able to deficate, his energy level is not normal. He is extremely lethargic and lacks energy. Following the March 6th vet visit, (b) (6) continued his regular diet of dry kibble, ground beef, and Waggin' Train Chicken Jerkey Treats. On March 13, 2012, I read an article on msn.com concerning contaminant concerns with the Waggin' Train Chicken Jerkey Treats and the potential for kidney failure. I have stopped giving (b) (6) these treats. The remaining treats are in the original packaging and are available for testing. They were originally purchased from Costco Wholesale located at (b) (6) on February 6, 2012.	13	Months	Other Canine/dog	Dog	75	Pound

<a href="#">EON-85439</a>	3/13/2012 16:45	Dingo	I have a full breed Pomeranian, which isn't in the list of breeds to choose from. He has been checked routinely for a high kidney count and was put on specific food to keep that number in check. This particular veterinarian just watched the status but didn't link the number to an issue with any intake of food or treats. My dog started to drink high amounts of water, he had some changes in behavior that were unusual for him. I took him to a new vet due to a move and I discussed with that vet the food I was told o give him and that his kidney count was being monitored. I also discussed the increase in water and the changes in behavior. Upon doing this the new vet checked the sugar level as a possible reason to the drinking but also the kidney numbers. They came back extremely high which could lead to failure. She asked if i was feeding him treats, since the food was appropriate, from China. I discussed that I fed him several items in the Dingo brand. She said for me to immediately stop those brands she had seen other animals with health issues linked to food from China. Once I did and went to American made his number came back in line and has been checked twice since and still good. I feed him Purina, which I thought was American made; however, he has been drinking more in recent months and I was starting to be concerned. Upon reading the new press on Purina I am concerned I feeding him items that may cause serious health issues. But due that and the fact Dingo wasn't named I wanted you to know the turn around that transpired when I stopped feeding him the Dingo brand.	8	Years	Little Lion Dog	Dog	13	Pound
<a href="#">EON-85438</a>	3/13/2012 16:45	Wagginġ Train treats	My dog is normally very active but after eating a treat, she just sat around and didnt respond well . This went on for about 1 month ! i then started to notice tht she had diarrhea quite a bit and it took her longer than normal to recover from it !! From there she started throwing up and just not acting like her normal bouncy self. I quit giving her treats and she has recovered somewhat but still has a hard time using the bathroom and it does take her longer to do both !! This was her only treat and she has never had any reaction to regular dog food !!	3	Years	Chihuahua	Dog	19	Pound
<a href="#">EON-85437</a>	3/13/2012 16:45	Milos Kitchen home style dog treats Chicken Jerky	Everytime he ate dog food I would see new bumps on his body. He did not want to eat and lost 8 lbs he was already very lean.  I did the allegic food chase and moved him to lamb based grain free food, Stopped giving him any chicken based food. His bumps started receding. One day I gave him one of the Milos kitchen chicken jerky and the bumps started to come back! He cannot eat anything with chicken now, he will get bumps that turn scabby on his body and will loose hair in the area. After changing him several times to a different protein I finally settled for a Turkey based Grain Free diet and he has no more bumps. and his hair is almost 100% recovered and he gained his weight back plus a little more.	2	Years	Beagle	Dog	40	Pound
<a href="#">EON-85436</a>	3/13/2012 16:45	Canyon Creek Ranch Chicken / Duck Jerkey	Purhased 2 bags of Canyon Creek Ranch jerkey from Petsmart, (b) (6) in November 2011. Kept them in a drawer in the kitchen unopened. Opened the chicken packet in early January of 2012 and fed my dog 3 pieces of jerkey per day for 3 days. Along with Alpo oven baked treats and her usual Natural food. Over the course of the 3 days she vomitted each day typically in the morning bringing up her meal from the night before. Once she had vomitted she was fine within herself. As we had just introduced the Canyon Creek jerkey I stopped and there was no more vomitting. I then checked on the internet and found the reports of the other cases of kidney failure etc. Both bags were thrown out. She hasn't had anymore issues since.	4	Years	Foxhound - American	Dog	50	Pound

<a href="#">EON-85423</a>	3/13/2012 16:00	WAGGIN TRAIN CHICKEN JERKY TENDERS	Our dog is a thorough bred pedigreeed Yellow Lab. He began to have seizures that were very intense and painful, lasting a few minutes and rendering him completely immobile. We consulted the vet and then, monitored him very closely. After speaking to a holistic pet shop owner, we were advised to remove all products that are not organic in nature and particularly those manufactured outside the US. We had been treating our pet to the WAGGIN TRAIN CHICKEN JERKY in addition to other chicken treats from Costco and we stopped that immediately. After this, our dog has not had any seizures but has been impacted visually and cannot navigate around the home without assistance. After reading this report on todays news, it could be that he was actually in the gripes of severe kidney pain that we could have mistaken as seizures. Currently, we have switched to the Good Life brand of Salmon raw food kibbles that has helped him tremendously.	5	Years	Retriever - Labrador	Dog	95	Pound

<a href="#">EON-85408</a>	3/13/2012 15:00	Beneful Dog Food	The dog became very sick and was vomiting its food. I took her to the Vet and she asked about the food. Vomit was red and ruined our carpet. The vet suggested the dog had developed a food allergy to the dye that was put in the product (Beneful). We took her off that food and put her on lams and have not had that problem since. I contacted Beneful, told them that their dye in Beneful made my dog sick and ruined my carpet. I asked that they stop putting dye in their product and asked for around \$1,000 restitution. They responded that the dye was approved and that I had no recourse to recuperate damages.	3	Years	Corgi - Welsh Pembroke	Dog	30	Pound
<a href="#">EON-85407</a>	3/13/2012 15:00	Cadet Gourmet Sweet Potato & Chicken Wraps	My dog got severe diarrhea after eating treats (Sweet Potato & Chicken Wraps). I had to take him to the vet. He was negative for parasites or foreign objects, so he's still taking medication and the diarrhea has stopped. I read online that there was a problem with chicken jerky treats and think this is probably what caused the problem.	10	Years	Terrier - Yorkshire	Dog	7	Pound
<a href="#">EON-85406</a>	3/13/2012 15:00	Waggin Train Wholesome Big Blast	Starting vomiting, diarrhea, would not eat. The only change in his diet was I gave him a new brand of dog treat.	12	Years	Retriever - Golden	Dog	120	Pound
<a href="#">EON-85405</a>	3/13/2012 15:00	Wagin Train Jerky Treats	(b) (6) is one of 2 dogs that we gave Wagin Train Jerky Treats to on a somewhat regular basis. (b) (6) a 4 year old, 5 lb Yorkshire Terrier was also given the Treats. (b) (6) experienced a significant amount of bleeding diahrea. (b) (6) lives most of the time with my daugher a mile up the road, and spends some time with me (b) (6) was put on a strict diet, to try to narrow down the probem, along with cutting out all treats.  Shortly thereafter, (b) (6) started getting bloody diahrea as well. The only thing they had in common were the Wagin Train Jerky Treats.  When we stopped BOTH from the treats, the bleeding stopped. THEN we heard about the problem with the treats from China. We also heard there was no proof. No, we don't have "proof" either, but we know for sure it was those treats.  I don't know the dates, but could find out from vet if need be.	3	Years	Terrier - Silky	Dog	9	Pound

<a href="#">EON-85404</a>	3/13/2012 15:00	Canyon Creek Ranch Brand Natural Chicken Tenders	Soon after giving our dog 2-3 Canyon Creek Chicken Tenders to our dog per day, she starting having episodes of vomiting, and hacking. This vomit was yellow colored and more liquid. She also seemed to be lethargic and she lay around the house more. Since the only new item we were giving her was the Canyon Creek Chicken Tenders, we decided to stop giving the tenders to her, she soon stopped having episodes of vomiting and returned to her normal activity within a couple days.	3	Years	Crossbred Canine/dog	Dog	31	Pound
<a href="#">EON-85403</a>	3/13/2012 15:00	Waggin Train Wholesome Chicken Jerky Tenders	(b) (6) began having leakage/urination problems while she was sleeping. It progressively got worse. She began regurgitating. I took her to the vet. He said she had lost 12 pounds over a few months. During her stay at the vet, her kidneys began to fail, and she passed away. I had been giving her Waggin Train Chicken Jerky treats to her for years. That was her favorite treat.	10	Years	Cattle Dog - Australian (blue heeler, red heeler, Queensland cattledog)	Dog	53	Pound
<a href="#">EON-85402</a>	3/13/2012 15:00	Purina Dog Chow	My dog has been on Pedigree brand dog food from birth through 8 years old. Around 8 months ago, I switched to Purina Dog Chow, as I have a friend who works for Purina and gave me \$20 off coupons for the Purina brand.  I had to take my dog into the vet because he had developed very large Urinary Stones and needed immediately surgery. (He goes regularly for wellness exams, so these stones developed in the timeframe of switching his dog food brand.) He actually ended up having to get the surgery twice to completely remove all of the stones- cut from abdomen to groin. My dog has had no prior history of any health issues, the only variable was the Purina brand dog food. He will now have to be on prescription dog food for life. I feel Purina Dog Chow needs to be investigated.	8	Years	Mixed (Dog)	Dog	60	Pound
<a href="#">EON-85401</a>	3/13/2012 14:47	waggin train jerky tenders	She became very lethargic.....by the time i got her to the vet her kidney was failing.....i had read about these treats and had stopped giving them to her a little prior but before that she had them everyday until i saw the articles on msn and followed up with my vet that said they were dangerous.....we did some dialysis on her but saw no way of curing the kidney.....i had to put her down.....this was my baby and i have been unconsoleable.....all this crap from china needs to be taken off the shelves and if not properly marked MADE IN CHINA.....i can have my vet send you a report if necessary	10	Years	Retriever - Golden	Dog	89	Pound

<a href="#">EON-85399</a>	3/13/2012 14:47	Waggin Tails Chicken Jerky	Last fall our Chocolate Lab developed some very unusual behaviors. She started hiding, would not get up off the floor when called and acted frightened all the time. At night when she was let out and a light was turned on to find her she would just freeze and not move for minutes at a time unless I walked out and physically moved her. We took her to the vet and there was no apparent illness so blood work was done and all the tests were off the charts but no tumors etc. to cause the high levels. It was at this time she would not come out of her crate in the morning and another trip to the vet showed indicated a swollen liver and blockages in her intestines, again no apparent illness. I was searching the internet and found a blog that indicated some of the same things could be related to the Jerky treats which she had every day. We stopped the treats and kept her on plain dog food and water. Within 3 weeks she was back running and in 6 weeks she was her old self. We returned some unopened treats to Sam's and never purchased them again. Our vet never could identify an illness and we spent \$400 to \$500 on testing. Thanks, (b) (6)	10	Years	Retriever - Labrador	Dog	64	Pound

<a href="#">EON-85398</a>	3/13/2012 14:47	Canyon Creek Ranch - Chicken & Banana	I used the above mentioned treats as my pup's trail treats for a few months. He then started having monthly episodes (lasting 4-7 days) of nausea, vomiting, diarrhea. I discontinued the use on 7/30 as I started seeing a trend of the same symptoms. Since then he has been in/out of ERs, vets, specialists. He's undergone at least \$4k worth of exams/ultrasounds/procedures.	3	Years	Retriever - Labrador	Dog	70	Pound
<a href="#">EON-85397</a>	3/13/2012 14:46	Waggin Tails Chicken Jerky and the Kind made by that famous chef/man.	Both (b) (6), the beagle, and (b) (6), a pit mix, were eating chicken jerky made in China and suddenly developed uncontrollable bladder problems. Both are house broken. Both just peed all over everything and seemed shocked that it had happened as if they had no idea they needed to go. I happened to see a report on the Humane Society website that recommended not giving the dogs these treats and stopped immediately. The problem disappeared.	11	Days	Beagle	Dog	32	Pound
<a href="#">EON-85396</a>	3/13/2012 14:46	Wagon Train Jerkey Tenders	In January 2011 my pet (b) (6) was diagnosed with kidney failure. He had to stay at the veterinarian for three days until his kidney function could be regulated to safe levels. I do not remember the exact chemicals that were monitored. But, the levels in his kidneys were extremely high. Again, in March 2012 he had a yearly exam and his kidneys were again heading toward failure due to the obscene high levels of chemicals. I read recently that treats made in China were reported causing kidney failure in animals. I am concerned that (b) (6) may have been contaminated by these tainted treats that are made in China.	5		Retriever - Labrador	Dog	86	
<a href="#">EON-85395</a>	3/13/2012 14:46	waggon Tail Chicken Jerky Treats from China	My little (b) (6) has eaten Chicken Jerky Treats from China for the past 4 years with no problems until Oct 2011 he ill with vomiting and he was taken to the Vet. and given a pepic for upset stomach. This did not help at all he would not eat and was vomiting what little he did eat which was frothy, I then took him back to the Vet. We changed his dog food to less fatty. Still not doing any better took him back again and insisted that they do blood work to find out what was going on, I mentioned the Jerky that he was eating this was removed as well. Blood work came back all ok liver a little high. He was put on Metoclopramide syrup not jerky and he is getting better slowly now.						
<a href="#">EON-85394</a>	3/13/2012 14:46	Wagon Train chicken jerky	I was giving my dog chicken jerky every night as a treat thinking that it was all natural and that it would be safe. He started feeling ill with diarrhea and vomiting for several days. He had to be hospitalized overnight due to lack of hydration. We spent over \$1000.00 for tests to rule out any other problems. I immediately quit giving him the chicken jerky and he has been great ever since. I truly believe it was the jerky and I would highly recommend that this product be taken off the market.	14	Years	Alaskan Malamute	Dog	20	Pound
<a href="#">EON-85393</a>	3/13/2012 14:46	Waggin Tail Chicken Jerky Treats	(b) (6) began eating the Waggin Tail chicken jerky treats several months with no other change in her diet. Last month she developed severe kidney disfunction and had to have emergency abdominal surgery to save her life as her bladder was completely full of kidney stones. She so obstructed that she could no longer urinate. This was sudden and extremely painful for her.	3	Years	Shih Tzu	Dog	12	Pound

<a href="#">EON-85391</a>	3/13/2012 14:46	Waggin' Train WHOLESOME CHICKEN 16 oz. Chicken Dog Treats	I've been using Waggin' Train Dog Treats, specifically Chicken flavored strips for several months. I've noticed what appears to be digestive problems, although not having any kind of real experience in the detection of such maladies, I cannot state with certainty that she is in distress. She is a Yorkie mix about 14 months old. I read the article on the internet this morning about this product being linked to illnesses and death. I immediately called Walmart and informed them for which their representative quickly distanced themselves from any liability for any illness my dog might contract. She told me to contact the manufacturer. In the meantime, I will of course cease using this product but I'm very concerned about possible heath issues for my pet. She is a companion animal and as I live on a fixed income, I'm afraid I won't be able to afford veterinary bills arising out of this.						
<a href="#">EON-85390</a>	3/13/2012 14:45	"WagginTrain/Chicken Jerkey treets"; Miloes Kitchen Chicken Jerkey, Milo's Kitchen homestyle dog treets	I use the 'Waggin Tail," Train, chicken jerkey treets and milos kitchen, Religiously, daily!! 2 big bags per week or 10 days 4 3 dogs, so use them allot! My Vet said, she was poisoned, food poison!! I thought was going to loose her, she is getting old but, the symptoms were soo bad I truly thought she was going to die!! And yes, took to Vet she spent the night, flushed with fluids and the diarreaaha, was by then BLOOD, as stated I thought it was Parvo!! We must do something about this, our pets are to important to we Americans and who ever dont like it well, they can bite me!! O, and I did have a larger dog and he was very healthy! but he died very misteriously in 2007, the vet then said he really didn't know! <a href="#">EON-85376</a>	3/13/2012 14:15	Milo's Kitchen home style dog treats. Chicken Jerky	My two dogs (other dog is age 2) have been eating the Milo's kitchen Chicken Jerky treats for 2-3 months and about 1 month ago the older job developed rapid weight loss. About 2 weeks ago she stopped going on walks and a few days after that stopped eating. The vet was called in (3/1/12) and we were told she had severe kidney failure. We tried to give her IVs and appetite stimulants, but she could not hold down any food or water and on (b) (6) she was euthanized. in the last week she was also unable to stand and go outside to go to the bathroom. Her breathing was all labored, she was extremely confused, and her eyes became opaque.	13	Years	Shepherd (unspecified)	Dog	65	
<a href="#">EON-85375</a>	3/13/2012 14:15	Milo's Kitchen Chicken Jerky	(b) (6) began urinating, vomiting and defacating all over the house. He stopped eating and drinking almost completely, but kept up with going to the bathroom all over the house (my mother-in-law's house in (b) (6)). We couldn't figure out where everything was coming from. This went on for several weeks, apparently, before we got there to visit. She and the vet made the decision to put him down, as they felt that was the best option for him. We brought all of his food/treats back to (b) (6) with us so I could donate. I noticed that the treats she sent back were the Milo's Kitchen Chicken Jerky treats. Later that week, I started seeing reports about the Chicken Jerky treats.	15	Years	Spaniel - Cocker American	Dog	15	Pound
<a href="#">EON-85374</a>	3/13/2012 14:00	Waggin' Train Chicken Jerky Treats	(b) (6) became more and more lethargic and didn't feel like eating much, so we went to the vet, (b) (6) . The x-rays showed there was no blockage in her bowels, so we took her home. I was the Labor Day week end, so we took her back to the vet on (b) (6) . That is when it was determined she was in renal failure. They gave her transfusions and tried flushing her kidneys, but it was too late and she was miserable so we had to put her down.	2	Years	Pit Bull	Dog	45	Pound
<a href="#">EON-85373</a>	3/13/2012 14:00	waggin tails chicken jerky treats	bought jerky treats at Sams Club. Waggin brand. Gave treats to my dog, but he kept throwing up. I decided to throw the whole bag out after i saw they were from China.	6	Years	Dobermann	Dog	70	Pound
<a href="#">EON-85372</a>	3/13/2012 14:00	Waggin' Train 22oz Chicken Jerky Tenders Dog Treats, Beggin Strips Dog Treats, Waggin' Train 7ct Bacon Wrapped Big Blast Dog Treats	I have been giving (b) (6) Wagging Chicken Treats, Begging Strips, Wagging Train bacon sticks for around 3-4 years now. In the last year we noticed her belly increasing in size. We took her to the vet. After numerous tests and blood work, he found out she had Cushion's Disease. We started treatment and after two months he told us that he was worried her belly was not reducing in size. So he recommended a specialist. After more tests were done and an ultrasound of her stomach, they concluded that she had a tumor in her liver. We discussed what we were feeding her as well as previous problems she ever had. The vet told us to stop feeding any treat coming from China. Basically all treats we ever gave (b) (6) were already coming from China. So of course we were extremely upset. We threw everything out and started treatment for her liver. They couldn't remove the liver because she had a very high chance of not surviving the operations and would die of liver failure. We have spent thousandsssss of dollars since we started her treatment as well as all the tests and blood work. In addition, because of her tumor, her belly has to be drain every 3-4 weeks.	10	Years	Mixed (Dog)	Dog	52	Pound

<a href="#">EON-85371</a>	3/13/2012 14:00	Milo's Kitchen Home Style Dog Treats Chicken Jerkey	After consuming Milo's Kitchen Chicken Jerky, (b) (6) would vomit 8-10 times a day. He was unable to keep any food down and became lethargic. This occurred after everytime that he consumed the product. His vet was consulted, and they felt he must have eaten something outside(he lives inside and only goes out to go to the bathroom). I realized that the only food item in his diet that changed was the addition of the chicken jerky. Unfortunately, it did take several feedings of the treat before I connected his sickness and the treats. Once I stopped given him the chicken jerky, his symptoms were alleviated and he returned to his normal self. I just read a report online regarding the FDA and sickness in dogs from chicken jerky. I feel most certain that this is what caused my dog's sickness.	7	Years	Retriever - Labrador	Dog	90	Pound
<a href="#">EON-85370</a>	3/13/2012 14:00	Canyon Creek Ranch Jerky Treats Chicken and Banana Duck wrapped yam Yam Good	I started giving (b) (6) Canyon Creek jerky treats (1 per day) last year in the summer. After a few weeks she began drinking excessive amounts of water and being constantly thirsty. She would get up in the middle of the night and drink 6 oz straight. I didn't connect it with the jerky treats until I read about the kidney damage and failure in other dogs. In November I read about the FDA warning and immediately discontinued the treats, although I still hadn't connected the thirst with the product. It was only after noticing over the last 4 months that her thirst had returned to completely normal that I realized what was wrong.	12	Years	Greyhound - Italian	Dog	17	Pound
<a href="#">EON-85369</a>	3/13/2012 14:00	Beefeaters Chicken Fillets Natural Dog Treats	My dog had been enjoying these treats for a couple of years, but one night about 5 weeks ago I gave her a couple of treats around 9 pm. About 1:30 am I awoke due to (b) (6) pacing back and forth in the bedroom and sort of gagging. I took her outside where she tried to vomit a number of times, but nothing came up so we went back inside. I stayed up with her and debated on taking her to the emergency vet. After about another 1/2 hour of this, I began to get dressed which is when she finally did vomit. It was pretty much liquid except for one chunk of the chicken fillet. There has been no repeat of the problem since I ditched the treats.	4	Years	Shepherd Dog - German	Dog	85	Pound
<a href="#">EON-85368</a>	3/13/2012 14:00	Waggin Train Wholesome Chicken Jerky Tenders	Our dog regurgitated the treat after eating.	8	Years	Shih Tzu	Dog	10	Pound
<a href="#">EON-85367</a>	3/13/2012 13:46	Beneful Dog Food	I had given (b) (6) and (b) (6) Jerky treats in the morning..do not remember the brand...before I went to work...came home from work, they both seemed fine....I put down their dinner..(Beneful) ...and walked into the living room. About 5 minutes later, my granddaughter said "Grandma.. (b) (6) is spitting"I got up and (b) (6) was foaming at the mouth and stumbling and turning in circles and then went into a full grand mal siezure. I took her to the vet ..he dis blood work, xrays...could not find anything wrong and I kept insisting that it had to be the food, she was fine prior to eating and after eating, she had a siezure and had never been sick a day in her life. She had another siezure that night and started on Phenobarbitol and Vet said it was probably not the food, and to keep giving her the food, and her siezures increased to the point over 3 weeks that they were becoming continuous..we had to have her euthanized because she couldnt eat or walk ...I still blame either the jerky treats or the Beneful. She had been fine untill that day and just before she ate her food and never recovered after the first siezure.	7	Years	Retriever - Golden	Dog	80	Pound

<a href="#">EON-85366</a>	3/13/2012 13:46	Canyon Creek Ranch Ducker Tenders	<p>We began purchasing Canyon Creek Ranch Duck Tenders late last year. We do not recall the specific date, but understand they were introduced to the market for sale late August of 2011, so it would have been after that point. We fed (b) (6) one a day (occasionally 2, if the pieces were very small) with his dinner each evening. We began noticing his tummy occasionally gurgling, usually at night (he slept in bed with us) &amp; sporadic bouts of eating grass &amp; vomiting (usually in the mornings) late in 2011, but he would return to normal afterward &amp; the upset tummy would subside. We did notice he seemed to be drinking a lot more water some time in late December or early January, but didn't realize there was a problem. We thought perhaps it was the dry heat in the house from our heating system. We have a pet door &amp; fenced in back yard, so (b) (6) came in &amp; out whenever he desired &amp; we didn't monitor his every visit to the "bathroom". He went from eating 2 meals a day, once in the morning &amp; once in the evening, to only wanting to eat in the evening around the same time. We thought he was just not wanting to eat as much because he was getting older, but didn't know why the upset tummy. The vet suggested we give (b) (6) Prilosec for the upset tummy whenever it occurred &amp; to be careful what we fed him. We were very careful to feed him good quality pet food &amp; treats, or so we thought. We always checked packaging on treats to avoid made in China products &amp; somehow came to the conclusion that the Canyon Creek Ranch duck tenders were American made, when in fact, they are made in China. (b) (6) started going to bed early on his own during this period. He had always went to bed with us in the past, so we were surprised when he would go ahead of us &amp; again explained it away as he was just getting older. He seemed to have bursts of energy &amp; playfulness, like his normal self, in particular during the later afternoon hours &amp; continued wanting to go for walks. Then things drastically took a turn for the worse. He began vomiting on the bed during the early morning hours of Sunday, January 22, 2012. He had never been sick in the house before. We cleaned up the bed &amp; a while later he vomited again, then a 3rd time. We considered taking him to the emergency vet, but the vomiting seemed to finally stop &amp; we watched over him all day Sunday. He refused to eat anything that day, but drank quite a bit of water. Finally, he ate some chicken &amp; rice I cooked for him on Sunday evening &amp; seemed to hold it down</p>	13	Years	Beagle	Dog	30	Pound

			& feel better. We thought whatever it was had passed. Monday morning, he still seemed not to feel very good, but no sign of vomiting that we saw & we thought he was probably a little weak from the early Sunday sickness. We reluctantly worked away from the home from early morning until mid afternoon. He still seemed not to feel very good when we returned home, but did eat dinner. Tuesday morning, he got up & started showing signs of distress, going in circles, lying down, whimpering, getting back up, etc. We realized whatever had caused the vomiting early Sunday was not just something that had passed, but there must be a serious issue & rushed him to the vet. Tests were completed & the news was not good. The Pancreatitis was flared up, but the more serious issue was (b) (6) was in kidney failure & his values were totally off the chart. He spent all day Tuesday & all day Wednesday at the vet hospital on IV fluids to flush the kidneys, but came home with us during the evenings for over night. He began getting worse during the night after bringing him home on Wednesday evening, lost control of his bladder on the bed, started vomiting again & was in serious distress. We called his vet's emergency number around 3:30 AM & were instructed to give (b) (6) his prescription pain pill & have him back in as soon as the vet opened. We got him back in early Thursday morning & the vet suggested we leave him there on constant IV fluids for 48 uninterrupted hours, along with						
<a href="#">EON-85365</a>	3/13/2012 13:46	Waggin Train Chicken Jerky Treats	After feeding (b) (6) the "Waggin Train Chicken Jerky Strips" he developed severe kidney problems and severe diareah(sp?). I took him to the teaching hospital at (b) (6) He was diagnosed a spossibbly having ulcerative colitis. He had never shown the above symptoms until after consuming the jerky treats. I started feeding him meals prepared myself from a recipre found on Dr. Fox's website. He has shown no other symptoms since I stopped giving him the jerky treats.	9	Years	Mixed (Dog)	Dog		
<a href="#">EON-85364</a>	3/13/2012 13:46	Waggin Train Jerky Tenders	Vomiting once or twice a day..Didn't link it to the Waggin Treat until I read something on the internet. Also we have a one year old 4 pound Yorkie, female that would vomit after eating it so we discontinued giving it to her. As of today, I will be throwing out the Waggin Treats.	7	Months	Boxer (German Boxer)	Dog	45	Pound
<a href="#">EON-85363</a>	3/13/2012 13:45	Waggin Train Chicken Jerky Treats	Several years ago I gave my dog Waggin Train chicken jerky treats on a daily basis. He became very ill on several occasions which prompted visits to the vet. Each time the vet was unable to find a cause of his illness. At one point he was hospitalized due to uncontrollable vomiting and diarrhea for a period of several days. There was never a diagnosis made as to what caused his illness. Many tests were run, but nothing was ever determined. It wasn't until recently that I was reading about the jerky treats causing these types of symptoms that I put it together.	4	Years	Dachshund - Standard Wire-haired	Dog	16	Pound
<a href="#">EON-85362</a>	3/13/2012 13:45	Milo's Kitchen home-style dog treats	I bought the Milo's Kitchen Chicken Jerky and it changed the dogs attitude to like a animal in shock. He is in pain.	11	Years	Shih Tzu	Dog	22	Pound

<a href="#">EON-85360</a>	3/13/2012 13:45	Waggin Tails Chicken Jerky Treats	(b) (6) ate about 4 of the Waggin Tail jerky treats a day. He developed diabetes so severely that we were unable to control it. It casued him to have kidney failure and many other symtoms that I have seen described on internet by other people. We ended up putting our baby to sleep in Dec. after he lost 40 pounds in 2.5 weeks and nothing the vet tried worked	6	Years	Mixed (Dog)	Dog	100	
<a href="#">EON-85359</a>	3/13/2012 13:45	Waggin Train Jerky Treats	Approximately seven months ago. I purchased Waggin Train Jerky Tenders for my 5 year old male Boxer. He receives one to two treats per day. After purchasing and giving the Jerky Tenders to him he began to have diarrhea severely. I discontinued the use of the treats, thinking he may have just gotten a bug. Once the diarrhea subsided, after about a week I continued with the treats. The diarrhea came back with a vengeance and I had to notify the Vet to prescribe some K-Pectin. I discarded the Jerky Treats and (b) (6) has recovered fully with not one episode of diarrhea since.	5	Years	Boxer (German Boxer)	Dog	56	Pound
<a href="#">EON-85358</a>	3/13/2012 13:45	Waggin Train Chicken Stix	Healthy dog that started eating treat a few days prior to becoming very ill. Vet was baffled by nausea, vomiting,diahrrea, and lack of emergy.	2	Years	Basset - Griffon Vendeen Large	Dog	71	Pound
<a href="#">EON-85357</a>	3/13/2012 13:45	Waggin Trail	After feeding him waggin trail treats he would have seizures. Our dog had seizures for quite a while. Vet checked him and said his blood levels were good and the cause of the seizures were unknown. We quit feeding him the waggin trail treats and he has not had a seizure in over a month.	3	Years	Mixed (Dog)	Dog	50	Pound
<a href="#">EON-85355</a>	3/13/2012 13:15	Waggin' Train Wholesome Chicken Jerky Tenders	On 2 occasions, I gave (b) (6) one Waggin Train chicken jerky tender treat and she became sick both times. The first time she vomited 10+ times, shaking tremendously, and was breathing heavily and was very lethargic. I called the (b) (6) at 10:30pm that evening because I thought I was going to lose her. I mentioned to my husband that maybe someone poisoned her while she was outside, because that's how she seemed. She stopped vomiting soon after the call to the vet and I chose to gamble and kept vigil on her during the night and she was clearly coming out of her sickness by the next morning. The second time I gave her one of the same treats was last night and she vomited just minutes after consuming the one treat. It hit me that it was the treat that was not agreeing with her. She has not been shaking, but she is extremely lethargic and still has not eaten a thing since vomiting 4 times last night. The treat came up in pieces, so I am hoping she was recover quickly. My 13 year old dog had the same amount of treats, but hasn't vomited, is still eating, but is extremely lethargic and I am praying he will be okay as well. Both dogs are mutts, with (b) (6) being part Irish Wolfhound and my 13 year old dog being part Border Collie.	3	Years	Mixed (Dog)	Dog	25	Pound
<a href="#">EON-85354</a>	3/13/2012 13:15	Milo's Kitchen Chicken Jerky Treat (Unknown exact discarded package)	Dogs fed Milo's Kitchen jerky treats in the morning of February 9, 2012. <a href="#">EON-85353</a>	3/13/2012 13:15	Milo's Kitchen home style dog treats Beef Sausage Slices with Rice	I bought 2 bags of Milos Home Style Beef Sausage Slices with Rice at Wal-Mart about 2-3 weeks ago. I had never bought them for her, but I wanted to give her something special besides her usual treats. I noticed that they were so hard, I couldn't break them up in small pieces for her. I had to use a knife to cut them into small pieces for her to chew. She is a small dog with a tiny mouth so I didn't want her to choke on them. I did notice that some days she just acts like she doesn't feel good. I never associated the treats with her not feeling well, as I only give her 1/3 a treat every other day as they are big pieces, and she didn't need a whole one. I don't know if it is associated or not that she wasn't feeling well. I did not take her to the vet, because she just seemed out of sorts with no real symptoms except not being active and just laying with a sad look on her face.	9	Years	Mixed (Dog)	Dog	12	Pound
<a href="#">EON-85352</a>	3/13/2012 13:15	Waggin Train Jerky Tenders	For three days my dog was shaking after eating the Waggin Train chicken treats that I purchased at (b) (6) . He then laid around not acting himself for about two weeks.	5	Years	Terrier - Jack Russell	Dog	25	Pound
<a href="#">EON-85351</a>	3/13/2012 13:15	Waggin' Train Wholesome Chicken Jerky Tenders	I purchased a bag of Purina Adult dog food, and it came with a free pouch of Waggin' Train Wholesome Chicken Jerkey Tenders. I gave all 4 of my dogs each 1 peice of the treat. ((b) (6) , Basset Hound, 62 pounds, 5 years old, Spayed, Healthy; (b) (6) , Basset Hound, 45 pounds, 4 years old, Spayed, Healthy; (b) (6) , Pyrenese/German Shepherd Mix, 55 pounds, 8 months, Spayed, Healthy; and (b) (6) , Pyrenese/German Shepherd Mix, 67 pounds, 8 months, Neutered, Healthy). Within 5 minutes, all of the dogs were acting lethargic. After 10 minutes, (b) (6) began vomiting. She continued to vomit for about 10 more minutes. Since she appeared to have vomited all of the treat, I did not contact our veterinarian. I have not notice any other long term side effects.	5	Years	Hound - Basset	Dog	62	Pound
<a href="#">EON-85350</a>	3/13/2012 13:15	milo's kitchen homestlye chicken jerky	fed (b) (6) 1 milo's kitchen homestlye chicken jerky and the next day she became very sick to her stomach,loss of appatite and no energy. A day or two later she was fine. About a week later I fed her anothe piece of chicken jerky and got sick all over again. I threw the stuff out and will never buy again.	8	Years	Unknown	Dog	185	Pound
<a href="#">EON-85349</a>	3/13/2012 13:15	wagon trail chicken strips	feed WAGON TRAIL CHICKEN STRIPS as treat, 2 to 3 strips daily. soon after starting of feeding strips, dog had watery loose stool, was larghic, drank larger amounts of water and was lissless. We heard of problem with Wagon trail and stop feeding. Dog is back to more normal, still drinking more water then in past, but has better energy and seems more sprited. We feed lass then 1/3 bag of the strips to the dog.	12	Years	Pointing Dog - German Short-haired	Dog	70	Pound

<a href="#">EON-85346</a>	3/13/2012 13:00	Canyon Creek Ranch Brand: Natural Duck Tenders	<p>On January 10th (b) (6) became sick, showed signs of throwing up bile. Previously (b) (6) has had intestinal blockages, twice before. I drove (b) (6) to the vet about 6 hours after first observation, and he was diagnosed via blood tests. He showed signs of pancreatitis, hepatitis, Kidney or Liver problems (not sure which).</p> <p>Approximately two weeks latter (b) (6) regained his health. He had injested over the holiday raw hide dones, dog food and table scraps. But I became aware of a possible link to illness from Canyon Creek Ranch Tenders (in this case duck) from an internet article. I thought I should be dilligent and report the possibility of a link to my vet.. I still have the tenders in the packaging.</p>	8	Years	Terrier - Airedale	Dog	98	Pound
<a href="#">EON-85345</a>	3/13/2012 13:00	WAGGIN' TRAIN WHOLESOME CHICKEN ALL NATURAL CHICKEN FILLETS	<p>Severe vomiting, diaherria, lethargic, stopped eating and drinking, bloody stool, large growths on hind leg size of a golf ball. All these symptoms appeared within one week of being given chicken tenders (Waggin Train variety) purchased at Walmart and Kroger for November 2011 to January 2012. Symptoms began with the growth popping up within 2-3 days after being given the treat 3 times per day in mid-December 2011. Growth was removed end of December by our vet and was determined it was cancerous. This brand of chicken tender was once again given to my dog the first week of Jan 2012 and within hours severe vomiting and severe diaherria began and he could not keep anything down. Veternarian treated him and took him off all food, drink and gave him antibiotics, medicine for vomiting and diaherria. Veterinary bills totalled over \$1000. My dog has not had that treat since and is doing fine. My neighbors dog also fell sick with same symptoms during the same time period. I gave them a bag of this same brand of chicken tenders, when they stopped giving the dog the treat the dog improved. IMPORTANT NOTE: My dog NEVER gets sick! He has been in EXCELLENT HEALTH! I strongly feel it was these dog treats that made my dog very ill. The bag said "MADE IN CHINA"</p>	10	Years	Siberian Husky	Dog	52	Pound
<a href="#">EON-85344</a>	3/13/2012 13:00	waggin train chicken jerky treats	fed her and our 6 year old male yorkie waggin train chicken jerky treats. both the female and male came down with diarerha, very lethargic and would not eat. this lasted for about 2 weeks. we immediatlly suspected the waggin train treats as i checked on the internet and saw an article about the treats. we consulted with a vet who advised us on the proper treatment for both dogs.	11	Years	Terrier - Yorkshire	Dog	10	Pound

<a href="#">EON-85341</a>	3/13/2012 13:00	Waggin train Chicken Tenders	I purchased chicken tenders from my local Costco for our dog. A few days later he was not him self, he couldn't hardly walk, and had yellow diarrhea. We took our dog to vet and they recommended that we take him to the emergency pet clinic. They had to keep him for a few days, they ran a few tests and gave him some IV's because he was dehydrated. They vet did not know what was wrong that it could be kidney failure and we might have to put him down. We told him what we gave him and he said that was most likely what made him this sick. There is something in there that I believe is bad for dogs and causing kidney failure. I called Costco to notify them and to pull the product off the shelves before other dogs get sick, they did not. I called and emailed the manufacturer but never hear a work back from them. I have proof from the vet and a \$1,000 vet bill for treatment. It needs to be pulled from the shelves immediately.	6		Bulldog	Dog	70	
<a href="#">EON-85340</a>	3/13/2012 13:00	Waggin Train Chicken Tenders	(b) (6) was fed the Chicken treats purchased at Sam's Club on aregular basis for at least two years. (b) (6) developed a type of skin cancer and Ultimately was euthanized.	11	Years	Retriever - Labrador	Dog	65	Pound
<a href="#">EON-85339</a>	3/13/2012 12:45	Waggin Train Jerky Chicken Treats	we gave our Samoyeds, Waggin Train Chicken Treats and she developed bladder problems. we now have to give her meds to control her bladder. <a href="#">EON-85331</a>	3/13/2012 12:30	Canine Carry Outs	We've fed her this brand of treat for years but in the last few months she began vomitting so much and so often that she got down to just 8 pounds. She developed a kidney infection and liver irritation, both diagnosed and treated by our local vets. She only got sick when she ate the treats. I had several bags because they had been on sale and/or had coupons and unfortunately I threw them all away and so can't give you any information on those bags.	6	Years	Chihuahua	Dog	12	Pound
<a href="#">EON-85330</a>	3/13/2012 12:15	Ol' Roy Dog Treats Munchy Bone	I recently read an article on Facebook about pet treats that are harmful due to PROPYLENE GLYCOL being an ingredient! I researched propylene glycol & found that it's a product included but not limited to ANTIFREEZE, brake fluid, paints, shampoos, body lotions, etc. I sent an email to Walmart & they have ignored me. I posted a comment on their feedback website & they deleted it! I will be returning 2+ bags of these pet "treats" to Walmart soon & am taking a printout with me to give to them which provides the harm this ingredient can cause - I know it can kill animals as I've read other articles about antifreeze leaking from vehicles & it being lapped up by cats, dogs, etc & they die as a result. The Ol' Roy Munchy Bones are a product that should also be investigated & be removed from their shelves. It does NOT show the origin of where it's being manufactured - I am guessing it's China. Their other product Ol' Roy's Yogurt Bones shows it as being made in the US.						
<a href="#">EON-85329</a>	3/13/2012 12:15	Milo's Pet Treats	Developed Renal Failure for no apparent reason, had been eating the Milo's jerky treats and his usual other food. <a href="#">EON-85323</a>	3/13/2012 11:45	Canyon Creek Ranch chicken treats	The treats gave him severe diarrhea which led to dehydration and obvious discomfort. He had to go outside multiple times and could not hold his bowels throughout the night. I originally associated this with his Blue Buffalo puppy food and switched but that did not help. I talked to the manager of PetSmart who suggested that he may have a chicken allergy. I immediately took away all of his chicken treats and his symptoms immediately stopped. I still had to take him to the vet for checkups to make sure that no damage was done.	9	Months	Retriever - Labrador	Dog	70	Pound
<a href="#">EON-85322</a>	3/13/2012 11:45	Waggin Train Chicken Jerky dog treats	(b) (6) would wake up in the middle of the night vomiting for no apparent reason. This dog was supervised closely and had nothing to eat except dog food, milk bone treats and waggin train chicken jerky. After reading about the dangers associated with the chicken jerky, threw away the remaining product and stopped feeding it to the dog. Have had NO problems with unexplained vomiting since.	8	Years	Mixed (Dog)	Dog	70	Pound
<a href="#">EON-85321</a>	3/13/2012 10:45	Waggin Trains Chicken Jerky	Approximately two years ago (b) (6) became very ill and was taken to his veterinarian. He had been lethargic, unwilling to eat and walked with his back hunched up from abdominal pain. The vet diagnosed pancreatitis and asked what I had been feeding him. He has been given Canidae All Life Stage dog food since he was 10 weeks old so the only thing that I had given him recently that was different was the Waggin Trains Chicken Jerky. Because it was "all chicken" I assumed it was safe for him to eat. (b) (6) needed to remain over night at the veterinary hospital and slowly began to recover the second day there. I feel I am one of the lucky ones. In researching this product I discovered that in China it is irradiated using old nuclear reactor rods. I also learned that even then, people were reporting their dogs dying or becoming ill after consuming this product. I immediately went to the (b) (6) Walmart and spoke with the manager about pulling this product from their shelves. He of course refused stating that no one else had complained about the jerky. I am glad this problem that has been ongoing is finally getting the attention it deserves. I'm sorry so many dogs had to die or become ill in order for this to be taken seriously. I will never again purchase jerky, a dog treat or any animal product that has the green "friendly" looking sign on the back that says it has been irradiated. Why is it illegal to do this to human foods but not pet food?? (b) (6) has gone on to live his life but I don't know if he has any permanent damage from ingesting this product.	7	Years	Mixed (Dog)	Dog	78	Pound
<a href="#">EON-85319</a>	3/13/2012 10:30	Waggin Train Chicken Jerky Tenders	We purchased Waggin Train Chicken Jerky from CostCo for many months -- our dog, (b) (6) loved them. After some months of consumption, she began vomiting without provocation. We initially thought it was stomach upset or allergies, but after switching food began to suspect the jerky. We removed it from her diet and have not had any issues since. Saw an article this morning -- <a href="http://vitals.msnbc.msn.com/_news/2012/03/13/10657635-3-big-brands-may-be-tied-to-chicken-jerky-illness-in-dogs-fda-records-show">http://vitals.msnbc.msn.com/_news/2012/03/13/10657635-3-big-brands-may-be-tied-to-chicken-jerky-illness-in-dogs-fda-records-show</a> -- and felt it was important to add our experience.  Given the sudden stop of the issue when we stopped giving her this product, believe there is a real tie. We took her to the vet while she was having the issue, and they could not find anything wrong from an external exam.	6	Years	Terrier - Border	Dog	16	Pound

<a href="#">EON-85289</a>	3/12/2012 17:45	Purina One Smartblend Lamb and Rice Formula	I purchase Purina One dry dog food (lamb and rice) for my dog. Because of concerns about the origin of food products for myself and my pets I purchase only food made in the USA. So much of the pet foods are from China - I had a dog get very sick from the melamine a few years back and both my dogs recently got sick from the chicken jerky dog treats. Both products are from China and therefore I have now look at every processed product and purchase only those from the USA. However, I became curious about if the Purina dog food is processed from products that are solely from the USA or perhaps from China or elsewhere in the world. I contacted Purina several times and expressed my concern. I was told that 100% of the protein products are from the USA but when I inquired about the additional potential ingredients they finally admitted that they use vitamins and other supplements from China and other countries. They stated that these foreign issued products are not readily available or are not available in the quantity they need in the USA. I have asked them again and again to tell me what these products are but they refuse saying they are proprietary and they will not share with me what they are or where they are from. I am extremely concerned and am especially concerned because they will not divulge what these products are. Can you relieve my concerns by telling me that everything they put into their pet foods is inspected by the FDA and is safe? I would really appreciate hearing from you. Thank you. <sup>(b) (6)</sup>						
<a href="#">EON-85262</a>	3/12/2012 12:45	Purina Alpo Prime Cuts in Gravy Homestyle with Beef	Fed 1/2 can to dog for dinner. Roughly 40-50 minutes later, I discovered her laying on the floor in a puddle of urine and feces. She was breathing very heavy and would not stand up. She finally walked outside and lay down on the back porch for about an hour, breathing heavily. She will normally not go outside by herself and prefers human companionship. After about an hour, we coached her back into the house. She walked over to her pillow and slept for the entire night. She woke a couple of times to drink water. She seemed a lot better the next day but did urinate once on her pillow.	2	Years	Retriever - Golden	Dog	52	Pound

<a href="#">EON-85211</a>	3/12/2012 3:00	Purina Dog chow Complete & Balanced	bought 44lb bag of Purina Dog Chow on 2-29-2011 @ Walmart (b) (6) Bar Cod Number 17800-12914. Fed it to both dogs. Older dog vomitted food around 2 hrs after ingesting it, started acting sick. Vomitted again about 3 times. Last vomit had like phlegm or something frothy. Tried to feed her at night with same food and would not eat it and push it away with snout. Other dog would not eat it either and she too would push it away with snout. Tried giving sick dog home food but she could not keep it down, vomitted again. Took away all food, fed her Pedialite & Karo syrup every 4 hrs for 12 hrs, then started feeding her rice , Pedialite & Karo every 6 hrs., After 3 feedings of this and no vomitting started feeding her boiled chicken and rice, had her on boiled chicken & rice for 3 days. Tried feeding Purina Dog Chow again but neither dog wants to touch it, and push it away with snout, but they have always eaten this food. Something is wrong with this food. Called Purina and reported problem. They told me they changed the formula in June 2011, and to throw all the food I had out	12	Years	Other Canine/dog	Dog	15	Pound
<a href="#">EON-85210</a>	3/10/2012 19:00	every single product on the shelf	Pet food treats are no longer required to state the country of origin on the packaging. Since consumers, such as myself, mistrust certain producer-countries' safety standards, this makes it impossible to determine whether a particular product is acceptable. As a result we do not dare purchase ANY such products.						
<a href="#">EON-85209</a>	3/10/2012 16:45	Kingdom Pets Chicken Jerkey	We gave our dog chicken jerky from costco as a treat around Oct 2011. By 10/12/11 he wouldn't eat his normal dog food, he was vomiting, and drinking tons of water. He would only eat his treats and be sick within hours of eating them. We couldn't get him to eat anything else besides the chicken jerky. We took him to vet and they couldn't find anything wrong with him. So we waited a few days and he got worse with the vomiting, so we took him back to the vet and they ran blood test and he had kidney failure and had to be euthanized. There was nothing the vet could do for him. He would have been 3 years old on (b) (6) .	2	Years	Shepherd Dog - German	Dog	100	Pound
<a href="#">EON-85208</a>	3/10/2012 11:00	Waggin' Train Big Blast, Waggin' Train Chicken Tenders, Cadet Duck Breat	I used "Waggin Train" chicken jerky treats for 2weeks on training walks.  Pup urinated indoors for the first time in months. Vomited x1. Refused meals for 24 hours. Very tired. Very thirsty.  Problem seemed to resolve itself 24 hours later.  Then I received notice from web site Dogfoodadvisor.com that FDA is issuing caution about chicken jerky treats from China.	11	Months	Retriever - Labrador	Dog	70	Pound
<a href="#">EON-85207</a>	3/10/2012 3:00	Milo's Kitchen Home-style Dog Treats - Chicken Jerky (No artificial flavors or colors)	We bought "Milo's Kitchen Chicken Jerky Dog Treats". We fed our dog one after dinner - the next morning he threw up. A day or two later, as a treat, we gave him one and he threw up that night. We checked websites after this and found out that many dogs have had problems with Chicken Jerky treats (we thought these would be a healthy treat option; we did not know the potential hazards since they were on sale at Target). These particular treats are made in China. Since we stopped feeding him the treats, he has not gotten sick once (and he did not really get sick before this). We have not taken him to a vet to see if any permanent damage is done, as we just found out today that this was the likely source (I suspected it because it was the only "new" part of his diet/life, but today we saw a story in the (b) (6) newspaper).	10	Years	Retriever - Labrador	Dog	80	Pound

<a href="#">EON-85206</a>	3/9/2012 23:45	PCI Chicken breast Nibbles, Waggin Train Chick'nBiscuits, PCI Quackers, Dogswell Vitality Chicken Breast, PCI Chicken breast Tenders	Severe gastroenteritis, bloody diarrhea, cramps, vomiting, bladder infection caused by high sugar in urine, increased thirst, pain in abdomen when lying down (indicated by loud moaning noises).	9	Years	Terrier - West Highland White	Dog	18	Pound
<a href="#">EON-85205</a>	3/9/2012 23:45	Waggin Tails Chicken Jerky Treats	Shortly after giving Chicken Jerky Treats, my Greyhound started drinking a lot of water, urinating frequently, loosing some control of bladder, stopped eating her dog food, and would only eat the Chciken Jerky Treats, so more were given to sutain her. Within weeks, she started vomiting with tinges of blood, had dirrahea, so was rushed to my Vet. Tests were run on the feces, as well as blood test, including a full panel. My Vet advised that complaints have been made regarding the treats, and use should be stopped immediately. Medication for the vomiting was given, and she started to seem better, but within a week, I found her dying upon returning home from an outing of 4 hours. The blood test resulted in levels to indicate she had high creatin levels, and kidney failure. I still have the test results, as well as the full container of treats. (b) (6) a retired racing Greyhound died on (b) (6) .	10	Years	Greyhound	Dog	65	Pound
<a href="#">EON-85204</a>	3/9/2012 22:45	Cadet Chicken Breast Tenders	Opened new package of chicken breast tenders & gave dog 1. She proceeded to vomit in large amounts twice during the evening. Upon further inspection of the pouch the product came in, I noticed a strange odor coming from the bag. They did not smell like the normal treats would smell. Also, they were rather soft and usually these treats are hard. I returned the product to the pet store only to hear from the manager that there have been several posts online about dogs getting sick after eating this product.	8	Months	Bulldog - French	Dog	21	Pound
<a href="#">EON-85201</a>	3/9/2012 18:00	Waggin' train chicken jerky tenders	Both of my German Shepherds got violently ill after feeding them 2 strips of waggin jerky treats, just these two dogs in my home. My other dogs were at doggie day care. Both were vomiting and had very bad diarrhea. I rushed them both into the vet, where they received fluids, by sub q. Both never left that hospital, as i lost both of them the next day. I am outraged, and disgusted that i fed them a treat, not knowing that they were tainted with poison, and made in China. I want this company to pay for what they have put me through, these dogs were my family and protectors. I have been going through a bad depression since losing them, they were young and healthy, they did not ask for this. My dogs are my world. I want this company held responsible for their deaths. I know it was these treats as all my other dogs are fine..i am so upset.	5	Years	Shepherd Dog - German	Dog	95	Pound

<a href="#">EON-85192</a>	3/9/2012 15:15	Waggin Train Chicken Jerky Tenders	Lats summer 2011 I started buying Waggin Train Chicken Jerky Tenders for my Italian Greyhound (b) (6) I started in May 2011 and she recieved 1-2 tenders every day untill August 8th 2011, when she stopped eatting. At first I didn't think anything of it, but after 3 days of not eating I called my Vet and we went in for an appointment. At first the Vet could not find anything wrong. Many tests were done. I was given Nutritional suppliments to syring force feed her. She was only 18 pounds to start with and went down to 14 pounds. in just 2 weeks. After many tests and Blood work it was decided that she had Addison's Disease. She was put on medication and had to have blood work every week for 2 months while the Vet adjusted the medication for her system. Durring that time She did start to eat again but the Vet and I had talked about her food/treats and her food was ok but her treats were from China and the Vet said to stop them. I had already done so anyhow when she had become sick in August. She got her diagnosis Aug. 31, 2011. It took till Nov 2011 to get her stable. Now for the rest of her life she will be on medication 2x a day, need blood work every 3-6 months and I have to watch her for any stress. Stressfull situations can make the disease worse and send them into attacks were they can die. Surgurys are not good for them either. I have to be very careful with her and keep her very happy (b) (6) .	7	Years	Greyhound - Italian	Dog	18	Pound
<a href="#">EON-85141</a>	3/9/2012 10:30	Beefeaters Chicken Fillets	we had taken our health girl to get her teeth cleaned and she was not wanting to eat, so thinking she needed to eat we tried various things we knew she liked, the only thing she would eat was the chicken fillets, she just kept getting worse.. We had her to the vet twice, being hospitalize with iv's... They could not believe she had got so sick so quickly. After many test they determined she had kidney failure. After several weeks of seeing our beloved (b) (6) lose her will to go on, we had our vet come to our house and end her suffering.. We did not think it could have been a issue with something we gave her until reading a article in our local paper about this causing other family pets health issues.	6	Years	Collie (unspecified)	Dog	30	Pound

<a href="#">EON-85139</a>	3/9/2012 3:00	Flint River Ranch Signature Brand Ultra Premium Sun Dried Bonita Treats	<p>To whom it may concern:</p> <p>For years I have fed a product called "Sun Dried Bonita Treats" to my cat.</p> <p>This is a fish product, that is sliced into thin flakes, which emits a smell that suggests they have undergone some type of smoke curing process.</p> <p>The "Bonita Treats" are distributed by the "Flint River Ranch" Company, which is located at 245 Hembree Park Drive, Suite 110, Roswell, GA 30076.</p> <p>The company's web address is: <a href="http://www.frrco.com">www.frrco.com</a>.</p> <p>THE SUBJECT OF MY CONCERN IS AS FOLLOWS:</p> <p>I received Four BLOATED "Vacuum Packages" filled with fish flakes.</p> <p>I have not opened any of these packages ---</p> <p>THE APPEARANCE OF THESE PACKAGES IS VERY UNUSUAL ---</p> <p>I have bought these "Sun Dried Bonita Treats" for several years, and I am accustomed to receiving four packages with a combined thickness of (1) one inch, so I have to think something is seriously wrong when I receive four "vacuum sealed packages" with a combined width of (10) ten inches total.</p> <p>The fish flakes are packed in "vacuum envelopes" that measure 6 X 9 inches, and are usually shipped to me in a slightly larger bubble pack envelope.</p> <p>The shipping packages I have received in the past were roughly 1-inch thick, and this was sufficient to accommodate all four vacuum sealed packages.</p>						

Key	Created	Product Name	Description	Age	Age UOM	Breed	Species	Weight	Weight UOM
			<p>The "Bonita Treats" that I received today, where shipped in an envelope that measures 15 X 19 inches.</p> <p>This is an exceptionally large envelope for fish flakes that usually arrive in an 8 X 10 bubble wrap envelope with a total thickness of roughly 1-inch.</p> <p>The size of this envelope also serves as a clear indication that whoever processed this order was aware of the fact that these "vacuum sealed" packages exhibit signs of contamination.</p> <p>Three of the "Vacuum Sealed Packages" I received today have swelled to a thickness of 3-inches, and the fourth package has swelled to a thickness of slightly less than 1.0 inch. The whole purpose of "Vacuum Sealing" a food product is to prevent contamination, and when the product is not sealed properly the end result is a package that invites bacterial contamination.</p> <p>Everything that I have read online today suggest that abnormal swelling of "vacuum sealed packages" is a clear indication of contamination, and the term I have encountered the most is "botulism."</p> <p>This product is sold through various online retailers, who indicate that all "Flint River Ranch" products are distributed directly by the above company.</p> <p>The "Bonita Treats" I am presently writing about were ordered from an online retailer in North Carolina, that I have not done business with prior to now.</p> <p>I have not contacted the retailer or the distributor regarding this matter, because if there is unlawful intent associated with this product someone should apprehend the person(s) involved.</p>						

Key	Created	Product Name	Description	Age	Age UOM	Breed	Species	Weight	Weight UOM
			<p>I feel these "Bonita Treats" should be tested to determine whether or not they are contaminated.</p> <p>I have no problem incurring a loss of \$6.49 per package for these fish flakes, or incurring an expense to have them shipped to a lab in the interest of preventing some child or their cat from getting sick.</p> <p>I created an account with your agency to report this matter earlier today, but the site kept timing out. I intend to cut, copy and paste this message there as well. My attempts to contact your Silver Spring, MD office met with a "This number has been disconnected message." I left a message with the regional office for your agency here in (b) (6) .</p> <p>My phone number is (b) (6) if someone wants to speak with me.</p> <p>I would appreciate any guidance you could provide to me regarding this matter, because I would like to get these items out of our house ASAP.</p> <p>Best regards,</p> <p>(b) (6)</p>						
<a href="#">EON-85138</a>	3/8/2012 21:00	Dogswell Happy Hips Chicken Breast	After opening a new package of Dogswell brand Chicken Breast flavor Happy Hips (basically a chicken jerky product) and feeding them to our dog, the dog exhibited sluggishness, anxiety and constant diarrhea for two days. On the second day, after thinking through everything about the dog's environment that had changed, we came to the conclusion that the only thing that had changed was the new bag of jerky treats we'd opened and given her. Other than these, her diet of dogfood was normal and unchanged. And we hadn't given her any other new or unusual foods. After ceasing the chicken jerky treats, she immediately improved.	8	Years	Terrier - Jack Russell	Dog	15	Pound
<a href="#">EON-85137</a>	3/8/2012 19:45	Dick Van Patten's Natural Balance Salmon & Green Pea Formula	I opened a new flavor of cat food, which we have used many times before with no problem: Natural Balance Salmon & Green Pea Formula, 6 oz can. (b) (6) consumed only about 1 tablespoon and stopped eating. After about 10 minutes, she vomited. 5 minutes later she vomited again, very explosively. She was very distressed and ran around the house for a short time - she doesn't typically run much due to her advanced age. After half an hour she appeared to have recovered completely. I wouldn't have been overly concerned except that her companion also became ill after eating the same food.	17	Years	Domestic Shorthair	Cat	8	Pound

<a href="#">EON-85013</a>	3/6/2012 17:00	Beneful Fiesta	Bought a bag of Beneful Fiesta dog food at PetSmart in (b) (6) around Feb 4th. (b) (6) has been eating this brand for 2 years with no problems until now. I noticed he wasn't gobbling down the food as fast as usual but he continued to eat it slowly but was becoming lethargic and glossy eyed. On Feb 20th he started throwing up and around Feb 23rd he started having severe diarrhea and he stopped eating the dog food. On Feb 25th I brought him to the emergency vet. x-rays were negative but he was dehydrated and blood test showed elevated liver enzymes. He was given anti nausea injection and anoter injection to coat/help with pain in his digestive tract. I was instructed give small amounts of boiled chicken and rice. He started eating small amounts of the chicken/rice and was feeling much better by 2/28. On 2/29 i mixed a small amount of Beneful into the chicken/rice and a few hours later he started vomiting and severe diarrhea again. On 3/2 I brought him to the vet and by then he was severely dehydrated, had irregular hearbeat and I was advised he was suffering so I made an appointment for euthanisia for (b) (6). He was given fluids, the anti nausea injections and took him home for the weekend but he improved because I did not reintroduce the Benefil to his diet again. I believe this dog food is contaminated because as the symtoms only came back when introduced to the food. I did some research on the internet and there are other people with similar complaints about their dogs getting sick or dying after eating Benefil dog food.	13		Beagle	Dog	40	
<a href="#">EON-85009</a>	3/6/2012 16:00	Nutro Lamb and Rice	I fed Nutro lamb and rice to my dog for ten years with no adverse affects. purchased a bag of dog food in the fall and dog seemed fine for a week and then started itching. I thought it was allergies. Her Vet. thought it was kennel cough she was dead in three weeks. Gave food to neighbor who fed it to her older dog one time and the dog went into convulsions and got very sick. I lost my dog the (b) (6). I didn't find out about the food until the day before christmas 2011. It destroyed me. I lost my best friend. The only dog that protected me and loved me unconditionally. I don't see how these people get away with this. I was shocked to find all of the web sites out there talking about food making animals horribly ill and killing them and yet the FDA ignored my email until this email came to me several months later....	10	Years	Lhasa Apso	Dog	17	Pound
<a href="#">EON-85002</a>	3/6/2012 15:00	Waggin Train Wholesome Chicken Jerky Tenders	Two days after eating a few of these treats the dog could not hold her urine. It smelled foul--like something out of a horror story. She's never had an accident in the house until now. I brought her to the vet and he did numerous blood and urine tests and figured out that it was a massive kidney failure due to an infection. He thought it was most likely because of these treats.  She is on Cypro for another few days and then I have to bring her back to re-do the tests to make sure all is better.	7	Years	Coonhound - Redbone	Dog	50	Pound

Recently, as of 2/28/12, (b) (6) began to urinate and drink excessively. This also coincides to the owner changing the manor of giving the treats-previously they had been soaked in water prior to administration (by owner). Physical exam findings are unremarkable. No weight changes. Labwork shows dilute urine (USG 1.008), trace glucosuria, normoglycemia (74mg/dL), AST 115 (twice normal baseline for lab). BUN is low normal at 5mg/dL. Magnsesium slightly elevated at 2.8 mg/dL Thyroid 1.0ug/dL. triglycerides: 849 (20-150) mg/dL. These treats have been withheld.	6	Years	Dachshund - Miniature	Dog	11	Pound
<a href="#">EON-84660</a>	3/5/2012 3:15	Milo's kitchen chicken jerky	Diarrhea started about 3 days after first given the Milo's kitchen chicken jerky, and I had given my dog about 1-2 strips a day. All day Friday he had diarrhea, with the last diarrhea having blood. When he showed signs of diarrhea, I stopped giving him the treat & withheld food. Saturday he had several bloody diarrhea bowels so i went to the Vet & he gave us antibiotics. So far only one diarrhea poop after the first few doses of antibiotics and so far has not had any other bowel movements, and has his appetite back.	3	Years	Mixed (Dog)	Dog	50	Pound
<a href="#">EON-84659</a>	3/4/2012 14:45	Dingo Jerky Chews - Chicken Chips, Waggin train Chicken Jerky	Morning of 2/29/2012 dog was lethargic. No vomiting, no diarrhea. Owner brought dog to me early afternoon that day. Dog was in hypovolemic shock, very difficult to obtain blood sample and place IV catheter. Blood work showed hyperglycemia, renal failure with sever hyperphosphatemia, and liver failure. All signs were sudden and acute. By 830 pm, dog died on her own in spite of pain medication, diuresis, and intralipids. Shortly before death, she began vomitting bloody fluid - no food.	6	Years	Mixed (Dog)	Dog	91	Pound
<a href="#">EON-84651</a>	3/3/2012 18:00	waggin train chicken jerky treats	Dog became very ill with profuse vomiting that induced dehydration. Afte vet visit it was dicovered to be a poisoning from Chicken Jerky. Intestinal systems were shutting down and the prognosis was poor, but with medication and attentive care she recovered. <a href="#">EON-84633</a>	3/3/2012 9:45	Dentley's with real chicken Wrapped Rawhide Sticks	(b) (6) is a 4 year old male castrated Yorkshire terrier referred to the (b) (6) for anorexia and previous history of vomiting. 8 days prior to the referral (b) (6) started acting lethargic and refusing to eat. He was seen vomiting greenish-bile. On 2/11 he was brought to his family veterinarian. Bloodwork was drawn at his rDVM and indicated that he was dehydrated with a slight elevation in bile acids, no other significant abnormalities were found. (b) (6) was given fluids, an injection of antiemetic and antibiotic. He was sent home on antiemetic and continues on this. He has not vomited since but refused to eat and was very lethargic. (b) (6) was brought to (b) (6) where mild increase of his kidney values was noted. He stayed in hospitalization and excessive work up was performed to reveal the cause of his anorexia. He was diagnosed with proximal tubular injury of his kidneys and urinalysis sent to Pennsylvania University confirmed Fanconi syndrome. Clinical signs, laboratory abnormalities and history was very suspicious of chicken jerky treat associated kidney injury. Owners reported that (b) (6) has been fed chicken jerky treats for a long time (2 a day). About a month or two ago, the owners switch to a different type of these treats made in China. On his recheck on 3/1/2012 (b) (6) is doing beetter, still not eating normally, still having glucose in his urine. Unfortunately, his kidney values increased significantly. We can't tell yet if this will be permanent kidney damage - this will be determined on his rechecks over the next 3 months.	4	Years	Terrier - Yorkshire	Dog	6	Kilogram
<a href="#">EON-84632</a>	3/2/2012 23:15	Lamb and Rice Formula/Chicken and Rice Formula	Fed the product in question and for two nights and two days had horrendous diarrhea.	11	Years	Other Canine/dog	Dog	24	Pound
<a href="#">EON-84631</a>	3/2/2012 18:45	Waggin Train Chicken Jerky Tenders	All dogs given 1 as daily treat. Opened new pack Wed AM (b) (6) has less appetite for eve meal. Lethargic licking lips and drinking more water than normal Thurs. Did not eat dinner. During night he began to excessively vomit foul smelling mucus> stopped and then 4 hours later had more vomiting. He is very lethargic and looks ill. Vet said wait 24 hours. All dogs ate the treat, all are not eating well now, one other had one vomiting episode. None of them would eat the organic chicken & rice I prepared for them. I am unemployed and will not be able to afford much medical care for my dogs. I have used these proudcts for over a year. ! a day, every morining as a treat for good behavior. Never again.	2	Years	Lhasa Apso	Dog	25	Pound
<a href="#">EON-84574</a>	3/2/2012 12:00	Pedigree Puppy Complete Nutrition , Pedigree Puppy Complete Nutrition	On February (b) (6) 2012 I fed my two dogs Pedigree puppy food, approximately 2 cups apiece. Within 10 minutes both my dogs vomited the dog food. I presumed they were responding abversely to an unfamiliar food. I gave them another portion the next morning which they vomited again. By evening of the (b) (6) h they were both wobbling, walking into things, and lost control of their back legs. By (b) (6) , my Malamute was dead. My Belgian Malinois died that evening. A veterinarian blood test analysis indicated an infection probably caused by ingestion of animal feces or urine. My own research on Pedigree dogfood indicates Salminella is a common problem with death of animals as a result of their dogfood. The Department of Agriculture has forwarded a sample of the dogfood to you to be tested further. Please be advised that I am also going to seek and hire my own private labratory to test the product as well. I would appreciate any testing you do on this product and look forward to the results you obtain. Thank you.	6	Years	Alaskan Malamute	Dog	110	Pound

<a href="#">EON-84563</a>	3/2/2012 7:00	9 Lives Tender Slices with Real Beef in Gravy	I opened the can of cat food this morning by pulling the ring tab on top. It made a noise similar to opening a can of soda - like a "pfffft!!!!", and the contents sprayed out onto my hand, falling onto the floor. The top had only been popped open - I had not yet begun to pull it back. I of course did not feed THIS can to my cats - but I am concerned about the safety of this can, as well as any others of this brand that I have purchased recently. I had fed some of the cans to my cats already, and have noticed 2 of them vomiting periodically. I did not keep records as to which brand or flavor they'd had before being sick. I primarily feed 2 brands of canned cat food (including this one) and 1 of dry; I also feed 3 other brands of canned cat food occasionally, as well as several other brands of dry.	4	Years	Domestic (unspecified)	Cat	10	Pound
<a href="#">EON-84554</a>	3/1/2012 17:15	Dogswell Vitality Chicken Breast	Ate Dogswell Vitality Chicken treats. For several days later, would wake up in the middle of the night in a panic and eat ANYTHING could. Grass, clothes, leaves, swallow toys, eat rugs, etc. Would lick the carpet as well until would throw up several times. Would calm down after several hours, but happened for over a week every night. After taking our dog off everything, it eventually went away (we didn't determine the cause). In January the symptoms started again and at the time we thought it was a chicken intolerance and gave the treats to a friend to give to his dog (springer spaniel, female) and the same thing is currently happening to that dog. The only commonality is the treats.	7	Years	Retriever - Labrador	Dog	80	Pound
<a href="#">EON-84540</a>	3/1/2012 15:15	Milo's Kitchen chicken jerky	I took my dog in on (b) (6), 2012 with vomiting, diarrhea, no energy (almost lifeless) and no appetite. The vet went over what I had fed the dog and the minute I said chicken jerky, she showed me the FDA's warning. My dog had every symptom on that sheet. She died on (b) (6), 2012.	10	Years	Other Canine/dog	Dog	35	Pound
<a href="#">EON-84530</a>	3/1/2012 13:15	Waggin Train Jerky Tenders	Diarrhea when providing the chicken strips from China to my lab and my friends lab. No other changes to their diet or with their snacks. Experienced diarrhea for one week, then I threw away the chicken strips and both dogs became regular again with their stools.	5	Years	Retriever - Labrador	Dog	50	Pound
<a href="#">EON-84526</a>	3/1/2012 12:15	Kingdom Pets	On 01/31/2012 I purchased from Costco dog treats brand name Kingdom Pets, chicken jerky. My dog has never had seizures before but on 02/02/2012 and 02/04/2012 he had them. The vet checked him over and took blood for tests and said he could not find any reason for the seizures. He had another one on 02/27/2012. On 02/28/2012 I heard on the local news about animals becoming sick from eating treats made in China. I checked the product and found that it was made in China. I returned the product to Costco and received a refund and they put the reason on some slip of paper that was to be turned in to whomever. I will let you know if he has another seizure. Some Consequence Huh! (b) (6)	5	Years	Pekingese	Dog	18	Pound

<a href="#">EON-84498</a>	3/1/2012 4:45	Josty Exquisites Chicken steak for dogs (strips)	Our perfectly healthy sheltie jung dog recieved a chicken jerky type treat for the first time and 4- 6 hours later developed terrible vomiting and diareah. We had no change in diet, routine or anything else. She had an extremely foul odor from her mouth and stool, unlike a normal diareah smell. She has been sick for 2 full days now and still has watery stool we have contacted the vet and will go intoday. We also contacted the store and the store headquarters. Here in Switzerland No one seems to know anything about this warning, Please make this an international warning so it is published in othet countries.	6	Months	Sheepdog - Shetland	Dog	9	Kilogram
<a href="#">EON-84497</a>	2/29/2012 21:15	Waggin' Train Wholesome Chicken Jerky Tenders	(b) (6) became lethargic, lost weight, had occasional vomiting. His normal diet included both wet and dry dog foods and chicken jerky treats. We took him to the veterinarian who found nothing wrong with his kidneys or blood work though his enzymes were kind of high. They even did an ultra sound. We changed his diet to chicken and rice, with fewer chicken jerky treats. Since then he has more energy, has far fewer instances of vomiting. After reading about the possible problem with the Waggin' Train Chicken Jerky treats we are more than disturbed that the opportunity to avoid this product was not offered to us by the FDA. We hope the problems will further disappear now that we will stop using this product.	11	Years	Mixed (Dog)	Dog	25	Pound
<a href="#">EON-84491</a>	2/29/2012 19:15	Chicken Jerky Treats	Sam experienced anorexia and weight loss over a 6 month period. All diagnostic tests were normal- cbc, chemistries, survey radiographs. No intestinal biopsies or further diagnostics were performed. The owner had been feeding chicken jerky treats from China for the past year. Once they stopped feeding the treats his appetite and weight improved. The owners requested I file a complaint with the FDA in his behalf although we have not ruled out other causes of anorexia.	10	Years	Mastiff	Dog	115	Pound
<a href="#">EON-84490</a>	2/29/2012 19:00	Beefeaters Chicken Jerky	She has arthristis and had been taking Rimadyl for a few years. When I moved to (b) (6) in 2009 my new vet suggested Previcox. She had been on that for 2 years when I decided to switch vets again. She has lost 6 pounds in 2 years and they ran bloodwork on her. She has severe kidney failure. I believe it wasn't because of the Previcox but because of the Beefeaters Chicken Jerky. She is due to go back to the vet next week to get her bloodwork run again as she has been taken off the Previcox and on a special kidney food diet.	14	Years	Mixed (Dog)	Dog	40	Pound
<a href="#">EON-84469</a>	2/29/2012 12:15	Canyon Creek Ranch Brand Natural Chicken Tenders	On February 22, 2012 (b) (6) began vomiting and having diarrhea. This continued through the night. By the next morning Brandi began shaking and panting. She refused water and food. We took her to the vet at 9:00 a.m. on February 23, 2012. She was treated with an IV to reverse the dehydration and treated with four different types of medication. She spent the night and the entire next day at the vet. We picked Brandi up on Friday, February 24, 2012 at 6:00 pm. Brandi has not had any more chicken jerky treats and has not had any additional symptoms.	2	Years	Terrier (unspecified)	Dog	17	Pound

<a href="#">EON-84450</a>	2/28/2012 16:45	Wellness	I decided to get food for (b) (6) right across the street from me at the vet's office. The brand was Wellness. (b) (6) finished one 5lb bag and approximately 1/4 of the second bag, so over about 1.5 months. (b) (6) got real sick and vomited for about 2days straight, I didn't have the money to take him to the vet and the vet offered to see him covered under a Good Samaritan fund. She took his blood and his kidney were shutting down. BUN & CREATIN levels were "off the chart" where one of these levels should have been no higher than 11 (b) (6)' count was 96!!! I had to make a decision that night and the vet thought it best to euthanize him. That little dog was my reason for living, there wasn't a person he met he didn't like and everyday was his Christmas! Sad isn't it. I started thinking and realize I had shortly before he got sick I had changed his dog food. I called Wellness' customer service and asked " is there ANY part of the product that was NOT manufactured in the USA, since they say it's "Made in the USA". A friend of mine told me just because something says that doesn't mean the ingredients all come from the USA. The customer service rep told me there were 3 substances imported, one was beef from Canada, lamb from Australia and something with a big long name that is imported from CHINA and I recollect she said because the USA doesn't have enough of whatever that product is!!!! I do believe that the substance that was in the dog food that killed many beloved pets, a few years back, was imported from China also. My longtime friend has 2 Yorkies which died from that fiasco and she said the same thing that happened to (b) (6) is what happened to her Yorkies, the same exact terminology was used by 2 vets in totally different parts of the country!!! "off the chart".	10	Years	Terrier - West Highland White	Dog	19	Pound
<a href="#">EON-84443</a>	2/28/2012 13:15	Waggin' Train Chicken Jerky Treats	(b) (6) was given a treat (1) of the Waggin' Train Chicken Jerky. He began not eating and just laying around. He started laying down, panting, and started writhing around on his side in circles. He continued for 15 to 20 minutes. His front leg twitched. He vomited several times during the night and had a soft unformed bowel movement. When I took him in to the vet, he was refusing water. He didn't even flinch when they drew blood from his neck. His liver function was elevated but other functions looked good on the test. He was given sub Q fluids, an anti-nausea injection, and an antibiotic injection. I alson had to take him home with antibiotics for 10 days twice a day. That night, I had to force water in him with a syringe as he wouldn't drink again and was breathing very rapid shallow breaths. I did not think he was going to make it that night. He was put on a chicken and rice diet. He is doing better. I saw a report on the local news regarding this product and it has some of the same symptoms that (b) (6) has. Since he has felt better he has been drinking a lot of water.	4	Years	Beagle	Dog	25	Pound
<a href="#">EON-84431</a>	2/27/2012 20:45	Pet Shoppe Chicken Jerky Treats	Fed the dog Pet shoppe chicken jerky treats on Sat. Dog got sick Sunday night and Monday - diarrhea and bloody stools. Still sick	5	Years	Schnauzer - Miniature	Dog	5	Pound
<a href="#">EON-84429</a>	2/27/2012 19:45	Waggin' Train Wholesome Chicken Jerky Tenders Chicken Dog Treats	Started with mucus, runny like stools with some blood. Vomiting after meals with undigested food. Drinking lots of water, lethargic at times. This went on for about 3 days before I took her to the vet on Friday, 2/24. Vet put her on special diet food and antibiotic. Checked her for blockage. She has been on this special diet for 3 days and is still vomiting and feeling sick. Goes back to the vet tomorrow.  A friend posted today an article regarding chicken strips from China causing dogs to be sick and even causing death. Her symptoms matched. Found your contact information on the fda.gov site.	3	Years	Pug	Dog	21	Pound

<a href="#">EON-84406</a>	2/26/2012 11:45	Waggin Train Chicken Stix Chicken and Rawhide Snack	Bought Waggin Train Chicken Stix from Wal Mart in (b) (6) the week of February 15, 2012. On about the fourth day of giving my dog half a peice only once a day, she threw up three times. The next day she had no appetite and wanted to sleep all day. She has never been sick in the past, and I strongly feel this is what caused her to vomit. I stopped giving her the treats, and saw on the news last night that other consumers were complaing as well, and nothing is being done about it. I believe this product needs to be recalled until the problem is found. Not leave it on the shelves because you cannot find a problem. It is becoming evident many dogs are getting sick and dying, and this should be enough for a recall.	16	Months	Maltese	Dog	5	Pound

			<p>Now, on Saturday, February 25, 2012, my dog is having more frequent and softer bowel movements.</p> <p>He NEVER has bowel problems. His stool is always firm and he eliminates with regularity and without incident.</p> <p>Since it was midnight when he was crying to go out, it was too dark to see the color of the stool.</p> <p>I am afraid of the change in this food. When I saw that yellow color, all I thought about was the change in the Canidae food and how many dogs got sick and died from it. As a matter of fact, I had been feeding Canidae. But I was lucky, I fed the last of their "good" formulation and found out about thier problem before I bought more. It was because of the issue with teh Canidae and the poison coming out of China that I turned to Wellness.</p> <p>I have five 26lb bags of Wellness on order that I am supposed to pick up on Monday, Feb. 27th. I am not sure I want it.</p>

Bloodwork and urinalysis were performed. CBC/Chemistry noted hypokalemia otherwise normal. U/A noted glucosuria. Urine culture negative. Lepto titres neg. Ultrasound performed - normal kidney architecture. Patient was eating Beefeaters and Loving Pets brand of treats (both from China). Patient has been diagnosed with fanconi-like syndrome with primary renal glucosuria most likely as a result of toxicity from treats from China.	2	Years	Maltese	Dog	13	Pound
<a href="#">EON-84401</a>	2/25/2012 15:45	Waggin' Train Wholesome Chicken Jerky Tenders	Over the course of 5 days, (b) (6) was staying in my home and was given a Waggin' Train Chicken Jerky treat 2 - 3 times a day. She then began having diarrhea which lasted over 24 hours. Her veterinarian ran tests and saw no signs of tape worms, so diagnosed her with an upset stomach.	6	Years	Newfoundland	Dog	100	Pound
<a href="#">EON-84400</a>	2/25/2012 15:45	Canyon Creek Ranch Natural Chicken Tenders	She had diarrhea all night, after eating chicken jerky treats from Canyon Creek brand, after not eating for 24 hours she was given regular dog food and had solid stool. Not recognizing the treats were the problem she was given them again quantity 1 and had diarrhea again. Taken to the vet, bacteria found probably in intestinal tract. continues to have loose stool at this time with minimal traces of blood.	6	Years	Newfoundland	Dog	100	Pound
<a href="#">EON-84399</a>	2/25/2012 14:15	Milo's Kitchen home-style dog treats Chicken Jerky	(b) (6) suddenly became very lethargic and suffered a complete loss of appetite. In the days prior to this, he was drinking excessive amounts of water. Alarmed by his loss of appetite and sudden change of disposition, he was brought to the vet. He was admitted on 1/21/2012. A full CBC was done to try and diagnose the condition of the dog. CBC counts indicated infection and elevated liver enzymes. Signs of dehydration were also exhibited. He was released with antibiotics and a hepato support supplement. After his release, (b) (6) was on a restricted diet and eventually transitioned back to a dog food. His condition has improved since his release.	8	Years	Retriever - Labrador	Dog	57	Pound
<a href="#">EON-84397</a>	2/25/2012 11:45	Science Diet Savory Stew with Chicken & Vegetables (Adult 1-6yrs)	Bought a case of Science Diet canned dog food. Gave her a can of dog food 3 days in a row and she threw it up each time, however she was eating her dry dog food with no problems. Went and bought another case of Science Diet canned dog food and gave her a can and she had no problems. Next day went and gave her a can of the first case and she threw it up. Then the next day i gave her a can from the 2nd case and she was fine. Returning the dog food and will notify Petsmart.	3		Retriever - Labrador	Dog		
<a href="#">EON-84396</a>	2/25/2012 3:00	Kingdom Pets Chicken Jerky	She is currently in the hospital with pancreatitis. The vet believes it is due to the consumption of the chicken jerkey treats. He says that he has seen many cases of this recently. She has been receiving antibiotics and fluids to reduce the inflammation and infection. She began to throw up everything on 2/19/12, by the 3rd day (2/21/12) we took her to the vet and they ran test on her and admitted her to the hospital and began treatment. On 2/22/12 they released her. By the next day 2/23/12 we had to bring her back in to the hospital as she still couldn't keep her food down. She is still in the hospital receiving fluids and antibiotics.	6	Years	Retriever - Labrador	Dog	80	Pound

<a href="#">EON-84379</a>	2/24/2012 13:00	Natural Chicken Fillets Waggin Train Jerky Tenders	<p>I had to fill in random numbers because your form doesn't take more than one entry.</p> <p>Many thousands of dogs of all ages, breeds, weight, and ages have had these products, and over 500 have been sickened or died in the last few months. The product is treats made in China - many brands involved, some specifically Waggin Train Jerky Tenders, Milo's Jerky, Dogswell treats, Canyon Creek...</p> <p>FDA knows about this problem but refuses to recall them, because they say they can't find any toxins. Now we believe it could be Arsenic, and we know the FDA does not test for Arsenic in food products. YOU NEED TO. Please see below email I received from a group member (group's cause is to get all this Chinese crap off the shelves).</p> <p>Sherrod Brown and Dennis Kucinich are both urging the FDA to take care of the problem - dogs are dying of kidney failure, liver failure, they are having bloody diarrhea and vomiting, but the FDA refuses to recall these products. Here is the new information. We expect the FDA will do the honorable thing and immediately TEST FOR ARSENIC.</p> <p>(b) (6) 2.24.2012</p> <p>Please research that Pfizer made a product called Roxarsone that was feed to chickens that contained arsenic. In china, there is no regulation and their chickens were loaded with arsenic. The FDA got them to stop producing it last Summer.</p> <p>The FDA doesn't check for arsenic in food products...just water. This is why the FDA reports are coming back negative. This is really terrible with what's happening to our pets. The FDA is hoping the problem will cease now that Pfizer discontinued maker the product. FYI...Roxansone has been made since 1944, and it is very soluble in water. It has gotten into the ground water and has been showing up in other vegetables and meat products. Chicken manure, containing arsenic, has been used as a fertilizer for growing hay, alfalfa and arsenic is appearing in meat products. I will not let our dog's unnecessary death go without the guilty parties paying for their negligence and greed.</p> <p>-----</p> <p>and I found this link: <a href="http://news.consumerreports.org/health/2011/06/pfizer-pulls-chicken-drug-roxarsone-due-to-arsenic-threat.html">http://news.consumerreports.org/health/2011/06/pfizer-pulls-chicken-drug-roxarsone-due-to-arsenic-threat.html</a></p>	10	Years	Mixed (Dog)	Dog	80	Pound

<a href="#">EON-84357</a>	2/23/2012 17:45	Waggin Train Chicken Jerky Tenders 48 oz	I had purchased 2 large bags of Waggin Train Chicken Jerky treats (purina) and given as treats during the summer/fall. During this time period, occasionally I noticed my dog drinking/urinating more often, but not consistently. In November, I began to notice him consistently drinking a lot more than normal, and urinating a lot more than normal, even having an accident in the house and having to go out at night. He energy level decreased. I took him to the vet 11/17/11, where urine tests showed a very low gravity level. Coincidentally, (and very luckily) about this time I ran out of the treats. The vet was not sure what caused this, as there were no signs of infection etc. A repeat test later showed improved urine, and after stopping these treats he began to recover and return to his normal activity. It was only after the fact, that I read about the chicken jerky and put it all together! I was very fortunate. I'm quite sure if I hadn't stopped the treats that his health could have deteriorated!	6	Years	Unknown	Dog	70	Pound
<a href="#">EON-84355</a>	2/23/2012 16:00	Waggin Train Jerky Tenders	I bought Waggin Train chicken jerky treats for dog about 4-6 months ago. Dog had episode of diarrhea and I took him to the vet. he was treated with anti-diarrhea meds which made him a little better but did not seem to work as well as expected. I thought the diarrhea may have been caused from anxiety as it continued even while on meds. when we were out of the pills, i called vet and got more pills. they still did not work well. It wasn't until my husband heard on the radio that there had been reports of dogs getting sick from eating chicken jerky treats with "made in China" on the back. Sure enough, I looked at the back of the Waggin Trains pouch and it said made in China. I immediately stopped giving my dog the Waggin Train treats and took him off of the meds and within a week to 2 weeks, he was back to normal again. There is no doubt that those treats affected my dog and I just hope that there is no permanent internal damage to him. Please let me know if you need any additional information. I do not normally take the time to report things, but in this case, I feel strongly that the chicken jerky pet treats made in China should be recalled at the very least. Thank you (b) (6)	7	Years	Mixed (Dog)	Dog	28	Pound
<a href="#">EON-84339</a>	2/23/2012 12:15	Milo's Kitchen Chicken Jerky	Bought a package of Milo's Kitchen Chicken Jerky at Petco. A 10 month old dog is having problems with severe bloody yellow diarrhea and vomiting. Please investigate and recall this product.						
<a href="#">EON-84322</a>	2/23/2012 3:00	Dingo Meaty Middles	For over a year, my dogs have enjoyed these rawhide treats on a daily basis. Then, in mid-January 2012, 3 of the dogs vomited immediately after eating these treats. They displayed the same vomiting reaction 2 more times within the next couple weeks after eating them. I had 2 unopened bags, which I returned to my local Walmart.	5	Years	Chihuahua	Dog	12	Pound

<a href="#">EON-84321</a>	2/23/2012 3:00	Iams ProActive Chunks 1+ Years	<p>When our dog ate the food from the newly-purchased bag of Iams she began to experience repeated bouts of diarrhea. She seemed disinterested in the food and was less active than normal. The diarrhea occurred constantly, to the point where the dog would have accidents indoors if we were unable to get her outside quickly enough. The loose bowel movements continued until I changed her food to a different brand. Now she is eager to eat again, has regained her vitality and vigor, and no longer suffers from any soft bowel movements or diarrhea.</p> <p>The type of Iams food we last used was the same type we have previously given to this dog with no previous ill effects, leading us to believe that there is something wrong with this specific batch/lot of product. The symptoms began when we started using this bag of Iams, and they stopped when we switched our dog to the competitor's product (Nutro Max - Lamb Meal &amp; Rice). The symptoms our dog experienced appear to be very similar to the symptoms associated with a similar problem with a different lot of Iams that originated from increased levels of Aflatoxin (sluggishness or lethargy, a reluctance to eat, vomiting, yellowish tint to the eyes, diarrhea).</p> <p>The data from the product packaging are: Iams ProActive Chunks 1+ Years 40lb bag; UPC: 0190101405; Expiration date: 01 APR 13. The other codes from the bag are: 13354175 E3 US30941.</p>	2	Years	Shepherd Dog - German	Dog	85	Pound

<a href="#">EON-84056</a>	2/22/2012 8:30	Kingdom Pet Chicken Jerky treats	I bought Kingdom Pet Chicken Jerky treats for my dog at Costco approximately 1 month ago. My dog started drinking a lot more than usual and also became incontinent. She was sleeping and urinating without realizing it. She is a senior dog so I thought that this was something normal. I came across a complaint about the treats and I took her to a vet. They said that she is in Chronic Renal Failure possibly from these treats.						
<a href="#">EON-83947</a>	2/22/2012 4:30	Top Runner Soft and Moist Dog Food Beef Flavor MADE WITH REAL bEEF	I purchased Top Runner Brand of moist and meaty dog food on sale at IGA food store today the company that manufactures this food is Sunshine Mills Inc. 500 6th street SW. P.O. Bx. 676 Red Bay Alabama 35582. I fed it to several dogs but my indoor terrier ate alot of it! I did notice that the food was a dark color almost black in places in the pouches. This food comes in pouches and has the apperance of ground beef. After about an hour or more My dog jumped on the couch and laid down and then a few minutes later started to cry-almost howling in pain she became stiff and her belly was hard and in spasms! Her gums were white and she had a glazed look and didnt respond to her name being called! This lasted about 8 minutes. She then raised her head and wanted me to comfort her so I rubbed her back and stomach which was no longer hard anymore! I gave her water and she drank all of it! She is resting still an hr. later and my other dogs seem okay so far but it,s night and I cant check on them very well now- but will in the morning.( Its 1am.) I think this food was stale or rotten- later I smelled it and it stinks badly! It should never have been marked down and sold at IGA in (b) (6) .!!But thats what they do alot- they put out of date products in a buggy near the entrance marked way down so people will be tempted to buy them and we do! But not anymore- I just hope my dogs live until the Vet opens in the morning!! just wanted to report this so maybe it wont happen to others! Thank-you- Anonomous consumer!	3	Years	Terrier - Jack Russell	Dog	16	Pound

<a href="#">EON-83849</a>	2/21/2012 20:00	Kibbles and Bits	I bought a large bag of Kibbles and Bits dog food. She got really sick and vomited everytime she ate. I bought this in January 2012. She started losing weight and continued vomiting. I gave this dog food to a friend who had dogs and they got sick from it also. I bought a large bag of lams for senior dogs and she wouldn't eat it and continued to vomit. I took her to the vet and he said she wasn't dehydrated but had lost alomst 11# and only weighed 48# at this time. I started giving her boiled hamburger and she nibbled on it. She didn't get any better so I took her to the vet again and it was determined that she had gastrointestinal colitis. I had to start feeding her ID gastrointestinal food, which is expensive. She got a shot of steroid and antibiotic. Also, a weeks worth ofFlagyland Cippro. She was having diarrhea that had no consistency, just dark brown liquid and very foul smelling. She was checked out all over and had no other problems, just the colitis. I spent around \$200 trying to get my dog well and she is finally starting to get better. I contacted the maker of the Kibbles and Bits and he acted like it wasn't their dog food, because it had been on the market for along time. I know that it was from that. Just because it had been on the market for along time, this particular bag had some kind of bad bacteria that got into her colon . I did not keep the bag because I poured it out into her dog food container and put it in the trash. So I don't know what the UPC code was.	7	Years	Boxer (German Boxer)	Dog	59	Pound

<a href="#">EON-83710</a>	2/21/2012 13:45	The Great Life Buffalo	<p>after transitioning my dogs from their old dog food to the new one (slowly over the course of 5 days) I noticed that my youngest dog was urinating and drinking a lot more than usual. Since she is a puppy, she was eating much more of this food than the other two, who started to display similar symptoms in the following week. All three dogs were also vomiting bile a couple times a day.</p> <p>After 2 weeks on the Food, the youngest dog was showing significant urinary symptoms with excessive frequency and incontinence. Upon examination of her urine at a lab they found no evidence of bacteria or red blood cells. Since she had suffered from hematuria in previous months (which had resolved) I had a good baseline for what her urine normally looked like. Over the previous 6 months she never showed any sign of crystals and maintained a fairly acidic pH. Her Urine analysis, following the consumption of this food and coupled with her worsening symptoms showed a pH of 8 and the presence of crystals. After discontinuing the food 2 days ago she has not had the same frequency in her need to urinate and the vomiting has resolved (previously she was unable to go a full hour without having an accident in the house due to what appeared to be no control of her bladder. after being off the food for 2 days she has been able to hold it for several hours and signal us that she needs to go outside indicating she is able to "hold it" again). she has not undergone any treatment or change except for the discontinuation of the food.</p>	10	Months	Dobermann	Dog	71	Pound
<a href="#">EON-83655</a>	2/21/2012 12:45	Wellness Duck & Sweet Potato Formula	<p>Food smelled off kind of with a yeasty smell. Leftover canned food started fermenting after refrigeration of 12 hours with an airtight plastic lid within minutes after being put in room temperature (approx 62F). This happened with two different batches dates:</p> <p>1.) Best By: 17 SEP 13 7WOPC1 09:32</p> <p>2.) Best By: 10 JUL 14 7WOPC1 2312</p> <p>Also noticed a change of order in list of ingredients. Manufacturers website still lists: Duck, Duck Broth, Turkey, Chicken Liver, Sweet Potatoes, Ground Barley, Carrots, Carrageenan, Ground Flaxseed, Potassium Chloride, White Fish, Guar Gum etc.</p> <p>Our cans now list but not in Formula name:</p> <p>Duck, Duck Broth, Turkey, Chicken Liver, White Fish, Ground Barley, Sweet Potatoes, Carrots, Carrageenan, Ground Flaxseed, Guar Gum, Carrageenan etc.</p> <p>We kept one closed can of each batch if needed.</p>

<a href="#">EON-83637</a>	2/21/2012 12:00	Waggin Train PBJ	<p>(b) (6)</p> <p>In December I bought Waggin Train PBJ, at Costco, as a Christmas treat for my dogs. They are peanut butter biscuits wrapped with a small piece of chicken jerky. I had never bought these treats, or anything like them before.</p> <p>The Lot number is62NC1005A Best Before 031913. A few days before Christmas, I opened the bag. I read the feeding directions, and followed them. I didn't feed the treats every day, the dogs didn't have very many at all.</p> <p>January 5th (b) (6), my 6 month old Corgi, threw up bile in the morning but ate breakfast. I thought she was ok and I left for work. I came home to vomit and diarrhea puddles, and she was quiet but I thought the worst was past.</p> <p>At 2 am (b) (6) started puking again, and the diarrhea started again. It was one or the other, every 20 to 30 minutes for the next 7 or 8 hours.</p> <p>She was at the vet first thing that morning, put on i.v. fluids and antibiotics, and anti-nausea medication. She was dehydrated. Her PCV was 72. We had just weighed her the day before, she weighed in at the vets 2 pounds lighter , she is only 18 pounds to start with.</p> <p>She vomited again that afternoon, which is very unusual with the medication she was given, so the vet suspect a blockage and started barium xrays. She had no blockage. The vet suspected antifreeze poisoning, but there's no antifreeze here for her to get into. The vet said if she continues to vomit, she would suggest exploratory surgery. I was holding (b) (6), and heard splashing on the floor. Her bowels had let go, but it was liquid, like urine and a huge amount. There was some white gunk in the puddle, and the vet tech said it looked like she was shedding her intestinal lining. But she'd tested negative for Parvo.</p> <p>They wanted to keep her on the i.v. and monitor her.</p> <p>She improved overnight, and I was able to bring her home the next afternoon. She's continued improving, but for at least 3 weeks she slept almost all the time.</p> <p>Just after (b) (6) came home, my two labs, (b) (6) and (b) (6), started to have diarrhea. They also started sleeping more and didn't have much energy. (b) (6) is 10 and was diagnosed with kidney disease just a few weeks before she was poisoned. She's just had new blood tests, and I'm waiting to talk to the vet about the results. All I've been told so far is that it's not good, but not horrible.</p> <p>It's been a little over 6 weeks, and (b) (6) is doing well, but (b) (6) and (b) (6) still have low energy and occasional diarrhea.</p> <p>The Waggin Train PBJ treats were the only newly introduced food, I also feed milkbones and dehydrated liver treats but have been feeding them for months without incident, and continue to feed them without incident.</p>	6	Months	Corgi - Welsh Pembroke	Dog	18	Pound

Despite aggressive care, condition worsened; went into anuric renal failure (b) (6) and was euthanized. Toxicology analysis of liver revealed 349 ppb of unmetabolized aflatoxin B1. Dog ate exclusively canned and dry Alpo, but had free access to large mountain property.	4	Years	Retriever - Labrador	Dog	110	Pound
<a href="#">EON-83384</a>	2/16/2012 9:45	Dogswell Vitality for Dogs	in the Summer of 2010 I began feeding my dogs treats" by Dogswell Brand; Chicken Jerky treats. My dogs are very picky eaters, and when I noticed they always gravitated towards this particular treat, I increased the feedings. My one dog (b) (6) (Long-Haired Chihuahua-7 years old) had a life threatening, SUDDEN ONSET of Addison's Disease in Early Spring 2011. She now requires life long medication. My second dog also didn't seem like herself for quite some time now. She has walked less and less, hides, sleeps much more, has chronic diarrhea. I recently moved and have been more busy, so again, unknowingly have increased the Chicken Jerky Treats. When I saw the MSN article just 1 week ago, I immediately eliminated the Chicken Jerky treats from their diet. The change is BOTH dogs is quite "miraculous". They both have more energy, are not hiding, sleep less, started to play together (it has been a couple years since they have played). I know my dogs very well and I am certain these treats were the culprit.	7	Years	Chihuahua	Dog	8	Pound

<a href="#">EON-83381</a>	2/15/2012 20:00	Natural Chicken Fillets Waggin Train Jerky Tenders	(b) (6) a very happy active poodle mix became very tired warn out, just acting plain sick. We had been giving her this treat for a couple of weeks or so and by the way she loved them. After a few days of her not getting better I made her appointment to see the vet. A bunch of test were done because prior to this (b) (6) had no problems. It was determined that she did have Lime Disease a slight case of that but a very serious Urinary Tract Infection, a fever and just one sick puppy. We went through a list of things she might have got a hold and nothing came to mind until I ritualized that the only new thing she has was the dog treats. A day or so later we heard the report about the Waggin Treats Chicken flavor and felt sick that we did not know and we had made our dog sick. I will also contact the complaint line as well for someone to take responsibility and all I ask is that the manufacturer and or company pay for (b) (6) treatments. She has had to rounds of antibiotics since this happen blood work and office visits. She can not even be treated for the lime disease until we get that UTI better. Next visit they may do the ultrasound. We don't have that kind of money and are racking up a hug Vet Bill. We don't expect to put a claim in for the lime disease but I want the medical bills for her UTI and possible Kidney infection. I can give all the phone numbers of vets copies of bills what ever they need.	8	Years	Poodle - Medium size	Dog	18	Pound
<a href="#">EON-83358</a>	2/15/2012 14:15	Chicken Jerky Treats from China	I just thought I would mention that xylitol poisoning symptoms are very similar to what we are seeing with the chicken jerky treats from china. Have you guys tested them for xylitol? It is a sweetener and not toxic to most animals but is to dogs.			Dobermann	Dog		
<a href="#">EON-83322</a>	2/15/2012 11:30	Uncle Sams's Duck Strips - Sergeant's Pet Care Products CHINA!	I am writing for a friend who does not have access to a computer. She thought she would treat her dog, a Hungarian Vizla, to something healthy and bought Uncle Sam's duck treats. Within the next 12 hrs. her dog had violent diarrhea with blood in it. The dog continued to be sick the next day not wanting to eat and throwing up. I don't understand why American companies keep using China to produce their treats?? (Chicken Strips and Duck Strips) I guess money is always the bottom line rather than the safety of our pets. So sad that we can't even trust our own country to do the right thing. I will also report this to the FDA along with all the other recall lists I subscribe to. Uncle Sam's Duck treats are made by Segeants's Pet Care Products in CHINA and sold in Publix supermarkets in (b) (6).	5	Years	Unknown	Dog	100

<a href="#">EON-83239</a>	2/14/2012 19:00	Kirkland Signature Super Premium Dog Biscuits- Chicken Meal & Rice Lamb Meal & Rice	I just recieved Kirkland dog treats for a Valentine's Day gift for my dog. They are the Kirkland Signature Chicken meal & rice and lamb meal & rice. My dog who never wets his bed has wet it the last three days since giving him these treats. I let him out at 4 AM and by 7:20 AM he wet his bed in two spots. I recieved a email about list of brands with treats linked to pet illness & death and only the Kirkland dog food showed up not the treats. So therefore I thought the treats would be fine and apparently not!						
<a href="#">EON-83238</a>	2/14/2012 18:45	Waggin' Trails Chicken Jerky	I had gotten Sara as a 9 week old puppy, and she had had all her shots by the time this event occurred. She was always fed quality dog food such as Blue Buffalo and Castor and Pollux and had vet visits for any and all problems. She was a very healthy year and a half old dog. Prior to 7-21-11, which was the date she became violently ill, I had purchased Waggin' Train chicken jerky for her from WalMart. That was the only new addition to her food. She had eaten one bag of chicken jerky, 2-3 pieces a day and I had purchased a second bag. She went to bed well (a house dog) and I woke up the next morning (7-21-11) to multiple piles of vomit and multiple piles of bloody diarrhea and my dog back in the corner of her crate like sick dogs do. I rushed her to her vet, an older, very experienced vet, who immediately hospitalized her, started an IV due to severe dehydration, and performed a barium study to rule out obstruction. There was none found. She was released the next day after 2 liters of IV fluid and iv antibiotics. She continued to take the following for a week: 20 mg Omeprazole daily, 60 mg Cerenia for 4 days, 68 mg Baytril, and 400 mg amoxitabs. My vet told me a second day without treatment would have caused her death. I am now fanatical about calling pet food and treat companies, and my dog will never eat anything from outside the US. I also have learned "made in the US" is not enough-one must also know where the individual products are from. All pet food should have to define that also as well as listing not only %protein and %fat, but also %carbs, as, in this search I've done, I also found out "diet" dog foods decrease fat but increase carbs. This event cost me \$626.40 to save my Sara's life (which I spent without hesitation, but some people couldn't) and may cause future problems. Sara will never eat anything from China again. I suspect that China has contaminated their soil, their, food products, their animals, and their people.	1	Years	Retriever - Golden	Dog	45	Pound
<a href="#">EON-83207</a>	2/14/2012 16:00	Alpo Prime Cuts in Gravy Tender Meaty Bites	For years, I fed canned Pedigree little champions to my dog. She started rejecting it so I changed to Alpo prime cuts. Two days ago, she threw up her feed and it was almost undigested. Then she started soiling the floor with her feces all over the house at odd times. I confined her to one room and she continued to soil the floor. This morning she had urinated and soiled the floor. I have not fed her any more Alpo since then. I fed her cooked rice and water which she ate. Her stools are firm now, but she is very lethargic and only perks up when she is taken outside. There are no other signs of illness and she does not seem to be in pain when she is touched on the belly.	13	Years	Bichon Frise	Dog	15	Pound

<a href="#">EON-83180</a>	2/14/2012 14:45	Purina Veterinary Diets OM Overweight Management Feline Formula	In May of 2011 (b) (6) primary vet was concerned about her weight she was approximately 12lbs and he was concerned about her becoming diabetic. To get her to a healthier weight of approximately 9lbs he recommended we switch her diet from California Natural Chicken & Brown Rice dry food to prescription Purina OM dry. After 3 months she did not have any results with weight loss so the vet recommended we switch her to the Purina OM canned formula. We fed her 1 can per day as prescribed for 55 days. On day 55 she began to have what looked like vertigo. We rushed her to the emergency clinic since it was Christmas Eve and our regular vet was closed. She was initially diagnosed with a double ear infection and sent home with prescription ear drops. Two days later she still wasn't eating or drinking and appeared to be getting worse. I took her to my regular vet who said it appeared to be a neurological issue and recommended a specialty hospital. The specialty hospital referred us to the (b) (6) because their neurology team was the best and would provide the most complete care. After an MRI and spinal tap at the (b) (6) it was determined that (b) (6) was suffering from a thiamine deficiency and (b) (6) suspected it was the canned food. The cans were sent to Purina for testing and to an independent laboratory. The independent lab found that the thiamine levels were inadequate while Purina says the cans are fine. I am attaching in this report the full vet history of this event as well as the independent laboratory test results.	6	Years	Domestic Longhair	Cat	9	Pound

<a href="#">EON-83103</a>	2/13/2012 17:45	Wagon Train Jerky Treats	<p>I had fed my three dogs chicken jerky treats from Smiths and Walmart (same brand). They were Wagon Train brand. I had been feeding it to them for a few months. During that time all three stopped eating as much as they used to. (b) (6) in particular stopped eating his food and ended up losing 5 pounds. He grew very thin and his equilibrium got VERY bad. We thought it was due to the brain tumor...but my vet could not figure out why it was effecting his appetite and making him lose so much weight. We did blood work and it all actually looked good. (b) (6) declined very quickly and started having seizures. On (b) (6) he had a very bad one and I ended up having to put him to sleep. I stopped feeding the jerky treats at time. My other two dogs have since regained their appetites and are eating again.</p> <p>Today I saw the report on the jerky treats on line and called my vet. The office manager said that he also had a dog that had been effected but recovered. Like my other two dogs....his was healthy and did recover. (b) (6) was already dealing with the brain tumor and we think that this was more than his body could handle. I do have a 15 year old mini-schnauzer and fortunately she appears to be OK.</p> <p>This makes me VERY upset that I was feeding (b) (6) something that may have actually caused his death. I thought I was feeding him something healthy. There are no words to describe how horrible this feels.....knowing I may have actually been poisoning him. I will never again buy anything that is not made in the US. I will read every label VERY closely.</p>	10	Years	Terrier - Jack Russell	Dog	20	Pound
<a href="#">EON-83095</a>	2/13/2012 17:15	Wagon Train Chicken Jerky	<p>I have purchased Wagon Train Chicken Jerky for a number of months. My first dog (b) (6), a chihuahua/yorkie mix first starting throwing up and passing blood in May of 2011. I took her to the vet they checked her for parvo wich was negative and after paying the vet bill of \$180 and charcoal tablets she died that night. The following week (b) (6), and (b) (6) both full blooded chiuahuas started throwing up and passing blood as well as (b) (6) who was a chihuahua/yorkie mix and only 10 weeks old. I took all three of them to the vet and they too were tested for parvo all negative and given charchoal pills. That vet bill was \$320.00.They got woarse during the night and I took all three back to another vet the next morning and had to pay a deposit of \$500 before he would see them He too tested them all for parvo but all came back negative. He then determined that there was some type poisoning and gave them all fluids. I was to return with all three and three of my other dogs the next morning in order for him to test all but (b) (6) and (b) (6) both passed during the night. I took (b) (6) and (b) (6), (b) (6) and (b) (6) and had them all seen and all showed signs of the same yet (b) (6) passed away in the vets office. I withheld all treats from all the other dogs for about a week and have not had any problems since that time.</p> <p>To make a long story short I lost 4 very precious dogs in a matter of a week and could have lost more because of a product that was sold at Pet Supply Plus and Brunos. Not to mention that it cost me around \$1,000 in a week in vet bills yet still had 4 dogs die.</p>	1	Years	Chihuahua	Dog	10	Pound

<a href="#">EON-83086</a>	2/13/2012 14:45	Milo's Kitchen Home-style Dog Treats -- Chicken Jerkey	dog began vomiting and had bloody diarrhea. nothing had changed in his routine; food the same (dry canidae platinum), fresh water, no table scraps. my mother purchased milo's kitchen chicken jerky treats (best used by date = 03-20-12; 1300HV A) and within a few days he was vomiting and had violent attacks of bloody diarrhea. he had no more than 2 treats/day preceding this behavior. we took him to the vet and they ran a blood panel, took x-rays...all came back within normal range although the x-rays showed a large amount of gas in the intestine and he was dehydrated. he was treated with an injectable anti-nausea/vomiting and received liquids subcutaneously and is on oral anti-vomit, anti-diarrhea meds for the next week. within 24 hours he made significant improvement. am just reporting this as the jerky treats were the only change in his usual routine of things he eats and so it seems his reaction was from eating them although this obviously isn't sufficient to be more than an anecdotal account...but one the can now be added to all of the others. we threw the treats away and will no longer be feeding any treats made in china to any of our family dogs as a precaution. the stress of seeing him so ill plus the cost of the vet diagnosis make this seem a reasonable course of action.	12	Years	Retriever (unspecified)	Dog	85	Pound
<a href="#">EON-83075</a>	2/13/2012 13:45	Waggin' Train (I called it Waggin' TAILS in the beginning of my report) Big Blast Pork Skin Twists with Chicken Liver Center	I've been feeding my dog Purina One and 1 Waggin' Tails Pork Twist Roll for at least the past year. In Feb 2011, he had a seizure of unknown cause. At that time his liver and kidney levels were not right. He had repeat blood work a month later and his kidneys still weren't right but wasn't enough for the vet to be alarmed and he didn't have any dietary restrictions. Earlier this month he went in for a dental procedure and they did blood work before and his kidneys are still not functioning right and now he has to be on special food and I'm no longer feeding the Waggin' Tails (and that was before I saw the info about the Waggin' Tails). Now, I realize it was the jerky that people were reporting problems with but I wanted to make sure to get my report in in case the problems expand to some of the other treats.	8	Years	Cattle Dog - Australian (blue heeler, red heeler, Queensland cattledog)	Dog	60	Pound
<a href="#">EON-83066</a>	2/13/2012 13:15	Happy Hips Chicken Breast	Starting four or five days ago we started giving our dog a new brand of treats- Happy Hips Chicken Breast. He had one per day, so maybe 5 total. About three days his bowel movements were softer and last night he was up every hour with diarrhea and and vomited twice. This morning he's had wet stool tinged with blood. He woke up with no appetite and eventually came around to eating his food, later than usual. Not sure if the treats caused the problem but they were made in China and look like chicken jerky. Our dog has had occasional soft runny stools in the past which usually clears up with a little rice, but not this time, as he wouldn't eat it. He hasn't had these problems in many months though.	11	Years	Collie - Border	Dog	44	Pound
<a href="#">EON-83061</a>	2/13/2012 13:00	Canyon creek	(b) (6) began vomiting, experienced prolonged diarrhea, lethargy. Took to vet several times for check ups. Blood test showed elevated liver values. This went on for months. Finally realized it was related to the chicken jerkey treats that we were giving her. We stopped giving her the treats, and she has been improving. Not fully recovered, but appetite came back, vomiting stopped, and diarrhea stopped. 100% sure this is completely related to treats. Happy to speak to you if you need more details. This product needs to be taken off of the market. Found out they are manufactured in china, and other dogs have had exact same issues. Very upset that these are still available for purchase. Two brands I fed her-waggin train and canyon creek	13	Years	Shepherd (unspecified)	Dog	40	Pound

<a href="#">EON-83025</a>	2/12/2012 19:45	Canyon Creek Chicken Jerky Treats	My daughter bought Canyon Creek chicken jerky treats for (b) (6) birthday. She gave him the treats on a Friday and he was sick by Sunday. My husband called me on my cell phone and said (b) (6) had some kind of spell and fell and was rolling around like he was having a seizure. I made a vets appointment on Monday and the Vet immediately asked me if he could have been poisoned. I was shocked and I said I don't think so we have a 6 foot fence in our back yard. She took blood tests and x-rays and said that his white blood cells were attacking his red blood cells. She also thought from the x-rays that something looked suspicious around his Kidneys. We had to take him to this other Vet Emergency Center to get a more thorough test run on his kidneys and other organs. They said there was no cancer to be found. The Vet gave us a prescription to see if it would take care of his blood problem. We went for two visits both getting worse. Then my daughter came home for lunch and saw (b) (6) with one of his eyes closed and took him to the Emergency facility. They told us that whatever was causing this blood disorder was progressing so fast that there was nothing he could do for him. We had to have him put to sleep. After (b) (6) dying I heard on tv about this dog treat that was killing dogs and guess what it was the same dog treat that was given to (b) (6) and (b) (6). (b) (6) was 7 and my daughter gave him more than the other dog (b) (6). (b) (6) is over weight and she only gave him one. (b) (6) is also only 2 years old. I really think that this Canyon Creek needs to pay for everything that they have put me and my family through. They also need to take this treat out of all of the stores, but they haven't. I want someone to pay for all of the animals they have killed. Please do this for all of our pets, please.	7		Sheepdog - Shetland	Dog	40

<a href="#">EON-83024</a>	2/12/2012 19:45	KC Beefhide Premium Pet Treats	She was given a rawhide on Friday, (b) (6), at the same time as my other dog. (b) (6) became ill on Friday night and most of Saturday, but recovered by Sunday. She had excessive amounts of diarrhea all of Friday night, and partially through Saturday. During that time she had very little interest in food, and did not regain her appetite until Sunday. I've submitted a report on my other dog who became quite ill Sunday night and was put to sleep on Monday.	5	Years	Retriever - Golden	Dog	89	Pound
<a href="#">EON-83023</a>	2/12/2012 19:45	KC Beefhide Premium Dog Treats	She was given a rawhide on Friday, (b) (6), at the same time as my other dog. The other dog became ill on Friday night and most of Saturday, but recovered by Sunday. (b) (6) however, became very ill late Sunday night and progressively became worse throughout the morning. (b) (6) had massive amounts of diarrhea and vomiting throughout the night and became very weak by the morning. I took her to my vets around mid-morning, and she grew worse over the day and we ended up putting her to sleep that afternoon. Her liver was bleeding, and her other illness appeared to have taken their toll. However, my other dog was also quite sick, which is what makes me think the rawhides may be contaminated.	11	Years	Great Dane	Dog	120	Pound
<a href="#">EON-83022</a>	2/12/2012 18:15	Waggin' Train Wholesome Chicken Jerky Tenders	<p>I have 3 Yorkies and one Silky. I purchased the Waggin'Train Wholesome Chicken Jerky Tenders at WalMart. I started giving these "Natural Chicken Fillets" after adopting a Yorkie from a rescue organization. (b) (6), our rescue, only has 2 teeth and needed to be hand fed when we brought her home. I gave these fillets to my 2 Yorkies and Silky to keep them busy while I hand fed (b) (6) as it took them a while to eat them and it gave me one on one time to feed her. I started this on Sunday, October 16, 2011. After 4 days I noticed something was not quite right with my Silky, (b) (6). The first thing I noticed was that she looked at me with a totally empty look. On Thursday, October 20, 2011 she would just stand in one spot and would look at me in a puzzling manner. She refused to go off of the deck in the back yard and would just stand still. It took some coaxing to get her down the steps. I had no idea what was going on with her. I at first thought maybe she was constipated and maybe had poop stuck to her, but after checking this out I found that was not it. She slept that night okay and on the morning of October 21, 2011 she seemed a little better and ate her breakfast as usual. She did not go outside once again and just stood staring at me. Her eyes were trying to tell me something, but I could not figure it out. Once again I checked to see if she had poop stuck to her, but she did not. I did talk to our Vet's assistant to tell her that (b) (6) was not feeling good and to let our Vet know in case we would need him on the weekend. On Friday when we returned from work @ 6 p.m. she did have poop stuck to her so we thought that was the problem. We washed her up, but she still did not seem herself. That evening @ 10 p.m. she started having some rapid respirations and her body temperature seemed cool which was out of the ordinary. At 3 a.m. Saturday, October 22, 2011 she was having difficulty breathing and we tried getting ahold of our Vet and had to leave a message. I did get ahold of his assistant and she said she would get ahold of him right away in the morning. (b) (6) calmed down after giving her half of a pain pill and she was able to rest after about 2 hours, of which she stood most of. Our Vet called @ 8:15 a.m. and I immediately took her in. Her temperature had dropped and the roof of her mouth and gums were white. She had severe anemia and was toxic. She was in shock. After some testing they found that she was getting fluid built up around her lungs so he drained some of it off and she seemed to breathe a little better.</p>	11	Years	Terrier - Silky	Dog	12	Pound

Key	Created	Product Name	Description	Age	Age UOM	Breed	Species	Weight	Weight UOM
			The fluid that he drained was blood tinged. The Vet gave her a steroid shot, an antibiotic, vitamin K, and vitamin C. He said it was like she had eaten rat poison, but we have no poison around. I left her there telling her I was sorry, but that she would be okay. She kissed me as if to tell me not to worry, which was just like her. When I got home my Vet called to ask me some more questions. What kind of food she was eating and what kind of treats she was eating? The only thing different was the Waggin'Train Jerky Tenders. He asked if they were made in China? He said that there is an ingredient in treats that are made in China that can cause problems. Of course I immediately got the bag and turned it over only to see first "Waggin'Train is an American owned company." I thought "whew!" only to look over to the left and see "Made in China!" My heart sank. Why had I not known about this I wondered???? My Vet gave me an update about every 3 hours or so. First call @ 11:10 a.m. she was not any worse, but not any better. 2nd call @ 2:45 p.m she was a little better, she even met him at the front of the kennel and licked him as she wagged her tail. 3rd call @ 5:25 p.m. she had gotten worse and he removed more fluid off of her lungs. 4th and final call 8:29 p.m. SILENCE...I have some bad news for you! (b) (6) died @ 8 p.m.! Lots of crying followed. (b) (6) was a kind and gentle spirit. She loved life. She was 11 years 8 month						
<a href="#">EON-83010</a>	2/12/2012 16:00	Milo's Kitchen Chicken Jerky	On Monday evening, February 6, 2012 - I gave (b) (6) a piece of the Milo's Kitchen Chicken Jerky at 6PM. My husband gave him another strip of Milo's Kitchen Chicken Jerky at 9PM. At 3:00 AM, my husband woke to find (b) (6) violently throwing up and having massive amounts of watery diarrhea. (b) (6) became extremely lathargic, wouldn't eat, drink, and refused to even lift his head. At 12:30PM, my husband took (b) (6) to the Vet. We ran through everything (b) (6) had eaten but completely forgot about the Milo's Chicken Jerky. We had never given our dog this "treat" before. For two - three days, (b) (6) was lathargic, barely eating, not wanting to drink any water. It wasn't until yesterday, Saturday, February 11, when my husand was researching everything in our kitchen (b) (6) would have come into contact he remember we both had given our dog strips of the Chicken jerky. Upon researching further - (b) (6) symptoms were exactly what other's have described.	8	Years	Cattle Dog - Australian (blue heeler, red heeler, Queensland cattledog)	Dog	60	Pound

<a href="#">EON-83006</a>	2/12/2012 12:15	Nutro "Natural Choice Lamb Meal & Rice Formula"	After my dog (b) (6) suddenly died I shared the almost full bag of Nutro "Natural Choice Lamb Meal & Rice Formula" dry food with my brothers' dog. I had bought the bag (10% more FREE, 38.5lbs \$49.99 at (b) (6) around the first of September 2011. See the initial Pet Food Safety Report, ID 7723 that was successfully submitted on 2/2/2012 10:51:55 PM EST to the FDA, and it was issued an Individual Case Safety Report Number (ICSR) of 1023989. I am here to report that my brothers' dog "(b) (6)" died suddenly last night. (b) (6) showed the same symptoms just before she died just like (b) (6) As if she was starving herself she lost about 20 lbs suddenly and her breathing seemed more like coughs, she was panting & moaning as if her pain was originating in her stomach. (b) (6) started losing her hair and refused to eat the dog food but the poison that had entered her body was too much. (b) (6) died (b) (6)/12 and I'm very upset that I may have had anything to do with the loss of my brothers' family pet. Do you want samples now or do I need to tell someone else?	9	Years	Retriever - Chesapeake Bay	Dog		
<a href="#">EON-83005</a>	2/12/2012 4:30	Canine Chews(TM) Basted Rawhide	I've given my Bassets chicken basted rawhide chews purchased at WalMart for several years. They are fairly flat with no knots which is considered safer by my vet. I do not remember the exact brand I purchased in the past because some time ago WalMart changed to one called Canine Chews SKU 8 77787 00374 2 which are labeled chicken basted rawhide chips. They are a product of Mexico. Since the change from the past product which is no longer available to the current one, (b) (6) has had frequent stomach upsets that make me suspicious of whether this product is causing her ailment. (b) (6) has been seen by the veterinarian several times and I've treated her with the meds prescribed both when the vet saw her and when she has had other bouts of stomach upset. Could this product be checked out for contaminates?	3	Years	Basset - Artesian Norman	Dog	52	Pound
<a href="#">EON-83004</a>	2/12/2012 3:00	Waggin Train chicken jerky tenders	We had given (b) (6) this same treat, same brand for several years when one day he threw it up not long after I gave him one. About 5 hrs later my boyfriend gave him one when he got home and the same thing happened. For the next few days I watched him seriously, did not give him any treats, and found (b) (6) wasnt eating correctly, and he was having diareah - I put him on boiled chicken breast with rice diet and that seemed to help, so after 5 days I gave him another treat and POOF! within minutes he threw it up and it was another 5 days of diareah and boiled chicken breast with rice for him - about two weeks later, after I had returned the treats and (b) (6) was back on a regular diet, he suddenly couldn't urinate or pass any stool - my vet gave him a cortisone shot for inflammation of the intestine, antibiotics, and a anti-nausious pill, just in case he started to get sick again - this problem passed, (b) (6) seems ok now, but we have not given him any type of dried chicken treat since. I have noticed he does not lay down in the same position he used to after this event, so he never seems to be able to relax all the way - my vet thinks I worry to much about it but its like he liked to lay this way for almost 11 yrs and now he wont or cant- I have told everyone i know NOT to purchase this product or anything like it.	10	Years	Siberian Husky	Dog	60	Pound

<a href="#">EON-82997</a>	2/11/2012 18:00	Dogswell Vitality Chicken Breast with Flaxseed	After giving our dogs Dogswell Vitality Chicken strips (purchased on 12/16) over the course of two weeks our dogs both became ill and one eventually had to be euthanized. On 1/1/2012 our four year old Shih tzu, (b) (6), began vomiting, was urinating a lot and acting generally unwell. She vomited multiple times over the course of three days and then our pug, (b) (6) got sick on the third day (Jan.4, 2012) (b) (6) continued to worsen, vomiting multiple times each day over the course of the next 4 days. We took (b) (6) to the vet on Tuesday, 01/10 where he was found to be in acute renal failure. We brought (b) (6) in and she too was in renal failure. (b) (6) BUN numbers were well over three times the normal number (63 BUN), (b) (6) BUN was well over 10 times at 249. Our veterinarian kept (b) (6) on fluids, hoping to flush out his kidneys. His numbers never budged. After over 72 hours of fluids, his numbers were basically the same (BUN was 241 on 01/10) we were told there was nothing they could do. We got him as comfortable as possible, loaded him with fluids so that he could come home for the weekend. He deteriorated over the weekend, stopped eating and drinking, developed ulcers in his mouth and on (b) (6) was put to sleep.	6	Years	Pug	Dog	15	Pound

<a href="#">EON-82996</a>	2/11/2012 13:45	Milo's Kitchen Chicken Jerkey	I fed my dog Milos Kitchen Jerkey Treats. I have done this occasionally in the past and she has been ok with it. I gave her a few treats one moring (2 or 3?) and went out for the afternoon. When I got home that evening, she was very ill. She had peed blood all over the floor. She was very lethargic and would not eat or drink (I actually though I was going to lose her) I had not heard of the warnings about the treats and just though something was wrong, or her medication had caused a problem, and was surprised how quickly she had gone from fine to ill. Took her to the vet first thing the next morning - the vet said the meds were ok and shouldn't have caused her symptoms. She ran blood and tests. Said nothing showed up, could be an infction, and sent her home with antibiotics. She recovered after a few days. She is now fine. I avoided all her treats at first because I was worried it would upset her stomach, it wasn't until later that I heard about the chicken warning, and threw all of those away. (This was all back in November 2011 - dates are approximate, but I can get exact date from vet if needed)			Mixed (Dog)	Dog	15	Pound

<a href="#">EON-82993</a>	2/11/2012 11:30	Milo's Kitchen home-style dog treats Chicken Jerky - No artificial flavors or colors	We noticed our dog started having very bad smelling gas, occasionally vomited after she ate and was very lethargic off and on since December 2011, which is when we purchased Milo's Kitchen chicken jerky as a Christmas treat. Since December, the dog has had one or two pieces of chicken jerky a week. Recently the dog started drinking two to three times more water than usual throughout the day, vomiting after meals, sleeping more than usual and had three days and nights of horrible smelling gas. She is a very healthy, well cared for dog and we could not figure out what was wrong with her until I read an article about dogs getting sick from eating chicken jerky made in China. We had last given her a strip of Milo's Kitchen chicken jerky a few nights earlier (on 2/8/2012) as a treat.	6	Years	Retriever - Labrador	Dog	70	Pound
<a href="#">EON-82991</a>	2/11/2012 9:30	Dogswell Biscuits with Benefits Vitality	Shortly after starting to give Dogswell Biscuits with Benefits, dog started having urinary urgency and accidents and increased water consumption. I sent urine in to vet for UA and am waiting results. Then just read about problems with these treats with other dogs where increased urination and water consumption were on the list of symptoms to watch out for.	14	Years	Spaniel - Cocker American	Dog	24	Pound

<a href="#">EON-82972</a>	2/11/2012 4:45	Waggin Train Pork Skin Twists with Chicken Liver Center	I started giving (b) (6) the Waggin Train dog treats because they claimed to be all natural. He loved them and did not have any reaction at first. He saw the vet regularly and had excellent health. About 2 weeks after I started giving him the Waggin Train dog treats he completely stopped eating(dry dog food, treats, wet dog food etc) and every time he tried to eat he would just throw it up , so I took him to the vet. They did numerous tests but everything came back normal. He continued to get worse the next couple days to the point he wouldn't even drink water, his stools became liquid and yellow. He went from weighing 19 pounds to 11 pounds within 2 weeks. I took him to the vet twice a week and having ultrasounds and blood-tests done because just kept getting worse. The vet tried putting him on all kinds of medication to try and increase his appetite and none of them worked. I put him down within 4 weeks of me giving him the Waggin Train dog treats because the vet believed he was in such bad condition he wouldn't have made it through the weekend and that he was suffering. The vet was so shocked at how quickly he went down hill from being in such excellent condition. The day he died I got the test results from the ultrasound that was given 5 days prior, he was diagnosed with the worst case of liver cancer. The vet told me that is was very possible it could have been caused by the Waggin Train dog treats or any treats Made in China because she priorly had a few dogs that she was treating that had died after been given dog treats made in China.	4	Years	Terrier - Jack Russell	Dog	19	Pound

<a href="#">EON-82971</a>	2/11/2012 3:00	Unsure as vet wanted dog on natural home cooked food after seizures	Dog started having seizures out nowhere, for seemingly no reason. After talking to the owner of the dog to try to trace back when they started (dog is about 4 1/2 - 5 1/2 now, but it seems that when these chewy jerky treats were first reported to have cause health issues were possibly when these seizures started. This country was also getting reports of childrens' jewelry from China contained lead or mercury, seems we've had several problems with meds, food products, etc. having issues...has it possibly occurred to ANYONE that China has had some really long term goals in mind for our children and animals? They already practically own us, I understand that through dummy corporations or greedy individuals that they're buying property from our own Dept. of the Interior of very isolated stretches of lots of acreage (in Ky., Col. and several other states that are either rather close to nuclear power plants, places like Ft. Knox, big military bases). Could these girls in (b) (6) been affected by something they've eaten or had on their persons that were made by the Chinese; could that explain why so many children are autistic; could these things be the explanation of some of these so-called mystery diseases that no cause can be found for in adults, all of which are weakening our society? Could most of the things we see in our stores...everything from towels, pots and pans, dishes...things that we expose to heat as we cook or use those products have toxic chemicals embedded in them that are slowly but surely getting into our systems and destroying us without the Chinese risking a loss of life? Not only are they buying up houses in the Atlanta area; there have been reports on TV news of them buying up entire housing subdivisions where the developers had gone broke, in some of the nicer towns. Would that be, not so much for the profit, but for possibly for those families of a future military and ruling party in our country? I'm not some radical, but I do remember very clearly what one of my very brilliant professors said towards the end of our year with him in a Russian History class (hated history, but he had an outstanding reputation as being a really interesting and inspiring teacher). He was from S. America, I think was Harvard educated, had been offered a position there but refused it to teach at our small womens' college outside of (b) (6), he had taught for many years in both China and Russia. Back then, you heard little about China...you might have said we were in those years of the cold war with Russia with fear of Russians being paramount. But he wanted us to remember his warning after the years he spend teaching in both countries...that China was the country we had the most to worry about; that they were able to wait to reach their goals for decades and even centuries...that they would be our main adversary. So, could ANY of these coincidental happenings be tied in to them reaching their goals? I myself was diagnosed decades with something that was considered to be all in my head...then some of us were considered the canary in the coal mines...there's still no answer, sometimes skepticism about what I and many have. Something seems awfully fishy, not in Denmark but in China and maybe many of their products	3	Years	Terrier - Jack Russell	Dog	15	Pound

<a href="#">EON-82968</a>	2/10/2012 23:45	Waggin' Train Wholesome Chicken Jerky Tenders Chicken Dog Treats. Natural Chicken Fillets LOT NO: B1CA5318A	My roommate bought Chicken Jerky treats a week ago for their dog and gave some to my dog who has now shown signs of illness since then. Subsequently, my lab, who is in excellent health started shaking, eating grass and has had progressively worse diarrhea. Further, last night he virtually slept on top of me, which may not sound like a symptom, but it is for my dog. He is very independent and only seems to get physically close to me at night if he is super cold or ill. Today, after seeing a headline for this story, I went looking in the cupboard for my roommate's dog treats and discovered that indeed, they had a new bag of chicken jerky treats. The bag said "American company" so i started to put it away, but then noticed at the last second that it said "made in China" in another place. So i called my roommate to discuss and she admitted to feeding my dog some of these treats over the last week - one each morning. As to the state of health of their dog, it cannot be known with certainty, since their dog is in general ill health. Further, they don't walk their dog so did not know if (b) (6) has had diarrhea or not, but I can attest that she seems to be drinking more water lately. My dog generally does his business on our daily walks, so I've noticed that his stools have been getting progressively worse. His diet is steady except for these treats that she has fed to him, so they remain my sole suspicion.	8	Years	Retriever - Labrador	Dog	95	Pound
<a href="#">EON-82967</a>	2/10/2012 23:45	Canyon Creek Ranch Brand Natural Chicken Tenders	Just took my dog to the vet yesterday. She has been vomiting and lethargic off and on for over a month. The vet performed several tests. The tests factors concerning her kidneys and liver were slightly off, but the vet could not find any other problems. She is now on antibiotics. I just read a message a friend posted to Facebook about the possibility of negative affects due to Chinese made chicken strip dog treats. We do give these to our dog. They are her favorite treat. We will no longer buy these treats. Thank you Facebook!	2	Years	Mixed (Dog)	Dog	46	Pound
<a href="#">EON-82966</a>	2/10/2012 22:45	Waggin' Train Jerky Tenders. Natural Chicken Fillets	I was rewardiong (b) (6) with Chicken Jerky Treats (China) over a period of 3 months October to December 2011 (3 to 4 treats/day). After about 6 weeks, (b) (6) developed diarrhea, and urinary incontinence. She was taken to our Veternarian (b) (6) and he proscribed estrogen therapy for the urinary issue. Her urinary incontinence stopped but the diarrhea continued at a reduced rate. By the end of an additional month (approx. the 15th of Decenber) she began to show a drop in activity and began to refuse her food. By the end of December 2011, she would not even eat her favorite foods and was very listless. We feared she might have cancer and took her for a repeat visit to our Veternarian. He ran a CBC and Canine Chem scan and found several issues, chief being signs of terminal acute kidney failure. He suggested euthanization and we agreed.	11	Years	Collie - Border	Dog	28	Pound

<a href="#">EON-82961</a>	2/10/2012 18:00	Canyon Creek Ranch Dried Yams	12/23/2011 (b) (6) was first examined because she was urinating more frequently. Polyuria and polydipsia began around 12/17/2011 and owner purchased Dried Yams at beginning of December. Urinalysis reveals that dog is not concentrating her urine. Specific gravity of urine 1.000. Was Lyme + on 4DX on 12/23/2011 and was started on Doxycycline once per day for 30 days. No protein in the urine. Chemistry revealed Albumin of 4.6 (N 2.5-4.4), Alk phos of 2167 (N 20-150), Glucose of 112 (N 60-110). Urine cortisol:creat ratio low at <0.2. Saw dog again on 2/3/12 and still had polydipsia/polyuria. Eating fine. Difficulty jumping. Urine specific gravity still 1.000. Checked thyroid level and T4 low at 0.8 (N1.1-4.0). Began Levothyroxine 0.8 mg bid. Eyes also tearing more and dog panting alot.	6	Years	Mixed (Dog)	Dog	95	
<a href="#">EON-82955</a>	2/10/2012 15:00	Waggin Trail Chicken Jerky	I have been feeding my dogs Waggin Trails chicken jerky for about 3 months now. I have noticed a decline in my dogs appetites, lethargic and having diarrheal stools. They haven't even had much interest in eating their favorite people food over the past several weeks. I was not sure what was going on with them at all and then when I saw the report about the waggin Trail Chicken jerky it was like a light bulb went off. I said that sounds just like my dogs. I still have a bag open that they have been eating the past week and I will save it. I had just bought 2 more bags yesterday morning to which I returned today. I also was babysitting a dog over the weekend 3 weekends ago and gave her some of these treats. My that Wednesday night she started getting sick and deteriorated to point she died within a week. Her owners spent thousands trying to save her so they have medical records that might be able to help with finding out if this could have caused her death. My dogs are still sick today. I am going to quit giving them the treats and see if they start eating better and get more energy. I am very concerned that this is what happened to (b) (6) the dog that was perfectly healthy when she came to my house for the weekend and ended up dying a week later.	9	Years	Hound (unspecified)	Dog	185	
<a href="#">EON-82932</a>	2/10/2012 11:45	Milo's Kitchen Chicken Jerky	Purchased Mio's Kitchen Chicken Jerky treats. Opened bag and gave to (b) (6) around noon on Wednesday, February 8. Around 7:00 pm that evening, he started with diarrhea and it has continued for the past two days. Coincidentally that evening, I received an email from an organization called (b) (6), and they provided a link to your website warning about chicken jerky products made in China. Because I try to purchase only quality products for my dog, I couldn't believe that Milo's Kitchen was one of the brands listed. I also have their products, beef sausage and chicken meatballs for him, and when I went to check the bags the only item made in China was the chicken jerky. I called the company and asked them why the chicken was made in China, and they told me it was because it was dehydrated and not as available in the United States. I told them it was more like it was probably cheaper to produce in China. I will be returning the product to Petco where I purchased it and bringing the notice from the FDA with me. I am going to ask them to please remove it from their shelves or at least put up the notice that it may cause harm to dogs.	4	Years	Retriever - Labrador	Dog	78	Pound

<a href="#">EON-82586</a>	2/8/2012 19:45	Canyon Creek Ranch Yam Dog Treats	I had been feeding my dogs Canyon Creek Sweet Potato treats. I have 2 very small dogs and they did not eat very much of the treat. However my larger dog loved them and would eat at least 2/day. Last week she began having bloody diarrhea and vomiting. I called my vet and made the dog NPO except for water. 24 hours after she stopped having diarrhea/vomiting, I fed her rice and chicken. I fed her this for 2 days. Her GI symptoms resolved. I did not correlate her illness to any of her foods or treats. I read an article by Pet Pardons News the other day and realized she might have become ill due to the treats. I have thrown all those treats away.	12	Years	Mixed (Dog)	Dog	29	Pound

<a href="#">EON-82443</a>	2/7/2012 22:45	Dingo - peanut butter bones plain mini dingos dingo chicken bones	My dachshund has always been in excellent health and has never been overweight. She has always been a little over 12 pounds in weight. She loves Dingo products and typically has one daily. In early November 2011 she went in to get the recommended canine flu shot. She had lost a pound of weight - she was then 11 lbs 4 oz which was a total of 1 whole pound down from her previous weight. I was concerned with her weight loss and noted her ribs were sticking out more. She remained active and was eating well so we decided to continue to observe her weight. Approximately a month later she began having uncontrollable diarrhea and she lost another pounds getting to an alarming 10 pounds. My veterinarian ran many tests on her with no conclusive results. I have had to change her from Royal Canine Dachshund food to Royal Canine GI food which I can only buy from the vet (and is quite costly in comparison to what was already a high end dog food). After cutting Dingos, etc from her diet we have gotten back to 11 lbs 10 oz. Now she only gets more organic treats. I recently read concerns about the health effects of Dingos and other imported dog treats and their adverse effects. It really concerns me that Dingos could have been the cause for these almost lethal effects to my beloved dog. Please investigate these products and ensure their safety before allowing them for mass consumption to the beloved pets of our great nation.	5	Years	Dachshund - Miniature	Dog	12	Pound
<a href="#">EON-82440</a>	2/7/2012 22:15	Dingos Dental Treats	We bought the Dingo dental treat and gave them to our dog. The next day she began experiencing extreme vomiting and diarrhea. She became very lethargic. We had to take her to an Emergency Pet Hospital where they gave her medication to stop the vomiting and diarrhea.  After I saw the FDA warning about these products I had to share my story. Our dog is better now but she was extremely sick for several days.	6	Months	Dachshund - Standard Smooth-haired	Dog	12	Pound
<a href="#">EON-82437</a>	2/7/2012 21:15	Waggin Train jerky treats	unknown if this is related, but I have fed my dogs Waggin Train Jerky treats for a number of years. This greyhound developed kidney disease and eventually died as a result. Another dog we currently have, a beagle, drinks a lot of water and urinates excessively. It had come to our attention that these symptoms may have been brought about by feeding these Waggin Train dog treats. We have since switched to a different dog treat.	9	Years	Greyhound	Dog	90	Pound
<a href="#">EON-82436</a>	2/7/2012 21:15	waggin train chicken jerky treats	I was giving Waggin Train chicken jerky treats to my dogs, a total of 1 complete strip each a day until the package was used up. The smaller of my two dogs sickened after about 7 days of feeding the treats, and had extreme abdominal pain and tenderness, lethargy and wouldn't eat her regular food (Royal canin for small adult dogs). We took her to the emergency vet, and the next morning, to her regular vet. The xrays and diagnosis came up with an suspected pancreatitis.	5	Years	Poodle - Toy	Dog	5	Pound
<a href="#">EON-82435</a>	2/7/2012 21:00	Waggin' Train Jerky Tenders	She has been vomiting and only receives one treat a day. I took her off of them a month ago b/c at the time Waggin' Train claimed on their website there had been no complaints or complications with their chicken jerky. They insist it's all natural. Why is it necessary to make natural chicken jerky in China?  A month passed with no chicken treats and no vomiting. I gave her one on Friday and she vomited on Friday, Saturday, and Sunday from just one piece. She will not have anymore of them.	4	Years	Shepherd Dog - Australian	Dog	56	Pound

<a href="#">EON-82403</a>	2/7/2012 17:45	Rollover Premium Dog Treat Beef Liver Chunks, Rollover Premium Dog Treat / Beef Liver Chunks/ All Natural 100%	I went and purchased dry dog food,crickets, and Rollover 100%Natural Beef liver dog treats on 02/06/12 at approx. 3pm. Once I, had gotten home from the Petsmart, in (b) (6) i gave my two dogs (b) (6) and (b) (6), a chunk which I had to break, to them each. put the bag away as my dogs went to their own areas to eat their goodies. About an hour later, I opened the bag on top my washing machine and did the same thing, but this time as i had done it over a surface I guess, I saw a 3-5 lil bugs(like mites/ticks maybe) scurrying around in the dust and crumbles the liver had left. I was grossed out and i raced to my dogs but they had consumed it all. I quickly sprayed down the area, got a plastic bag and proceeded to take the liver pieces out of the original bag and place in a white garbage bag. As i did this, the closer I got to the bottom of the bag, the bugs were now coming out too, looking in the dust in the bottom of the original bag I could see like 10+ bugs running around. My dog woke up, unactive, not hungry, not interested in her walk and over 12+ hours later had puked up undigested pieces of the liver.	4	Years	Pit Bull	Dog	56	Pound

<a href="#">EON-82385</a>	2/7/2012 16:45	Milos Kitchen	The older dog (9)had the worst symptoms and is now recovering.The dog was a very healthy dog who we would take on a 1 mile walk every day. Now she can only go out to the backyard to use the restroom.It started with Vomiting and diarrhea. She then Became unable to walk and kept falling. Excessive drooling. Sleeping a lot. After consuming Milo's kitchen treats from Walmart. I thought she was going to die. We looked the symptoms up and it looked like poisoning. the younger dog age 1, drank excessive water and did not use the restroom much. He had vomiting for a week. He is fully recovered now. We bought the product at Walmart's, there was a promotion to buy Milo's treats for free if you bought Milk bones. I give my dogs Purina dog chow and milk bones and bought the Milo's treats as a promotional sale. This makes me feel very angry that the company will not pull this product off the shelf and all these dogs are suffering and dieting. Purebred dogs, such as German Shepard's cost a lot of money to buy, any where from \$500.00 to \$3,000 dollars. And they are part of our family. My daughter and I have been crying about the old dog, because it was the last present he bought my daughter before he died with a heart attack in 2003. I hope you do something about this?	9	Years	Shepherd Dog - German	Dog	100	Pound
<a href="#">EON-82376</a>	2/7/2012 15:00	Waggin Train Chicken Jerky Tenders	was feeding him Waggin Train Chicken Jerky Treats and my dog (b) (6) had to be euthinized just before Christmas 2010 due to Kidney Failure.	7	Years	Shepherd Dog - Australian	Dog	45	Pound
<a href="#">EON-82374</a>	2/7/2012 14:45	Milo's Kitchen chicken Jerky	After being fed Milo's chicken jerky, she began to urinate frequently and had an accident in the house. We took her to the vet to see is she had a bladder infection. She had an unusal reading, but they weren't sure if the sample was contaminated. So they got a sterile sample a the vet's office. The test came back ok. The sympton's started to subside. She was fed the jerky again and the paniced frequent urination started again. That's when we heard the announcment on t.v. about the problems with Milo's chicken jerky.	9	Years	Mixed (Dog)	Dog	40	Pound
<a href="#">EON-82371</a>	2/7/2012 14:00	Ever Pet Adult Dog Food	I ran out of my regular dog food and purchased one bag (approx. 4 lbs) for one-time use. I fed the Ever Pet primarily to the one dog (the others still had left dog food in their bowls). Since then, she has lost a significant amount of weight and is listless. I took her to the vet who could find nothing else wrong with her (intestinal worms/heart worms clear). Unfortunately, I could not afford any additional testing (complete blood panel). The vet recommended adding pasta to her food, which I have started, and not feeding her this brand of dog food. However, she is still significantly underweight for her size (she should be at least 65-70 lbs), but seems to be recovering; she is not losing any additional weight, but she is also not gaining. She did experience some diarrhea and dehydration, but that seems to have stopped.	2	Years	Hound (unspecified)	Dog	55	Pound
<a href="#">EON-82370</a>	2/7/2012 14:00	Waggin' Train Wholesome Chicken Jerky Tenders, Canyon Creek Ranch Brand Natural Chicken Tenders	Dog would get very nauseated, heartburn like and some heaving, had red rash on underside of ear, drank more water than normal, some lethargy. I was giving this treat off and on and symptoms also came off and on, first noticably in March 2011. Took dog to Vet and we could not figure out what was causing this. Subsequently I received information about the chicken jerky treats and immediately quit giving them to the dog. Nausea subsided in 8 days. Rash on ears still visible but less after three weeks. Energy and water consumption back to normal in about two weeks after discontinuing treat. See ataachment for more information.	4	Years	Other Canine/dog	Dog	73	Pound

<a href="#">EON-82109</a>	2/5/2012 13:45	Kingdom Pets All Natural Ingredients Chicken Jerky	Fed both my dogs chicken strip treats from Costco. My older dog, (b) (6) 13 yrs appx, was aging but in excellent health. She started slowing down, walking slow, vomiting etc. Took her to the vet and she was in kidney failure. I was not aware of the issues with dried chicken breast treats from China. So I assumed it was her age. My 2nd dog became deathly sick in 12/2011. My vet has not been able to figure out exactly what is wrong w/him. He sent me to a specailist last week. He asked what (b) (6) has eaten since becoming sick in 12/2011. He immediately said throw away the The Costco Chicken treats from China and never feed those to my animals again. At first, when (b) (6) came down with sudden kidney failure, I thought it was just her age. Now that my 2nd dog is gravely ill, I have to wonder if it was these treats and now I get to live with wondering if I poisoned my own pets! I know you are trying to figure out what is in these treats, but why have they not been recalled and why are stores able to still sell them? I have the almost empty bad that both dogs had eaten from and I have a 2nd bag I bought last month that only (b) (6) has eaten from. I would like to mail these two bags to you if possible!	13	Years	Lhasa Apso	Dog	25	Pound
<a href="#">EON-82108</a>	2/5/2012 13:00	BEEFEATERS CHICKEN FILLETS NATURAL DOG TREATS	(b) (6) was given small portions of the checken fillet treat several times daily. Assumption is there was a cumulative effect (b) (6) defecated during the night in the house 3 nights in a row. In the approximately 8 years we have her she has NEVER done this before. Also observed her to 'ask' to be taken out for a walk much more frequently than is her usual. and noted her to be somewhat sluggish in behavior and not wanting to be out of my site.	11	Years	Mixed (Dog)	Dog	13	Pound
<a href="#">EON-82105</a>	2/4/2012 14:15	Cadet Real Chicken Treats Gourmet Chicken Breasts	After consuming chicken jerky from China ( Cadet brand ) he quit eating food - even things he previously couldn't resist. He vomited, became lethargic, drank copious amounts of water. Upon having blood tests at the Vet, he was found to be in kidney failure. Treatment followed but no improvement in three days.	2	Years	Mixed (Dog)	Dog	11	Pound
<a href="#">EON-82104</a>	2/4/2012 12:45	Milo's Chicken Jerky	I had been giving (b) (6) the Milo's chicken Jerky Strip treats for several months, I noticed recently she was having loose, dark bowel movements, occasionally vomiting and did not have her normal appetite. I took her for an examination and ther ewere no apparent signs of a physical problem. I saw an article on Yahoo dealing with a Vet in Tampa that had found what appeared to be kidney / liver problem in a dog that had been given chicken jerky treats. I did more research and found that the FDA was concerned about these treats that were manufactured in China. I stopped giving (b) (6) the treats and she appears to be normal again.	7	Years	Chihuahua	Dog	10	Pound
<a href="#">EON-82095</a>	2/4/2012 11:30	Canyon Creek Ranch Brand Natural Chicken Tenders	(b) (6) had her yearly checkup in July 2011 and was found to be fit and healthy for her age. In December 2011 I began seeing a lack of energy, excessive thirst, progressively heavier breathing and what seemed to be a bit of depression. Just after Christmas 2011 her condition became noticeably worse and I took her into our Vet. The Vet examined her and suggested x-rays which showed fluid in both her abdomen and chest as well as masses in both cavities. He told me that with the masses in both cavities surgery and further treatment was not in her best interest. (b) (6) died on January (b) (6) 2012. The only difference introduced in the last year was the chicken jerkey treats I had given her prior to finding out that they could be toxic in October 2011. Her daily diet consisted of weight maintenance Blue Buffalo dog food. I held onto the last bag of chicken jerkey strips when I found out what they can do just in case so that is still in my posession.	12	Years	Collie - Border	Dog	72	Pound

<a href="#">EON-81996</a>	2/2/2012 23:45	Nutro Natural Choice (10% more FREE 38.5lbs) lamb Meal & Rice Formula dry dog food	My 13 year old, very healthy Beagle/Terrier mix had been eating Nutro "Natural Choice Lamb Meal & Rice Formula" dry food for about 2 years. I had bought the last bag (10% more FREE, 38.5lbs \$49.99 at (b) (6) ) around the first of September 2011 when I began to notice a sudden drop in her weight within 4-7days of her eating it. My dog refused to eat the dog food (which is very, very unusual for a Beagle!) after around the 6th day and began throwing up bile/acidic liquid. I just thought it was something upsetting her stomach and expected her appetite to return the next day not even thinking it would be her dog food at all. However on the next day of her going without food, during the middle of the night she let out a howl, began panting heavily, moaning approximately every half hour until about 7am. I could tell she was in a lot of pain & couldn't get comfortable but because it was in the middle of the night I waited and planned on taking her to the vet that morning. My beloved dog was in pain, her stomach started bloating and that was when I knew she wasn't going to make it to the vet. Our beloved dog died in our arms that morning at (b) (6) on September (b) (6), 2011. Since I didn't suspect the dog food and thought it was simply because she was an older dog that suddenly got ill, I gave the rest of the 38.5lb bag of dog food to my brother's dog. What I have to tell you will shock you as it did me. My brother's dog started showing signs of sudden starvation in just 1 week of feeding the dog food I had given him. His dog had the same symptoms, refusing to eat, throwing up, acting lethargic & coughing. Luckily he bought new dog food of a different brand, to which his dog ate within minutes without hesitation. I pray that he caught it more quickly than I did and that his dog will live without any side effects. I didn't get to be so lucky. I am sick to my stomach with the feeling that this trusted dog food "Nutro Natural Choice" I had given my beloved pet could possibly be the cause of her death. I never would have suspected this and I am outraged that this is kept quiet. I will be sending in the dog food samples to Nutro & the FDA. Something must be done, people need to be warned so this doesn't continue to happen in the future.	13	Years	Beagle	Dog

<a href="#">EON-81982</a>	2/2/2012 17:46	Waggin Train Wholesome Chicken Jerky Tenders	After eating Waggin Train chicken Jerky Tenders he experienced : lethargy, hunched over, vomiting, excessive drinking and urination. This has happened before I took the treats away thinking that they were the cause.... He felt better after a few days. I did not throw the bag away....The dog was given the treats by someone who did not know...and again he got very sick...up all night. After calling the company, they told me to throw the bag away they would send me coupons for new ones. I asked them if they had any complaints of this and the man said no. After that I got on the computer and did some research and realized that there are thousands of complaints. Its noted that the product has been tested and there is not of yet any findings. I find this very hard to believe. I'm am taking my boy to the vet later this afternoon for blood tests and whatever the vet recommends. The gov't. should have these products taken off the market.	15	Years	Terrier - Yorkshire	Dog	9	Pound

<a href="#">EON-81758</a>	1/30/2012 21:15	Milo's Kitchen Chicken Strip Treats	We would give (b) (6) Milo's Kitchen chicken strip treats. After some time (b) (6) got where she would not eat her regular dog food and the only thing we could get her to eat was the Milo's chicken strip treats. The more we fed her the treats the sicker she got. Then she started to pass out and loose control of her bladder. We took her to our vet, (b) (6) ., and he diagnosed her with Immune-Mediated Hemolytic Anemia and put her on medications for that. He said it affected her liver enzymes and did not have a good chance of surviving. We gave (b) (6) her meds as prescribed and more treats because that was the only thing she would eat. The vet said that it was not the treats causing the problem. During the next week (b) (6) continued to get worse. She would get up to go outside and pass out. Her oxygen levels were 30%. By the end of the week (b) (6) could not even get up to go outside. Then she stopped eating and drinking all together. It was after hours and we ended up taking her to Oakland Veterinary Referral Service there they examined her and she had an oxygen level if 10%. They said she was so bad they could not save her. We could not let (b) (6) suffer any more. A week after we had (b) (6) put to rest (b) (6) called and asked if we had any of (b) (6) treats left that he could test. Unfortunately we did not. The pain of loosing our beloved (b) (6) was to much to handle and we got rid of all the food and treats (b) (6) proceeded to tell us that he had three other dogs that exhibited the same symptoms as (b) (6) and that the only common thread between all the Dogs were the Milo's kitchen Chicken Strip Treats. So I want to get it out to everyone that the Milo's Kitchen dog treats and food is killing our pets.	10	Years	Spaniel - Cocker American	Dog	55	Pound
<a href="#">EON-81756</a>	1/30/2012 19:00	Purina Pro Plan Small Breed Formula / Adult Note Green stripe across front of product name and indication of "OptiHealth" on packaging	(b) (6) had been eating Purina Pro Plan Small Breed for about 7.5 years and doing well. Purina recently changed the dog food formula which we learned by calling Purina. The new formula known still as Purina Pro Plan Small Breed contains an indication of "Optihealth" on the rear of the packaging. The old formula is no longer made and there was no clear labeling on the product to indicate the change in formula or the specific nature of the formula change.  On changing (b) (6) diet to the new product, the dog began to have soft stools ultimately resulting in diarrhea. Purina customer service indicated that the formula changed and the dog should adapt in two weeks. After a week and a half, his stools remained extremely loose often resulting in nighttime diarrhea. We took him to our veterinarian who did a complete exam including a fecal analysis. He recommended changing the food to another product which we did. He also gave him a pp dose of barium and put him on metronadizole for 7 days. The stool has begin to assume a more normal color and is beginning to harden up.	8	Years	Dachshund - Miniature	Dog	15	Pound
<a href="#">EON-81671</a>	1/29/2012 14:45	Nature's Variety Prairie Chicken meal & Brown Rice Medley	Fed all dogs @ 5pm Friday 1-27-2012 from a newly opened bag of Nature's Variety Prairie chicken & brown rice dry dog food. Two - three hours after feeding two dogs started vomiting and drinking heavily. Then three more started vomiting. This went for hours until well after midnight. The following morning three were still having some vomiting and one had diarrhea. Two were trembling and quiet all day. Sunday morning at 6:30 am two were having diarrhea, with one of them vomiting clear liquid. 4 of the 6 were trembling and quiet. I have not fed any more of this food since this incident occurred. None of the dogs have fevers or dehydration at this time. If no sings of improvement on Monday AM, I will be calling my vet to have them evaluated.	6	Years	Terrier - Toy Fox	Dog	8	Pound

<a href="#">EON-81670</a>	1/29/2012 13:45	dogswell happy hips chicken breast glucosamine and chondroitin	i had my dog on nature's balance regular pet food for months and started giving her treats (Happy Hips Glucosamine/Chondroitin Chicken Jerky Treats - from CHINA) for training purposes. She got sick about 1-2 weeks after giving her them. No other change in diet, no table food, to scraps, etc. She began to have diarrhea for a week, problems with loss of bladder control and some vomiting. I took her to the vet after one month of this and with the diarrhea getting to the point of watery stools with mucous in it. The vet gave antibiotics and we stopped the treats. They did bloodwork, but she was still incontinent of urine at times. Months later, we are still dealing with the incontinence of urine. The vet said her urine was diluted. She was drinking water incessantly and urinating like crazy - thought she had diabetes, but bloodwork showed no sign of it. The date this started is approximate - I would have to look into her vet records for the exact dates. I am currently dealing with her issues of incontinence which the vet said is very unusual for a pup her age.	2	Years	Boxer (German Boxer)	Dog	60	
<a href="#">EON-81669</a>	1/29/2012 12:15	Ol Roy Complete Nutrition	Bought a 40 lbs bag of Ol Roy dog food from Walmart in (b) (6) Fed the dog who eagerly ate the food but the next day the dog began to vomit the dog food, become lethargic, and would not eat any food including treats. The dog continues to vomit bile but is drinking water. The only change made to the dog was the dog food and I will take my dog to the Vet on Monday.	10	Years	Siberian Husky	Dog	45	Pound
<a href="#">EON-81668</a>	1/29/2012 9:45	Canyon Creek Ranch Brand Wholesome Chicken Breast Tenders Snack	My Yorkie was perfectly healthy until I gave him Canyon Creek Ranch Brand * Wholesome * Chicken Breast Tenders Snack. I gave him 1 treat per day over the course of a week and skipped a few days. The package said he could consume up to 6 per day based on his weight, I did not come close to that.  A week later, he stopped eating. A day after that, he was suffering from acute kidney failure. He was hospitalized for about 6 days and treated and he died on (b) (6) January (b) (6), 2012.  I also gave this very same product to my Lab on the very same day(s) and he suffered from severe diarrhea. He was treated and is slowly getting better but since the death of my Yorkie on Friday, our vet now wants to test the Lab as a precaution. He is going in this morning for blood work.	6	Years	Terrier - Yorkshire	Dog	14	Pound
<a href="#">EON-81666</a>	1/28/2012 12:00	Waggin Train Wholesome Chicken Jerky Tenders	We bought (b) (6) a new treat, Waggin Train Chicken Jerky Tenders and after he had been eating them for a few days, he became very ill. He vomited only once but he had diarrhea so badly that he was bleeding from his bottom. After several days of this we took him to the veterinarians in which the Dr. asked what was different with his diet. The only change were these treats. The dog had a fever of 101 degrees and was given two types of medication. After a week, (b) (6) was back to his normal self. I still have the remainder treats but fear to give him any more.	3	Years	Spaniel - King Charles Cavalier	Dog	24	Pound

<a href="#">EON-81523</a>	1/25/2012 17:00	Natural Balance L.I.D. Limited Ingredient Diets Potato and Duck Dry Formula	(b) (6) has had digestive trouble with grain since he was a puppy so I have had him on a combination of Natural Balance Duck and Potato and Lamb and Rice Formulas for 4 years. During that time, the food has worked well. However, about a month and a half ago, when I started two new bags of food, he started having serious digestive issues again, including regular (almost daily) vomiting of a yellow foamy substance in the morning, almost constant diarrhea or very loose stools, weight loss, energy loss, difficulty sleeping, and lots of audible indigestion. I did not realize it was the food at first because he does so well on it - so I assumed it was chemicals outside, or that he had grabbed a bite of something he wasn't supposed to. He got progressively worse so I started cooking rice for him and adding it to his food, as well as pumpkin, then sweet potato. After some time I took him completely off the kibble and he started to do much better. I went to the store where I purchased the food (b) (6) ) and an employee told me that Natural Balance had in fact changed the formula for the Duck and Potato formula without any obvious labeling changes (they made the subtle change of replacing "Duck and Potato" with "Potato and Duck", a change I had not even noticed). He told me that a number of dog owners had been complaining of serious digestive issues with their dogs since the change. I purchased a different food - Taste of the Wild, Fowl formula, and started feeding it to (b) (6). He immediately started feeling better - sleeping through the night, producing solid stools, no more vomiting or sounds from his stomach. It was a night and day difference. He is doing great now - but it was over a month of pain and suffering for him. I wish they had labeled the change so that I would have avoided the food altogether and switched to Taste of the Wild sooner.	4	Years	Mixed (Dog)	Dog	72	Pound
<a href="#">EON-81515</a>	1/25/2012 13:00	Iams MiniChunks ProActive Health	(b) (6) has had frequent bowel movements, diarrhea and several instances of vomiting. She became sick a few days after I bought a new bag of dog food. The first day of her illness she had bowel movements every 45-60min for a 16 hour period, as well as 12 instances of vomiting. She was still fairly alert and had energy, however she did not eat or drink anything for approx 36 hours after symptoms began. To be safe, we fed her some food we had on hand and she seemed to be recovering. Yet when we tried to give her this food again she was having frequent bowel movements within 20 hours.	4	Years	American Pit Bull Terrier	Dog	55	Pound
<a href="#">EON-81446</a>	1/24/2012 13:00	Waggin' Train Jerky Tenders	I gave my dog Waggin Train Jerky Treats about mid day, he seemed relatively lethargic compared to how he usually acts (he is a purebred Beagle--young, and typically has loads of energy). Later in the afternoon, he began to throw up his dog food (which he has been eating--this was not a new bag of dog food (Purina) he usually eats the dog food and has shown no health concerns after consuming it)--he was crying and ended up throwing up multiple times. I was warned about the Chicken Jerky treats from China, however, I gave it little thought because of the apparently low incidence of complaints, however, I am concerned that they may have been contaminated and disposed of them.	1	Years	Beagle	Dog	35	Pound

<a href="#">EON-81431</a>	1/23/2012 20:45	Hill's Prescription Diet W/D	<p>On Saturday, January 14, 2012, we noticed that (b) (6), our 12 year old golden retriever, never made it upstairs the previous night. We found her sleeping in the family room, where while responsive, she was unable/unwilling to get up and also appeared to have wet herself. After coaxing her up with a biscuit, she got the paper and came in to eat breakfast. At this time, we noticed that she did not complete her breakfast--a first for (b) (6). (She did finish it a few hours later).</p> <p>Our vet came to our house on Saturday, January 14th. (b) (6) was looking improved, but we still planned on bringing her to the office on Monday morning for labs. On Sunday she was much better--but that evening her appetite was again diminished.</p> <p>An x-ray showed a possible mass in her abdomen, and lab work showed that she was profoundly anemic and thrombocytopenic.</p> <p>On Tuesday, (b) (6) had to be carried down the stairs and she again had no appetite. Her activity for the day included getting up and moving to a new spot 3 times the entire day. At this point, we believed our only option would be euthanasia by the end of the week.</p> <p>On Wednesday, January 18th, (b) (6) actually began to be a little bit more active, but still showed signs of reduced appetite. She would eat as many dog biscuits as we gave her, but she did not want to eat her dog food, Prescription Diet W/D, unless we mixed in biscuits with it. She was subsisting on a diet that was equal parts biscuits and dog food. We began to suspect that there was something wrong with the bag of food we had been feeding her.</p> <p>On Thursday, January 19th, (b) (6) activity was mildly improved, but she still didn't want to eat her Prescription Diet W/D. We borrowed a cup of dog food (Nutro Natural Choice Lamb and Rice Formula) from our neighbor's dog. We at first gave (b) (6) just a small amount of food (about 1/4 cup) and she inhaled it. She still appeared hungry so we gave her the rest of the food (about 1 more cup) and she finished it all. We then offered her some of the Prescription Diet W/D and while she at first put some in her mouth, she then spit it out. We are convinced that it was her food all along that were causing her problems of lethargy and lack of appetite. Since last Thursday, we have given her the Nutro food exclusively (along with her treats) and (b) (6) activity and appetite are back to what is normal for her. We went from a dog with 3 paws in the grave to one with several months, if not years, left to live.</p>						
<a href="#">EON-81429</a>	1/23/2012 18:15	Canyon Creek Ranch brand Chicken Tenders	After reading the warning about chicken jerky from China this shed some light on my dog's illness a few weeks back. She was lethargic, vomiting with diarrhea. She was drinking an inordinate amount of water and not eating any solid food. This was completely unexplained until reading this. She had most symptoms, if not all symptoms associated with eating chicken jerky from Canyon Creek Ranch. I typically would giver her one, on occasion two per day.	10	Years	Rottweiler	Dog	75	Pound

<a href="#">EON-81360</a>	1/22/2012 20:00	Waggin Train Wholesome Chicken Jerky Tenders	Within a few hours of giving my dogs Waggin Train Jerky Chicken Tenders they both started throwing up, had bloody liquidy stool and were very lethargic into the next day. I didn't know that the FDA had given a warning on this product til my daughter told me and then I looked it up online. I emailed the company, they replied with a stock email. I know it had to be The Waggin Train Jerky Treats cause besides their regular food, that was all that they were given.	1	Years	Bulldog	Dog	50	Pound
<a href="#">EON-81359</a>	1/22/2012 14:45	Waggin' Train Wholesome Chicken Jerky Tenders-Chicken Dog Treats	(b) (6) was brought to the vet on January 2, 2012. The dog was not acting normal as she was sleeping a lot, she began to vomit, excessive drinking, on and off liquid stool unrelated to actual diet as her diet has not changed and she appeared to have pain in her hind legs. Blood work was done at the vet and revealed elevated Urea/Nitrogen levels of 64 where normal is 6-21. Also she had elevated Creatinine levels. Condition was said to be critical/grave. I remembered hearing something on TV about a recall on Jerky treats and immediately stopped giving the Waggin' Train Chicken Jerky Tender dog treats to (b) (6). We followed up as the vet recommended (ten days later) for an Ultra Sound at a specialty vet's office to look at the dog's kidney's. Since the visit with the second vet I have noticed a great improvement in the dog's overall well being. She is eating well and acting as usual. Results of the Ultra Sound showed no kidney dysfunction and repeat bloodwork was done and showed marked improvement. The doctor recommended to stop feeding Waggin' Train treats that were made in China to the dog. Bloodwork was going to be repeated in a month which would show that the kidney problem was related to the Chicken Jerky Treats.	3	Years	Terrier - Yorkshire	Dog	5	Pound

<a href="#">EON-81358</a>	1/22/2012 11:00	Wellness single protein source white fish and sweet potato	<p>In November I purchased "whitefish and sweet potato" dog food manufactured under the Wellness brand at my local PetCo (Blue bag, 6lb). The bag appeared fine at first purchase but after using some of the dog food I realized that there were worms in the food. Upon closer examination of the bag I also found what appeared to be webbing at the seams where the worms had developed. This was found in a 6 pound bag that had an expiration date of April 2012. I immediately checked some additional bags I had just purchased the day before since that original bag was getting low. The expiration dates were May of 2012 on these bags. They too were contaminated and had the same webbing and worms as the first bag. I promptly returned all of the product to my local PetCo (b) (6). I brought the worms, original packaging and the 3 new bags so that the store manager would have all the information she needed to report this problem. She refunded my money and noted the brand, expiration date, and lot number so she could complete her report of the problem. Upon returning home from PetCo I contacted the manufacturer of Wellness dog food. I reported the same information to them.... They were apologetic but ASSURED me this was an isolated incident. The girl I spoke with though advised me that I should go elsewhere to buy the next bag of food to avoid any further contamination. I waited a few days and decided to try Wellness again.</p> <p>This time I visited a PetSmart that is 15 minutes by car away in (b) (6) (different company, different town) When I grabbed a bag from the shelf I noticed the Wellness food in this PetSmart had moths flying around the bags, dead moths on the shelves and I also noticed a worm attached to the outside of a bag of food. Isolated incident?? I told the PetSmart staff of their problem and I called the manufacturer to report the problem giving them all the info that was needed. Again I was ASSURED that this was an isolated incident. At about this same date I realized that since I stored the dog food in my food pantry I now had these same worms and moths contaminating my family's food. Four hours and a large garbage bag later I was done cleaning my pantry.</p> <p>I had found 3 worms and about 8 moths in our food/packageing. 1 worm was even attached to my cooking apron that hangs in the pantry!! I happened to be visiting my son in (b) (6). a couple of weeks later, (b) (6) is 100 miles from my home. I tried Wellness again in this (b) (6) PetSmart. When I got back to my home a few</p>						

Key	Created	Product Name	Description	Age	Age UOM	Breed	Species	Weight	Weight UOM
			days later, I opened the bag and placed it into another clear container to be able to see the contents more easily.....yes this bag had worms as well. This time the expiration date was September 2012. I did not return to the store this time since I was 100 miles away, but I did contact the manufacturer. I gave them the needed info and they ASSURED me, once again, this was an isolated incident!!! I ASSURED them when something happens in 3 stores of 2 different chains, over 100 miles apart, in multiple bags of food with multiple expiration dates that does NOT qualify as an ISOLATED INCIDENT. I asked to speak to someone higher than the telephone customer service agent. He assured me he was the manager of the department but agreed to have a quality control person call me....that was 1 week ago and I have not heard back from anyone. I seriously feel this situation deserves to be investigated. I feel that all that has been done so far is completion of paperwork. I do not feel anything will really be done to correct this problem. I am filing this report in hopes that someone will do that. I am also contemplating contacting my local television "action reporter" to see if they could research this company and see what they might be able to do to try and correct this situation. I would not tolerate this in human food and I have no plans to tolerate it in my pets' food either.						
<a href="#">EON-81351</a>	1/20/2012 15:15	California Natural Pure & Simple Grain Free Venison Meal Formula	Noticed a hair (at lest 5 mm long) protruding from kibble. (Gross!) Called the company that makes it & was told that the hair was perfectly OK and due to "subcutaneous hair follicles" and was a result of the processing of venison and lamb kibbles. (Vet said not to feed & that wasn't from any "subcutaneous hair follice.) Took that bag of dog food back (kept small sample) and exchanged for another bag. New bag had hairs and a dark green piece of something embedded in kibble. (First scoop out.) Kept a small sample again (also noticed light colored sharp flecks protruding). This bag had the same date code but a different lot number. This time I bought a bag from a different store with different date code and lot number. Again - many hairs and lots of what appear to be bone shards sticking out of the kibble. Bone shards very sharp & could easily puncture the baggie they are in. Contacted the company again. They want me to send a sample but they don't appear to be concerned. They sent me a coupon for free food. I will never feed my dogs anything from them at all again.						
<a href="#">EON-81216</a>	1/19/2012 3:00	Waggin Train Jerky Tenders	About 45 minutes to 1 hour after eating Waggin Train Jerky Tenders, my dog's head and body began to shake uncontrollably. He also had difficulty moving his hind legs.	8	Months	Spaniel - Cocker American	Dog	25	Pound

<a href="#">EON-81210</a>	1/18/2012 21:15	Waggin Train Chik'n Biscuits	Within days of being fed Waggin Train Chik'n Biscuit which contains chicken jerky for the first time in his life my toy rat terrier collapsed and almost died. His blood pressure and body temperature were so low that he was going into organ failure. He was ill for over 10 days and spent 2 nites in an emergency hospital at the cost of over \$2400. We would do anything to save our dog and he is finally on the mend but not out of the woods. These treats are dangerous and those of us who love our pets need to know that our government is there to have our backs, to protect our family members from harm. The packaging on this product is deceitful, it makes you think that the procdct is made and manufactured in Anderson, South Carolina but elsewhere on the packaging it states Made in China. I had to beg borrow and plead for money to save my dog and we may lose my home becase we were forced to use our house payment funds to pay veterinary bills. Please have these products removed from store shelves. Save your own pet!	3	Years	Terrier - Rat	Dog	8	Pound
<a href="#">EON-81209</a>	1/18/2012 21:00	Waggin Train Wholesome Chicken Jerky Tenders	A while after feeding our dog 2 "Waggin Train Chicken Jerky Tenders" our dog seemed uncomfortable, he developed bad gas, was very thirsty, and later defecated diarrhea on our floor. He has not had any accidents in 4 months, it was very unusual. We didn't relate it to the chicken jerky until after giving it to him on two separate days (after the first incident) he experienced similar symptoms.	8	Months	Shar Pei	Dog	45	Pound
<a href="#">EON-81191</a>	1/18/2012 13:15	Waggin Train Wholesome Chicken Jerky Tenders	Animal was sleeping/resting in my lap. (b) (6) suddenly started having spasms with legs jerking which caused him to fall off my lap. The attack continued with legs and body having major spasms. Slight spittle from mouth and what appeared to be his breathing becoming labored and stopping. I gave him chest compressions and he seemed to respond to the compressions. This was on a Sunday evening and no vet care was readily in area. after a period of 20 minutes he appeared to greatly improve although he wanted to be held. In the days prior to this episode all three dogs i own were drinking more water than normal. I provided two types of treats to my pets. One is a small biscuit made by Iams "Iams Proactive Health" biscuit. The other Waggin Train Chicken Strips. The treats were never fed whole, the chicken strips were broken into pieces under 2 inches so the total daily amount was approximately one complete strip. The small biscuits were broken in half and would be equal to two biscuits. My other two dogs, both Italian Greyhounds each had identical symptoms after the attack the chihuahua had, all taking place over a two week period. the grayhounds were fed a whole small biscuit and half a chicken strip.	3	Years	Chihuahua	Dog	5	Pound

<a href="#">EON-81135</a>	1/17/2012 16:15	Canyon Creek Ranch Brand Natural Duck Tenders	A family member bought a bag of Canyon Creek Ranch Duck Tenders for my dog as a christmas present. I started giving him the treats on the 26th of Dec. 2011, he's 50lbs and the bag said he may have 5 treats a day so i abided by that. [There have been no other changes in his life or diet (he has always had Brita filtered water to drink, his whole life)]. On the 13th day of Jan 2012 he began vomiting and shooting out black watery liquid/bile, with a trace of blood-every two to three hrs. This is still ongoing day and night for 72 hours. He cannot keep any food or liquids down-he vomits everything up along with a gel like goop. He is exhausted, back legs are weak from squatting and he is beginning to cry when he tries to squat and gathers all of his muscles to strain and push this black bile out of his rectum. I have been advised that he is in the process of kidney and liver failure-I have no transportation to the vet and lack the 1000 dollars the vet quoted at the minimal price to try and give my dog a few more months to live. All I can do is give my dog salt, vitamin c, and lemon water enemas to maintain hydration [(since he can't keep anything down orally), the vet said my dog will retain the enema rather than discharging it and this will help replenish the blood]. All I can do is keep my dog comfortable and loved until he slips into a coma and dies.	12	Years	Pit Bull	Dog	50	Pound
<a href="#">EON-81119</a>	1/17/2012 13:15	Sergeant's Marinades	This is the second piece of metal I have found in a bag of Sergeants Marinades dog treats. The piece of metal appears to be from a machine or piece of equipment. The first piece I threw away thinking it was just a flook. I have saved the second piece which looks almost identical to the first piece. Thank you. Regards, (b) (6)						
<a href="#">EON-81084</a>	1/17/2012 3:00	Waggin Train Chicken Jerky Tenders sample	We have received a free bag of Waggin Train Chicken Jerky Tenders in each bag of our Purina dog food and fed 2 bags of them, which contain 4 or 5 treats in each bag, to him over the course of a week or so and he started vomiting, didn't want to eat, but still drank heavily. He would be really sick for a couple of days and be ok for a couple of days. After a couple of weeks he'd lost a considerable amount of weight and became very lethargic. We took him to the vet and they found that his gut bacteria was too high in bad bacteria and too low in good bacteria, and a blood test revealed deathly high creatnine levels. Healthy kidneys function at about 25 and his were 224. We had him on IV fluids and lots of drugs for a week, but only brought the kidney number down to 111 which is still over the failing number of 45. We agonized over the decision to euthanize, but did so. The vet suspected that he ingested something toxic, but we couldn't think of anything at the time that was out of the ordinary. It was after a news article that we realized that we'd fed these sample bags of treats to him.	5	Years	Cattle Dog - Australian (blue heeler, red heeler, Queensland cattledog)	Dog	60	Pound

<a href="#">EON-81083</a>	1/16/2012 23:45	Waggin Train Wholesome Chicken Jerky Treats	We purchased a large bag of Purina Dog Food from Walmart that contained a free bag of Waggin Train Chicken Jerky Treat. We feed our dog a half of a slither of the treat. The following day, our dog began vomiting and had diarrhea. Within a couple of days of this episode, he began to get weak, high heart rate, lethargic, blood in his urine and stool. We took him to the vet and he gave the dog medicine to stop the vomiting and diarrhea. He bounced back to normal, within a few more days his condition repeated itself and he was a little bit worse including excessive drinking of water, weight loss, he would try to walk and he would fall down, he also had an odor and his hair looked extremely dull. Vet treated him with B12, Dexasone and antibiotic. Urine test at first showed nothing irregular, retest showed an irregularity. My dog would bounce back and a few days later he would decline worse than the last time. This started in November and he lost his battle this past Sunday.	12		Shepherd Dog - Belgian (unspecified)	Dog	130	
<a href="#">EON-81082</a>	1/16/2012 23:45	smart puppy proactive health	i purchased and have been using iams puppy food for sometime. On january 6th i came home from work and fed my animals which i have a 5month old puppy and a five year old dog. about two hours later the puppy started to throw up and got diarrhea which lasted much of the evening. i contacted a vet because of the severity of the puking and diarrhea. he returned my call the following morning and instructed me to use immodium and to discontinue the dogfood and to feed her rice and boiled chicken. our puppy started to feel better but by monday our older dog became ill with the same throwing up and diarrhea, so we discontinued the dog food which she also eats the smartpuppy iams food. she stayed ill all week. we continued to keep in contact with the vet and continued with feeding them the rice and boiled chicken. They started feeling better and introduced the puppy food to them on thursday evening the 12th and by friday morning both animals were sick all over again with the same symptoms of throwing up and severe diarrhea. I contacted the vet again and he went on the computer to find out that this food had been recalled prior. both dogs were prescribed medication and was placed on different dogfood and are now doing great. So I would like to make you aware of this problem so it does not happen to other dogs.						
<a href="#">EON-81080</a>	1/16/2012 19:15	Purina Puppy Chow	12/24/11: Lethargy, anorexia with refusal to eat the food. When hand fed she reluctantly ate and immediately vomited the food. <a href="#">EON-81076</a>	1/15/2012 17:00	Mighty Treats	Have been giving my dog Mighty Treats. A dehydrated dog treat made in Sun Prairie WI. (www.mightytreats.com) (b) (6) Have given her the liver treat variety in the past and of recent the tripe and tried the beef the been once. Last week, I noticed a big fat worm on my kitchen counter (where I keep the dog food and treats). No food was on my counter. I immediately checked the Mound Dog Food bag (clear plastic) with a flashlight and found nothing. I then checked the Mighty Treat Tripe. It was full of worms and noticed a large a spider in the crumbs in the bottom of the container. Rcently purchased this from (b) (6) . These treats come in a clear hard plastic container with a plastic zip to open the container. So it must have been infected at the Mighty Treat plant before sealing the plastic container. I had been giving my dog these treats and this made me sick to my stomach. I called (b) (6) and told them they should remove these from their shelf. After work I took the infected Tripe back to (b) (6) . I was told by the manager that they had been having problems with the Tripe. I asked for contact informaton of the manufacturer. I called the manufacturer and them and left a voice mail, however they never returned my call. I also talked to a co-worker as I know she had been giving her dog these treats. She said she had notice some shells and worms in the liver version recently. There is no lot number on the treats nor an expiration on these treats. My dog has been having an issue with diareah the past several months. She has been to two separate veterнарiаns and we having been running tests to find out why. Costing me thus far over \$300.00. Have been feeding her boiled chicken and rice (I personally make) and have tried numerous different dog foods to decipher the problem. Now, I realize this is probably from the Mighty Treats. Please worn other pet owners. To say the least I will not purchase these every again as I do not trust the sanatation of this company.

<a href="#">EON-81075</a>	1/15/2012 12:45	Innova adult dry dog food small bites	After being on the same diet of Innova dry red meat small bites for two years our dog (b) (6) has recently been experiencing loose watery stools. We've gone on and off the "bland" diet of rice/chicken or rice/beef. I have veterinary technician training and this is the standard diet for this problem. (b) (6) gets back to normal on this diet after 2 or 3 days in which case I start adding back in her Innova dry food along with the canned cat food I always give her. I have two cats and so the canned food I give (b) (6) is always from a new can and only a few tablespoons, she is a picky eater. I am now on her third round of this process, every time I switch to all dry with a dab of canned she has loose watery stools again. Out of curiosity I checked on the web under DogFoodAdvisor/Innova and you will find numerous reports of the same thing with Innova dry food. It also is reported that Proctor & Gamble bought this brand out last year. Could they have changed something in the recipe? I think some of the original bags are still in circulation because I didn't have a problem like this since last summer when our dog did experience some less severe problems like this but at the time I guess I just used the rice/chicken long enough to get her through, we usually mix the older bag with the newer bag of Innova but this last bag that seems to be the problem was not mixed with our older one due to being away during the holidays. I had packaged up all of the older bag into individual portions for our pet/house sitter and so the "new bag" is all the same bag. Hopefully if the food has been reformulated you can help people out there who are having a problem but are not as familiar with helping their animals cope. This would have probably meant a large Veterinarian bill to anyone not knowing what to do and if the dog is older or already not 100% it could mean worse problems like dehydration, weight loss etc. Thanks for helping get the word out.	5		Shepherd Dog - German	Dog	70

<a href="#">EON-81066</a>	1/14/2012 3:00	Waggin' Train Wholesome Chicken Jerky Tenders	(b) (6) was given a Chicken jerky treat on November 18, 2011. 3 AM ,five hours later he started vomiting, again at 6 A.M. he vomited all food and water weekend of November 19 and 20. We took him to his Vet monday, Nov. 21. He was given fluids SQ and meds to stop vomiting. He would not eat for the next five days. He was taken to Emergency Animal Clinic on November 25,2011. He was given more fluids SQ and meds for vomiting, liver protection, antibiotics, and fluids SQ for home. We returned to clinic Nov. 28 for sonogram and blood test. Sonogram revealed liquid in abdomen and infection in Pancreas, liver failure. (b) (6) was admitted to stay for a few days. Tuesday, true cut biopsies were recommended. Upon arrival, Nov. 30, we were informed that he might be too weak for surgery, and lab results indicated small improvement. An infusion of Albumen was recommended to help leakage into abdomen. We agreed. (b) (6) 2011, we received a call that his labs had fallen, and the Vets had nowhere to go except bioopsy. We returned to Clinic for discussion. We asled to see (b) (6) , and he had to be helped to walk with a towel under his abdomen. When we placed him on an exam table, on a pad, he was too weak to sit up, his legs shaking He was extremely lethargic and weak. He could not endure the surgery. Our options at that point was Euthanasia or allow hin to die slowly on his own. The decision was tough, but he had suffered enough. I chose Euthansia.	7	Years	Chow Chow	Dog	50	Pound

<a href="#">EON-81045</a>	1/13/2012 12:45	Milo's Kitchen home-style dog treats	Approximately 1 hour after ingesting the third chicken jerky treat of the day, our dog became quite sick, drooling, pacing about and generally unwell. We took her to the vets and they proceeded to run a number of tests amounting to over \$900. We had been with her all day and she had eaten only her normal food and the chicken jerky.	10	Years	Retriever - Labrador	Dog	80	Pound
<a href="#">EON-81014</a>	1/12/2012 23:45	CEDE PREMIUM EGGFOOD	BIRDS WERE ON THE SAME DIET BUT BECAUSE THEY WERE LAYING WE ADDED CEDE PREMIUM EGGFOOD TO THEIR DIET. WE PURCHASED THIS PRODUCT AT (b) (6) . MY GRANDMOTHER HAS A PAIR OF CANARIES THAT WE GAVE HER AND BECAUSE HER CANARY IS LAYING WE DECIDED TO GO BUY ANOTHER BOX SO THAT SHE CAN ALSO FEED HER CANARIES. THAT VERY SAME EVENING 7 OF OUR BIRDS DIED. THAT IS WHEN WE NOTICED THE FOOD HAD BEEN EXPIRED FOR ALMOST 5 MONTHS. WE TALKED TO THE STORE EMPLOYEES BUT THEY ONLY REFUNDED THE 2 BOXES WE HAD BOUGHT. THE STORE OWNER REFUSED TO PAY FOR OUR CANARIES " THEY MUST'VE BEEN SICK" WAS HIS RESPONSE. I AM REPORTING THIS BECAUSE I HAVENT FOUND WHO IS WILLING TO HELP . I'D HATE TO HEAR ABOUT OTHER BIRDS DYING OR THAT THEY WOULD STILL BE SELLING THE EXPIRED FOOD.	2	Weeks		Other Birds	1	Gram

<a href="#">EON-81010</a>	1/12/2012 18:45	Waggin Tails chicken Jerky	I bought The Waggin Train Jerky Treats at (b) (6) in (b) (6) at 10:30 pm on Dec 30 2011.. Gave my dog a treat when I got home around 11pm. The following day she seemed lethargic but ok. She is a puppy and always wants to play but was laying around most of the day. She would not eat any of her food either. She started vomiting a pink foam that smelled almost metallic like and continued to do so for about 4 hours every half hour to hour. We monitored her and fell asleep with her on the floor. I then woke up around 5am to see bloody diarrhea on the kitchen floor and her under the table which is where she goes when she does something mischievousness because she knows to go outside and basically always has. We took her to the emergency vet at 6am on Jan 1st where she was tested for certain diseases and given antibiotics and something to coat her stomach and was to be given to her twice a day for 7 days.	10	Months	Poodle (unspecified)	Dog	9	Pound
<a href="#">EON-80947</a>	1/11/2012 22:45	Milo's Kitchen Chicken Jerky Treats, Waggin Tails Chicken Jerky Treats	<p>I have bought Milo's CHicken Jerky TReats and Waggin Tails Chicken Jerky Treats for the last year and have noticed that my dog now has to urinate during the night, he is thirsty more than usual and lethargic. I thought I was giving him healthy treats because on the bag it says that there are no preservatives and no artificial flavors in these treats- I now believe that these treats MADE IN CHINA are causing a change in my dogs health.</p> <p>I URGE THE US FDA TO PULL ALL MADE IN CHINA DOG PRODUCTS OFF our store shelves....I will never purchase another made in china pet item again!!! Please do not allow our pets to be harmed any further. I urge you to recall such products and anything made in China for the sake of our pets' health.</p>	3	Years	Terrier - Yorkshire	Dog	8	Pound

<a href="#">EON-80943</a>	1/11/2012 18:00	Waggin' Train Chicken Tenders	I have been buying Waggin' Train Chicken Jerky treats for my dogs for about one year. No huge problems had occurred until last week. I gave (b) (6) chicken treats. She ate them and soon started vomitting. That's all she ate that day. She couldn't ate anything else after eating the treats. It never crossed my mind that it could be the chicken treats making her sick. But looking back, the days she started feeling better, she didn't vomit, have diarrhea, was acting normal. I gave her another treat and soon she started vomiting and the diarrhea started all over again. Now my other chihuahua, (b) (6) is experiencing the same thing. Since she is a little chubby, she has been on a diet and cannot have treats all the time. But that day she was being such a good girl that I gave her that treat. To this day she still has diarrhea.	3	Years	Chihuahua	Dog	9	Pound
<a href="#">EON-80937</a>	1/11/2012 16:45	Hills Prescription Diet i/d feline Gastrointestinal Health	<p>My son (b) (6) had fed one of our cats, named (b) (6) , a portion of a can of Hill's ID cat food. At the next feeding, I was preparing to feed Roswell when I noticed that the bottom half of the catfood was of a different color then the top half. the catfood was then sniffed and it had a different smell from another can which we opened. The suspect catfood had a chemical smell. We then set aside the suspect catfood.</p> <p>We then proceeded to contact the manufacturer and our vetrinarian, where we bought the food.</p> <p>We are concerned about our cat's health, although there has been no apparent effects.</p> <p>We returned the food to the vet and they still have the sample. We think it should be tested.</p> <p>We informed Hill's of this problem and the case file is #001893247A.</p>

<a href="#">EON-80895</a>	1/10/2012 21:15	Waggin Train Jerky Tenders	We gave both dogs about a 1-2 inch piece of the Chicken Jerky Treat 1x after dinner. The next morning we gave them both same amount after breakfast. About 1.5 hours after eating (b) (6) threw up. Immediately she broke out in huge hives all over her body and her eyes swelled shut. Her breathing became very labored. I didn't know what was happening I thought her blood vessels were getting ready to burst. It was a Sunday so I started to look up an emergency vet then I thought I would try and see what these lumps were and I found pictures like what she had and it said hives and that you could give a benadryl. So I gave her one and within about 5 minutes the hives started disappearing. I still wanted to get to the bottom of what could have caused such a violent reaction and I looked up Come and Get It and then found the Wagon Train Chicken Jerky treats and all of the dogs that have gotten sick and how many have died. PLEASE issue a recall on this product. Why would you just sit on this information and not recall this product when over 355 dogs have become sick and how many more probably hundreds that don't even know it's the Chicken Jerky treats that have caused their dogs to die. I was lucky my dog had an allergic reaction before we had given her enough to shut her kidneys down! We depend on the FDA to protect us and you have this information and are doing nothing about it. I don't care if you can or cannot figure out exactly what in the CJT is causing sickness and death. Who cares after this many incidents you have to warn people not to buy them or take them off the market. Shame on you! How can you sleep at night knowing this is happening to all of these families!	7	Months	American Pit Bull Terrier	Dog	46	Pound
<a href="#">EON-80867</a>	1/10/2012 15:15	Purina Fancy Feast Grilled Purina Fancy Feast Sliced in Gravy Purina Fancy Feast Original (Pate)	Had been feeding my cats Fancy Feast for years. In November some refused to eat it and all of them had diarrhea and vomiting all over the house every day. Tried different flavors/types of Fancy Feast and no change. Tried the pate, grilled and sliced. After a month of this I decided it must be the food, not the cats and switched to a different brand. They gradually got better and are back to being healthy.  Something is wrong with at least some batches of Fancy Feast. I'm sorry I didn't keep the packaging, or I could tell you what lot. I bought it at (b) (6) in (b) (6) in November and December of 2011.	12	Years	Ragdoll	Cat	14	Pound

<a href="#">EON-80863</a>	1/10/2012 13:00	Waggin Train Western Grill Dog Treats	Waggin Train treats were just purchased and opened on New Year's Eve. Our dog was fed two of the treats. Within a couple of hours he began stratching, shaking his body and ears non-stop. He was rubbing his face on the carpet non-stop as well. He was up all night stratching, rubbing, etc. By morning his right eye was almost swollen shut, and his body was completely swelled. Due to him shaking his ears we looked in them and there were open sores oozing blood and puss non-stop. He had light red bumps on his stomach area as well. We watched him for a few hours, and his breathing was getting shallow so we took him into the emergency vet, as it was new years day at this point. The vet stated it looked as though he had been poisoned, but could not pin point exactly what it was. He was given a prescription for steriods and antibiotics. He appeared to be getting better after starting the medications, and had returned for the most part to himself. His ears were healing, the spots and swelling had gone down significantly. Because we did not know the cause of the reaction, we were very careful about letting him outside, checked the home for things he could have gotten into etc. On Thursday night the 5th, we gave him two more of the Waggin Train treats, not thinking it could ever be treats sold in stores and on the shelves. Within hours of giving him two of the treats he began to scratch his body, shake his head, rub his face all over again and could not get to sleep. I checked him and found his face and eye was beginning to swell again, his stomach had broke out in what appeared to be hives, very bright red and swollen spots. I found these also appeared under his fur all over his underside, and most prominently under his legs where they connect to his body. I immediately gave him a half a steriod although he was starting to be weaned off of them and down to 1/2 a pill a day. The next morning I took him into our regular vet along with the bag of treats and she stated she firmly believed it was the treats that caused the reaction, as had seen many dogs very sick off of the treats made in China. Particularly treats made from chicken in China. Our dog had to be put on a stronger dose of steroids, and start a prescription all over again until he can be weaned from them. He continued on the anitbiotics he had already been prescribed and been taking.	3	Years	Retriever - Golden	Dog	90	Pound
<a href="#">EON-80862</a>	1/10/2012 13:00	Kingdom Pets Chicken Jerky	(b) (6) was getting chronic kidney infections. After a month or two on antibiotics and special diet, the vet started looking into what else she was eating. We stopped giving her the chicken jerky treats and her kidney infection cleared up shortly after. The second dog who was also eating the treats, weighs about 85 lbs. She did not get a kidney infection but she weighs a LOT more than the dog that got sick.	9	Years	Retriever - Golden	Dog	55	Pound
<a href="#">EON-80859</a>	1/9/2012 21:45	Waggin Train Wholesome Chicken Jerky Tenders	I gave my dog who is an 8 year old toy yorkie one chicken treat a day. He loved them I thought it would be good for his teeth and gums. He's a small dog and sometimes he gets upset and he'll vomit,so when he vomited I didn't get to worried. Then he started not eating his regular food and peeing on the floor something was very wrong !!!!! We heard about these dog chicken treats on the news we stoped giving them to our dog and he seems to be eating better and not getting sick. I hope he's ok I'm going to keep an eye on him!!!!

<a href="#">EON-80849</a>	1/9/2012 15:15	Dr. George's Plaque Blast dog & cat oral spray BASE	<p>Dr. George's Plaque Blast dog &amp; cat oral spray base. Purchased product at CVS but it was in the aisle of products sold on TV. I sprayed his teeth the night before. The next morning he was shaking and developed obcessive licking of his nose and paws until they were bleeding.</p> <p>I did not make the connection at the time. The vet asked me if I had changed laundry detergents....carpets shampooed, etc. None of which made sense to me as nothing had changed. The vet told me he had lesions in his mouth and showed me. He had developed an immune system disorder and had to wear a halo for two weeks to keep him from chewing on his feet. He lost all the pigment around his mouth (which used to be black) from licking. Very sick doggie!!!!</p> <p>It wasn't until days after that I passed by this product on my porch and had a lightbulb moment. Made perfect sense as the infection developed in his mouth. Product has glycol in it which would take the color out of his face. Also the explanation for the lesions in his mouth.</p> <p>Vet put him on prednisone and clavamox. Had me soak his feet twice a day in blueish product to for 10 minutes for relief of itching. His eye was also infected. It had pretty much attached his whole system. He was unable to eat any hard food as his mouth hurt to bad.</p> <p>My vet has photos that he took just to document in case (b) (6) got worse. I am sure he would be willing to share them should it be necessary.</p>	15	Months	Pekingese	Dog	16	Pound
<a href="#">EON-80798</a>	1/9/2012 11:00	Canyon Creek Ranch Brand Natural Chicken Tenders (Lot #W1CA5141A)	<p>Dog ate Canyon Creek Ranch Brand Natural Chicken Tenders (Lot #W1CA5141A) which were produced in China. Dog first ate the product around 12/25/11. He was seen for bruising by his primary veterinarian on 12/30/11 and diagnosed with thrombocytopenia. Dog came to our emergency facility on 1/1/12 for vomiting blood. Despite 6 days of hospitalization, aggressive treatment, and multiple transfusions of packed red blood cells and fresh frozen plasma the dog did not respond to treatment and eventually passed away. We are unsure if the chicken jerky product caused this unusual reaction or not.</p>	7	Years	Dachshund (unspecified)	Dog	14	Pound

<a href="#">EON-80709</a>	1/7/2012 19:15	Waggin Train Chicken Jerky Tenders	When we woke Tuesday, 1/3/2012 my dog looked very bad, he refused to eat and wanted just to lay down. We found some "throw-up in the living room. We worked Tuesday so at 7:00 AM we left her out and she went #1. I returned home to check on her at 9:00 AM. (b) (6) looked worst then I have ever seen her, I left her out and she was throwing up and doing #2 at the same time. I called and made an apointment with our vet and stayed home with her. At 2:00 PM I took her to the vet for her apointment and the vet said she was dehydrated. He injected water under her skin at her shoulder and gave a rectal exam. He then gave her Maropitant Citrate injection and Cerenia, Citrate injection 24mg pills, as well as Matronidazole anti biotic pills to give her the next 5 days. He said not to feed her Tuesday and gradually increase a bland diet after that. Each day she seemed a little better. Currently she seems almost her old self. As I said I worked from home Tuesday after 9:00 AM and my wife stayed home with her on Wednesday. My boss asked me on Friday if we had given her any chickeb jerky as he had read an article on MSN about the Chicken Jerky issue. He said my ogs simptoms seemed the same. It surposed me when he said that because I don't normally give her checken jerky but we had gotten some for Christmas. We are very careful how we fed her. I gave her 1 pc on Christmas morning, she threw up later in the day, we assumed that because of the excitment she hadn't chewed it properly. Then on Monday. 1/2/2012 I gave her another pc. We purposely made sure that we got here back on her schedule because of going back to work. The only different thing that we fed here was the chicken jerky. This is why it struck me when my boss asked me about it. I then looked up the simptoms online and they fit.	11	Years	Terrier - Jack Russell	Dog	12	Pound
<a href="#">EON-80707</a>	1/7/2012 13:15	Rimadyl	<p>My dog had a severe reaction to the drug, Rimadyl. Upon taking him back to the vet, it was determine that his liver was extremely swollen and shutting down. He was able to survive the weekend by being on IV's but it was touch and go. He is improving but only with additional medications to correct the side effects of the drug.</p> <p>I see that there was a class action suit in 1999 against Pfizer. It does not appear to me that they have made the necessary corrections to Rimadyl. The vet and myself notified Pfizer of the drug reaction. I have not heard back from Pfizer.</p> <p>What do I need to do to have the FDA look into side effects of Rimadyl? I know that it certainly has shortened by dog's life. I do not want it to happen to other animals.</p> <p>Thank You</p>	10	Years	Mixed (Dog)	Dog	55

<a href="#">EON-80706</a>	1/7/2012 3:00	Waggin Train wholesome chicken jerky treats	<p>Please help me, My father died last January after he died I took in his dog and my brother bought her a bag of the Waggin Train chicken jerky treats made in China, after I gave the dog back to my mother I continued to buy the same treats for my 10 year old pug. In the summer my dog started urinating more by fall she started losing weight and in the beginning of November she was not eating, vomiting, diarrhea, decreased activity, I took her to the vet on November 12th blood tests were taken and two days later we got the call that she had kidney failure, we put her on medication &amp; fluids from 9-4 pm that day and by the end of the day she was worse so we had her put down because our next step was a kidney transplant. A week after my dog was gone our friend gave us a new puppy and I was feeding her the chicken jerky treats too from the same bag the pug ate from, last week I seen the FDA warning on those treats from China, I went to the bag and seen I had Waggin Train made from China, first I took the bag and the FDA warning to my vet and he believed I could be right that this is what took my pug because she had all those symptoms. I called the company and gave them the details on the pug and told them that the puppy was eating them too, they opened up a case on the pug and said claims would contact me and they wanted me to mail them my bag, I haven't done so yet because I wanted to speak with you first and keep playing phone tag with the FDA's 1-800 number, two days ago my puppy was not acting herself and yesterday she started throwing up, today my husband took her to the same vet and the blood test came back the same as the pug (kidney failure) the puppy is in the hospital for the weekend on fluids &amp; medication in serious condition, I called Waggin Train back &amp; again they want their bag &amp; treats back and they opened a case on the puppy, I told her I needed to speak with a few people one being the FDA before I would release the bag. When someone has a chance could you please give me a call? I can be reached at (b) (6)</p> <div></div>	10	Years	Pug	Dog	26	Pound
<a href="#">EON-80705</a>	1/6/2012 22:00	Blue Buffalo Life Protection Formula Large Breed Puppy Natural Chicken and Brown Rice Recipe	<p>I have been feeding my dog the Large Breed Puppy dog food since he was 3 months old. He vomited on Christmas Eve for the first time. We thought that he choked on a toy. Three days later, he had diarrhea and had an accident in the house. He is house trained. He got better as soon as he stopped eating the Blue Buffalo dog food. We've been giving him rice and chicken. I am afraid to give him the dog food and would like to have the food analyzed. I also would like to know if anyone else has experienced the same problem. Is it a bad batch? I have another unopened 30 lb. bag and am considering taking it back to the store for a refund and changing to another dog food.</p>	6	Months	Retriever - Golden	Dog	50	Pound

<a href="#">EON-80690</a>	1/6/2012 15:00	Waggin Train Chicken Jerky	I gave my dog Waggin' Train Brand, Chicken Jerky treats on Christmas day. My dog (b) (6) health has been deteriorating since this event. Following the week after Christmas she has not been herself. My dog lies all day in bed, whimpers throughout the day, lost of appetite, and has been having termors. I took her to the vet this past wednesday, January 4th and received blood work last night. Vet diagnosed that my dog's liver is not working properly. She also said that due to her liver malfunction, she now has significant increase in white blood cells and is anemic. Antibiotics have been prescribed and I am watching her progress but it is too soon to tell. This is the only type of treat that I give to my dogs and it needs to be recalled asap before other animals health is affected.	3	Years	Maltese	Dog	23	Pound
<a href="#">EON-80689</a>	1/6/2012 15:00	Catswell chicken Jerky	In July of 2011, I bought chicken jerky treats from 'Catswell' from (b) (6). Two of our five cats liked them and requested treats several times a day. (b) (6) ate more than our other cat, (b) (6). We gave them these treats for a few days and, all of a sudden, both of them lost their appetite, became inactive, started vomiting and had diarrhea - with blood. They both started drinking quite a lot of water. We went to the vet with both of them and he said that they might suffer from food poisoning. He also gave us medicine to improve liver and kidney function. We immediately switched out all food and fed them Innova, one of the brands our vet recommended. Unfortunately, we didn't think of the chicken jerky treats (didn't even mention those to our vet) and since both of them requested these treats, we continued to give these to them - we had no idea that that might have been the issue... we were 'happy' that they at least wanted to eat "something." They both got sicker, we went to the vet again and again, who became concerned after blood tests showed that the liver was getting worse.. and we had to force-feed both, (b) (6) and (b) (6). At that point, they didn't even want to eat the treats anymore. (b) (6) mom, (b) (6), who is 3 years old, slowly got better but (b) (6) died on August (b) (6), 2011. Since non of our other three cats (who did not eat the Catswell chicken jerky treats) got sick my husband and I came to the conclusion that this must have been the problem. (b) (6) was only 1 1/2 years old and we were/are extremely sad that this extremely healthy young boy had to leave us so early in his life. I put together a video to create awareness regarding pet food and informed my friends on Facebook to be careful what they feed their pets - I did not know where else to report this until a friend on Facebook gave me this link today. I'll be happy to give you more information if needed.	1	Years	Oriental	Cat	7	Pound

<a href="#">EON-80671</a>	1/5/2012 18:00	Canine Carry Outs Grillers made by Delmonte Pet Products	<p>(b) (6) feels that the Delmonte Pet Products Brand Canine Carry Out Grillers chicken jerky treats that he was feeding (b) (6) led to kidney failure and his eventual need to be humanely euthanized.</p> <p>In October (b) (6) noted that (b) (6) habits had changed, asking to go outside more, and had a few accidents in the house. I discussed on the phone on 10/13/11, the problems (b) (6) had noted at home, he was not sure if he was drinking more or urinating more, and had elected to watch him closer, focusing on taking him out a bit more often, and observing him for any other problems. He aslo had noted some limping at home on the right front, and brought in (b) (6) on 10/19/11 and was examined, and recieved a prescription for Tramadol for pain. (b) (6) then rechecked with me 12/1/11, at which time (b) (6) problems at home had intensified, he seemed to be drinking more, urinated more, but was also having anxiety like behavior where he was wandering into rooms and getting "stuck" in corners, pacing, and listless. We discussed anxiety behavioral possibilities as well as possible underlying problems/rechecking bloodwork/further workup. We tried (b) (6) on an anxiety medication, fluoxetine, briefly, to see if that would help but within days his condition had deteriorated, he was very thin with generalized severe muscle wasting and unable to get around or support himself, and hence humane euthanasia was elected for with cremation of the remains.</p> <p>I suspected at the time of euthanasia, either an underlying progressive organ failure, such as kidney disease or liver disease, or because of his history and quick deterioration neoplasia, possibly in the brain, causing the behavioral/mentation changes. Regardless, (b) (6) ski and I discussed (b) (6) quality of life and felt euthanasia was the more humane option versus hospitalization for supportive care and diagnostics.</p> <p>I was recently contacted by (b) (6) on 12/29/11, and he had been doing some internet research and found that chicken jerky treats made in China have been implicated in causing a possible kidney disease in dogs. He had been feeding (b) (6) the above noted chicken jerky treats and is now convinced that they are responsible for (b) (6) deterioration which resulted in his euthanasia. (b) (6) had been feeding the treats over the past year, at most 1 per day, average of 5-6 per week. He has noted that (b) (6) did seem to get some diarrhea on occasion and some nausea which seemed to resolve each time when treats were discontinued.</p>	13	Years	Sheepdog - Shetland	Dog	18	Pound

<a href="#">EON-80669</a>	1/5/2012 16:45	Waggin' Train Chicken Jerky Treats	My dogs, (b) (6) and (b) (6), have enjoyed Waggin' Train Chicken Jerky Treats for over one year that I purchase at my local Sam's Club in (b) (6). No problems as reported by FDA. Opened new bag on Monday, January 2, 2012. By that evening, (b) (6) began drinking bowlfuls of water. This is VERY uncharacterisitic of her. I remembered the article about the FDA warning concerning chicken jerky treats and have not given them any more. (b) (6) still drinking a lot of water. Looked up the article again and reviewed the symptoms. Called my local vet. The vet I talked to was unfamiliar with the warning, but after review the information did tell me to not give them to my dogs anymore. She also wanted me to bring (b) (6) in for blood and urine test to make sure she was okay given the excess water consumption. (b) (6) was completely fine with no symptoms prior to this newest bag of Waggin' Train Chicken Jerky Treats being opened last Monday.	5	Years	Retriever - Flat-coated	Dog	55	Pound
<a href="#">EON-80659</a>	1/5/2012 15:45	Natural Balance L.I.D. Sweet Potato and Bison Formula	We've been feeding our dog Natural Balance Sweet Potato and Bison for six months now - it's supposed to be a high-quality food and up to this point seemed to be working out well. Her energy level has been good, she's growing like a weed, her eyes are bright and clear and her coat is shiny. The last bag we got smelled different and was a lighter color than what we'd had previously. After a few days of eating it, she started vomiting uncontrollably. We took her to the vet, and x-rays revealed she was really constipated, as if her whole digestive system had shut down. They kept her for the day and gave her an enema, then put her on 10 days worth of a prescription food that's easily digested. When we started mixing her regular food back in as we reached the end of the prescription, the vomiting started up again. I went online and found that people all over the country are reporting similar problems, and this just started up about a month ago. Several people with older dogs or dogs with pre-existing health problems said their dogs died as a result. When we returned the food to (b) (6) and told them what had happened, they said they were hearing a lot of this lately. The girl we spoke to said it was so common that she took her dog off the food as a precaution after using it for years. The company so far is denying any issues. Happily, (b) (6) has adjusted well to her new food and the vomiting has completely stopped. We're out \$700 for vet bills and have had a few very long nights with lots of dog vomit. During her illness, she lost 10% of her body weight, and became very listless and shaky.	9	Months	Terrier - Boston	Dog	10	Pound
<a href="#">EON-80657</a>	1/5/2012 14:45	Canyon Creek Ranch Brand Tasty and Delicious Apple & Chicken Wraps	I gave (b) (6) 1 treat per day on Saturday, Dec 24, Sunday, Dec 25 and Monday, Dec 26. By Monday afternoon he was acting sluggish and not eating. On Tuesday morning he had severe diahrea, would not eat and drank several bowls of water one after the other. I associated it with the treats being too rich, but then later in the day saw an MSN article involving chicken jerky from China. These treats are made in China. I contacted his vet and she said it would be difficult to tell if the reaction was from the treats themselves or simply dietary discretion because I had introduced a new treat to him that he hadn't had before.	9	Months	Mixed (Dog)	Dog	23	Pound

<a href="#">EON-80531</a>	1/3/2012 23:00	Purina Beggin Strips Bacon and Cheese Flavor	We had been giving our dog Purina Beggin Strips (bacon and cheese flavor). The last bag that we purchased, we gave our dog several of them because the medicine he was on reduced his appetite and he became very picky. Within a few days of giving him several of the Beggin Strips, he became very ill. He lost his appetite entirely, became very lethargic, was vomiting, had an increase in thirst and urination, and also began having diarrhea with blood in his stool. I took him to the vet and he had kidney failure and passed away a couple of days later. I was shocked when I saw a recent article that said that dog treats were making dogs sick. While Purina CLAIMS to make 99% of their products in the USA, and while these were not chicken flavored treat, I find this very coincidental. My dog was managing just fine before the larger doses of the Beggin Strips. I think all dog treats need to be inspected closer to find out what is causing the dogs to get sick before any more dogs get sick and die as my dog did in late November.	15	Years	Spitz - American Eskimo Dog	Dog	20	Pound

<a href="#">EON-80513</a>	1/3/2012 13:45	Pedigree Chopped combo with chicken beef and liver meaty ground dinner	I opened a can of Pedigree dog food, and immediately was overcome with a terrible smell. The top portion of the food was covered with a dark grey mass. Underneath the mass was the dog food. The smell is overwhelming. I saved the can and contents, quadrupled bagged it and placed in the garage. Minutes later, the smell seeped through the garage door into the house, so I have placed it in a 5 gallon bucket with a lid at the furthest point in the garage. I do not know if I need to send in the food and mass. Please advise. I could not look at it but for a minute or two. I took a picture of the mass in the food and the UPC. My best guess is the mass is not a rodent but hard to say. I am confident the can was completely sealed prior to opening. Expiration date on the bottom of the can is not until 2013. Can was bought as a sealed package of 12 from Walmart on (b) (6) around the first week of December. I emailed Mars Inc and Pedigree about 10:30 am today, but have not heard back.						
<a href="#">EON-80487</a>	1/2/2012 18:15	Dogswell Happy Hips Chicken Breast with Glucosamine & Chondroitin, Milos Kitchen home-style dog treats Chicken Jerky	I opened two bags of Chicken Jerkey Treats at the same time. One is Dogswell Happy Hips Chicken Breast, the other Milos Kitchen Chicken Jerkey on December 29, 2011. I gave (b) (6) 2 treats from each bag. During the night (b) (6) had severe Diarrhea. We could not figure out why. Again, on December 30, I gave (b) (6) a total of 2 treats from each bag. Again, during the night she had severe diarrhea. She didn't seem to feel good. My daughter told me about the problems with Chicken Products made in China. She had seen it on MSM on line. We took the treats away immediately, and I went to the FDA Website and saw the caution. Today is Monday, Jan. 2, 2012, and (b) (6) is 100% back to her old self.	2	Years	Boxer (German Boxer)	Dog	75	Pound
<a href="#">EON-80486</a>	1/2/2012 15:45	Waggin' Train Chik'n Biscuits	First, I noticed a change in her fur from thick and glossy to brittle. People used to comment on her hair. Then it started falling out in clumps. Five vacuum bags in a week. That would be abnormal for a spring shedding and it was December when her fur she become thicker. Her downy under fur fell out completely. She started drinking 2 to 3 times as much water and asking to go out during the night and then she started vomiting.  Coincidentally, the news reported a problem with chicken jerky treats for dogs! Sure enough, we had started giving her that brand about 6 months ago and all of these problems have developed since then.	11	Years	Retriever - Golden	Dog	75	Pound
<a href="#">EON-80482</a>	1/2/2012 12:45	waggin train chicken jerky	For about 3 weeks prior to the incident being reported my dog had become incontinent of urine in her sleep about 1-2 days in a row approximately weekly. During these days she would go off her food and have diarrhea. On the date in question she started vomiting, having diarrhea, and lethargy. By 4 am she couldn't even walk. Rushed to emergency. Given subcutaneous IV, (because I could not afford the \$1000/day in patient care quoted to me), Medications, Xrays. 2 more emergency/specialist visits, then 3 visits with regular vet. Total 2 xrays, 1 cat scan, 5 urinalysis, 3 bloodwork and \$2500 bill.	8	Years	Great Dane	Dog	136

<a href="#">EON-80476</a>	1/1/2012 14:15	Canyon Creek Ranch Yam Good Duck, Milo's Kitchen Chicken Jerky Strips	We got up on Saturday morning and (b) (6) was vomiting. Through out the day he continued to vomit was drinking a large amount of water. He had always been a very active dog, but Saturday he would not get up unless we coaxed him to get up. By Sunday morning he had quit drinking water and would not eat. We took him to an emergency vet clinic. The vet said he seemed to have been poisoned. We discussed any possibilities but did not know about the chicken treats. Monday morning the emergency clinic had us take (b) (6) to our vet. Out vet examined (b) (6) and immediately told us we needed to take (b) (6) to a near by Veterinary Teaching College, (b) (6) The doctors there said the same thing, some type of poison, but could not come up with what type. Again, discussions of any possibilities that we could think of, and we never mentions that (b) (6) got a treat every day of either Milo's Chicken Jerky or Canyon Creek Ranch Duck Yam Good treats. I had never seen you precautionary warning until a friend mentioned it to us last night. After reading the warning the symptoms were the same as what (b) (6) had. (b) (6) was in intensive care for 3 days. On Wednesday he went into a comma and had to be euthanized. I have already sent emails to Del Monte and Canyon Creek Ranch and plan to go to WalMart where I purchased Milo's and Pets Mart where I purchased Canyon Creek and ask both to consider removing any pet food products that have ingredients made in China. (b) (6) was a very special member of our family, and after spending over \$7000.00 on all the treatment I feel that I have been betrayed by our US companies because they put profits before safety. I hope you can get these products removed.	4	Years	Dachshund - Standard Smooth-haired	Dog	28	Pound
<a href="#">EON-80475</a>	1/1/2012 13:15	Sweet Potato snacks for dogs	We bought new bags of sweet potatoe treats (fries). They were made differently than the previous batches. Prior batches were dried sweet potatoes. These 3 new bags were processed and cut into fries. Instead of being somewhat soft, they are very hard and the dogs found them difficult to eat. One of the dogs, (b) (6) started vomiting, had a fever, stopped eating, was drink hugh quantities of water, was lethargic. Her last stool had undigested sweet potatoes. Two days later on Monday we took her to the vet. The blood tests comfirmed that she had pancreatitis and was spilling sugar in her urine. She was given a antinausea drug along with an antibiotic, since she had a temperature of 104 degrees. We took her home for several days. She did not get better, no eating etc. She was taken back to the vet and hospitalized for 5 days on IV etc. She is better now, however, she is still drinking lots of water and spilling sugar in her urine.	7	Years	Maltese	Dog	11	Pound

<a href="#">EON-80459</a>	12/30/2011 17:45	Family Pet Original flavor CRUNCH 'EMS Premium dog food Puppy	I purchased Family pet Crunch 'ems puppy food from Family Dollar store (b) (6) on Dec. 13th. 2011. Puppies were active, jumping up, playing etc. I fed them the crunch em's, upon getting home and within 15 minutes I heard the sounds associated with struggling to breathe. I checked in the puppy box and a pup was laying on it's side gasping for air, I checked for choking or obstruction there was none, the pup died within minutes. I had owned and operated a pet store for 5 1/2 years and was baffled as I had never seen a pup "go down" that quickly with no apparent reason. I did not suspect the food at that time, I was just totally confused. Two days later again, pups up, playing around, jumping up very active and within minutes of being fed the product 2 more pups fell ill and died within moments of eating, 2 additional pups had exact same reaction the following day. Until that point even tho pups had been deflea'd I thought possibly illness could be attributed to slight flea infestation, except the sudden onset of illness and death following feeding, and the immediate death after being so active just moments before made no sense to me. I honestly did not suspect the food until the last 2 pups fell ill and died, again within minutes of eating the product. I immediated stopped using the product and the remaining pup is alive and thriving. I worked under a vets licence for 5 1/2 yrs. and I have never seen pups being so active and full of life and being dead or dying withing minutes of eating. The pups were free of round and hook worms as they had been wormed from 3 weeks of age, and showed no signs of paracites other than fleas, but they had been sprayed more than a week prior to this incident and were happy and healthy and active prior to food consumption. After researching on the internet I deducted that it had to be the food that caused the pups to fall ill and die.	8	Weeks	Chihuahua	Dog	2	Pound
<a href="#">EON-80456</a>	12/30/2011 16:15	Milo's Kitchen home-style dog treats - Chicken Jerky	Vomiting occurred after giving (b) (6) chicken jerky from last package purchased (December 9, 2011). I could tell the vomiting was from the chicken jerky due to color of vomit. Immediately, I cut back on the portion size - adding a small piece of chicken jerky along with a Milk Bone dog biscuit in his "Kong" when we would give him a treat. Previously, (b) (6) had been chewing/scratching more - when there was no presence of fleas. The scratching/chewing had been a problem for the past 3-4 months. Since discontinuing giving (b) (6) the chicken jerky altogether, I am noticing a decrease in this activity of scratching/chewing. I am not positive that the chicken jerky is the culprit in the skin irritation. I do believe the last package of chicken jerky purchased caused vomiting.	9	Years	Terrier - Manchester	Dog	12	Pound
<a href="#">EON-80421</a>	12/30/2011 13:45	canyon creek ranch brand natural chicken tenders	(b) (6) had a seizure, first ever, on 12/23/11. she was seen at by a vet emergency clinic. she began to recover, but after having canyon creek chicken tenders, on 12/24, she became incontinent, very lethargic and unresponsive, labored breathing, unsteadiness and tremor. she was seen again, and we were told she was probably in her final hours. her condition worsened through the day and we very sadly euthanized her at the vet's recommendation.	12	Years	Mixed (Dog)	Dog	85	Pound

<a href="#">EON-80308</a>	12/29/2011 22:45	Waggin Train Chicken Jerky Treats	I took my little dog to her Veterinarian to have her teeth cleaned. They took some blood from her prior to the procedure. They called me and said they could not clean her teeth due to the fact that she was in renal failure. Her labs - BUN and Creatinine were extremely elevated. I was shocked to learn this. The Vet asked me what she was eating and I mentioned that she loved the Waggin Train chicken treats and ate some everyday. The Vet then told me to take them and throw them in the trash, that they were garbage. The Vet put her on a special diet = Hills Prescription Diet for kidney function (KD), and see if her labs would improve. I did, and after 400+ dollars later, (b) (6) improved. I really didn't realize that the chicken treats were causing problems but I had had several issues prior to this teeth cleaning episode. She had orange urine, she vomited alot off and on, she had loose mucousy stools quite often. ALL OF THESE PROBLEMS CEASED when I quit giving her and my other 3 dogs the chicken treats. This stuff is poison.	3	Years	Terrier - Yorkshire	Dog	3	Pound

<a href="#">EON-80235</a>	12/29/2011 12:45	Dynamic Pet Real Ham Bone	On 12/10/2011 I purchased 2 Real Ham Bones from Dynamic Pet Products from Dollar General in (b) (6) for Christmas presents for my 2 Italian Greyhounds. On 12/24 at approximately 11am we gave our dogs the bones. I sat near my dogs and supervised as they chewed on them. Within 5 hours they were very sick, vomiting profusely. I then tried some water. They kept this down for about an hour so we went to bed. When we woke up the next morning, the female had vomited about another 5 times, the male had vomited much more and had bloody diarrhea all over. I went to let them outside and the male collapsed. I rushed him to the emergency vet hospital in (b) (6) (this would be on Christmas 12/25) His body temp when arriving there was 97 degrees! His heart was racing so much so they were concerned about cardiac arrest. They hooked him to an IV and took X-Rays. The X-Rays revealed splinters in his intestine and a blockage. They were hoping if they could get him hydrated enough and on enough medications, there was a chance the blockage may move through his system and not require surgery. He was in the hospital for 2 1/2 days. The vet tech said she had never seen a dog with his glucose levels and dehydration levels every survive. He was released from the hospital on Tuesday 12/27 on special prescription dog food and medicines. I was left with a \$900 vet bill, but so lucky my dog is with me. The female recovered at home. I called Dynamic Pet Products at their Washington, MO location and spoke with (b) (6) who informed me that she "had never heard of their bones causing anything like this before" and that my dog "must have gotten backed up from eating the bone" I then began researching this bone and found out that thousands of other pets have been injured by this bone. (b) (6) I have also contacted Dollar General and have not heard back from them. I contacted the Better Business Bureau also. These have to be taken off of the shelves before more dogs die.	3	Years	Hound - Italian Short-haired	Dog	16	Pound
<a href="#">EON-80234</a>	12/29/2011 12:45	Milo's Kitchen home style dog treats - Chicken Jerky	I was given a bag of Milo's Kitchen Chicken Jerky for my dog as a Christmas gift, I gave her several of the treats over the long weekend. On Monday Dec. 26 she began vomiting, had excessive thirst ,decreased activity and shaking. I took her to the Vet on Tues Dec 27 and they took blood and it showed high liver & bilirubin functions. The vet then took an xray of my dogs abdomen which showed no masses or any other problems. My dog was given IV of electrolytes and antibiotics. Today, Wed. Dec 28th she is still shaking and is weak and just laying on the couch. We have to force her to go outside to urinate which she usually loves to do. She has not eaten any food since Monday.	8	Years	Beagle	Dog	31	Pound

<a href="#">EON-80199</a>	12/29/2011 9:15	none	I do not have a specific incident, but I do know that there are meat processing facilities trying to sell the waste that is washed down the drains in packing plants and then goes to the waste water area as pet food. This product is normally hauled to landfills or used as fertilizer. I do not know of any specific buyers for the waste for pet food, but the packing plants are definately trying to sell this waste as pet food. The plants are cleaned with chemicals and the waste is treated again at waste water with chemicals. I feel this needs to be addressed as there is a possiblity that there is a buyer in the US somewhere for this and I feel chemically treated waste should not be sold as pet food. Maybe they are actually using this product in China to make pet treats. Please check into this. We did lose one of our dogs to kidney failure 2 days after chewing on a rawhide bone that we had bought at the dollar store. She was old and had other health issues, but had been just fine up until the we gave her the bone. We really don't know if that caused her death or if old age took over. But we have wondered if this sped up her demise.

<a href="#">EON-80164</a>	12/28/2011 18:45	Waggin Train Wholesome Chicken Jerkey Tenders	We started feeding Waggin Train Chicken Jerky Tenders to our dog last spring, approximately in May of 2011. Our dog shortly thereafter developed extreme thirst, followed by frequent (every 2 hours) urination. Our vet drew blood and determined that she was suddently having liver and / or kidney issues. A couple of blood draws were taken and we tried a few medications, with no effect. I read about the problem with Chinese chicken jerky treats at the end of November and checked the bag in our possession - we had been feeding these, one per day, since approximately May of 2011. The Waggin Tails Jerkey Tenders WERE definitely from China, so we immediately stopped feeding these. Our pets blood draw on Dec 20 was dramatically improved, most likely due to the discontinuance of the Chinese jerkey treats. However, it took a couple of months and many expensive vet tests to draw this conclusion.	12	Years	Schnauzer - Miniature	Dog	18	Pound

<a href="#">EON-80154</a>	12/28/2011 17:45	Waggin'Train Jerky Tenders	Our baby (b) (6) is usually given 3-4 treats per day from 9am to 10pm, and last couple of days we've noticed that he's been vomiting and quite lethargic. We have not yet taken him to the vet, just saw another update on warning of chicken jerky and looked at the product and realized it was made from China.	6		Dachshund - Standard Wire-haired	Dog	22	Pound
<a href="#">EON-80153</a>	12/28/2011 17:15	Waggin Train Chicken Jery Treats	My Shiba Inu became very ill near death...took her to the Vet ...she was barely moving...looked awfull....\$2000. vet bill... hapen again...within two weeks...I knew the smytoms..got her to the Vets right away.. To make this short....It was the WAGGIN TRAIN chicken Jery...It was her favorite treat...me not knowing this ...immediately gave her favorite treat the first time she was released from the Vets. WAGGIN TRAIN LISTS THEMSELVES AS AN AMERICAN COMPANY... I BELEIVE THAT THIS IS WHY THE PROBLEM IS CONTINUING...WITH SICK DOGS. THE JERKY IS MADE IN CHINA. A good ending to this is that my dog is very healthy now (took several months to get her back to completely normal) I no longer buy Chicken jerky or any meat treats from Waggin Train.						
<a href="#">EON-80152</a>	12/28/2011 17:00	Do not know. It was a package of Christmas treats purchased at PetsMart.	Christmas Eve, while the family was eating at my mother-in-laws house, I gave our dog a small sucker rawhide (chicken in the middle) to chew. He was very active before giving him the treat. About 30 minutes later, (b) (6) became docile. He sat on the couch while we finished our activities. My wife and I came home and about 30 minutes later, (b) (6) vomited. We have him 1/2 tablet of aspirin-free Pepito Bismal. 30 minutes later, he vomited again. He was fine through the night vomited the next morning. We have gave him a small amount of boiled chicken and rice in broth and he kept it down. At noon, we gave him more. He is doing fine now. We threw the package away, not know there were other pet parents with similar issues.	2	Years	Havanese	Dog	17	Pound
<a href="#">EON-80151</a>	12/28/2011 17:00	Chicken Jerky	We have four dogs and were giving them chicken jerky treats from Costco several times a day as a treat. One of our dogs, (b) (6), lost her appetite and one day went totally lame. The vet said she had lyme disease, but had no explanation for her breakdown of kidney function (nephritis). He did not think it was related to the lyme disease. The antibiotics cured the lyme disease but the kidney nephritis raged on and she was barely alive. I did some research and found that Lysine is very helpful for kidney nephritis and I spoon fed her this vitamin in baby food several times per day. She made a fantastic recovery after that, but still has a picky appetite. Also - she will not touch any form of chicken any more, even though she still loves steak, ham, fish, etc. I took the Chicken Jerky treats back to Costco with an explanation and although they were sympathetic, they did not pull them from their shelves.	8	Years	Mixed (Dog)	Dog	30	Pound
<a href="#">EON-80149</a>	12/28/2011 16:45	PAWS dog food	(b) (6) vomited repeatedly on 12/4/11. Took her to Vet next day, she was hospitalized for 2 days due to dehydration, had IV fluids.	2		Bichon Frise	Dog	12	
<a href="#">EON-80148</a>	12/28/2011 16:45	Wagon Wheel Chicken Jerky	Dog #1 - Cocker Spaniel - Kidney Failure & Died Dog #2 & #3 - Very Runny stools (some bloody) Dog #4 - Seizure  I did not associate anything with this treat until recently when I removed it from their diets. I was sure the the cocker died from Beneful dog food but now I know it was the treat as this is all she had ate before becoming so ill. I did process of elimination just recently on the foods / treats and when the Wagon Wheel chicken jerky was eliminated within 24 hours all bad symptions disappeared and have not returned - that was 2 weeks ago.	2	Hours	Terrier - Yorkshire	Dog	6	Pound

<a href="#">EON-80098</a>	12/27/2011 19:00	Waggin Train Apple Chicken Wraps , Waggin Train Wholesome Chicken Jerky Tender	Took (b) (6) to vet fro routine procedure and they wanted to check his blood because his gum looked very pale. Numerous test were done but they could not tell me what was wrong but the signs were kidney failure. After \$500 worth of test i could not afford more. He seemed to get a little better and got worse 12-19-11. He would not eat, he drank alot, became listless, started throwing up and the last two days had diaharra. I took him to the vet 12-26-11, they were closed 12-23 to 12-25 for holiday and I didn't think it was an emergency. The vet did blood work and urine test it showed he was in kidney failure. Over the weekend my cousin told me about the alert on chicken jerky made in china. I had been giving (b) (6) chicken jerky and when i checked the package it did come from China. I looked at the website and (b) (6) had all they symptoms listed and the vet confirmed kidney failure. I had to have a precious (b) (6) put to sleep on (b) (6) because there was nothing the vet could do to save him. I had been giving him the jerky for over a year .	5		Mountain Cur	Dog	26	
<a href="#">EON-80069</a>	12/27/2011 3:00	Milo's Kitchen Chicken Jerky Dog Treats	Our dog (b) (6) is often given treats for good behavior. In this instance we purchased Milo's Kitchen Chicken Jerky as a treat. (b) (6) was given small portions broken off of larger pieces on two separate occasions over a period of two days. On day two, (b) (6) became lethargic, stopped eating, had an increase in water intake and had very runny stools that became uncontrolled. We immediately stopped offering the treats as we thought they might be upsetting her stomach. When our other dog also became ill as well despite eating a different brand of food, we immediately suspected the treats and began researching the problem. Both dogs recovered.	8	Years	Chin	Dog	7	Pound
<a href="#">EON-80065</a>	12/26/2011 3:00	Waggin Train Wholesome Chicken Jerky Tenders, Waggin Train Country Style Drumettes 2 treats in 1 chicken outside and dental chew inside	several times I have bought waggin train dog treats. I have taken my dogs to see the vet and they said it is something that they are eating, I bought treats for them for christmas and they have eaten nothing but the treats and both are real sick. Please check into these treats. I can go back and get my vet bills and let you know when this started. I am reporting the known fact that today it is the treats they have been getting sick on.						
<a href="#">EON-80061</a>	12/25/2011 3:00	Ol'Roy Complete nutrition	I bought a 40 lb bag of Ol' roy dog food and about a week after giving it to my dog he started having diarrhea. We were not sure what started it but the only thing i could think of was the food. I had my husband look to see if it had been recalled and it has not. He looked into this brand more and found this site <a href="http://www.consumeraffairs.com/pets/ol_roy.html">www.consumeraffairs.com/pets/ol_roy.html</a> , There is 43 pages of people talking baout how sick their dogs have gotten or that the dogs have even died from this food. Something needs to be done before more dogs die. We took the food and treats (Same brand) Back to WalMart and told them about what was happening with our dog and showed them a few of the pages we had printed out and the lady i talked to was shocked.	5	Years	Beagle	Dog	45	Pound

<a href="#">EON-80000</a>	12/23/2011 12:15	waggin train chicken jerky tenders	My dogs eat products of the higherst quality and healthy, and given that I'm really concerned about what they eat, I buy treats that are as healthy as possible. In early October I bought Waggin Train chicken jerky tenders, because they were dry chicken... how healthier can a treat be?, the following day my dogs started having explosive diarreah, in the beggining I tought they got giardia (at the same time??) after going throug the treatment, they would still have diarreah, and we did not know what was wrong anymore, until I started to think what was different in their diets, and that was the waggin train chicken jerky tenders. I stopped givem those treats and the diarreah stopped immediatly. It's cerarly really disturving to find out that these problems have been reported for years, but they are being sold at large ever since, without any prohibiton. I guess that they are just dogs and nobody cares.			Retriever - Golden	Dog		
<a href="#">EON-79968</a>	12/23/2011 7:15	Blue Bones, Wilderness Chicken	There are two issues I wish to make you aware of: first, roughly 12 months ago, field employees were asked to buy Wilderness Chicken bags in the small and medium size bags with a certain lot number w/out informing the stores or customers of why they were doing it. As employees, they were not told why to do it. Once they finished that activity, it was made clear the problem still existed and they secretly (or so they thought) sent Regional Demo Directors into the field in every state to purchase remaining lot numbers without informing employees or consumers as to why. This has been a common tactic with Blue Buffalo for years now. Secondly, two weeks ago field personnel were asked to go into all national retail stores and buy all bags of Blue Bones with a use buy date of 01/13 citing weights/measure concerns to their employees. After being given mass feedback on the mass volume involved in the purchase, employees complained about the potential costs involved for them. After the complaints were provided from the field, they were told not to worry about it, they would find a different way to handle the situation. I feel Blue Buffalo has a history of lying not only to their employees but their consumers as well, not to mention the regulating agencies for the pet food industry. Blue Buffalo obviously feels as though they are above the law and do what they want without any concern for the consequences, only the bottom line.						
<a href="#">EON-79967</a>	12/22/2011 23:15	Waggin' Train Jerky Tenders	passing bloody stools middle of the morning, went to vet and started vomiting bloody stuff. Vet kept dog to start an IV and start testing for the cause.	5	Years	Other Canine/dog	Dog	6	Pound
<a href="#">EON-79964</a>	12/22/2011 20:00	Purina Pro Plan Large Breed Formula	<p>My dog (b) (6) experience chronic diarerra for a period of approximatley 2 months which the vet was unable to treat before her death on May (b) (6) 2011. We tried a number of treatments and ran a battery of tests but she became to weak to respond.</p> <p>After her death I gave her remaining Purina Pro Plan Large Breed formula feed to my next door neighbor. He returned the food a week later saying his dog (b) (6) began experiencing the same conditions as (b) (6). Fortunately his dog recovered and didn't die.</p> <p>Purina is not wanting to test the food to rule it out as the cause and is wanting to give me a nominal amount for my anguish. I currentlty have approximately \$1,000 in vet bills trying to save (b) (6), \$1,250 in a replacement lab puppy, and an an additional \$1,560 in training to get my new pup field ready similar to (b) (6). Purina's insurance agent's vet analysis seemed misguided since they had (b) (6) listed as a male (she is a female), died at home (she died at the vets office), and extensive liver damage (liver damage resulted in last week and was considered mild).</p>	9	Years	Retriever - Labrador	Dog	85	Pound

<a href="#">EON-79918</a>	12/22/2011 15:15	Nutro MAX CAT ADULT Turkey & Chicken Liver Entree Chunks In Sauce (NET WT 3 oz can)	On December 18'11 I bough a soft food for my cat (Nutro - MAX CAT adult formula can: Turkey & Chicken Liver Entree Chunks in Sauce). My cat was sick a month ago with a dry good and his veterinarian recommended to switch on full soft food, preferably light, because my cat is overweight. I bought MAX CAT light big can over a week ago and my cat ate it - he doesn't eat all the food - he is finicky this way. Because he ate it and I went and bought more of MAX CAT and different variates of it to try. I gave half of this 3 oz can to my cat at about 10:30 pm. He ate it and left some on his plate. I covered it not to dry out (he opens cover by himself) and went to sleep. He woke me up at about 2 am when he started vomiting (his place was already empty). My husband said out cat just drank a lot of water and started vomiting. I checked his vomit: it was plain water with one dark think, like a piece of food. 2nd time he vomit - the water was pink with his blood and again there was one piece of something dark - when I wiped it with the towel - the piece was very hard with sharp endings on the both sides. I pressed it very hard and cracked it on 2 smaller pieces - it was a BONE. He vomited only water (and bloody water) with 3 pieces of bones - he vomited 4 times - one after another. THANKS GOD that my cat is alive!						
<a href="#">EON-79869</a>	12/22/2011 13:45	Beneful Dog Food	<p>We purchased a bag of Beneful 15.5 pound bag of dog food from Pet Smart in (b) (6) Serial Number 17800-12631, best by September 2012. We purchased the food for a dog which we were fostering through the (b) (6). After 3-4 days from the date we opened the bag of food we noticed white worms of some sort throughout the bag along with cobweb type looking objects throughout. We took the bag back to Pet Smart and weren't really given any explanation and they didn't indicate to us whether or not they had experienced other similar problems. The dog is now experiencing diarrhea symptoms and is not his normal self.</p>	1	Years	Pit Bull	Dog	55	Pound
<a href="#">EON-79735</a>	12/21/2011 17:15	Waggin Train	<p>Dog had been given treats for the past 6 months. When went in for dental we were told he was not acting himself lately. Bloodwork demonstrated an increase BUN and Creatinine and the owner did say he was drinking more. urinalysis revealed a urinary tract infection so we thought that was the cause. Treated that with Baytril for 1 month. That resolved but the BUN kept rising as did the PU/PD. The owners noted he was getting worse and on examinationDecember (b) (6) the BUN was greater then 130 and his PCV was 10. We worried about a GI bleed secondary to the BUN so he was given a blood transfusion, antiulcer medication, fluid therapy. The liver was enlarged on ultrasound but everything else was normal as was on radiographs. He was clinically improving on December (b) (6) with fluid therapy. On the night of December (b) (6) he had a hard time with the fluids so we stopped them and gave him lasix. He got worse and died in the middle of the night. Gross necropsy revealed cardiac arrest but no other gross changes other than the enlarged liver. Histopath pending.</p>	9	Years	Maltese	Dog	19	Pound

<a href="#">EON-79725</a>	12/21/2011 16:45	Beefeaters Piggy Twists	(b) (6) had a history of cystic calculi and 2 cystotomies. Mid October 2011 (b) (6) started to eat poorly and vomit (His owner had been feeding oneof the piggy twist treats per day since August 2011. On 11/11/11 his bloodwork showed a new decreased urine specific gravity (1.017) and mild azotemia: creatine (2.6) and BUN (35). He also had 1+ glucose and 2+ protein on UA. We confirmed the glucoseria in house and then sent urine for a Fanconi profile which he tested positive for on 11/17/11. He was much sicker clinically then he would have been expected from the defree of azotemia and in hindsight we now attribute this to the Fanconi syndrome and the metabolic acidoses it caused.He also had a low B12 level which we started him on injectable B12 for and IV fluids, anti-nausea meds, flagyl... At first he improved clinically and went home but then he came back for a recheck on 11/10/11 and was eating poorly once more. The bloods showed he'd become much more azotemic, creat 5.5 and BUN 61. He was readmitted and put on IV fluids. Once the Fanconi test came back positive on 11/17/11, he was started on the Gonto protocol of treatment (including Bicarbonate) and sent home with subcutaneous fluids. Since then, he has gradually improved clinically. He is still on many medications and subcutaneous fluids at home. His BUN rose to >140 but now is back down to 101, creat is 3.5. We highly suspect this Fanconi syndrome and illness were brought on by the piggy twist treats manufactured in China by Beefeaters. This company also makes chicken jerky treats which have already been implicated in causing Fanconi syndrome. We are concerned that these pig products may be made on the same equipment or with the same chemical process as the chicken jerky treats and therefore contain the same toxins.	9	Years	Terrier - Yorkshire	Dog	19	Pound
<a href="#">EON-79713</a>	12/21/2011 15:45	waggin trains chicken jerky	the dog developed diahrea, increased thirst and urination, and low appetite. She also lost energy and was lathargic.	8	Years	Mixed (Dog)	Dog	45	Pound

<a href="#">EON-79463</a>	12/20/2011 3:00	PETKING Chicken Jerky Cutlets	I gave my dog the Chicken Jerky dog treat, a few days later I noticed that he was suffering from diarrhea. I gave him soem Pepto-Bismol (hoping that it would do the trick). The diarrhea has not stopped. And now, (to make matters worse), I am seeing traces of blood in the diarrhea. After some research, I saw that bloody diarrhea is a common side effect of digesting the Chicken Jerky dog treats.	3	Years	Shih Tzu	Dog	10	Pound
<a href="#">EON-79461</a>	12/19/2011 18:45	Waggin' Train Chicken Jerky	<p>We have regularly given our dog chicken jerky treats without incident. We've used different brands, including Waggin' Train, in the past, but this is the first time we've experienced regular vomiting.</p> <p>About 3 months ago I purchased 2 packages of Waggin' Train at our (b) (6) grocery store (we just recently moved). After a few days of giving our dog these treats, she began vomiting about once per day (about as often as she got the treats.) Shortly after I saw an article about the danger of jerky treats from China - I confirmed via the bag that these treats were made in China so we threw the remaining product away (about 3 weeks ago). her vomiting continued the next 2 weeks, at which point we took her to the vet (last week) and she determined the dog has pancreatitis. We did mention the treats to the vet.</p> <p>She's been on anti-vomiting medication and antibiotics for 2 days now, and the vomiting seems to have stopped. We also changed her diet from her regular dry food to boiled chicken and rice.</p>	14	Years	Whippet	Dog	26	Pound
<a href="#">EON-79460</a>	12/19/2011 16:45	Hill's Science Diet Adult Indoor	They started a new bag of food on 12-11-11. He was presented on 12-14-11 for anorexia of one day duration and lethargy. His temperature was 102.4. He was started on amoxitabs. His symptoms weren't improving so he returned on 12-16-11 for labwork. CBC was unremarkable, T4 was low (<0.5), chemistries: AST 651, ALT 110, AMYLASE 1405, CPK 81,310. He was started on denosyl. <a href="#">EON-79249</a>	12/16/2011 14:45	WAGGIN' TRAIN WHOLESOME CHICKEN JERKY TENDERS	On Dec. (b) (6) 2011, we took our dog to the VET. (b) (6) had bloody stool, was not eating, only drinking water and was lethargic. The VET diagnosed (b) (6) with Kidney Disease and we had to put (b) (6) to sleep. We were baffled because Kidney Disease usually affects older dogs. (b) (6) was kept inside and was well maintained. We researched on the internet as to what could cause it and came across the FDA warning of chicken jerky products from China. We had been giving (b) (6) the WAGGIN' TRAIN JERKY TENDERS for well over a year. We were unaware of the FDA's warning until now. I have contacted the VET through their email so that they can report this. (b) (6) was a mixed breed (mutt). Really didnt know how to classify the breed and I put Dec. 10th as date problem started (bloody stool) and not eating. But he had been lethargic before this time, because he didn't want to go on our daily walks as often. (b) (6) Mother is still living and well and his father lived for almost 14 years, both dogs were mainly outside dogs. We are reporting this so that this does not happen to anyone else. We assumed that these treats were safe for our beloved pet.  (b) (6)	7	Years	Anglo-Francais de Petit Venerie	Dog	60	Pound

<a href="#">EON-79131</a>	12/15/2011 15:45	NO GRAINERS	I purchased a 7oz. bag of No Grainers dog treats. Upon giving these to my dog, I reached inside the bag and felt a "needle type" poke in my finger. There was blood on my finger, and upon further examination, I noticed a plastic looking sliver sticking out of my finger. I then dumped the bag of treats and I could see these same slivers sticking out of most of the treats. If these slivers could easily penetrate my finger, I believe these would do the same to the inside stomach lining and or digestive track of a pet, causing internal bleeding, obstruction, or death! I contacted this company with this complaint (approx.) 10 days ago, and they have chosen to ignore my request for an explanation.						
<a href="#">EON-79075</a>	12/15/2011 9:45	Vitality Chicken Breast with Flaxseed & vitamins	<p>A couple of days after feeding the treat, (b) (6) began vomiting and had diarrhea. He would not eat or drink. After 24 hours, with no improvement in his condition, I took him to the Vet. The Vet could not find any abnormal condition and presumed it was something (b) (6) had eaten; he is an inside/outside dog. He prescribed Baytril (twice daily for five days) &amp; Pro Pectalin Anti-Diarrhea Gel (3 cc every 8 hours). The Vet visit was on Monday (12/12/11). Follow on instructions were to return on Wednesday (12/14/11) if there was no improvement. By Wednesday (b) (6) was fine so the follow on visit wasn't necessary.</p> <p>I have two dogs; (b) (6) is a 5 year old Chihuahua which weights 10 pounds. They were both given the same treat in the same quantity. I can only presume (b) (6) became ill because of his age and developing immune system and (b) (6) did not.</p>	20	Months	Shih Tzu	Dog	19	Pound
<a href="#">EON-79050</a>	12/14/2011 20:15	Waggin Train Chicken Strips	(b) (6) was given Waggin Train Jerky Strips as a treat because it was a natural chicken product. The treat was given to 3 of my dogs all females, One spaniel mix, and two Yorkshire terriers. All dogs developed lethargy, diarrhea, and vomiting within 48 hours of ingesting the product. The two younger dogs eventually regained their health. The spaniel/spitz cross went downhill very quickly. After trying several things to combat slightly elevated liver enzymes and no other clinical finding. She died.	14	Years	Basset - Fawn Brittany	Dog	24

<a href="#">EON-79024</a>	12/14/2011 14:15	Waggin' Train Wholesome Chicken Jerky* Tenders	<p>My Shih Tzu (b) (6) ate his breakfast on Dec 13, 2011 around 10 AM. (Pedigree canned dog food Bacon and Cheese flavor.) His normal day- he gets a Waggin' Train Chicken Jerky Tender a few hours after breakfast. He Got sick yesterday (Dec 13) around 3 PM with mushy Diarrhea. Had a big pile on the sidewalk- he never poops on a sidewalk. Then later in the day he had several small piles on subsequent walks. Was fine for the rest of the day- appeared playful and happy. Then no more diarrhea. I assumed it was the Pedigree dog food as it was a brand new can opened yesterday. He only eats once per day.</p> <p>In the evening my girlfriend gave him another Waggin' Train jerky Tender. The last time we went out it was 12:00 AM but no diarrhea.</p> <p>Then in the morning Dec 14, 2011 at Approximately 6:45 AM he scratched at his crate- I let him out and he immediately ran into the bathroom and had liquid diarrhea- like he peed out of his butt. The mess was about a foot in diameter. Then I took him out and he tried to get the rest out for the next 30 minutes.</p> <p>He also threw up green foam. (He ate some grass.) He threw up twice.</p> <p>I cleaned him up and tried to give him water but he would not drink any so I put some on his lips so he would lick it off. He is lethargic and sleeping right now.</p> <p>I called Pedigree and they said there was no pet food recall. I looked online and found nothing. Then I looked up Waggin' Train and immediately found the FDA warning posted on dogaware.com. I called Waggin' Train and they did tell me of the warning but said that the FDA report was not conclusive and they offered no advice other than not to give (b) (6) so many treats.</p> <p>I am throwing the bag out.</p>	1	Years	Shih Tzu	Dog	9	Pound

<a href="#">EON-78824</a>	12/10/2011 17:15	Fopper's Dog Treats 51 Pc-Gourmet Dog Treat Gift Box	<p>I am contacting you today in regards to some products recently purchased as Christmas gifts for friends and our own dogs. The product is the 51 Pc-Gourmet Dog Treat Gift Box purchased online through The Lakeside Collection on 09/02/2011. Three boxes were ordered. One of the boxes was recently sent out to friends and the other two remained in our possession.</p> <p>I received a call today (12/10/2011) from our friends in Connecticut who were sent the treats. They informed us that upon opening their box they discovered numerous bugs inside that were still alive.</p> <p>I proceeded to take the two boxes of treats in our possession and open one of them carefully in our kitchen sink. Before opening the first box, I examined the cellophane wrapping and found it intact. I also noticed a couple of bug carcasses that looked like very small cockroaches between the wrapper and the bottom of the box. When I removed the wrapping and then the cover, I also discovered small insects crawling around inside. Pictures can be provided as evidence of the findings. The other box was not opened as it also exhibited some dead carcusses between the wrapper and the bottom of the box. Both boxes were immediately disposed of outside (still in my possession) to prevent release of any insects into my home. Hopefully, none of them escaped.</p> <p>I am utterly shocked to find insects, still alive no less, in my friend's and my pet's treats. Based on the wrapping being intact, the only other way they could have gotten inside was during production and/or packaging.</p>						
<a href="#">EON-78817</a>	12/10/2011 10:45	Dave's Naturally Healthy Food , Berkley & Jensen Holistic - Natural Chicken & Brown Rice Recipe	(b) (6) started vomiting continuously after eating his normal food a combination of Dave's Naturally Healthy cat food (chicken variety) with a tiny sprinkle of BJ's dry food on top. Initially I thought he must have ingested a foreign body. X-rays at the vet did not identify any obvious cause. He was given anti-nausea medication and fluids and sent home. During the night my other cat (b) (6) also became sick and started vomiting. Vomiting continued after morning meal of same food fed to Butterbean. I now question if the illnesses experienced by my kittens are food related. I have stopped feeding this food as of now and have fed an alternate brand (before grain) of wet food with no further vomiting at this time.	6	Months	Domestic Mediumhair	Cat	9	Pound

<a href="#">EON-78812</a>	12/9/2011 18:00	Kingdom Pets All Natural Ingredients Chicken Jerky	Took (b) (6) in to have him fixed at our vet, pre-op blood work indicated that his kidney function levels were high, he was given an antibiotic and told to come back 2 weeks later. We returned to the vet on 12/5/11 to retest and I had also found blood in his stool that morning. A panel of bloodwork was sent out for analysis, on Tuesday, 12/6 our vet called and indicated that (b) (6) kidney function levels were even worse than the prior test. We had also noticed that his tongue was very dark in color, usually is a nice pink. (b) (6) had an ultrasound done yesterday to determine if he had a genetic/congenital problem with his kidneys, he does not. The 1st question the vet asked was "could he have gotten into anti-freeze?", to which the answer was no. The second question was "has (b) (6) been given any Chicken Jerky treats made in China" to which we answered yes. After googling the information on the internet, I found that the product that I had bought from Costco has not been recalled, however several people had reported renal failure and even death from this product. The name of the product is Kingdom Pets Chicken Jerky treats.	1	Years	Shepherd Dog - German	Dog	80	Pound
<a href="#">EON-78811</a>	12/9/2011 17:45	Pur Luv Healthy Support Natural Dog Treats for Senior Dogs	Pur Luv Healthy Support Natural Treats for Senior Dogs treats were given twice over two days. The first instance caused violent vomiting; not realizing the dog treats were tainted I gave another treat the next day, which has resulted in diarrhea and lethargy.			Terrier (unspecified)	Dog		
<a href="#">EON-78752</a>	12/9/2011 15:15	Waggin' Train Wholesome Chicken Jerky Tenders	Presented on 10/11/11 for a short 1-2 week period of incontinence. A urinalysis revealed a USG of 1.015 & trace protein. A prep profile showed an elevation in creatine of 1.7mg/dl. The dog was placed on IV Normosol, Enacard 10mg, & Hill SD K/D diet for 2 days. A follow up prep profile was performed on 10/13/2011 that showed the creatinine had dropped back into the normal reference range of 1.4mg/dl. The dog was sent home on Enacard & K/D dry/canned food. On 11/11/11, the dog was reported as doing well without any incontinence issues. Another prep profile showed the creatinine holding on the upper end of the normal reference range at 1.4mg/dl. Currently the dog is stable and doing well. The owner has a friend who had recently had their young dog treated by another veterinarian for renal disease. They began comparing notes & realized that they had both been feeding Waggin Train Wholesome Chicken Jerky Tenders. (b) (6) unfortunately does not have the original bag of treats.	5	Years	Retriever - Labrador	Dog	70	Pound

<a href="#">EON-78590</a>	12/9/2011 3:00	Wagon Train Chicken Jerky	We gave Wagon Train Chicken jerky treats to our corgi (b) (6) She was a very active dog and only 5 years old. She started vomiting and acted very tired and would not eat. She was not herself at all. We took her to the VET and they said she was in kidney failure. Her creatinine levels were off the charts at 15. The Vet told us she had must be put in the hospital and given IV fluids. This was on November 29, 2011. The vet / hospital has run over \$2,500 to try to save her. The VET gave me the humane thing to do talk (put to sleep) I was not happy at all over this. The Vet could not lower her creatinine levels to a normal level. We finally had to have her Euthanized. She was suffering terrible and the vet said they could not save her because the toxins in these Chicken Jerky treats caused her kidney failure. (b) (6) was my daughter's Christmas present five years ago. Now our Christmas is ruined. I cannot stand the fact that we let these toxic products in from CHINA and use US based companies to supply these treats to our animals. I want my vet bills paid for by the company that supplies these Wagon Train Chicken Jerky treats in Anderson, South Carolina. How many dogs do we have to lose. They are still on the shelves in stores.	5	Years	Corgi - Welsh Pembroke	Dog	40	Pound

He then became lethargic and also started having "extreme" diarrhea. During this time, he was not able to eat or keep anything down. He was then taken to the DVM for treatment in which he was given IV fluids, and antibiotic injection, he was given an anti-diarrheah med, and then is taking 2 different antibiotics by mouth and will need to take for a total of 10 days.	4	Years	Retriever - Labrador	Dog	64	Pound
<a href="#">EON-78457</a>	12/7/2011 21:15	Canyon Creek Ranch Natural Chicken Tenders	(b) (6) , my 7 yr old dalmation began having seizures once per month after he started getting chicken jerky. I did not connect this problem to the treats initially. My vet ruled out other causes and said it was likely epilepsy, that some dalmations are susceptible to epilepsy and that seizures can increase with age. As I started keeping track of the frequency of the seizures on my calendar in late 2010, I became alarmed to discover that they were occurring almost every 30 days, like clockwork! I began to realize that this pattern was too regular to simply be attributed to increased seizure activity in an aging dog with epilepsy (because that would have been much more random, and would not have occurred on regular monthly cycles). It seemed that the seizure pattern might be attributable to something building up in (b) (6) system, and triggering the seizures. When I thought about what I had been feeding (b) (6) , the only new item I had introduced into his diet was Canyon Creek Ranch Chicken Tenders (from PETSMART). His dog food brand (NUTRO) had not changed in 7 years, nor had his other treats (Peanut Butter Bones and MILKBONES). When I thought back about it, I realized that he had first seized in December 2010, and I had started feeding the chicken jerky treats November 2010. I drew the correlation between the chicken jerky and the seizures finally in September 2011, and guess what? No more seizures! I told the manager at the PETSMART (b) (6) location in (b) (6) , and she said there had been lots of complaints about this product, but the company refused to stop selling it. Please ban this product from the U.S., and do not allow the sale of foodstuffs prepared in China to U.S. consumers period, whether for human or animal consumption.	7	Years	Dalmatian	Dog

<a href="#">EON-78347</a>	12/6/2011 18:45	Pet Pride Dog Gone Deli Large Dog Biscuits	I recently had two dogs pass away within one month of each other. Both got sick suddenly and passed away approximately one week after getting sick despite being treated with antibiotics and other medicines. One of our dogs was older and the death was more expected, however; the other dog was younger and both dogs were very healthy. I have been trying to make sense of the deaths and in retracing my steps I believe that the dogs may have been exposed to Aflatoxin or Salmonella through a type of bones we were giving them ( Pet Pride -Gone Deli Lg dog biscuits). We have never used Pet Pride products before and the bones were the only thing that was different in their diet. Through research I have learned that Pet Pride had a recall in December 2010 for some of their pet products for possible exposure to Aflatoxin. I have saved the bones in question in there original container and I have copies of the medical records/lab results for both animals.	8		Other Canine/dog	Dog	60	
<a href="#">EON-78346</a>	12/6/2011 17:45	Kingdom Premium Chicken Jerky	I should first state that (b) (6) was seen by her vet on October 4, 2011 and was given a clean bill of health. I purchased Dogswell Chicken Breast at my local Costo as a special treat for the old girl. On Thursday night (11/10) (b) (6) got up several times to go outside, which was very unusual. Even though she is a lab, she is a house dog and sleeps on my bed. She had vomited and had several loose stools over the past few weeks. On 11/11, her activity level had decreased but still ate both her meals. She enjoyed being outside while I cleaned up the leaves. On 11/12, she ate part of her meals, had both diarrhea and vomiting and drank more than usual. I talked with a friend who was going to watch the dogs while I was away and I decided to take her to the vet on Monday to have her checked out. On Sunday, 11/13 she refused to eat her breakfast. I fixed her a scrambled egg and brown rice hoping she would eat. She only took a few bites while she was lying down. We spent part of the day outside, when I called her to come in that evening, she walked very strangely when she entered the house. She laid down on the carpet and never go up again. I slepted on the floor with her that night and watched as her breathing became labored. She died at 5:15am on (b) (6) On November 21, while in CA, I read an article on msnbc regarding chicken jerky treats lined to mystery illnesses, deaths in dogs. This could be a coincidence but thought I should report it to both you and my local Costco.	12	Years	Retriever - Labrador	Dog	74	Pound

<a href="#">EON-78307</a>	12/6/2011 15:00	Ol' Roy High Performance dog food	<p>This is a hunting dog used for birding. The owner explained that this dog was regularly active during hunting seasons. This season (started October 2011), owner noted dog was not running as well, and tired easily, after 6 hrs of running (this had not been the norm). Approximately 1 month ago, owner noted that the dog lost some weight. Prior weight on 4/12/11 was 53.6 pounds; weight on 11/14/11 was 49.6 pounds. Owner would supplement the dog's diet of Ol Roy High Performance (dry food) with 1 Tablespoon of vegetable oil 2-3 times per week during hunting season. After a recent hunting episode, the dog lay collapsed in the back of the owner's pickup truck, and would not move. The owner had to pick him up and put him on the ground. The dog was beginning to be lethargic. On 11/26/11, owner noted that (b) (6) only ate a little. On 11/27/11, again, the dog ate only a little, but then vomitted. On 11/28/11 the dog did not eat anything. On the morning of 11/29/11 the dog was admitted to (b) (6), and seen by (b) (6), owner of (b) (6). The prevalent signs seen were a painful abdomen, severe weight loss, and shock. The dog would not eat anything, and vomitted in the hospital. Intravenous LRS were started, and Dexamethasone was given for shock. Initial bloodwork on 11/29/11 yielded increased amylase and lipase, so pancreatitis was diagnosed. The dog exhibited marked somnolence while in the hospital. After 3 days of intravenous fluids, ( 3 liters total) the dog still did not eat. On i-Stat bloodwork done on 12/1/11, the BUN was 60 mg/dl. Hematocrit and hemoglobin were high. The dog was discharged to the owner, with a poor prognosis. On 12/1/11, the dog died in the owner's home. The owner buried the dog later that afternoon. The (b) (6) received the Vet-LRN notification about Ol Roy dog food that date, and knew about this dog in this hospital. I contacted (b) (6), and her office concurred that this dog had eaten Ol Roy dog food. (b) (6) was willing to have his dog, (b) (6), necropsied by the (b) (6), so he dug up his dog on 12/1/11 and submitted his dog to the (b) (6) laboratory for necropsy. The remaining bag of the Ol Roy dog food was also submitted by him to (b) (6), which was in turn acquired by (b) (6), of the (b) (6) on 12/1/11.</p>	7	Years	Pointing Dog - German Short-haired	Dog	47	Pound
<a href="#">EON-78282</a>	12/6/2011 12:45	Canyon Creek Ranch Brand :natural" Chicken Brand	<p>We purchased the Canyon Creek Ranch ""Natural chicken tenders" a couple of weeks, started giving our Chihuahua a half a piece each morning along with his regular dog food (1 cup of pedigree) each day. On (b) (6) 12/1/11 (b) (6) didnt want anything to eat, stayed in bed. Again on (b) (6), (b) (6) wouldnt drink or eat anything... Then on (b) (6) 12/1/11 I took (b) (6) to the vet and he had blood work done. The blood work came back that his kidneys were shutting down. He was then put on IV's for fluid. I brought him home (b) (6) afternoon and continued the fluids thru IV's for (b) (6). (b) (6) we took (b) (6) back to the vet and again they seemed very puzzled that a dog that was very healthy just a couple months turned this way and he asked for all the foods and treats he was taking... He had been on the dog food for years, and the only change we made was these treats.</p> <p>THe vet also told us that he was so bad that he didn't see (b) (6) being able to fight this and we had to put him to rest.</p> <p>This has our family very heartbroken. Last week he was like any other healty dog and today he is gone.</p>	6	Years	Chihuahua	Dog	11	Pound

<a href="#">EON-78247</a>	12/5/2011 19:45	Kingdom Pets Chicken Jerky	I purchased Kingdom Pets Chicken Jerky from Costco as it boasts that the product is all natural. I noticed after buying the product several times and using the chicken jerky as dog treats for both of my dogs that they started drinking way more water than usual. I also observed decreased energy levels and there would be days when the smaller dog who is only 16 lbs would not want to eat his regular food. After taking my dogs in for their bi-annual comprehensive testing, I noticed both dogs had severely decreased white blood cells. (b) (6) also had incredibly high BUN levels as well as creatinine levels, indicating possible liver disease. It was only the other day that my husband saw an article from FOX News on Facebook regarding the possible recall of the very chicken jerky treats we had been feeding our dogs for a year or more. I have contacted my local Costco to let them know about the potential issue and they have made a note of it. They had information about the possible problem and claimed that their treats are not yet being recalled, but that they may cause liver failure. As of December 2nd, we are no longer feeding the treats to our dogs. I can only hope and pray that any damage can be reversed by not feeding them the treats that have been causing the health issues with my dogs.	9	Minutes	Lhasa Apso	Dog	16	Pound
<a href="#">EON-78245</a>	12/5/2011 17:45	Milo's Kitchen Chicken Jerky	Dog was given the Milo's Kitchen Chicken Jerky on a Sunday afternoon. Started vomiting early morning of Monday. From a Vet visit-found out that there was a recall of Chicken Jerky imported from China. This particular Milo's Kitchen Chicken Jerky was made in China.	2	Years	Retriever - Golden	Dog	67	Pound
<a href="#">EON-78242</a>	12/5/2011 15:15	Kirkland Chicken Jerky	Approximately 11 months ago bought Chicken jerky from Costco and gave her 1-2 a day most days. Approximately 6 months ago began having increased incontinence, increased thirst, some weight loss. Thought it might be diabetes. It was not. Approximately 5 weeks ago started having diarrhea, vomiting, weight loss, lethargy. Took her to vet approximately 2 weeks ago where labs values indicated some possible chronic kidney failure with superimposed acute end stage kidney failure. Tuesday November (b) (6) had to have (b) (6) euthanized.	9	Years	Mixed (Dog)	Dog	55	Pound
<a href="#">EON-78149</a>	12/4/2011 11:31	Mellow Mut chicken breast strips	Animal had watery diarrhea. I suspected the chicken so I stopped giving it to her for a few weeks. I gave her another two pieces on 11/25 and within 6 hours she had terribly diarrhea. I have stopped giving it to her and she has been fine. <a href="#">EON-78031</a>	12/1/2011 17:00	Kingdom Pets all natural chicken jerky	<p>On Sunday night 11-20,2001 our dog began drinking huge amount of water. She was also pacing around the house and seemed restless. Other than that , we didn't notice any other symptoms. She had eaten her dinner the night before without incident. The next morning around 6 am I heard her drinking a lot and pacing around the house. She wouldn't sit or lie down. I kep getting up to refill her water bowl. About 2 hrs later she started projectile vomiting. Then she would drink another entire bowl of water and vomit. She wouldn't lie down or even sit down and she was moaning. The only thing in the emesis was chunks of the chicken jerkey and water. This went on for hours. At one point I took her outside and she collapsed. She appeared to be unconscious. She wasnt responding to me at all. I tried to wake her up and get her to go back in the house because it was about 30 degrees. She refused and when we tried to help her she growled at us. So we left her there for about 3 hours when we discovered that she was shivering horribly. We got her up and took her in the house. She laid down on the kitchen floor where she stayed for about 30 hours. She didn't move at all and rarely changed positions. During that time she refused to take any water. We tried to give her eye droppers full but she refused. I think she knew that her gut needed a rest. We were seriously afraid that she was going to die. She was very lethargic, didn't respond to us and never even lifted her head. Her eyes were closed and very droopy. My husband and I took turns lying on the floor with her.</p> <p>Eventually, about mid day of the 3rd day she began to rally. She started taking little sips of water thru the eye dropper. She began to wake up and become a little more alert. She wouldn't sit up but she did lift her head and respond to us when we came in the room. She got up, which was very hard for her. She was extremely weak from her ordeal and her legs wouldn't allow her to get up. Her legs kept falling out from under her. When we eventually got her up off the floor she wanted to go outside. At that time she started to have diarrhea. But she also was a lot more alert and seemed to feel alot better. That night we began to give her tiny bites of rice and chicken stock, per the directions of our vet.</p> <p>Today she is almost back to her normal, barking, playful self! We praise God for her recovery. The first day this all started we heard on the news that thousand of dogs all over the country have been dying because of chicken jerkey treats that were imported from China and sold at big box stores (ie Costco). We checked the bag and found that the treats we have been giving her for years were indeed the ones on the news. We are 100% certain that it is the chicken jerkey treats that almost killed our beloved dog. It was later determined that our 9 yr old grandson had given our dog extra treats when he stayed here for the weekend. When he told us that we had the confirmation that we needed that her sickness was indeed caused by the chicken jerkey she ingested, especially since there were large quantities of the jerky in her emesis.</p> <p>We are very concerned about this because about every dog owner we know gives these chicken jerky treats to their dogs. People need to be made aware that they are a problem and feel strongly that the treats need to be recalled.</p>	13	Years	Retriever - Golden	Dog	83	Pound

<a href="#">EON-77962</a>	12/1/2011 3:00	PCI Brand "CHICKEN BREAST TENDERS" 100% Chicken Breast Fillets	<p>As a treat, I would give my dogs 1 to 2 'chicken jerky' strips every evening after their run. My little dog (b) (6), a voracious eater by the way, began to vomit a white, frothy-like substance one morning. He then began to consume inordinate amounts of water, of which he also vomited and he would NOT eat. My concern was that he somehow developed pancreatitis. The following day his appetite returned, and that evening I gave him another jerky strip - the next day the same thing happened. However, his vomit had speckles of blood in it. He was larthargic and depressed.</p> <p>At that point, I knew it was the chicken strips. I contacted the store where I purchased them and reported the product. Since that day (2 weeks ago) he has NOT had a similar episode. I thought this product, "Made in the USA" and endorsed by the "ACA" would NOT have such an effect. The product is "PCI Brand" "100% Natural Chicken Breast Tenders". I still have some in the container that's identified as "EXP/LOT#052014". I also gave them Milo Chicken Breast treats, too. But at the onset of his illness, it was the PCI product.</p> <p>Please let me know if there's anything else you need.</p>	10	Years	Terrier - Jack Russell	Dog	12	Pound

<a href="#">EON-77961</a>	12/1/2011 3:00	IAMS Smart Puppy Proactive Health	On November 19th (b) (6) was healthy and happy, the morning of the 20th he wouldnt eat or drink. He didnt great me as soon as I got out of bed. He had vomited and was lethargic. I had no idea what was wrong. I took him to the sofa and tryed again to get him to eat, he wouldnt. Some time later in the morning I took him outside but he couldnt stand up, once we went back inside and I layed him back down and he urinated on himself. I took him to the VCA Animal Hospital. After several hours of test trying to figure out what was wrong I was told his Liver was failing and his chances of living were unknown. It was a very emotional week. (b) (6) spent 8 days at the VCA Animal Hospital. They said the liver failure was caused by a toxin. I believe his IAMS puppy food is the toxin. They do not know if he will have future problems due to this event or not. This was IAMS Smart Puppy Proactive Health - scan code 19014 02121 3.51lb bag - best by date 08 Sept 12 080912 other codes under the date 11284177 I1 US61591 I purchased this bag on November 9th at Bloom Grocery store in (b) (6) and it is stored in my kitchen. Because (b) (6) is so young he was not eating any other treats or snacks. He is thankfully home now after 8 days of treatments and testing. He had several fresh frozen plasma treatments and a blood transfusion. His clotting factors are still not perfect and he is taking several medications at home. He had a follow up appointment today and we should know the results of his blood work tomorrow. I'm not sure how to list Budderball he is a Golden retriever/White Shepard. We call him a Golden Shepard	10	Weeks	Shepherd Dog - White	Dog	12	Pound
<a href="#">EON-77960</a>	11/30/2011 23:00	Chicken Tender Treats	Our family dog (b) (6) died in my arms on January (b) (6) of this year.She suddenly became sick and we took her to the vet on 1/11/11 and 1/13/11. Her symptoms included.Lack of appetite>Weakness>Increased thirst>Increased urination>My kids all called and emailed regarding news that just came out that 70 dogs have reportedly died from eating Chicken Tender Treats from Costco.Our dog (b) (6) loved these treats and ate one a day.I even saved one and had put it in our memory box of her along with her collar and pictures.There is no doubt in our minds that is the cause of her sudden death.She was a member of our family.This news has answered the question of what happened to her.We don't want another pet to suffer like she did.Please make her #71 on your list.Sincerely, The (b) (6)	11	Years	Collie - Border	Dog	53	Pound

<a href="#">EON-77952</a>	11/30/2011 16:45	Waggin' Train Wholesome Chicken Jerky-Tenders Chicken Dog Treats	I bought a bag of Waggin Train Jerky-Tenders Chicken Dog Treats over the weekend. I gave a treat to two of my dogs, (b) (6) and (b) (6). (b) (6) has issues with a sensitive stomach, and after I noticed she through up once, I did not give her any more, assuming that the treats did not agree with her. However, (b) (6) loved them, so I continued to give her one a day for the past three days. Yesterday evening when I got home from work, I noticed that she had thrown up a couple of times and seemed lethargic. She did not want to eat any dog food which is one of the first things she will normally do when I get home. Overnight, (b) (6) continued with her vomiting, vomiting several times during the night. I took her to the vet first thing today (11/30/11). The vet put her on a special bland pet food for the next few days as well as gave her some medicine to help with the vomiting and nausea. The vet also recommended that I get pepcid for her to help relieve any acid in her stomach since some of her vomiting contained yellowish bile. So far I have given her the first dose of medicine for the vomiting, half tablet of pepcid, and a little bit of the bland pet food.	3	Years	Chihuahua	Dog	9	Pound
<a href="#">EON-77924</a>	11/30/2011 13:45	IAMS Original with Chicken Cat Food	<p>A report about IAMS recall appeared here: <a href="http://www.truthaboutpetfood.com/articles/iams-recall.html">http://www.truthaboutpetfood.com/articles/iams-recall.html</a> I asked IAMS about this on their Facebook page last night. They said NO RECALL. Good. I'm feeling better.</p> <p>Then I get an update to the story <a href="http://www.truthaboutpetfood.com/articles/per-iams-it-was-a-product-pull.html">http://www.truthaboutpetfood.com/articles/per-iams-it-was-a-product-pull.html</a> (this is the updated report). it was a product pull. Per the website: "according to a Iams Customer Service Representative. The notice that three varieties of Iams pet food tested with "elevated aflatoxin levels" wasn't meant for public notice. It was a product pull, not a recall."</p> <p>This is very concerning. I feed Iams cat food. I don't have the lot number for the "product pull" but is my bag safe? Iams says they follow over 100 safety checks. How does food get out there in the public, then silently pulled and we as consumers are not alerted? I thought there was going to be more transparency since the 2007 Melamine recall that was in pet food.</p> <p>While the IAMS facebook page might be "technically" and "legally" accurate of "no recall" it is certainly a deception if there was something wrong with the food. What kind of non conformities occurred in production and what are they doing to address these?</p>						
<a href="#">EON-77923</a>	11/30/2011 13:15	Wagon train chicken jerky	(b) (6) became listless and slept a lot after eating these Wagon Train treats. After that he started vomitting (never before) , pooped in house (never done before), pee'd a lot When we stopped the treats it took him about 3 days to get back to normal. He was getting other treats too but we only in the last day or so went back to these because we figured they might be too hard to digest	9		Bichon Frise	Dog	15	Pound
<a href="#">EON-77918</a>	11/30/2011 12:15	Jerky treats from Costco	I can't prove that being given the jerky treats caused her kidneys to fail, but can't prove they didn't. Her half-brother is fine. Symptoms started as excess urination and thirst, prompting a visit to the vet. BUN and creatinine were badly elevated. With numerous herbs and making her food special, she was able to live for six months before I had to put her down.	21	Months	Dobermann	Dog	68	Pound

<a href="#">EON-77879</a>	11/29/2011 23:45	Unknown - package was thrown away when dog refused to eat more.	<p>I was given a bad of chicken jerky treats for my dog by a friend. (b) (6) consumed maybe two a week, but often left peices of them on the floor. In August he began vomiting. I took him to the vet and began a round of procedures to try and identify the problem. He did not have pancreatitis; a change in diet did not work. An xray showed a shadows that the tech said was a partial obstruction. An endoscope showed nothing. We went through a series of medications. Nothing worked. (b) (6) dropped to ten pounds and we had him euthanized (b) (6) .</p> <p>Today a friend sent me an article about the chicken jerky treats from China. I believe these are the cause of my dog's illness.</p>	7	Years	Papillon - Spaniel - Continental Toy (with erect ears or with dropped ears (Phal	Dog	14	Pound
<a href="#">EON-77878</a>	11/29/2011 23:15	Kingdom Pets Chicken Jerky - don't have original package so this is a guess.	(b) (6) began throwing up, having diarrhea, and showed signs of excessive thirst and urination, as well as being very lethargic. The symptoms lasted a few days, in varying degrees. Some days she would feel a little better and would hold her food down, and then the vomiting and diarrhea would start up again. I put her on a mild diet of organic rice and chicken broth for a couple days, then added small amounts of roasted chicken (all human food), until her digestive tract seemed to be acting normally, then gradually returned her to her regular diet. I started giving her treats again (varying types), and occasionally the symptoms would return. I read about the trouble with chicken dog products from China, and it exactly described my dog's illness and symptoms.	11	Years	Dachshund - Miniature	Dog	16	Pound

<a href="#">EON-77870</a>	11/29/2011 21:00	Waggin Train Wholesome Chicken Jerkey Tenders	I took my dog to the vet on 11/21/11 because she wasn't eating well and was very lethargic. Knew something couldn't be right because she has always been a very active happy lab. I noticed that her eating habits were off a bit a week prior to bringing her in, and her activity level was decreasing but thought maybe she just wasn't feeling well. When I brought her in I was shocked to find out after tests that she was in kidney failure. We got her on some anti-biotic in case the kidney failure was caused by leptospirosis (sp). I took (b) (6) home and the following moring the vet had called me and asked if I had given (b) (6) any Chicken jerkey treats recently. I told him I had a week or two before, I had gotten them in my dog food bag as a free sample. He told me that he had just gotten a notice from the FDA about a warning with Chicken Jerkey treats made in China that cause kidney problems. He then advised me to call Purina and let them know of the issue. I did that on my lunch break that day. After speaking with a rep. from there they also told me to call Waggin Train the Manufacture of the Chicken Jerkey. I also called them that same day and made them aware of the situation. My vet asked me to also follow up and fill out a report here. I have been very peroccupied taking care of my sick dog and am just no willing out this report. (b) (6) because she was not eating or drinking any longer and vomiting any time she did. I figured I better take the time and fill this report out now.	8	Years	Retriever - Labrador	Dog	65	Pound
<a href="#">EON-77867</a>	11/29/2011 16:45	Waggin' Train wholesome chicken Jerkey Tenders	I fed my dog Waggin' Train Jerkey Tenders and she developed severe diarria on November 15th. The diarria continued, and on November 19th my husband and I took her to our vet. The vet, (b) (6) ran some stool tests and than gave two injections and sent us home with Fortiflora and Metronidazole. I saw a new broadcast about the same type of treats getting other dogs ill and sent a complaint to the manufacture and later the same day, November 28th, they called and offered to either send me a new package or refund my money. My dog only ate the treats and her dogfood which was Wellness Core and she was half the way through a 30 pound bag so I know it wasn't the food.	3	Years	Shepherd Dog - German	Dog	74	Pound

<a href="#">EON-77775</a>	11/29/2011 3:00	Kingdom Pets All Natural Ingredients Chicken Jerky	I gave a strip of chicken jerky to her and my other dog and both developed diarrhea after eating it (not normal for them). A few days later I gave another strip to the dogs and both developed diarrhea. I haven't given any more to them since then and the diarrhea is resolved.	6	Years	Mixed (Dog)	Dog	40	Pound
<a href="#">EON-77774</a>	11/29/2011 3:00	Cadet Real Duck Treat Gourmet Dog Treats Premium Quality Select Low Fat High Protein Treat for Dogs Oven Roasted Duck Brests	Last winter, (b) (6) began drinking excessively. He was displaying signs of distress, and frequently urinating. We took him to our vet suspecting a possible urinary tract infection. The vet stated that he did not have bacteria in his urine, but that he was suffering from medulary washout syndrome. Of greater concern were his bloodwork values that indicated he may be going into kidney failure. His platelet counts were also on the highest side of normal. At that time, there was no obvious connection made to treats that were purchased, but I had a nagging voice. The treats were received for Christmas and were premium duck tenders from Costco. We ceased feeding the treats. (b) (6) was placed on a behavioral water rationing and reintroduction because our vet thought this to be a behavioral problem. Boodwork was repeated 2 weeks later, and again 6 months later. He slowly began coming into normal ranges (and we had discontinued the treats). He remains slightly elevated with his platelet count. After seeing the symptomatic information related to the chicken tender advisory, we checked the bag of Duck treats, and they're from China (and also from Costco).	5	Years	Schnauzer - Giant	Dog	89	Pound

<a href="#">EON-77766</a>	11/28/2011 21:00	Nature's Deli Chicken Jerky Dog Treats	I bought a bag of chicken jerky on Wednesday (11/23/11), and gave <sup>(b) (6)</sup> 2 pieces that afternoon. She woke up in the middle of the night and had several bouts of diarrhea for about 9 hours. She did not really eat or drink all day Thursday and was lethargic. She did not have any chicken jerky on Thursday or Friday and started to feel better. She has eaten this jerky in the past without issues, but did not have any for a few weeks. I thought I had given her too much on Wednesday and thought that it upset her stomach. I gave her 1.5 pieces on Saturday afternoon (11/26/11), and she woke in the middle of the night with diarrhea again.	5	Years	Boxer (German Boxer)	Dog	36	Pound
<a href="#">EON-77765</a>	11/28/2011 20:00	Chewmasters Chicken Strips	I have three dogs. A yourshire Terrier, a Silky Terrier and a border Collie. I have bought these 100% all natural chews chicken strips. My dogs LOVE them but my smaller dogs tend not to chew it up but swallow it before it softens. Therefor the treats cut their insides and causes them to have bloody diareah and bloody vomit. It takes about 4 days before I see my dogs are back to normal. They had stopped eating due to the pain of having to pass a hard sharp object through their small intestinal tract. The only warning on the bag is "Always supervise your pet while consuming these wonderful treats". These treats should not be given to small dogs. Intestinal injuries could lead to death and only after this happening so many times I realized it was the Chicken Strips. So I stopped feeding it to them as a treat and all is now well. My medium size dog seems to have no problem chewing them up really good and no intestinal bleeding.						
<a href="#">EON-77764</a>	11/28/2011 19:45	Chicken Jerky Dog Treats	Have fed the Costco Chicken Jerky Treats product numerous times over the past number of years. Recently, my dog began throwing up, having runny stools, having loose stools in house, and acting ill. Completed numerous stools samples and blood work at the vets visits with no answers. Stopped feeding the jerky treats after noticing her throwing up not long after eating the treats. Since throwing out the product over a month ago, the problem has stopped.	7	Years	Schnauzer (unspecified)	Dog	15	Pound
<a href="#">EON-77763</a>	11/28/2011 19:15	Milo's Kitchen Chicken Jerky	I began feeding my dog one Milo's Kitchen Chicken Jerky treat per day beginning around October 24, 2011. On the morning of October 31, 2011, my dog had trouble getting up and he had wet his bed. He is an older dog, I thought he was just "having one of those days." I thought perhaps his arthritis was acting up. I took him to the vet and he got an injection of adequin. I rewarded him with another chicken jerky treat. For the next three weeks, my dog consumed large quantities of water and, for the first time in his life, began having "accidents" in the house. He urinated on my living room rug right in front of me. I took him to the vet and he urinated on my foot. By November 24th, my dog was leaving little puddles everywhere he went. He was extremly thirsty, very lethargic and somewhat disoriented. Finally my fiance said, "Boy, I hope you're not feeding him Chicken Jerky from China. I heard bad things about that product on the radio." I checked the package and my heart fell when I saw the words "Distributed by Milo's Kitchen. Made in China."	13	Years	Beagle	Dog	50	Pound

<a href="#">EON-77729</a>	11/28/2011 13:00	DINGO DENTA TREATS MINI	<p>I purchased a bag of DINGO MINI DENTAL TREATS for my dogs back in April 2011. I had 3 little ones (dogs) and 3 big ones ranging from a 10lbs 13 yo Yorkie to a 100lbs, 6yo Mastiff. To make a long story short, on Wednesday I gave a treat to each of my dogs, something I rarely do as i am not a fan of treats but these were to help with their dental care so I let them indulge in one every once in a while. I had never purchased the Dingo brand before so this was my first experience with this particular product. In the past I had bought Greenies, which I had also learned are not any better either and they all cause kidney damage.</p> <p>Within hours of getting their treats they all started one by one throwing up. At around 9:00pm, (b) (6), my smallets one, threw up a clear liquid followe by s gellatin like white substance with spots of green coloring. Everyone else had been throwing up what looked liked a paperlike green material. At first I thought toilette paper but when I saw (b) (6) throwing up, I relaized it was Dingo. (b) (6) stopped eating on Thursday and threw up again Thursday twice and once Friday. My other dogs were still throwing up as well but at least they were eating and drinking unlike (b) (6). By Friday, afternoon he was looking disoriented and a little on the weak side which did not surprise me given he had not been eating for 2 days now. I was at the vet with him first thing Saturday morning and he spent the last 4 days at the vet with IVs in him. The vet did X-rays, daily blood work, urine, and anything else thought of but despite the IVs in him (b) (6) kept doing worse instead of better. by Wednesday, the vet informed me his kidneys had shut down.</p> <p>Hard to believe that just 8 days prior I had a healthy, happy 13yo running around the house who would wake me up in the morning because it was time for his meals and here he was fighting for his life. Quickly he became non-responsive and you could see he had turned to skin and bones. We tried Pedialite, baby food with a droppper but nothing seemed to work. The decision had to be made to not let him suffer any more and (b) (6) was put to rest and allowed to go to the Rainbow Bridge as his blood and kidney values kept going up regardless of the treatments administered My other dogs</p>	13	Days	Terrier - Yorkshire	Dog	10	Pound

Key	Created	Product Name	Description	Age	Age UOM	Breed	Species	Weight	Weight UOM
			<p>kidney values kept going up regardless of the treatments administered. My other dogs, given that they were bigger and younger seemed to have the strength to fight whatever had poisoned them and recover. (b) (6) lost his battle although he tried so hard!</p> <p>I contacted Dingo immediately and shared my story in hope to get some answers from them but all I received was their apologies and an offer to send my vet and product receipts to submit for management approval of a full refund. Their product killed my dog and all they have to offer is an evaluation for refund? My vet's exact words were "there is no doubt in my mind that this death was caused by the treat (b) (6) ate" .....it was just one little treat and it caused his death!</p> <p>I am sharing my story so no one else has to go through what I have gone through. My dogs are my children. All rescued, all survivors of neglect in the past and all my babies. (b) (6) still had a few more years in him. His death was unwarranted. I cannot let his death be in vain and I need to fight this. Since then, I have had 4 other consumers and pet owners that have read my story and contacted me because they too lost their pets under the same exact circumstances. Unfortunately, Dingo won't pull their products off the shelves and more pet lives are being lost.</p>						
<a href="#">EON-77728</a>	11/28/2011 12:45	Milo's Kitchen	<p>Fed both dogs Milo's Kitchen chicken jerky before leaving for a 1 hr shopping trip. When we returned (b) (6) had thrown up 3 times. 10/1/11</p> <p>She was very sick all weekend.</p> <p>She was taken to Vet on 10/3/11 early am &amp; was immediately put on a IV.</p> <p>She stayed with the Vet the whole week under intensive care.</p> <p>The vet thought that she had contacted Leptospirosis; but the blood work came back negative.</p> <p>She died on 10/11 of total kidney failure. <a href="#">EON-77721</a>	11/28/2011 3:45	Prime Rawhide Assorted Bones & Chips	(b) (6) had spent the day with our 1 year old lab and my husband outside all day, and was fine. They had been inside for an hour or more when I came home from work. When I came in, as usual, I gave them a Hartz Prime Rawhide chew. This was the first of the chicken basted chews they had had from the bag. When I went to give (b) (6) one, I noticed that two of them were stuck together. I seperated them and gave him one. Within about a half an hour, he began having severe seizures. We took him to our vet immediately. They gave him valium and muscle relaxers to calm the seizures. Through blood tests, they determined his blood sugar had dropped. We then transferred him to the emergency hospital. They could not stabilize his blood sugar, and he continued to have seizures if not medicated. The next morning we had to make the decision to have him put to sleep.	9	Years	Retriever - Labrador	Dog	103	Pound
<a href="#">EON-77720</a>	11/28/2011 3:00	Milos Chicken Jerky Treats	After consuming 5 of the jerky treats, my dog began experiencing bloody diarrhea, which became explosive. I rushed her to the vet hospital where she was treated for gastroenteritis and release. Three hours later, I rushed her back to the vet hospital this time she was unable to stand, was in shock and septic, her blood report was high PCV, accompanied by high packed cell volumes (red blood cells), high white bloods cell and very low glucose.	10	Years	Dobermann	Dog	74	Pound
<a href="#">EON-77719</a>	11/27/2011 23:45	Kingdom Pets All Natural Ingredients Chicken Jerky	On Sunday Nov. 20th early am, my dog woke me up to go outside to go potty, I noticed she had diarrhea. I took a wet paper towel to wipe her when she came in and their was a lot of blood on on it. I made her some hamburger and mixed it with rice to help her with the bad stomach (Vet told us to do this before in the past to help her diarrhea) she seems to be fine now, but we did give her a Kingdom pet chicken jerky treat today (Nov. 27th). We seen a WARNING post on facebook today about this product, we are sick to our stomach about this and will be contacting our vet on Monday Nov. 28th in the morning. Please provide us with any feedback or anything that we should do different to make sure our dog has not been affected by this product.  Thank you,  (b) (6)	6	Years	Retriever - Labrador	Dog	80	Pound

<a href="#">EON-77716</a>	11/27/2011 18:45	Chicken Soup for the Dog Lover's Soul Adult Dog Formula	My mother was opening a can of Chicken Soup for the Dog pet food. It has a flip top. Just as she pulled on the tab the food in the can literally exploded all over her and the kitchen ceiling, walls and floors. While she was not visibly injured (not cuts or scrapes) I am very concerned about her health because she was covered in the food and what was left in the can smells FOUL. We did open another can from the same case and it did not explode and the food inside smells okay (or as okay as dog food can smell), but now I'm afraid there may be some kind of contaminant or pathogen in the food. Is my mother's health in danger if that food that she was covered in had some kind of botulinum in it?						
<a href="#">EON-77715</a>	11/27/2011 16:45	Nutro Natural Choice Dog Food	Upon opening new bag of Natural Choice Large Breed Adult Dry Dog Food noted different smell and darker color. After feeding to dogs one week noticed one dog picking through food. (she gets additional food mixed with hers). She was leaving the dry food. When reaching down into the closed container of dog food noticed that smell again. Asked partner if she noticed it and she said yes. Our dog did vomit that evening. I immediately took a sample to PetSmart where we purchased it. The Manager and another employee were able to smell a difference also. Almost a metallic smell. She opened another bag and the same smell and color. She gave us a different brand to try and our one dog gobbled it down! I saw a post online regarding other owners who have this year had many concerns with health issues of their dogs who have fed this brand. <a href="http://www.consumeraffairs.com/pets/nutro.html">http://www.consumeraffairs.com/pets/nutro.html</a> I hope a resolution is found. I did not have the bag but the store I brought it back to was PetSmart (b) (6)  They stated they were going to follow up with this concern. Sincerely, (b) (6)	11	Years	Other Canine/dog	Dog	65	Pound

<a href="#">EON-77706</a>	11/26/2011 14:15	Pedigree	Bought what seems to be a bad batch of dog food. Our golden retriever has has always eaten the Pedigree brand with a few attempts at swapping to other brands - usually she would eat them but found she preferred the Pedigree. The last batch we bought we noticed she wasn't eating much, eventually not at all. She ate her treats and other scraps but would not eat her food. After a few days I started to wonder if it was the food but then got busy with the holidays and didn't pay much attention. Today I went out to feed her and she couldn't hardly get up and walk. Came to me then fell over. I took out some treats to her and she gobbled them up. My daughter is visiting with her 2 dogs. She did not bring food for them as she was relying on us having some. I gave the food to her dogs - they had been 24 hours without food, just a few treats, so I knew they were hungry. They sniffed at it, picked up a piece, ate it, picked up another piece and just dropped it on the ground and looked at me. They have had varieties of foods including the pedigree from the last time they were here and have had no problems eating them in the past. They would not eat this food. That's what convinced me it was the food. They are young vibrant dogs, mixed breed. I then went to the store and bought a few cans of soft food and another bag of pedigree. My dog devoured the soft food and after an hour got herself up to go get a drink, though wobbly. The other dogs ate from the new bag of Pedigree. Something was wrong with that prior batch, I'm convinced. Unfortunately, we did not save the bag. My husband said it was the 20 +/- pound bag with bonus weight, the one with the golden retriever on the front purchased around mid-November in (b) (6) at Food Lion. That's all we know. We have a rubbermaid container we store it in. I have saved some of the food if there's any way to have it tested. I will submit an update in a week or so.	11	Years	Retriever - Golden	Dog	65	Pound

<a href="#">EON-77703</a>	11/26/2011 10:45	canine carryouts dog snacks chicken flavor	within 24 hours of eating one canine carryout chicken flavor strip, that was broken into 3 pieces and given to him, (b) (6) began to vomit, at first it was undigested food. then turned to foam. he also developed diarrhea. After half the day of vomiting, he vomited up the 3 undigested peices separately. this vomiting lasted him aprox 24 hours and he was feeling fine afterwards.  My 2nd dog, (b) (6). A 13 pound female, not spayed, not pregnant, shih tzu who is 6 years old was also affected. SHe began vomiting and diarrhea on sunday november 20th. Her sickness was the same as Bailey and lasted about 24 hours as well. She also vomited up 2 of the 3 pieces of the treat and they were still whole (undigested) when they came up.	1	Years	Shih Tzu	Dog	11	Pound
<a href="#">EON-77702</a>	11/26/2011 3:00	Canyon Creek Ranch Natural Chicken Tenders	I had been feeding my dog chicken jerky treats from petsmart for months. In Oct 2011 she suddenly died after showing symptoms of sluggishness, loss of appetite, diarrhea and at least one episode of vomiting in a 24 hour period. She did not make it to the vet and her death was not explained. After reading about new cases of dogs becoming ill and dying after eating chicken treats from China, I checked the bag I still have and found out that it was made in China also. I do not know for sure if the treats were the cause of her death, however, it would explain this terrible event.	10	Years	Retriever - Labrador	Dog	85	Pound

<a href="#">EON-77701</a>	11/25/2011 23:45	Waggin Train Wholesome Chicken Jerky Tenders/40 Oz Waggin train chip n biscuits 5.0 oz Canyon Creek Ranch/ Yam Good16 oz	I have been feeding all three animals Waggin Train Jerky Chicken strips, the greyhounds from age 2-7 and (b) (6) 7 mod-2yrs. They all died of renal failure. I contacted wag gin train and they said never had a recall and in fact they have had two that i know of at this time. All three dogs ate two to three a day for five yrs (greyhounds) 1 1/2 yrs (b) (6) who was a lab mix. This is all that was totally common with all three dogs, they also ate canyon creek chicken wrapped biscuits and sweet potato sticks. (b) (6) started vomitting, then could not stand up and had lost 30 lbs. or close to, (b) (6) was scheduled to have her teeth cleaned, different vet and that was three days after having to have (b) (6) put down. vet said (b) (6) was in total renal failure. Had ecopsy done on her and she was diagnosed with renal failure and one other thing, cannot remember what but had to do with an enlarged heart ventricle. (b) (6) started vomitting and then could not stand, took her for a blood test, renal failure, really massive high numbers.	7	Years	Greyhound	Dog	90	Pound
<a href="#">EON-77653</a>	11/25/2011 19:00	Chicken Jerky	I purchased a bag of Kingdom Pets Chicken Jerky at Costco and many times prior have purchased the same treat for my dog. This last bag he seems to have gastric distress after eating them. I limit his intake of treats so he doesn't get alot of them at once. Over the past month that this bag has been used, he has had occasional bouts of diarrhea, a few bouts of vomiting, and his appetite has decreased considerably. He has no fever, palpable tumors, or any other problems except arthritis, and I haven't changed his dog food, so the only thing I can attribute the problem is to the chicken jerky. I understand that unless he is tested at a veterinarian's office, etc., the company would more than likely blame the problem on a variety of other issues, however two friends of mine and I were talking and they both have seen changes in their dogs as well after recently giving the same brand chicken jerky. Just to be on the safe side, I'm taking back the new bag I purchased and make my own. I no longer trust anything food wise that comes from China.			Mixed (Dog)	Dog

<a href="#">EON-77510</a>	11/23/2011 3:00	Doctors Foster and Smith 100% All Natural Chicken Fillets	My 5 yr old dachshund, who previously had no health problems, started having diarrhea and was leaving some of his food in his bowl, which is highly unusual for him. After a day of diarrhea and seeing that he wasn't as peppy as usual, we called the animal hospital at the (b) (6) and described what was going on. They said if it continues to bring him in, but he seemed to recover a bit that evening. About 3 days later, (b) (6) , who has been house trained for years, began peeing/having accidents in the house, and was drinking more water than usual. He also had another bout of diarrhea, and so we brought him to the Vet ER that morning. They did a urinary test and some preliminary blood work, and could not come up with a definitive problem that would be causing his symptoms. The only thing they mentioned, was that he was a bit dehydrated and that his protein levels were very high. They gave him a subcutaneous fluids injection, and told us to follow up with our regular vet and keep an eye on him. The next day, he seemed to be recovering. We thought it was from his newer brand of rawhide, and stopped giving it to him and just kept a close eye on him. This morning my mother-in-law saw CNN and informed me about the chicken jerky recall, I looked into it, and realized I started giving (b) (6) a new brand of chicken jerky when all these problems began. I haven't given him the jerky since, and he hasn't had any noticeable problems, so I feel his symptoms are probably due to the chicken jerky we gave him. The brand we started giving him as an occasional treat (1-2 jerky per day, every few days) was Doctors Foster and Smith Chicken Fillets.	5	Years	Dachshund - Standard Smooth-haired	Dog	15	Pound
<a href="#">EON-77509</a>	11/23/2011 3:00	canyon creek ranch brand natural chicken tenders	dog went down within a 3 hour period. stoppeateating , vomiting, diarhia, unstable, listless. Took him to the emergency vet (w/e) and test showed all liver functions were off the charts. heavey meds, IV fliuds, and he began to respond. vet felt it was a viral or bacteria infection that hit his liver. recovery was quick (3-4 days) and steady improvement was noted. going back to his regular eating habits went fine until we began to add his chicken jerky treats. My daughter sent me a warning note from the FDA about "chinese chicken jerky". All of our food products come from Pets Mart and we are careful what we chose. We purchased Canyon Creek Ranch (an American Company) not noticing that it was "made in China". I am keeping the product aside in case further testing is desired.	6	Years	Other Canine/dog	Dog	86	Pound

<a href="#">EON-77505</a>	11/22/2011 22:45	Happy Hips glucosamine and Chondroitin	Dog ate Happy Hips glucosamine and chondroitin chicken strips (also called chicken jerky on bag) manufactured in China. Began throwing up after eating. Believe the most recent bag purchased was the problem, because this treat is routine for this dog and she had no problems with previous same treats from other bags. Petco store in (b) (6) has the returned product, which would indicate "lot" number.	6	Years	Mixed (Dog)	Dog	28	Pound
<a href="#">EON-77491</a>	11/22/2011 21:15	Waggin Train Jerkey Tenders Chicken Dog Treats	Approx 2yrs ago, picked up bag of Waggin Train Jerky Trenders Chicken Dog treats and fed as a treat. Within the past year, after several trips to the vet to determine cause dermatitis and of extreme biting of pads and lower joints, and recently notice of blood in the urine, I now have discovered a very recent report on these symptoms being directly linked to the products distributed by Waggin Train, LLC of Anderson, SC 29623. The UPC codes for the top two products we have been using are 07020-22208 and 07020-33012. I feel that the products which are imported from China need to be placed in a suspended category until this issue has been resolved.	13	Years	Shih Tzu	Dog	15	Pound
<a href="#">EON-77490</a>	11/22/2011 21:00	Canyon Creek Ranch Chicken Tenders Dog Treats	Dog awoke at approximately 1:30 am vomiting. This continued for over one hour vomiting over 10 times. We took the dog to the emergency vet at approximately 2:30 am, where she was evaluated and it was determined that she had acute gastritis. The dog was given anti nausea medicine and subcutaneous fluids and we went home. The next day the dog's condition has improved, vomiting has resolved however, she is still a bit lethargic. The only thing that we could determine that had changed in her diet was we purchased and fed her "Canyon Creek Ranch" chicken tenders for dogs from petsmart in ann arbor. We returned the dog treats to petsmart and informed them of our dogs condition.	19	Months	Spaniel - Springer English	Dog	48	Pound
<a href="#">EON-77489</a>	11/22/2011 20:15	Milo's Kitchen hom-estyle dog treats. Chicken Jerky	I was taking (b) (6) on a road trip with me to Kentucky from (b) (6). I bought him Milo's Kitchen Chicken tenders for the trip. We left on 11/10/11. He got a chicken tender after our arrival in Kentucky. Several were placed where he could eat them through the night. He woke me up the morning of 11/11/11 vomiting. The chicken tenders were gone. This was around 7:30 a.m.. He continued to vomit and his gums went white around 1:00p.m.. At this point, he was taken to an emergency vet in Kentucky. They did blood work, gave him cerenia to stop the vomiting, gave him fluids sub-Q, and gave him sucralfate for me to give him. I decided to get him home to (b) (6) after the visit. On 11/12/11, he was taken to (b) (6) and given more fluids. He refused to eat. The only thing he would eat was the chicken jerky. He continued to remain ill. He was lethargic, lost 9-10 pounds, and was taken back to the (b) (6) on 11/21/11. His blood work was done again. I started to do research on the internet and found the FDA warning about the chicken jerky. I contacted (b) (6) and left a message for his vet with the information. (b) (6) agreed that the his symptoms and blood work were consistent with the illnesses caused by the chicken jerky.	4	Years	Shepherd Dog - German	Dog	108	Pound

<a href="#">EON-77488</a>	11/22/2011 19:45	Waggin Train Wholesome Western Grill Mixed Favorites Lot No: J4CA4985A	WE purchased a new type of dog treat for our Chinese Pug and he seemed to enjoy the new variety. However, within an hour of his eating 2 of the treats, he was vomiting and very lethargic. At first we thought he might just have a slight bug, but this continued for 2 days. He couldn't keep any food down and slept for almost the entire day. We heard about the dog treat problems on the news and immediately took away those treats. After another day of rest (and no contact with the contents of the chicken jerky treats), he was back to his old self. I have NO DOUBT that these treats adversely affected on usually-healthy dog.	2	Years	Pug	Dog	22	Pound
<a href="#">EON-77487</a>	11/22/2011 18:45	Kingdom Pets Chicken Jerky	We purchase Chicken Jerky from Costco (Kingdom Pets brand) approximately 10 -14 days ago. Our dog has been regularly throwing up and lethargic for the past 7-10 days. We have also experienced a few days where wouldn't eat period when usually he is at the bowl waiting to eat.  As a precaution, we stop feeding him any treats (he does not eat people food) and he has seemed to bounce back the last few days.  Today, I heard the report concerning Chicken Jerky on the radio and verified that the packaging of the product that we have originated in China.  Obvioulsy, I can be sure that this is the trigger but it has raised my suspicion enough to fill out this report. My intention is to return the product to Costco.  Thank you.	1	Years	Terrier - Irish Soft-coated Wheaten	Dog	40	Pound
<a href="#">EON-77486</a>	11/22/2011 18:45	Milo's Kitchen Chicken Jerky	After ingesting the product (Chicken Jerky), Vomiting followed through the next couple days. Decreased appetite and both dogs are acting very lethargic (sleepy).	4	Years	Pointing Dog - German Short-haired	Dog	70	Pound
<a href="#">EON-77477</a>	11/22/2011 16:00	Milo's Kitchen Chicken Jerky	After consuming several treats at one a day. My dog became very sick and began vomiting , diareha, listness and loss of appitite.	4	Years	Terrier - Yorkshire	Dog	4	Pound
<a href="#">EON-77474</a>	11/22/2011 15:45	Canyon Creek Ranch Brand *Natural* Chicken Tenders	After giving (b) (6) a piece of the Chicken Tenders, within a day he vomited up his food (sometimes multiple times) and had diarrhea that lasted for multiple days. He would act very lethargic during this period, which was not normal for him.	6	Months	Mixed (Dog)	Dog	52	Pound

<a href="#">EON-77454</a>	11/22/2011 15:00	Kingdom Pets: All Natural Ingredients: Chicken Jerky	We bought the treats, began feeding them to our dog who began to seem sick. He would just lie around, not come when we called, and then he began to lose his appetite. We thought perhaps he was having a bad reaction to the new treats, since we had never purchased them before, and thus stopped feeding the treats to our dog. After we did this, he began to regain his energy and actually had an appetite again.	15		Terrier - Jack Russell	Dog	120	
<a href="#">EON-77441</a>	11/22/2011 14:00	Waggin Train Chicken Jerky dog treats	After giving 1-3 treats to each dog per day over a week's time, 3 out of 4 dogs had excessive and foul smelling gas unusual for them, 2 out of 4 dogs were drinking excess water (an extra 16-32 ounces/day between them), 1 dog had frequent and urgent diahrrea for 24-48 hours. 48 hours after stopping the treats, symptoms are gone. All 4 dogs have eaten similar chcken jerky treats, including treats of this brand (Waggin Train from Sams Club) previously without reaction.	6	Years	Rottweiler	Dog	90	Pound

<a href="#">EON-77406</a>	11/22/2011 11:15	Wagon Train	<p>11/21/11 (b) (6) presented for exam. Last seen April 2011, was advised to have (b) (6) lose some wgt so (b) (6) was trying to have (b) (6) lose wgt. She stayed on the same food but lowered the amt fed. (b) (6) switched to working nights the week of Nov 7-9 and thats when (b) (6) noticed decreased eating. Normally would eat BID and is only eating SID and wgt loss was seen. Thurs 11/17 (b) (6) was lethargic, decreased eating to 1/2 the amt and not eating treats but did eat a carrot. Sat Nov 19th, eating decreased to almost nothing and drinking now started to decrease. Sunday 11-20, eating and drinking were VERY minimal and very lethargic. Today - eating and drinking are both absent. No vomiting at any point in time. (b) (6) has not been anywhere other than at home and no ticks were seen or removed from her. Last heat cycle was possible end of April 2011. No litter of pups since 2005.</p> <p>PE: 3/9 BCS = 63# (28.3# loss) QAR Temp - 102.0 P116 R 30 MM light pink/moist CRT 1 sec. No skin tent. Chest/abd/LN/UG/anus=normal.</p> <p>Plan: chem 12/e-/cbc/UA</p> <p>Interpretation=renal disease with tubular damage evidence on UA (alot of casts) and low concentration, small amount of glucose in urine (but normal glucose on chem panel=Fanconi's syndrome??). Azotemia with hyperphosphatemia. Non-regenerative anemia, low Plts (???) will check with MF labs on platelet count.</p> <p>DDX: Renal dysfunction with possible failure (CRF?? RE: non-regenerative anemia)...cause=no known toxin/NSAID exposure, lepto??</p> <p>Plan: Adv IV fluids for 2-3 days, start tx for lepto (PenG injection and start oral doxycycline) and send out lepto PCR test. Adv SHelly Cricket is not dehydrated yet but could become so quickly. PX is very guarded at this time and will change based on response to therapy/tx.</p> <p>(b) (6) elected taking home on oral doxy. OK'd PCR urine test for lepto.</p> <p>NOTE: After office hours today found out FDA just made Alert on Chicken Jerky treats from China causing renal failure in dogs. Will contact (b) (6) tomorrow and see if they have used any.</p>	9	Years	Retriever - Labrador	Dog	63	Pound
			<p>Platelet count from MF labs=130,000.</p> <p>11/22/11</p> <p>(b) (6) spoke with (b) (6) about possible chicken jerky use. She reports that her Purina Dog food bags recently purchased came with sample bags of jerky. (b) (6) did get the majority of these treats (b) (6) did get some but not many per (b) (6)). Will see if can find the bags (but have used them all) and will see if made in China. She reports did get (b) (6) to drink some yesterday and ate a cup of hamburger/rice but vomited it up soon after and then ate it again and kept it down. Adv feed 1/2 cup more frequently (TID/QID).</p> <p>(b) (6) returned call 10-15 min later. Did find one of bags of chicken jerky (empty), name of product is Wagon Train. They are chicken jerky treats and made in china. Adv to call maker and report and gave link to FDA to report (<a href="http://www.fda.gov/petfoodcomplaints">http://www.fda.gov/petfoodcomplaints</a>). Adv (b) (6) renal disease still "may" be lepto or other cause but the evidence is pointing at renal toxicity due to these treats.</p>

<a href="#">EON-77405</a>	11/22/2011 11:15	Milo's Kitchen Chicken Jerkey	unconfirmed/suspect--- Dog experienced loss of appetite and decreased activity on various occasions when fed chicken jerkey as a treat (2-4 oz/day)	4	Years	Other Canine/dog	Dog	145	Pound
<a href="#">EON-77404</a>	11/22/2011 11:15	Smokehouse Chicken Breast Strips	I gave my dog several of the Smokehouse Chicken Breast strips as treats and I noticed that her bowel movements were either strained, constipated or she had loose bowel movements.	2	Years	Terrier - Boston	Dog	25	Pound
<a href="#">EON-77403</a>	11/22/2011 11:15	Chicken Recipe Jerky Sticks	We first noticed a decrease in his appetite. A day or so later, he started vomited a few times a day. Then diarrhea, which seemed painful for him. He would whine, and actually yelp in pain while he was having a bowel movement. We didn't connect the relationship to the chicken strips until we ran out. He seemed better and was having normal bowel movements. We purchased another pack, gave him one, and every symptom returned. We threw the rest away, changed his treats to human food, and he has been 100% better since then.	4	Years	Pug	Dog	22	Pound
<a href="#">EON-77392</a>	11/22/2011 10:45	Waggin' Train Jerky Tenders	Gave her a couple of pieces of Waggin' Train Jerky Tenders at bedtime. Within 12 hours she began experiencing diarrhea. After reading an article about other pets experiencing the same symptoms from jerky treats "Made in China" I stopped giving her the treats. At this time I don't know the effect of removing her from the treats. Treats were suspended on the morning of 11/22/2011. The bag of treats was opened for the first time on the evening of 11/19/2011. First symptoms appeared the morning of 11/20/2011.	10	Years	Corgi - Welsh Pembroke	Dog		
<a href="#">EON-77385</a>	11/22/2011 9:45	Milo's Kitchen	I gave both of my dogs Milo's Kitchen chicken jerky treats. Just one each a day, sometimes twice a day. Both started acting sickly a day later. Neither had any energy, not interested in food. (b) (6), the Rottweiler, had a particularly scary reaction to it. He started attempting to regurgitate but nothing would come up. This occurred a day after receiving the treat so I did not make the connection at first. By the next day his belly was noticably distended and all he would do is lay around. Not interested in the park, would not get up to greet me, would not eat his food; very very unusual for this dog. I am not certain what is in this product to make dogs sick but it is certainly doing so.	2	Years	Rottweiler	Dog	100	Pound
<a href="#">EON-77384</a>	11/22/2011 9:00	Milo's Kitchen home style dog treats Chicken Jerky - no artificial flavors or colors 100% real	Bought Milo's Kitchen Chicken jerky as a new treat- "all natural". Started giving it to her as a special weekend treat and she started to have loose stool and would vomit bile every so often. She is on the leash at all times outside and is not allowed to "eat" food that isn't in her bowl. or Pedigree treats (which have NEVER been an issue)	10	Years	Sheepdog - Old English	Dog	89	Pound
<a href="#">EON-77380</a>	11/22/2011 3:01	Waggin Train Wholesome Chicken Jerky Tenders	(b) (6) was at a boarding facility. We left a bag of treats for him. When we picked him up 7 days later he had developed severe diarrhea with blood in it, which continued for over a week, even after feeding a liquid diet. It finally cleared up after another round of Metronidazole. Stool sample did not show any specific bacteria or virus. I had previously quit giving the chicken jerky because I suspected it casued diarrhea earlier this summer. However, some jerky was inadvertently taken to the kennel and was given to (b) (6) and probably to our other dog, (b) (6) (Siberian Husky - 6 or 7 years old). (b) (6) had some diarrea, but not nearly as bad as (b) (6). Hers cleared up with no medication within a day or so after we returned home.	11	Years	Retriever - Flat-coated	Dog	69	Pound

<a href="#">EON-77379</a>	11/22/2011 3:00	Canyon Creek Ranch Brand Chicken Tenders	My wife and I and our 2 collies (1 male and 1 female) went RVing at a state park in (b) (6) in July of 2011. We purchased Canyon Creek Ranch Chicken Tenders as a treat for the dogs to have while camping. After consuming the chicken tenders (b) (6) the male collie began bleeding and diarrhea from his rectum. We contacted our Vet, he did not know what may have caused this. At the time he suggested stress and the heat while camping. He gave us medicine, antibiotic. We never thought any different until I read this article on MSNBC.COM http://vitals.msnbc.msn.com/_news/2011/11/21/8885427-chicken-jerky-treats-linked-to-mystery-illnesses-deaths-in-dogs-about-made-in-china-products-causing-this.	3	Years	Collie - Rough-haired	Dog	74	Pound
<a href="#">EON-77378</a>	11/22/2011 3:00	Waggin Train Wholesome Chicken Jerky Tenders	chronic diarrhea, heaving, hives and inflammation in skin, anus and ears. Runny eyes. chronic itching.	2	Years	Poodle - Standard	Dog	75	Pound
<a href="#">EON-77377</a>	11/22/2011 3:00	Milo's Kitchen home-style dog treats Chicken Jerky	I gave (b) (6) and my other dog (b) (6) an 8 year old English Bulldog Milo's Kitchen Home Style dog treats Chicken Jerky. Within a couple days (b) (6) developed severe diaharria and has dropped weight as a result. She is now on a home cooked bland diet of boiled meat, Rice and pureed pumpkin. She is doing much better now.	7	Years	Shepherd Dog - German	Dog	90	Pound
<a href="#">EON-77376</a>	11/22/2011 3:00	Dogswell Happy Hips Chicken Breast Glucosamine and Chondroitin	I bought some of the dog treats and gave them to my dog and he started vomiting and had diarrhea.	10	Years	Sheepdog - Shetland	Dog	38	Pound
<a href="#">EON-77375</a>	11/22/2011 3:00	Canyon Creek Ranch Brand Natural Chicken Tenders	(b) (6) was given a chicken tender treat during the evening hours. The next morning she was very depressed, trembling, vomiting, no appetite, gulping water. She was seen by a veterinarian within 4 hours and had to be hospitalized. She was given intravenous fluids and antibiotics as her white blood count was high. Bloodwork showed signs of reduced kidney function. After two days, she began to show interest in food and blood work was showing improvement so she was released to return home.	11	Years	Hound (unspecified)	Dog	70	Pound
<a href="#">EON-77374</a>	11/22/2011 3:00	Waggin Train Jerky Tenders	(b) (6) began a decline that took about two weeks. He lost his appetite and began to consume large amounts of water. I scheduled an appointment with my vet (b) (6) here in (b) (6). The vet suggested a blood test and sure enough it showed that (b) (6) had chronic renal failure (kidney failure). He was miserable and we decided to put him down two days later. The vet asked me if he had access to antifreeze and I assured her that (b) (6) had never consumed any anti freeze. I have bought the Waggin Train Jerky Tenders here at the SAMS Club in (b) (6). I still have the treats if any testing needs to be done. My dog was in excellent shape and If these Chinese made dog treats are to blame I will seek legal advice and take the necessary action.	10	Years	Schnauzer - Miniature	Dog	22	Pound
<a href="#">EON-77373</a>	11/21/2011 23:00	WAGGIN TRAIN WHOLESOME CHICKEN JERKY TENDERS	CAT KNOCKED BAG OF WAGGIN TRAIN JERKY TENDERS DOWN AND CAT AND DOG ATE MANY TREATS. DOG GOT VERY SICK. HE WOULDN'T EAT, WAS THROWING UP, NO ENERGY, CONSUMING A LOT OF WATER, WEIGHTLESS. I TOOK TO VET AND THEY ORIGINALLY THOUGHT HE HAD CANCER BUT COULDN'T SEE THE STOMACH. THEY RECOMMENDED PUTTING HIM TO SLEEP. THEY KEPT HIM OVER THE WEEKEND AND WERE GOING TO DO SURGERY MONDAY. THEY PUT FLUIDS BACK IN HIM. BY MONDAY HE WAS DOING BETTER BUT THOUGHT IT WAS PANCREATITIS INSTEAD DUE TO HIGH PROTEIN INTAKE. THEY KEPT HIM ANOTHER 3 DAYS. HE ALMOST DIED.	7	Years	Spitz - American Eskimo Dog	Dog	40	Pound

So we took him to the vet she put him on liver meds and said his glucose was off. He then seemed to be doing better. Friday night we gave him a treat chicken jerky sat he would woble and didnt want any water or food. sunday he was not wanting food or water throwing up and stuff he then couldnt move att all he died at 0300 with blood coming out of his orpahces.	9	Years	Dachshund - Miniature	Dog	11	Pound
<a href="#">EON-77349</a>	11/21/2011 21:00	Milo's Kitchen Chicken Jerky (made in China)	11/6/11 noted a loose stool late afternoon but fed normally. Dry pedigree with 1/4 can pedigree dog food. I have recently (3-4 months) been giving her a chicken cutlet treat after her dinner (Milo's Kitchen Chicken Jerky). By the next morning (before 7:00 AM) she had diahrrea all over the rug in our family room. This has never happened before. I fed her rice and plain chicken (boneless) for breakfast. She continued to have bouts of diahrrea all day and it was mostly water. Called my vet and she told me I could give her an Imodium and feed her boiled hamburger and rice for dinner. The next morning, I woke up at 7:00 to bloody, mucus and called the vet at 8:00. Took her in to be checked, and they kept her overnight and treated with IV's and cortisone as well as antibiotics. There were no parasites noted in stool. She was able to come home the next afternoon with antibiotics and cortisone tabs for 10 days, as well as a limited diet. She has been fine since then with no more diahrrea. Cost was almost \$800 with the food they sent home with her. Please note that there was nothing out of the ordinary that she had, and I take her outside on her leash at all times.	12	Years	Beagle	Dog	51	Pound
<a href="#">EON-77348</a>	11/21/2011 20:15	Kingdom Pets Chicken Jerky	She and my 3 year old Bernese were given Chicken strips as treats. They received probably as many as 8 strips a day. She started losing weight, became lethargic, lost control of her bladder and was dead within 30 days. The vet thought a very aggressive cancer but I did not want her tested.	12	Years	Crossbred Canine/dog	Dog	80	Pound
<a href="#">EON-77347</a>	11/21/2011 20:15	Milo's Kitchen Home Style Dog Treats	All three of mine were very ill in September and I had just purchased a bag of Milo's Kitchen chicken jerky ȳ and they are labelled as Made in China. The oldest died - (b) (6) 18 yo ȳ very painfully with bloody diahrea. The 12 yo showed signs of kidney and liver failure and we (Vet and me) put her on a Hillȳ's K/D and very strict diet ȳ the puppy was only ill for a couple of days and was fine. I have not fed them anything out of this bag since. I just retrieved it from the fridge to check. I am going to seal it and save it ȳ let me know if you want me to mail it to you. <a href="#">EON-77344</a>	11/21/2011 19:45	Waggon Train jerky tenders	food poisoning, symptoms were continous bloody diareaha, was brought to vet, he was kept 2 days, hydrated intrvenously(sp?), and given antibiotics. I almost lost him to this posioning. I monitoreed what was given for food. several months, later I again added Waggon train chicken jerky to his diet and it happened again. My pet had bloody diareaha, and was very sick. I immediately took him to the vet and he was given some antibiotics. There is no question this treat caused the problem. It has been at least a year or so since this happened. The web article prompted me to file this complaint. I still have the treats that caused this poisoning.	1	Years	Chow Chow	Dog	50	Pound
<a href="#">EON-77343</a>	11/21/2011 19:15	Waggin' Train Wholesome Chicken Jerky Tenders Chicken Dog Treats 97% Fat Free Natural Chicken Fillets	My dogs were given Waggin' Train Wholesome Chicken Jerky Tenders - Chicken Dog Treats as treats since 10/1/2011 and they developed severe diarrhea 1 week later and, still have diarrhea from the dog treats. They DID NOT have diarrhea prior to giving them the treats. Upon noticing that both had diarrhea at the same time which never happens, and after reading the news report on Waggin Train Jerky Tenders, I feel that I can conclude this product is responsible for my dogs being sick. The product I purchased is the same as reported in the news and is MADE IN CHINA per bag. I hope that the FDA mandates that this product be taken off the shelves of retailers and suppliers of this product IMMEDIATELY, and to further efforts to maintain the safety of consumer's pets and consumer interests/concerns/safety. Based on report I have STOPPED using this product.	9	Years	Retriever - Labrador	Dog	80	Pound
<a href="#">EON-77341</a>	11/21/2011 19:00	Milo's home style chicken jerky	After feeding jerky treats for several weeks, dog began to drink excessively. Gertting up in the middle of the night two and three times just to drink. Took to vet and asked him to check for diabetes or related illnesses. After blood work and urinalysis no diabetes showed up the doctor asked me about his treats. I told him I feed chicken jerky for treats and nothing else. He told me about a concern for chicken jerky and they tested (b) (6) for other diseases based on the FDA ruling. Right now the only symptoms are the excessive drinking so I'm stopping the treats	3	Years	Schnauzer - Miniature	Dog	11	Pound
<a href="#">EON-77340</a>	11/21/2011 19:00	Merrick's Smothered Comfort, Merrick's Wingaling	I am repeatedly finding large bones in Merrick canned dog food, specifically Wing-A-Ling and Smothered Comfort. If I didn't find these before I served the food to my dog, I'm not sure what would have happened. I consider finding bones in dog food very risky.						
<a href="#">EON-77339</a>	11/21/2011 19:00	Canyon Creek Ranch Brand Natural Chicken Tenders	Your drop down list does not list my breed. I have a Pomeranian. I was feeding my dog Canyon Creek Ranch brand Chicken Tenders, (made in China, and manufactured by Canon Creek Ranch in South Carolina 29623 according to the package)and noticed after two weeks that he began to develop soars on the top of his head and was vomitting frequently. When I stopped feeding him these chicken strips the soars began to heal, and the vommiting stopped, completely. He no longer has any signs that the soars were there. I still have not thrown out the remaining strips and will no longer be feeding him anything made in China. Just want to submit a warning to all.	5	Years	Crossbred Canine/dog	Dog

<a href="#">EON-77338</a>	11/21/2011 19:00	Innova Large Breed Senior Dog Food	I changed my working dog's diet to the Innova Large Breed Senior kibble last spring. After feeding two smaller bags of the food without incident, I purchased a Large size bag and started feeding it to (b) (6) only. (b) (6) began having reflux symptoms and started losing weight. I was unaware that the food was bad and continued to feed it. While on a trip she became seriously ill with bloody stools and vomiting, panting, very lethargic, etc. I was at a dog show so I purchased a sensitive stomach food from a dog show vendor and immediately she seemed to be less painful. I began flagyl and Gaviscon and made an appt with my vet. My vet found that (b) (6) had serious colitis and bleeding ulcers. After a round of medications she started to improve. We were not sure what caused the incident however I still had the bag of food. I decided to try feeding a meal of the Innova to my Boxer who has an iron stomach and within 8 hours he was blowing with diarrhea. I returned said bag to PetSmart, called Innova and reported the incident however they did not even take my name....	6	Years	Retriever - Curly-coated	Dog	60	Pound
<a href="#">EON-77335</a>	11/21/2011 18:45	Kingdom Pets Chicken Jerkey	This was our second bag of this product. The first bag she reacted fine, however, within days of opening the second bag, she began having bloody diarrhea, became lethargic, would not eat or drink. She also began to have green discharge coming out of both of her eyes. The discharge was so thick that her eye would occasionally seal shut.	5	Years	Weimaraner	Dog	59	Pound

<a href="#">EON-77328</a>	11/21/2011 18:00	Waggin Train Chicken Jerky Treats	<p>The dog was restless at night for a few weeks which was unusual. I brought her to the vet (for her regular checkup) and noted that and they did a blood panel. By the next day the dog was really not feeling well and when her blood work came back it showed that her liver and kidneys were both failing. By the following morning she was unresponsive. My dog that ALWAYS eats was not eating, drinking or even getting up. She didn't know where she was or who we were. I brought her to the emergency vet. When I brought her in she had a 106 degree fever. She was close to death when I dropped her off - her liver was almost nonfunctional - the vet called it an 'assault on her liver' and her kidneys had started to shut down as well. She immediately got intravenous fluids and antibiotics. Somehow she survived. The vet didn't know what caused the assault on her liver, but they thought that maybe it was pancreatitis. She was much better within 24 hours and she was released after 2 days. While her liver still wasn't doing great, she was well enough to go home - eating, drinking and functioning.</p> <p>I noticed that when I gave her her favorite Chicken Jerky treats from the Costco that she would start declining again, so I stopped giving them to her and I haven't given them to her since then. She has had no relapses since then. My dog got 2 or 3 of those jerky treats every single day. Since she is blind I used to cut them up and throw them outside on the lawn for her to hunt for them (she would use her sense of smell to find them since she is blind - she loved doing that). I saved the bag of jerky treats for a long time to see if anything like this came out because I suspected that there was something wrong with them, but ultimately I threw the bag out.</p> <p>We even had an ultrasound of (b) (6) (the dogs) internal organs done to see what was causing the problem but it showed no problems - no tumors anywhere, no obstructions, normal sized adrenal glands, etc.</p> <p>The product was Waggin Train Jerky Treats from Costco in (b) (6)</p> <p>Our dog has not gotten the jerky treats again and she has been stable since June and is doing well.</p>	14		Cattle Dog (unspecified)	Dog

<a href="#">EON-77327</a>	11/21/2011 17:45	Canyon Creek Ranch Brand Natural Chicken Tenders 97% Fat Free Treats for Dogs	About three or so weeks ago, I gave my dogs a "chicken tender" distributed by Canyon Creek Ranch. I specifically looked for a made in the usa symbol, and saw that Canyon Creek Ranch is an American owned company. When I got home and looked over the packaging, I realized that even though Canyon Creek Ranch is an american owned company, their product is made in China. I was upset that I had bought them, but they were really expensive so I thought, what harm can this do them. I just won't buy any more. A few days later, my dog (b) (6) started throwing up. The first day it was once or twice. Then each day it got worse. I took him to the vet (along with a stool sample which came out negative) and they said everything looked fine and said he may have acid reflux and gave me medicine for that. He seemed to get better. Not thinking that the chicken tenders might be the cause of this, I gave him another one or two. A day or so later, in the middle of the night, (b) (6) had diarrhea in my bedroom. This is a dog that would rather die than go to the bathroom in the house. It just never happens. From there it got worse. The entire next day he was either throwing up or having diarrhea. He wouldn't eat and seemed to be in a lot of pain. So I took him back to the vet. They did blood work (which came back fine) and we ended up treating the symptoms, not knowing what the cause was. They injected water in him because he was so dehydrated and gave him pills for the vomiting and diarrhea plus put him on a low res canned food diet for a few days. Well, that really helped and he was much better the next day. So in my mind I'm wondering what is going on and what made him so sick, but all the tests seem fine. The only variant I could come up with were the chicken tenders. I then read on the internet about this problem and decided to contact you. I still have the bag and product. I'll hang on to them for a few days, but then will throw them away. This incident cost me about \$375 in vet bills and meds/food!	3	Years	Retriever - Labrador	Dog	85	Pound
<a href="#">EON-77326</a>	11/21/2011 16:45	Waggin Train Jerky Tenders	on 11-12 2011 (b) (6) was taken to the groomers to get groomed. after I brought her home from the groomers I rewarded her with a chicken jerky treat like I always do she was pretty hungry so I gave her two treats. about a half an hour later she threw the treats up. I thought maybe she had eaten them too fast! so I thought nothing of it. but later on that night she went to the bathroom and I noticed she had diarrhea.she had never had this problem before but I thought it was because we have been trying to find a dog food that she would eat.so I returned her original food which is the iams band. but her diarrhea has lasted a week now. I have been giving my dog these particular brand treats for a few months with no problem. but now I'm reading about these type of treats that are from China and that's where these are manufactured. the brand is Waggin train brand jerky tenders. made in china lot # 61ca4881a	1		Shih Tzu	Dog

<a href="#">EON-77325</a>	11/21/2011 16:45	Vita Kitty Chicken + Vitamin Jerkey	<p>Product was VitaKitty Chicken + Vitamin jerkey treats, purchased multiple times at (b) (6) as well as at Target on (b) (6) . in (b) (6) in the spring and summer months of 2009. I also gifted this product to a friend, whose cats, thankfully refused to eat them. I always purchased the 2oz package.</p> <p>I fed the cat treats at or below the frequency recommended on the package. I fed these treats as treats not as a dietary staple. After consuming the treats, his feces went from average cat feces (in terms of frequency, appearance and odor) to diarrhea that was foul smelling and frequent. It stunk so bad, you could smell it throughout an 800SF apartment and outside the entrance as well. He was also losing weight, and at the time, he was less than 1 year old, and growing rapidly. I took him to the vet, they did a stool sample and found no parasites, fungus or errant bacteria, and the vet determined that his stomach chemistry was probably off, and the good bacteria got out of control. I think he was treated with Cefadroxil (it was a liquid that had to be refrigerated, the vet also flavored it because he said it was bitter and may make the cat foam at the mouth). Once treated, he returned to normal, so I thought treats were safe again. He again started having the foul feces and losing weight, so I consulted the vet via phone, and they instructed to do another round of the prescription. I drew my own conclusions about the treat and discontinued feeding them to him.</p>	3	Years	Siamese	Cat	10	Pound

<a href="#">EON-77314</a>	11/21/2011 15:00	I don't remember much except it was chicken jerky type product	Do became very very thirsty all the time, urinated a lot and occasionally threw up. Eventually the dog became lethargic and could not eat. Vet had to put him down because he was too far gone. I had given the dog chicken jerky before this happened. Over then course of several weeks he got a treat a few times a day.	8	Years	Newfoundland	Dog	160	Pound
<a href="#">EON-77313</a>	11/21/2011 15:00	Waggin' Train Wholesome Chicken Jerky Tenders Chicken Dog Treats	Dog was consuming Waggin Train brand chicken dog treats. They are made in China, and sold in the US by Costco. After ingestion, he began to experience diarrhea. He was seen by our veterinarian who de-wormed him and provided antibiotics (Metronidazole 500mg 7 day supply taken 2 times daily) for an unknown diarrhea infection. I have read about FDA warnings on chicken jerky treats made in China, and my dog has symptoms. After treatment, he is slowly improving.	3	Years	Spitz - Dutch (Keeshond)	Dog	40	Pound
<a href="#">EON-77311</a>	11/21/2011 14:45	Canyon Creek Ranch Chicken Tenders Dog Treat , Waggin Train Chicken Jerky Tenders	<p>My English Setter vomited within 1-2 hours after receiving jerky treats on several occasions, and at an undetermined time after treats also experienced crate accidents. Stool seen in accidents was formed, but large and soft/foamy/bulky, and paler than usual in color. Vomitus contained parts of undigested treat. The episodes of vomiting and bulky stool were self limiting and generally resolved within 24 hours. Dog has subsequently experienced some weight loss, but this may be due to increased activity. Dog did not exhibit any signs of lethargy or depression in conjunction with the episodes, and appears otherwise healthy except for the weight loss. There were no concomitant changes in diet or indiscretionary eating that could have been associated with the episodes. Dog is an indoor-outdoor dog who is crated for approximately 9 hours during the day and spends another 4-5 hours outdoors and the remainder of the time unrestrained inside. Dog was generally given 1-2 strips as a treat per day. The only other treats that the dog receives is pressed rawhide bones (cowhide or pighide).</p> <p>This occurred with two separate brands of treats over two months - Waggin Train Chicken Jerky Tenders (purchased at (b) (6) ) and Canyon Creek Ranch Chicken Tenders Dog Treat (purchased at (b) (6) ). I have discontinued the use of the treats and I did not retain the packaging, so I do not have lot numbers or UPC codes - the events were generally mild and I did not immediately associate them until I saw the FDA preliminary health notification. I did not take my dog for veterinary attention for any incident. The products were stored in the original packaging (resealable bags), in my kitchen pantry in a temp-controlled house (65-82 degrees F approximately). I do not remember the purchase dates, but they were used within 3 weeks of opening the package. The products had no unusual odor or signs of spoilage that I recall.</p> <p>The treats were also given to my Jack Russell Terrier with no apparent ill effects, and I have also used the Milo's Kitchen Chicken Jerky Strips Dog Treats (Purchased at (b) (6) ) prior to this (before September) with no ill effects. It only occurred with the two subsequent brands that I listed. I have given the approximate range of dates covering the occurrences.</p>	18	Months	Setter - English	Dog	65	Pound

<a href="#">EON-77283</a>	11/21/2011 12:15	Dogswell. Happy Hips Chicken Breast Glucosamine & Chondroitin helps maintain healthy joints.	Nov.14,2011 in the late evening I gave her 2 chicken jerky chews. She was behaving oddly needing to go out often and drinking a lot of water. At 5:30 am (b) (6) I found her in the kitchen having vomited a lot of liquid and with some signs of blood in it. She wanted to go back outside and since it was warming up I let her. I checked on her several times and she appeared to be resting. At 8 am I found her having vomited again and I checked her gums which were very pale. I called my vet and was told to bring her in at 11:45 that morning. I watched her often noting no improvement and when I went to pick her up to take her to the vet found her to be fatigued and very weak. When we got to the vet Dr (b) (6) did an Xray and heart lungs looked good spleen didn't appear definitive of causation. Dr (b) (6) advised blood work and to would call me within 90 minutes. When Dr (b) (6) called she told me shocking news that (b) (6) had gone into cardiac arrest and died. Dr (b) (6) asked me on the phone if I used any rat or mouse poisons and I said No never and she was with me all day. Went for a run in the morning ate her meals and no problems till during the night. When I went back to the vet another vet asked me what was the orange stuff and that she vomited something orange just before she went into cardiac arrest? At that moment I had forgotten about feeding her the dog chews as I was in shock and fatigued along with sleep deprived. The next day after I buried her I found 2 places of vomit and there I observed orange coloration and pieces of the chicken dogs jerkey strips. I did a google search read about cautions of canine chicken from China and much to my shock on the back of the package it small print, "made in China". Within 12-14 hrs. (b) (6) died. From normal to dead in just hours.	12	Years	Siberian Husky	Dog	70	Pound
<a href="#">EON-77221</a>	11/21/2011 7:15	Canyon Creek Ranch Natural Chicken Tenders	(b) (6) has twice in last last 6 weeks spit up a bloody mucus. The first time was much worst. We took him to the vet where they gave him a shot and put him on a bland diet for a week. The second time we switched to the bland diet immediately. I just saw a link to this FDA report and will now pull him off his treats - we give him Canyon Creek Ranch chicken tenders because they appear to have few ingredients and seemed the most healthy.	2		Bichon Frise	Dog	18	Pound

<a href="#">EON-77217</a>	11/19/2011 21:45	stop and shop companion dog food	on monday 11-7 i fed her like i normally do. the next day when i went to feed her she did not want to eat. she wasnt acting herself. by wednesday when i came home from work she vomited several times. she still did not want to eat. very listless. i brought her to the vet and he recommended keeping her overnight and run test. he was very concerned she was dehydrated. the tests came back and her kidney function level was over 130 which is very high. 6 months ago her level was 19. she was very healthy. she was diagnosed with kidney failure and he recommended putting her down. we decided to wait until monday to see if she would come out of it. the vet said there is a 20%chance she will. he said she likely ingested some poison to bring on acute kidney failure.	11	Years	Poodle - Toy	Dog	6	Pound
<a href="#">EON-77216</a>	11/19/2011 21:45	Waggin Train Jerky Tenders	after feed the chicken jerky to our pet she started having blood in her stool and had a loss of appetite. Spent \$150 at the vet and hope all will be ok.	11	Years	Mixed (Dog)	Dog	25	Pound
<a href="#">EON-77215</a>	11/19/2011 16:00	BeefEaters Chicken Fillets Natural Dog Treats - 3 lb.	I got a 3-pound bag of BeefEaters Chicken Fillets from BJ's Wholesale Club. My dog ate either one or two (if two, they were spaced apart by a day) and he got diarrhea with blood in it. It was so bad that I took him to the vet and he had to get on an antibiotic and a bland diet for a few days. It was extremely difficult while he was sick. I know it was the chicken tenders. I threw them away.	6	Years	Retriever - Labrador	Dog	60	Pound
<a href="#">EON-77213</a>	11/19/2011 14:15	Waggin Train All Natural Chicken Jerky dog treats	Our (b) (6) had been eating the Waggin Train brand of these (purchased at Costco/PetSmart) when she got sick 6 weeks ago. The first day or two it was lethargy and "scooting" with loose stool, and she was having a hard time expelling fecal matter. I took her to have her anal glands cleared (she is a chihuahua/ dachshund mix and has this common problem, which we take care of every six months or so). Things got a LOT worse, very fast- she had all the symptoms they name off in this article ( <a href="http://www.lifewithdogs.tv/2011/11/fda-continues-to-caution-dog-owners-about-chicken-jerky-products/">http://www.lifewithdogs.tv/2011/11/fda-continues-to-caution-dog-owners-about-chicken-jerky-products/</a> ) Which is what prompted me to write this report. She ended up VERY sick- in the ER vet overnight, after losing a lot of blood in her stool. At the time we (and the vets) could not determine what had made her so very sick. They diagnosed it as Gastroenteritis, and gave her fluids, tummy soothers, and did a deworming treatment as a precautionary, as well as a run of Probiotics. It took her a good 10-12 days to be back to 100% Glad we threw the rest of the bag away. (We threw away the bag of food she was working on too, just to be safe.)	4	Years	Crossbred Canine/dog	Dog	9	Pound
<a href="#">EON-77210</a>	11/18/2011 21:00	Waggin' Train Jerky Tenders Chicken Dog Treats Chicken	Dog was given Waggin Train chicken jerky treats purchased at Costco. She vomited about 10 times in one day. We reduced her diet to one thing at a time to narrow down the problem. We ARE NOT SURE the jerky caused the problem. However we saw the cautionary FDA statement today and so are reporting it. If you would like the treats I still have them and can mail them to your laboratory.	7	Years	Japanese Chin (Spaniel)	Dog	13	Pound
<a href="#">EON-77209</a>	11/18/2011 19:45	Trader Joe's Chicken Stix	Walked dog on Thursday November 3rd morning...no problems. Fed treats along the way. Ate normal breakfast. Ate normal dinner at 6:00pm. Started moaning about 8:30 pm. Threw up Friday November 4th morning--all of his dinner from night before. Did not eat breakfast and started drinking lots of water and urinating frequently. No eating from this point forward but still drinking water often. Died on (b) (6) morning November (b) (6) at 9:30 am.	15	Years	Terrier - Fox Wire	Dog	22	Pound

<a href="#">EON-77106</a>	11/17/2011 18:15	Purina Pro Plan Shredded Chicken and Rice Formula Adult	Eight hours after being fed from a new bag of ProPlan Shredded chicken and rice for adult dogs she began to vomit. This continued for about two hours and i could tell she was in distress so I took her to the emergency vet. My two other dogs also vomited but not to the same degree.	13	Years	Spaniel - Springer English	Dog	41	Pound
<a href="#">EON-77076</a>	11/17/2011 12:45	Simply Nourish Cat food Chicken and Salmon Stew	I think there is a defect with the packaging used for the Simply Nourish Cat Food cans (3 oz), specifically the tab and lid of the can. On two separate occasions, approximately 10 days apart, when opening a can of the cat food, the pull tab snapped in half as I pulled it back, and pressed with my thumb. Because it snapped in half my thumb pressed onto the broken edge and suffered a cut. Shortly after the first cut healed, the exact same thing occurred - again painfully cutting my thumb. I have opened hundreds, if not more, cat food cans in my life and I have never encountered the breakage of a pull tab like this. (I have had a tab break off completely on cat food or another type of can but not break in half). I was concerned that there is a weakness in the metal of these tabs used on the cans, causing them to break with only the normal pressure required to open the can, causing the threat of injury to pet owners. This is a quality product that my pet enjoys and I want to be sure it is safe for owner and pet alike. The second injury occurred with the Chicken and Salmon Stew variety. I saved the can with the broken tab. I did not save the first can and I do not remember the variety of food (there are 6 varieties in cans). My blood from the cut got into the food so I threw it away, and at that time thought it was a fluke occurrence.						
<a href="#">EON-77044</a>	11/16/2011 18:45	Canyon Creek Ranch Chicken Stix	About 24 hrs. after eating the Canyon Creek Ranch Chicken Stix, both dogs had diarrhea and blood in their stools.	2	Years	Cattle Dog - Australian (blue heeler, red heeler, Queensland cattledog)	Dog	42	Pound

<a href="#">EON-76937</a>	11/14/2011 20:45	Ol' Roy Kibbles Chunks & Chews	Owner purchased a new bag of Ol' Roy Kibbles, Chunks & Chews and fed it to all her dogs approximately 9 pm. (b) (6) sleeps in her room, and in the middle of the night he jumped down and began vomiting and gagging with some mucoid stool. In the morning approximately 6:30 am he lying beside her bed cold and unresponsive. She brought him in to my veterinary clinic where he was found to be hypothermic, severely dehydrated, and having seizures. His ALT was nearly 1000. A few hours later she brought in her 2 pomeranian puppies who both had high normal temperatures, were vomiting and had loose stools. One puppy, (b) (6), had an ALT over the limits of the machine (>2000). The other had a milder increase of ALT. All were treated symptomatically. The puppies were given a parvo test which was negative. (b) (6) died later in the day. (b) (6) and the other puppy (b) (6) were dead the next morning.	3	Years	Dachshund - Miniature	Dog	9	Pound

<a href="#">EON-76931</a>	11/14/2011 16:45	Dingo Dynostix Meat in the Middle	<p>I have already contacted Dingo Dog Treats Company about my situation. Saturday afternoon, I had given my Pomeranian Puppy a Dingo Dynostix treat. I was in the room with him the whole time so he was supervised. He didn't eat the whole treat, and only ate the red part of the treat. A few hours later, he began puking, and there was red from the treat in the vomit. Between 7 and 8 p.m. he had vomited 5 times. I text a lady that works at my local vet and she told me to give him ice chips and see how he was in the morning. The next morning, he was no better, worse actually. He was dehydrated, couldnt stand on his own and just laid down. I text the lady from the vet again, she told me to take him to (b) (6).</p> <p>When we got him there, they asked if he had anything different and I specifically mentioned the Dingo treat. He was supervised, and when he wasn't in his kennel, he was with me. They gave him IVs because he was dehydrated and his glucose level was really low. They did a Parvo test to rule that out and he was negative for that and they did more bloodwork, which I sent a copy of to Dingo. A few hours later the E-vet called and stated that his kidney and pancreas levels had dropped along with his white blood cell count, and that he had gone in to cardiac arrest. They were able to revive him but he had suffered brain damage from his heart stopping. He began vomiting blood and was crying out, which they said was from the brain damage. The vet stated that she believe he was septic and that toxins had entered the bloodstream and that his rate of survival was less than 50%. We made the decision to end his suffering, and it was the most difficult decision I have ever had to make. My baby was fine Saturday morning, up until he had ate the Dingo treat. And now he is gone. All information has been sent to the Dingo Company including the patient chart, bloodwork, and vet bills. If there is anything else that needs to be done, please let me know. I was referred to this website by a woman that had the same exact thing happen to her with this same brand, only her pet died from the Denta-stix. I had actually given some of those to my Lab, and he had diarrhea every time he ate those as well. If there is anything else I need to do, please let me know. I don't want any other pet parents go through what I just went through.</p> <p>Thank you, (b) (6)</p>	8	Weeks	Other Canine/dog	Dog	1	Pound
<a href="#">EON-76905</a>	11/14/2011 11:45	Nature's Variety Instinct Chicken Meal Formula for Cats	Received product from Petco.com via FedEx on Saturday 11/12/11. Opened bag, but did not inspect. Fed 3 cats approx 1 cup total (early evening). All 3 cats began vomiting within 1-2 hours after consumption, and continued on and off for 1-3 hours. All cats had empty stomachs before feeding this product - ran out of food the day before (11/11/11). All cats appear to have recovered completely.		Years	Domestic (unspecified)	Cat		
<a href="#">EON-76885</a>	11/14/2011 3:00	SAMs club dog food	(b) (6) (Lab) presented vomiting, bloody diarrhea, lethargy and dehydration. Taken to ER had fluid for 3 days eating only chicken and rice, got better. Soon after going back on regular dog food began to have bloody vomit. Started giving different dog food and got better. (b) (6) (Dachshund) eats puppy food and no problem. On the day after she ate some of (b) (6) food (b) (6) vomits that is when I make the assumption that it was the new bag of dog food.	4	Years	Retriever - Labrador	Dog	86	Pound

<a href="#">EON-76407</a>	11/5/2011 17:00	Colorado Naturals Pizzles	Dog ate pizzle and had severe diarrhea. She defecated in her crate overnight because she was unable to hold it and continued to have liquid diarrhea throughout the day. She was fed a bland diet for the day and then she recovered the following day. I suspected the pizzle, so after a few days I tried to give another one and it resulted in the same case. Uncontrolable liquid stools severals times throughout the day.	7	Months	Shepherd Dog - German	Dog	80	Pound
<a href="#">EON-76406</a>	11/5/2011 3:00	Waggin Train Chicken Jerky	Hopefully this is the right place to submit this. (b) (6)  I've since then had many comments of people who are suspicious of Waggin Train chicken Jerky making their dogs sick. I understand that a good number of these complaints may be simply conjecture, but there are enough of them to warrant contacting you. You can read the comments of worried pet owners here: (b) (6)  I have instructed these pet owners to have their veterinarians report the cases to the FDA.			Beagle	Dog		
<a href="#">EON-76372</a>	11/4/2011 15:45	purina beneful healthy fiesta	Have 3 dogs (b) (6) is husky is vomiting, (b) (6) is a mix of sorts but also vomiting, and (b) (6) has loose stools.	10		Unknown	Dog	50	
<a href="#">EON-76336</a>	11/4/2011 13:00	Eukanuba	Eukanuba Canned Caat Food in the 3 oz size has printing on the label which is so small the consumer, being me, cannot read it in order to determine the ingredients and whether the product contains ingredients I do want my cat to be eating, such as "meat by-products," "wheat gluten, pork plasma, or other ingredients not necessary for animal nutrition.  Being able to read the label is fundamental to adequately and accurately communiating required content to the consumer. Proctor & Gamble's other brand of cat food, Iams, has labeling which is readable, even on the same size can, so I see no reason why Eukanuba cannot comply with this.						
<a href="#">EON-76274</a>	11/3/2011 19:45	Black Gold Premium Dog Food Super Blend	I noticed problems with my dogs health after feeding them Black Gold super blend dog food in August; they had diarrhea, blood in their stool, hair loss, and less energetic. At first I was uncertain to what caused their health to degrade until 10/31/2011 after opening a bag of dog food and finding mold. I contacted the store where the dog food was purchased and the Manager confirmed that other dog owners had reported similiar symptoms with their pets after feeding them Black Gold super blend. I spoke with (b) (6) the store Manager at (b) (6) and she confirmed that they had shipped unused product back to the manufacturer. I consulted with other breeders and the symptoms were consistent with five other breeders who have feed their dogs Black Gold super blend dog food. I contacted the food manufacturer and they claimed that this was an isolated event and they would not further investigate or notify stores that carry this particular brand of dog food of the potential harm to their pets.	2	Years	Mastiff	Dog	125	Pound

<a href="#">EON-76243</a>	11/3/2011 3:45	Hills Science Diet Adult Cat Food	<p>First of all, I wasn't sure how else to submit my query or concern aside from this portal, so if it is not the proper venue, my apologies.</p> <p>I have been a small animal veterinarian for 18 years, and seen innumerable senior cats develop hyperthyroidism. Even in the dark ages when I was in veterinary school, there was speculation that high iodine levels in cat food could cause or at minimum precipitate this condition. However, until Hill's Prescription Diet y/d was released recently, no pet food company either researched or admitted to high iodine levels being problematic in creating hyperthyroidism in cats. Since y/d has good data that it resolves the signs and symptoms (including heart enlargement) within 4 weeks of a cat consuming this diet, it seems logical that hyperthyroidism in cats is most often a nutritional disease (as was taurine deficiency cardiomyopathy), and that it should be addressed across the FULL SPECTRUM of pet foods, not just as a prescription diet that theoretically every adult cat in the U.S., perhaps the world, should be consuming.</p> <p>I would like to know what the FDA's veterinary division plans to do about normalizing iodine levels in commercial pet foods so that all cats receive the benefits of y/d, rather than undergoing surgery, radiation therapy, or medical therapy--none of which cure the disease except surgical excision of the thyroid gland. Frankly, I am angry that it took this long for anyone in the industry to figure out how to prevent hyperthyroidism in cats when it was being openly discussed 20 years ago when I was a student.</p> <p>At this point, I demand that the FDA conduct its own clinical studies to determine the optimal levels of iodine for kittens and for adult cats, and require manufacturers to adhere to those levels, just as they now must do for taurine. Different organ, same problem--DIET. I've had to euthanize too many cats who were difficult to treat (for the owners), or who could not afford the cost of managing it for the rest of a cat's life, including one of my personal pets.</p> <p>I would really appreciate a direct reply to my concern that I can share with my colleagues. Thank you.</p> <p>(b) (6)</p>						
<a href="#">EON-76242</a>	11/2/2011 23:00	Purina Friskies Chicken & Tuna Dinner classic pate	<p>Friskies Chicken &amp; Tuna Dinner classic pate found small pieces of metal in two cans of the canned food.</p> <p>Had bought a case - kitten had been getting sick. <a href="#">EON-75288</a>	10/24/2011 18:45	Greenies	(b) (6) ate a Greenie, then over the course of the afternoon, became lethargic and ill. He became progressively more ill overnight, so I took him to his veterinarian in the morning, where blood work (normal), temperature (normal) and x-rays (visible obstruction and air pocket after it in colon) were performed. We were advised to attempt to get him to pass the Greenie for the rest of the day before resorting to surgery the following morning. We fed him pureed pumpkin and saltine crackers on the vet's advice to attempt to push the object - the Greenie - through the colon. He became sicker over the course of the night, but then passed the Greenie out of his bowel early that morning. We took him back to the vet about an hour later, and the vet determined that the danger was past and that the entire Greenie was out of his colon.	1	Years	Pug	Dog	16	Pound
<a href="#">EON-75232</a>	10/24/2011 12:15	Royal Canin Veterinary Diet Rabbit Food Limited Ingredients	After feeding cat(s) a can Royal Canin rabbit food, they began vomiting within 10 minutes after ingesting. For the course of 7 days, they could not consume food and were vomiting with diarrhea. After a trip to the vet, it was determined that the cause was bacterial, and through process of elimination the vet instructed me to contact the manufacturer and report the incident. (brief history...1 cat had a skin allergy 6 years ago and was placed on a prescription restricted diet to eliminate any foods that might be triggering the skin reaction. From that point on, the cat with allergies and the cat without allergies were on the restricted diet. Both cats are 100% indoor, have no access to any other animals, and only eat Royal Canin rabbit and green pea food...so, the bacterial infection could have been contracted from the food source.)	8	Years	Domestic Longhair	Cat	7	Pound
<a href="#">EON-75195</a>	10/24/2011 10:45	Canyon Creek Ranch Brand Wholesome Chicken Breast Tenders Snack	I purchased a new bag of Canyon Creek Ranch chicken breast tenders October 14th. On October 18 or so, I fed my dog a few treats from the new bag and she developed diarrhea the same day. I noticed the treats appeared different (smaller pieces, darker, different shape) than previous bags. Her diarrhea continued for 4-5 days, sometimes with blood, but otherwise she was behaving normally and had an appetite. I did not give her any more of those treats during that time as I figured they are hard to digest. Yesterday (October 23), after her diarrhea had resolved, I fed her a few pieces of jerky and her diarrhea returned, this time more severe and frequent (approximately every hour or two for the past 12 hours). She also appears lethargic and I will take her to the vet today. I believe the jerky treats are causing her symptoms.	12	Years	Collie (unspecified)	Dog	45	Pound

(brief history...1 cat had a skin allergy 6 years ago and was placed on a prescription restricted diet to eliminate any foods that might be triggering the skin reaction. From that point on, the cat with allergies and the cat without allergies were on the restricted diet. Both cats are 100% indoor, have no access to any other animals, and only eat Royal Canin rabbit and green pea food...so, the bacterial infection could have been contracted from the food source.)	8	Years	Domestic Longhair	Cat	15	Pound
<a href="#">EON-74983</a>	10/21/2011 5:15	Purina Smartblend ONE Lamb and Rice	<p>I have always fed my dogs Pruina Smart Blend ONE lamb and rice without any problems. Since I started feeding Purina Smart Blend ONE Lamb and Rice purchased at Kroger to (b) (6) and (b) (6), my two bulldogs, they have both experienced the following: red puffy eyes, wimpering and gas after feeding, bloating, ear redness and discharge, heavy breathing, sound of water in lungs. (b) (6) was particularly sensitive because he eats twice as much as (b) (6) (he's 2x (b) (6) size) He was developing a lump near his anus. Yesterday when he woke up his rear end was extremely red and rashy with blood. Not blood in his stool, just on his skin around his anus. This all started with a new bag of food purchased from Kroger. He had a grand mal seizure which almost left him dead in my arms. I have spent 500plus dollars at the vet since. Kroger almost killed my dog, I saved the bag for testing.</p> <p>The good news is, yesterday, I stopped feeding them the poison pro plan and went to chicken livers and whole wheat bread. All conditions immediately stopped. Now I am praying that they will both be o.k. (b) (6) is resting now for the the first time in weeks.</p>	7	Years	Bulldog	Dog	80	Pound

<a href="#">EON-74972</a>	10/20/2011 19:15	Milo's Kitchen home-style dog treats	<p>(b) (6) was transferred to (b) (6) on Wednesday morning for weight loss, anorexia, and fever. She is a middle-aged dog who was adopted 2-3 years ago. She lives in a protected environment, is part of a multi-dog household. She has no previous known medical issues, seeing her referring veterinarian for routine visits in the last 3 years. (b) (6) was spayed prior to adoption and has not had any surgical procedures in recent years, though she did have a dentistry done. (b) (6) normally eats a lamb and rice diet and a variety of treats. Recent treats do include some chicken jerky treats (manufactured in China).</p> <p>(b) (6) has been evaluated several times in the last week for lethargy, decreased appetite, weight loss, and a single vomiting episode (9/5). (b) (6) has had xrays and abdominal ultrasound (both reported as normal), routine lab work and urine tests (9/10 and 9/12). Abnormalities on lab work include an elevation in one of her liver enzymes (mild to moderate increase in ALP), significant electrolyte changes (low phosphorous, potassium, sodium), and dilute urine with glucosuria (but normal blood glucose). (b) (6) has been treated with antibiotics (first amoxicillin and flagyl, then doxycycline). (b) (6) was febrile earlier this week, so antibiotics were changed to zeniquin on 9/12. (b) (6) also had a 4DX test and a cPL test this week, results were all negative. Yesterday, (b) (6) was admitted to (b) (6) because of her fever and anemia (hematocrit down to 30%, some autoagglutination present). (b) (6) was admitted to (b) (6) on Tuesday night and was started on IV fluids with potassium and phosphorous supplementation. Her fever improved overnight, and she had an unremarkable evening.</p> <p>(b) (6) was transferred to (b) (6) on Wednesday for evaluation of electrolyte changes and profound lethargy.</p> <p>(b) (6) called you on Wednesday to discuss (b) (6) history, the lab work changes, and the concern for a condition called Fanconi's syndrome (which would tie together many of (b) (6) symptoms along with the electrolyte changes and the glucose in the</p>	6	Years	Shih Tzu	Dog	12	Pound

Key	Created	Product Name	Description	Age	Age UOM	Breed	Species	Weight	Weight UOM
			<p>urine).</p> <p>(b) (6) had a screening test (urine) submitted on Wednesday for this type of kidney disease. However, confirmation of the suspicion for Fanconi syndrome via this test will take several weeks to return. In the meantime we will need to treat (b) (6) with fluids and hopefully stabilize the electrolytes. We discussed that Fanconi syndrome (which is a problem with a region of the kidneys called the tubules) can be caused by toxins, infectious diseases, genetic abnormalities, or other underlying triggers (cancer, certain drug reactions, hypoparathyroidism, kidney disease).</p> <p>There is a tremendous concern in (b) (6) situation that she has been recently fed some chicken jerky treats from China. This could be the underlying trigger for Fanconi, as this has been investigated in other dogs in recent years. We will certainly report her case top the FDA when the Fanconi's test returns.. We also submitted leptospirosis titers and will continue treating (b) (6) with antibiotics in case this is due to an underlying infectious disease.</p> <p>Unfortunately, the prognosis for (b) (6) may be guarded. Dogs with Fanconi syndrome can progress to kidney failure in the short or long-term. We hope that (b) (6) will have a good response to treatment and there is a possibility she could recover, but I am worried because her electrolyte abnormalities are significant. The good news is that her kidney function is not severely impacted at this time and the hope is that if the underlying trigger is removed then she may recover. There is a protocol for treating dogs with Fanconi (Gonto protocol) that will be initiated in coming days and that will continue for some time. The goal in the hospital is to treat her immediate electrolyte imbalances and to diurese or flush her with fluids.</p> <p>Another problem that has been identified in Lilo in recent days is anemia. (b) (6)</p>

<a href="#">EON-74966</a>	10/20/2011 17:45	Iams Indoor Weight & Hairball Care 1+ years ProActive Health	<p>Approximately 7 years ago, we started feeding our 2 cats, Iams Cat Food. We were told that for a good long life, it was best to feed such a food as Iams ProActive Health Cat food as Iams has. In the last year or two, Iams cat food was hard to get and we had to change from one of their types to the 1+ years formula instead of the older 7+ years type. Neither of our cats was very fond of Iams food but because Iams always said it was so good for them, we continued with the 1+ years formula.</p> <p>In July 2011 we noticed that (b) (6) was losing a little weight but that was good according to Iams Customer Service.</p> <p>(b) (6) was seriously losing weight and did not look like herself beginning of August 2011. I took (b) (6) into (b) (6), a vet, on August 4, 2011. She did an exam and xray on (b) (6) and told me that she had fluid around her lungs.</p> <p>She stated to me and also to my wife by phone that her heart was strong but that if she removed the fluid from her lungs she would suffer from that and it would probably come back in several days. (b) (6) was having trouble breathing and the Vet advised us to put her down. Afterwards I contacted P&amp;G Iams and told them of our suspicions that the Iams food had a role in her condition when we had to put her down. I contacted them by phone and by letter. About 9/6/2010, a (b) (6) from P&amp;G Iams contacted me and asked for the Vet's name and number. I gave her such information. I also sent a sample from one of the sacks of Iams ProActive Health cat food that we had purchased. It was sent to them around the same date. About 9/12/2011 the same (b) (6) from P&amp;G Iams called me back and said she had gotten in contact with the vet, (b) (6) and the vet said the fluid was inside her lungs and that she had a bad heart. Also we were told the sample proved perfectly fine.</p> <p>What (b) (6) told me was not what we were told by (b) (6), in fact it was opposite what we were told. Later in another conversation, (b) (6) from P&amp;G Iams told me she had gotten all of (b) (6) records including the Xray and exam from (b) (6).</p> <p>We never gave authorization to anyone at P&amp;G Iams to be sent that material. In fact, it seems that P&amp;G Iams is very concerned that there is a problem and may be positioning themselves to be free of this problem.</p> <p>We received nothing in writing from P&amp;G Iams have they followed through in their communicating with us on (b) (6) death.</p> <p>We now have changed the food we had been giving our other cat and she has started looking better and acting much better too.</p> <p>It no longer is Iams brand of cat food.</p> <p>We seriously believe the IAMS food we were sold was somehow responsible in (b) (6) suffering and the loss of our pet cat.</p>	15	Years	Mixed (Cat)	Cat	12

<a href="#">EON-74924</a>	10/20/2011 13:00	Dingo Outback Bites	We purchased a bag of Dingo Outback dog treats on clearance 10/13/2011 at our local Target store. They were marked \$1.47 a bag and flavored Beef n' Bacon. We gave our TWO Golden Retrievers these treats starting on 10/15/2011. I heard one of them vomiting in the hallway but didn't think too much of it. We gave our girls the same treats on Sunday (10/16/2011) and one got sick... same thing on Monday (10/17/2011) after giving them the treats. They stopped eating for two days (Sun and Mon) and then both started throwing up by Tuesday (10/18/2011) night after giving them treats when we got home from work. Wednesday (10/19/2011) we had to rush them to the vet. Please note, we did not think that the treats could be a factor until Wednesday afternoon. (b) (6), the first one to get sick, had to be rushed first because her face and throat swelled severely in addition to severe vomiting. She is the one that had been throwing up since Saturday. (b) (6) had tests done and a liter of fluids pumped into her. Then (b) (6), the second one, became severely sick ALL day Wednesday & my husband had giving them each treats in the morning. (b) (6) had to be rushed to the vet Wednesday afternoon. They both had fluids pumped into them and bloodwork done. They're now testing their stools and (b) (6) has been admitted today (Thursday, 10/20/2011) to the vet for observation. She can barely walk. (b) (6) is still swelling up on Thursday as well.	18	Months	Retriever - Golden	Dog	62	Pound
<a href="#">EON-74705</a>	10/18/2011 17:45	Purina Chef Michael's canine creations Filet Mignon Flavor and potato and green bean garnishes	We received Chef Michaels's Dog food from a relative. We mixed about 1 cup of it with a bowl of our dogs regular food. He ate about 1 cup of food in the early afternoon. When we got home in the evening he had a loose bowl movement in the house. He never does this in the house. After that I had to take him out evey hour all night because he kept crying to go out. He has had liguid bowl movements sometimes with blood for 2 days now. We have been giving him Imodium and feeding him white rice to try to stop the diarrhea. Nothing seems to be working. We are also trying to give him fluids/electrolytes. He doesn't want to eat or drink.	6	Years	American Pit Bull Terrier	Dog	50	Pound
<a href="#">EON-74600</a>	10/17/2011 12:45	Purina Friskies Indoor Delights cat food	First cat was an indoor/outdoor cat. He was laying next to his water bowl and I knew something was wrong. He was usually very lively and active. My daughter and I took him to the vet but there was nothing that could be done. The doctor stated that he might have gotten into something and asked if we had rat poison around. Of course we don't, He died on the way home. Within a week 6 more indoor cats died. Searching for the cause I looked on the internet and saw that other Friskies products were recalled due to Salmanella contamination. When I researched the symptoms, my cats displayed the same, vomiting, diarrhea (one bloody), lethargic and then they died. All of the cats that died were healthy one minute and dead the next. I also noticed my other cats were not eating like they normally did. I stopped feeding them the Friskies cat food immediatly and changed what I fed my cats. The cats have started eating again normally and I have not lost another one since.			Unknown	Cat

<a href="#">EON-74500</a>	10/13/2011 12:00	Fancy Feast Ocean Whitefish and Tuna in Gravy/Grilled	On the morning of Sep 24, 2011 I opened a new case of Fancy Feast that I had just purchased at PetSmart in (b) (6). I have 2 cats, one is picky, the other eats anything and everything available, so I cater to the picky one, but give them both the same food. I mix the Fancy Feast with Purina's Dry Hairball formula because the picky eater tends to get hairballs too easily. Anyway, I put down the normal AM mixture, and watched as both cats sniffed around the food, then sat down and refused it. Since I had gone to bed early and gotten up late, I knew they were really hungry. I took up the food and threw away the portion that I had mixed, but I froze the fraction of a can that was left. I also have 47 unopened cans from the same batch as the one they refused. The same day, I contacted the PetSmart store where I had purchased the food (no satisfactory concern) and the next day 9/25/2011 I contacted Purina. Purina Customer Service sent me coupons in the mail and said they had passed on the information to the appropriate people, but I have not yet heard anything from them. I'm concerned that other cases of this food are out there that need to be investigated.						
<a href="#">EON-74294</a>	10/9/2011 13:15	California Natural Pure & Simple Chicken Meal & Rice Formula	Dogs were fed California Natural Chicken Meal & Rice Formula for approximately one week. On October 6, 2011 (b) (6) awoke during the night with gas and diarrhea and vomiting which continues to date (October 8). (b) (6) began exhibiting same symptoms the night of October 7, and (b) (6) followed on October 8. <a href="#">EON-73892</a>	10/3/2011 10:45	Victor premium dog food chicken rice and lamb	<p>The ingredient list does not reflect what is actually in the bag. The manufacturer told me that they had changed the formula several months ago. Some ingredients have been added, some removed, the order of ingredients has changed. Yet the manufacturer continues to package the product in the old bags with the wrong ingredients listed.</p> <p>This has been occurring for at least several months- may be throughout their product line.</p>						
<a href="#">EON-73772</a>	9/29/2011 20:45	Purina Pro Plan Adult Turkey and Cheddar Chese Entree Made with Real Turkey	Bought 2 24-pack Purina Pro Plan cat food cans (UPC 3810014396), in factory-sealed plastic around cardboard trays at PetCo on Military in San Antonio. Three were fed to my cats before I noticed that when I grabbed the next can it had a severe indent in the side of the can. I grabbed another can which also had a severe indent in the side of the can. I pulled all cans out of that tray and inspected them for dents. I found 15 of the 21 remaining from the first tray were very obviously dented (I did not count ones with minor dents on the bottom). The majority of dents look like someone took a small hammer to the side of the can, but there is no tearing of the labels. There are a few cans that are completely distorted - sort of sideways, but again no tearing of lables. I opened the second tray and found 2 obviously dented cans and other marginally dented cans (on the bottom). I reported to Nestle Purina.

<a href="#">EON-73763</a>	9/29/2011 13:00	VITAKITTY CHICKEN BREAST WITH FLAXSEED & VITAMINS	<p>I have used chicken breast jerky products by the "Dogswell" company since its inception about 10 years ago. "Catswell" was developed more recently (perhaps 5 years ago?) after the success of the Dogswell products-- white meat chicken jerky strips (as well as duck and beef I think, as I only use chicken) They also now manufacture canned food, dry food etc. which I do not use.</p> <p>As you might infer, I am very familiar with the chicken jerky products which contain only "chicken breast jerky with added nutrients" in both the cat and dog varieties. The only difference is that it is cut and sized differently to suit the species. Catswell jerky is very thin small strips an inch or two long (they vary) and perhaps .25" wide. Dogswell jerky is much larger, thicker rectangular strips about 1" x 4"</p> <p>My veterinarian advised it was perfectly fine to give the Catswell treats to my Chihuahua (current and prior), in order to reduce the amount of this treat he/she consumed at one time. My dog and cat love these products (as does every animal I've ever recommended it to) Historically, I have often bought the Dogswell Happy Hips Chicken as well as the Catswell Happy Hips Chicken, and have tried most of the other chicken varieties.</p> <p>This complaint is (hopefully) not about the small amount of nutritional supplements they add to the different varieties of their chicken jerky products, as I imagine they are destroyed in the heating process. (I have learned that the guaranteed analysis can occur during any time during the manufacturing process). Then again, I do not know the consequences of applying unusually high heat to Vitamin E, Flaxseed and Vitamin A acetate that are in the product "Catswell VitaKitty Chicken Breast."</p> <p>Being such a long time user, I am very familiar with what these products should look like, and have always trusted this company until now. The chicken is always a reddish color and as mentioned the only part of chicken used is the breast. Perhaps there is some slight variance in color in terms of "doneness," but nothinglcompares to the</p>	7	Years	Domestic Shorthair	Cat	12	Pound

Key	Created	Product Name	Description	Age	Age UOM	Breed	Species	Weight	Weight UOM
			<p>product I received.</p> <p>In my two recent Amazon orders (initial order and replacement) of "Catswell VitaKitty Chicken Breast," the product was very atypical. Most of the pieces were very dark, extremely unevenly colored and some pieces were wholly or in part pitch black. In each 2 oz bag (an order consists of 10 bags) there were a couple of "normal" tiny strips, but the vast majority were not. Additionally, much more of the contents was crumbled than usual.</p> <p>Because this product is manufactured in China, I became especially concerned considering the 2007 scandal. I called Amazon and the manufacturer. Amazon said they would have to send me a replacement order before any action could be taken, and they did. The second order (different lot #, expiration etc.) was worse than the first. The order was initially placed in early September.</p> <p>The customer relations person I spoke with at Dogswell was relatively casual about my report. She claimed it was like baking cookies-- some parts of the oven are hotter than others thus causing different levels of doneness. Yet this seems ludicrous as the pitch black pieces demonstrated very poor quality control and they were decidedly omnipresent.</p> <p>As this brand is sold in just about everywhere pet food is sold (Petco, PetSmart etc.) except large supermarkets ( and it may also be sold in some, just not in (b) (6) ) as an animal lover I felt it my duty to report this to you as many people are not as familiar with the product as I am and might not recognize the irregularity I noticed. Also, I am concerned as to the toxicity of the pitch black burned pieces.</p> <p>I discerned their Customer Relations person, "(b) (6)" was not very informed as she pronounced Melamine "Melanine." I initially offered to send a bag from each batch to her, but upon further consideration thought it more appropriate to contact you to ensure proper action/analysis is</p>

<a href="#">EON-73719</a>	9/27/2011 23:45	Hills Science Diet Small Bites	I have always used Science Dog Food. I bought a new bag on Friday, September 23, 2011. I came home that evening and gave this dog approximately a cup of food in her dish. The next morning I came downstairs and she had bloody diarrhea everywhere. She would not eat for a day and half. I gave her bland human food to help her stomach. She ate it and then threw it up. The bloody diarrhea continued up to today. She has been lethargic. She is normally a very gay and happy dog in beautiful condition. I walk her with her brother almost every day. For the last four days, they have not been outside. There is no other probable cause of this illness. Nothing else is new or has changed. They are predominantly house dogs. She is "somewhat" better but not out of the woods. (b) (6) reacted second to the food within hours of (b) (6). He is very lethargic, and although the bloody diarrhea has slowed some, he will not eat very much (human food). He is the most quiet I have seen him. (I tried to input their breed above, but your pull-down menu does not function properly.)	9	Years	Chinese Crested Dog ½ Powder Puff with veil coat	Dog	10	Pound
<a href="#">EON-73673</a>	9/27/2011 13:00	Waggin Train LLC Jerky Tenders - chicken dog treats	Owner fed a Waggin Train Jerky Tenders chicken treat on 9/12/11. Vomited 7 times over 12 hours after eating treat - initially vomited treat, subsequent vomiting episodes were phlegm and bile. Diarrhea with frank blood started 9/13/11 a.m. Anorexia 9/13/11.	3	Years	Dachshund - Miniature	Dog	11	Pound
<a href="#">EON-73586</a>	9/26/2011 19:45	100% Pure chicken Liver Pro-Treat for dogs	Evaluated 7/16/11 for acute lethargy which was not pursued at the time and resolved per medical record. Presented on emergency to (b) (6) on 8/18/11 for lethargy, PU/PD, vomiting a few days prior & soft stool. Diagnostics abnormalities: blood glucose 40, sodium 129, chloride 97, bicarbonate <10 (venous), anion gap 36. Urinalysis; specific gravity 1.024, pH 5.5, pH 2+, negative for urine glucose, 3+ ketone. Follow-up 8/20/11 (in-house bloodwork)- blood glucose 34, ALT 234, Na 143, K 2.8, Cl 107. Work up included bile acid stim (pre 4.6, post 11.1), baseline cortisol )17.2), serum insulin (<1.2 with BG 44).	3	Years	Terrier (unspecified)	Dog	1	Kilogram

<a href="#">EON-73310</a>	9/21/2011 21:15	Tromodol, Cortizone, Rimadyl	Dog was having pain and issues with back legs. Brought to vet and was prescribed Rimadyl (shot to start) and Tramadol. Vet thought it was IVDD. Dog got better after 1 day then progressively got worse, lack of appetite, losing control with hind quarters, depressed, gums and tounge were purple and red spotted. Talked to vet told the dog will have good and bad days. Vet tole me to start steriods - dog was off Rimadyl for 1 1/2 days then went on cortizone - started with shot then pills. Continued with Tramadol and Cortizone for 5 days then dog died after 3 weeks of treatment. Bleeding occured from mouth sores and from stomach. Also last day looked like her vagina was pushed out - watery blood came out.	13	Years	Mixed (Dog)	Dog	48	Pound
<a href="#">EON-73175</a>	9/19/2011 20:45	Royal Canin Urinary SO dog food- dry; vetrinary diet (RX)	<p>On September 7, I bought a 25 lb bag of Royal Canin Urinary SO dry dog food. It is a prescription diet that both of my schauzers are on to prevent bladder stones.</p> <p>On Sept 8 when I opened the bag of food, I noticed several dry clumps of dog food - they were hard clumps that look scorched/sort of burnt slightly. I threw them out and smelled and felt the rest of the food. All seemed ok. The kibble just looked browner/darker than usual.</p> <p>The dogs started eating the food around Sept 8-9. (b) (6) turned lethargic on sept 11 and threw up on Sept 12- he vomitted a few hours after eating and the food came up undigested- could see the kibble. My other dog, (b) (6), did not vomit at this time but was not finishing his meals. He would leave about half in his bowl- very very unusual for him.</p> <p>Sept 16- both dogs vomitted mid-afternoon (they eat in the morning) and their hind legs were shaking. (b) (6) was very lethargic and shaking the most.</p> <p>Sept 16 evening- we stopped serving the food and bought a new bag of food and disinfected their bowls and food container.</p> <p>After serving them rice for the evening of 9-16, we started serving them the new food on 9-17. They have not vomitted again and the shaking stopped also.</p> <p>Both dogs are in general good health. (b) (6) is not on any medicines at all. We strongly believe the Royal Canin food was contaminated with something. Our dogs rarely vomit or get sick.</p>	10	Years	Schnauzer - Miniature	Dog	28	Pound
<a href="#">EON-73171</a>	9/19/2011 14:15	Holistic Select Vitalize Senior Health Chicken and Rice Recipe and Holistic Select Radiant Adult Health Chicken and Rice Recipe	<p>On Saturday monring, I went to (b) (6) to purchase food for my dog. They are one of only three places in the area that sell Holistic Select - Senior Formula. When I checked the expiration date, I noticed that it was October 2010. Thinking that it was just a fluke, I went back to the shelf and every bag was outdated and not by just a month or two. Most were almost a year old. I then decided to get the adult formula rather than the senior formula. Again, all of the bags except two were expired. This was clearly not an issue of one bag mistakenly being left on the shelf. In my opinion, these folks are knowingly selling outdated product because they assume that because it's for a dog, people won't pay attention. I would never give my children expired food and I would never give it to my dog! Also, when I reported this to the staff, they did not seem bothered in the least. I don't know what the process is for correcting or monitoring this situation, but I hope that something can be done.</p>

<a href="#">EON-73146</a>	9/19/2011 11:00	Beefeaters Natural Cuisine Tarter Control Raw Hide Bones for Dogs.	My husband and I had given our 5yr old Shi Tzu, Beefeaters Raw hide. He had it for 10 min and was dead within 20 min. The raw hide had broken up into sharp Fragments and got lodged into his wind pipe. My concern, which I found out later was that the product was made in Colombia South America. I had a Necropsy report done and findings were that cause of death were clearly from the raw hide. There was no warning lable on the package or ingredients. It also did not have where it was made.						
<a href="#">EON-73136</a>	9/16/2011 23:45	Merrick Cowboy Cookout Sausage Treat for Canines	My name is (b) (6) and I purchased several of the Cowboy Cookout treats in the Pro Pets store in (b) (6). Their address is:  (b) (6)  These packages are sold in airsealed packaging, are not refrigerated, and the packaging does not indicate that they need to be. I have in my possession several packages with a "Best By" date in November 2011. They have extensive mold and other bacteria. E coli? Salmonella? Who knows. I have taken several pictures of the items, and still have them in my possession.						
<a href="#">EON-73133</a>	9/16/2011 21:45	RAWHIDE. 2007 Petrapport/Beefeaters. Natural Cuisine	(b) (6) was chewing on Rawhide Beefeaters treats and within 15 minutes, he choked to death in the arms of my husband. There was nothing we could do to dislodge this product and the autopsy results showed that the rawhide chew was lodged in his windpipe and broken pieces shattered internally. There was nothing we could've done to save Louie. He was being watched the whole time he was chewing on this and it just happened that fast. Normal rawhide takes days to soften and/or break off.	5	Years	Shih Tzu	Dog	7	Kilogram
<a href="#">EON-73062</a>	9/16/2011 3:15	Science Diet Light Dry Cat Food	The cat had been, for the past days, ingesting one half cup of a newly purchased 17.5 bag of "Science Diet Light Dry Cat Food" (Hills Nutrition). The cat is familiar with the food, having eaten it for 3 years.. The cat is in well health, had all inoculations, normal stool, urine, and bloods. She has a routine check-up biannually. The food, in question, was aliquoted and presented to her. She eat some of the pellets when I am present. (and more after). When I return, some hours later, she vomited. The vomitus is dull yellow viscous liquid, with undigested pellets. There was also partly digested food. Since opening this new bag, at every eating she vomited. She does not vomit given Science Diet Light wet cat food (purchased at a different store), or when given a competitor dry cat food. Restarting the Science Diet Light Cat food, from the contaminated bag restarts the vomiting.	7	Years	Domestic Longhair	Cat	10	Pound

<a href="#">EON-72947</a>	9/13/2011 9:45	Cesar Bistro Steak Florentine Flavor in Sauce	<p>My dog was acting completely normal and eating regularly. The vet suggested we mix a teaspoon of wet food with dry food for weight control. On Sunday, 9/11/11, my mother purchased Cesar Bistro Steak Florentine Flavor and that same night we mixed his kibble with a tsp of this. I woke up the next day at 5:50 am to 6 piles of puke. He threw up all of his dog food and threw up the rest of the day even after drinking water. We called the vet and they said to fast him for the day and make sure he gets water because it was probably that knew food. Twenty-four hours later he still seems sick and lathargic. He always sleeps with me and I found him laying in the floor in the corner and he would not get up. I gave him a tiny piece of treat to see if he would eat and he threw that up. The neighbor cooked him white rice with a small portion of extra lean beef and he slowly ate that. He wanted to go for a walk so I took him. He ate grass and peed normally. He has not puked from the food yet.</p> <p>An owner knows their dog. I know that sometimes dogs will vomit after eating new food, which he does. However, this was too extreme. There had to be something wrong with that dog food. I googled Cesar and there were some cases of food poisoning. They mentioned that this brand tends to throw in moldy substances. If this is the case they need to be punished! This is ridiculous that they are still allowed to sell products!</p>	4		Beagle	Dog	40	
<a href="#">EON-72946</a>	9/13/2011 3:00	iams original with chicken proactive health	my 1 1/2 yr old female fixed indoor himalayan cat has been on iams her whole life so far - i purchased her usual brand of iams original with chicken (orange bag) from walmart - i put it in her bowl and she always walks over and eats her food - she smelled it and walked away - i thought nothing of it until i realized that she wasn't barely eating - in a week she would normally eat 7 full bowls and she had eaten barely one bowl the whole week - she also is having loose stools and is not acting her usual self hiding and sleeping alot - she has a routine of playing with our new puppy a few times a day and she won't go near her now - she's obviously sick so i need to take her to the vet - i picked up a bag of fancy feast dry cat food tonight and will b trying that tomorrow morning - she has been eating her temptation cat treats so it's not that she is not hungry - theres something wrong with the iams food - a cat doesnt eat the same thing (and no people food ever) every day and then all of a sudden not want to go near it and appear sick for no reason the expiration date is 12/6/12 the UPC # is 19014 10504 the numbers next to the expiration are 061212 and the numbers under it are 12184177 13 US61591 its a 4 lb bag	1	Years	Himalayan	Cat

<a href="#">EON-72836</a>	9/10/2011 14:45	Milo's Kitchen Chicken Jerky Treats	A friend of my husband's had introduced our dog, (b) (6), to "all natural chicken jerky treats". When my husband described how much (b) (6) liked the treats, I noticed a coupon in the paper for such treats--Milo's Kitchen brand. In July, I purchased a trial size that the dog finished off within about a week's time. In August, I had another coupon for the same brand of treats, even though they were expensive, I thought he is such a good dog and likes them so much, we'll give them to him gradually as special treats. During this interval, I noted upon further reading of the Milo's Kitchen Chicken Jerky Treats label, that the product is made in China. At that point I had second thoughts about continuing to feed them to (b) (6); however, I rationalized that these were labeled as all natural, and the ingredints listed on the label did correlate with such a claim, so what could possibly be the harm. I did not point this information out to my husband, as the treats were expensive, and (b) (6) enjoyed eating them so much. After each of us had been giving them to (b) (6) over about a two week interval, (b) (6) experienced a grand mal seizure (Tues., Aug. 30, 2011). To the best of our knowledge, (b) (6) had never seized before. The seizure lasted about 4 minutes, and he has not had another since that time, nor has he had any more jerky treats since that event. (b) (6) was due for his annual physical and vaccinations that week, so on Tues., Sept. 6, 2011, he was taken for his annual check-up at (b) (6). We related this information to him. He examined (b) (6) and said he appeared in excellent health; however, he did give us an antibiotic for a possible tooth infection, and he instructed us to throw out the jerky product without giving anymore to (b) (6). I also informed the doctor of another individual at my place of work who's dog had seized the day after mine (unknown to me), who also had been fed the Milo's Kitchen product. I found it odd that each of us had recently found the same product via coupon/advertising and fed it to our dogs. I have since spoken with a woman at work whose dog is vomiting after eating this same brand.	4	Years	Coonhound - Bluetick	Dog	60	Pound
<a href="#">EON-72782</a>	9/9/2011 3:00	EverPet Cat Food  Chicken Flavor	I open a large blue bag of cat food with white cat on front , purchased at Dollar General and noticed it had mold in it  I then opened a second bag and it was totally engulfed inside the bag with mold						
<a href="#">EON-72781</a>	9/9/2011 3:00	Rachael Ray Nutrish	On Sunday September 4, 2011 I bought a small bag of Rachael Ray's Nutrish natural dog food. This was a new food for my dog that she had never had. On Tuesday September 6 my dog vomited once and was acting normal the rest of the day. Wednesday September 7 my dog had diarrhea numerous times in the house but was still behaving normally. On Thursday September 8, my dog woke up at 8 am vomiting in the bed and continued to vomit until she was taken to the vet at noon. She refused to eat or drink anything and was extremely lethargic. She needed to stay at the vet until 6pm that night for tests and medicine. There was nothing abnormal about her tests and all seemed normal. She was given one cup of the food every day and the symptoms began slowly after starting the food. After researching the dog food and other foods, I believe it is the ingredient, Menadione Sodium Bisulfite complex. It is a controversial ingredient that has been in cat and dog foods and caused illness.	2	Years	Pug	Dog	18	Pound

<a href="#">EON-72638</a>	9/6/2011 16:45	Weruva Paw Lickin' Chicken Canned Cat Food	I bought 4 box (24X5.5oz can) of the Weruva Paw Lickin' Chicken Canned Cat Food and one box of Weruva Variety Pack Canned Cat Food from petfooddirect on July 2011, order number 2259987, 2259990, 2262322. Recently I found many cans has yellow color instead of the normal white color. Yesterday morning when I opened one can for my cats, the stinking smell shocked me, and the color is totally RED! Can't believe even Weruva has rotten food with this expensive price! The bottom of the can says 'best by MAR 2014, NX1025/N3C1H'.						
<a href="#">EON-72606</a>	9/6/2011 3:00	Natural Balance Limited Ingredient Diets. Duck and Potato	<p>I apologize for the long report, but I am a 20 year retired Detective who knows the proof is often in the details.</p> <p>The horrible problem started on 7/14/2011 when we arrived in the (b) (6) area in our RV for a 6 day medical clinic for me. On 7/6/2011 I had bought a new supply of food from Petco. We have been feeding them the Duck and Potato Natural Balance for at least three years. We switched from the vets potato and duck, because if we ran out on a trip, we found it hard to find. The pups loved th NB and were eating two 5 lbs. a month. They also got about 2 tbls. of canned food in the morning and at night. They were given the dog treats for reward for special things. I had noticed at Petco several months back that the Duck and Potato was pretty much gone from the shelves. I asked an employee and he said it was very popular. They started having sales on the other flavors , so I started buying them the sweet potato and other meat combination. I also bought a variety of canned flavors. The treats were also a variety. They have always liked sweet potatoes so that was what I chose as a substitution for the duck. Now the Duck and Potato was back on the shelves, so I bought that on the 6th. The dry, canned and treats.</p> <p>We carried their dry food bowl from the house into the RV because it was 1/2 full and placed the unopened bag of new dry food in the latched cupboard for their food. I did have to open the dry treats before we left because they ran out. It was a different color, texture, and smell from previous treats. When I gave (b) (6) his earned 1/2 treat bone, He smelled it and turned away. I kept trying and a few times he ate it, but most often would take in in his mouth and put it on the floor. We thought it was because the new ones were very hard and it may have been harder to chew.</p> <p>We camped in an RV park with no one camped around us. We put out the pup fence at the door so they could be out side if they wanted to. (b) (6) could not go up or down the steps because of his short front legs and large chest. We had to help him in and out. They were never out unless we were right there with them. The grass was very clean and had just been mowed. There were no other dog feces around. No other dogs or</p>	14	Years	Shih Tzu	Dog	19	Pound

Key	Created	Product Name	Description	Age	Age UOM	Breed	Species	Weight	Weight UOM
			<p>people came around us.</p> <p>We always leave out the dry food bowl and water in the house so they can eat when they want. We change the water several times a day and refill the dry food. When the dry food from the house; which was not Duck and Potato, was mostly eaten, (b) (6), my husband opened the new bag and filled it to the top. Later he thought I was refilling it, as I thought he was every day.</p> <p>When I was there in the evening, (b) (6) would stand by the dishes and bark, they do that if the bowls are empty, but they were not, the food was full. He would go over to the fridge and look up to say he wanted food from there. This went on and on and my husband says it happened during the day. We scolded (b) (6) and said you have food. This makes me so sad.</p> <p>We feel so bad now knowing what he was trying to say. (b) (6) has never been a barker, so it was unusual. He was the best little boy and everyone always commented on that.</p> <p>When we got home late on 7/20/2011 we took the bowl in the house and it was 2/3 full. I did notice that (b) (6) was taking the food out and throwing it on the floor. I thought she was just playing and I rolled bites to her to eat. She would eat one or two and walk away. Both were eating their morning and afternoon wet food. (b) (6) mentioned he had not really seen them eating out of the bowl, but they can eat whenever they wanted. On Friday July 22 I noticed (b) (6) trying to have a bowel movement and he was straining. He usually had at least four very firm ones a day. He had a very good digestive system. We joked to say we wished we had his. I decided to wait a day or two to see what happended. We thought he was constipated. He started to shiver on Sunday. Monday morning I called the Vet and took hi</p>						
<a href="#">EON-72523</a>	9/2/2011 13:00	Purina One Wholesome Turkey and Barley Entree	<p>Last night Sept 1, 2011 I purchased Purina One canned Dog food with Turkey and Barley. I fed it to all four of my pets which are 2 rat terriers, a Yorkie, and a bull dog. This morning, all four are very sick with vomiting and diarrhea. I checked the expiration date on the can and it was good until 2013. I then looked and saw what appears to be tiny little lice sized black bugs. All of my dogs are lethargic and sick still as I am writing. I have a broken foot and it has not been easy taking care of them through this and seeing them suffer. My husband is taking them to the vet at 4pm when he gets home from work. I have contacted Purina and consumer affairs about this as well.</p>

<a href="#">EON-72372</a>	8/31/2011 8:15	CesarCanine Cuisine with Chicken & Liver	On Monday, 08/29/2011 at approx 0800 hrs, my wife opened up a can ( flat white square tray ) of Cesar 3.5 oz Dog Food ( chicken & liver ). Since we have a rather small dog, we remove the entire contents from the tray intact, place it on a paper plate, and then we always " dice " up the food inside, so she can eat it easier. Inside the dog food, we found a 1.5" long, thin Plastic hang tag strip of plastic , which was a very pale or light green in color - ( a " T " shaped , plastic or nylon piece, that usually is used to hold or attach paper hang tags onto products, such as clothes, stuffed animals, etc ) . I called the Toll Free phone number on the package, and had to leave a message for someone to call me back about this problem, and asked that it be a supervisor only. I did receive a call back from a man named (b) (6) who said that he was the Consumer Relations Supervisor, for the company, which I believe is Mars Packagaing Co., somewhere in Tennessee. I advised him what we found in the dog food, and he advised me to clean each piece off, and that he would mail me a return envelope, to send the items to him, so he can begin a investigation of this problem. I just want to make sure that this is followed up on, because we were lucky, because we actually cut our dogs food up into smaller bite sized pieces. But, someone who might have a bigger dog, may not do this, and the dog could have either choked to death on this plastic or nylon item, or caused some internal problems when swallowing the item, because it would have been like injesting a Fish Bone. I just don't want to see or hear of a dog suffering from another item like this, should another item like it be in any other can of this dog food.

<a href="#">EON-72145</a>	8/29/2011 8:15	Nutro Natural Choice Sensitive Stomach Chicken Meal Rice and Oatmeal	<p>I was feeding my dog Nutro Natural Choice Chicken, Rice and Oatmeal for Sensitive Stomachs. I had switched her to this brand around the first week of July 2011. I slowly incorporated her old food with the new over a 7 day period. I had never fed (b) (6) Nutro before. She went through two 5 pound bags of the dog food with no problems. I purchased a new 17.5 pound bag on 8/7/11 at a nearby Petsmart. I began feeding her from the new bag on 8/9/11.</p> <p>I came home from work at 2pm on Friday 8/12/11 to find out that my dog had thrown up 4 times that morning. I gave her about 1/2 cup of food because she had thrown up her breakfast. She threw that food up two hours later. She was also eating grass and drinking lots of water (b) (6) threw up two more times that day and became lethargic and eventually stopped drinking water. I took her to the vet at 8am the next day so she could be monitored until they had a chance to take a look at her and run some tests. (b) (6) needed fluids and electrolytes. Her liver and kidneys were tested and an xray was taken. Test were negative and the xray showed no problems. Was told to take (b) (6) home and feed her a bland diet of chicken and rice. (b) (6) seemed to be recovering that weekend and I called the vet on Monday 8/15/11 to tell her (b) (6) progress. Was told to start incorporating (b) (6) regular food back into her diet. I gave (b) (6) a total of 1 cup of the Nutro Natural Choice for Sensitive Stomachs on Tuesday 8/16/11. She chewed the food very, very slowly which is not normal for her. The next day on 8/17/11 (b) (6) had diarrhea very bad. That is the first time I suspected the Nutro. I called the vet and I was recommended to start feeding her a gastrointestinal prescription diet from the vets. (b) (6) had diarrhea for two days before it tapered off. On the second day it looked like it had blood in it although I did not report this to my vet. By 8/21/11 (b) (6) was completely back to normal and appeared healthy and energetic. I have not fed her anymore Nutro food since Tuesday 8/16/11.</p>	8	Years	Unknown	Dog	32	Pound
<a href="#">EON-72107</a>	8/27/2011 10:45	PUPPY COMPLETE Chicken & Lamb Protein Formula For Puppies NaturalLife Nutritional Pet Products	The animal was healthy and active with no problems prior to eating this puppy food. After eating this food according to the amounts suggested on the product label, within three days the animal became lethargic, stopped having bowel movements, spent most of his time laying around whining and crying and would no longer eat. His stomach also became swollen and hard. He spent all of his time sleeping or whining. When we could get him to walk, it was a very stiff legged gait with a lot of pain.	9	Weeks	Bolognese	Dog	2	Pound
<a href="#">EON-72082</a>	8/26/2011 15:00	Frosty Paw Peanut Butter Flavor with Vanilla Bean Coating	We gave (b) (6) Frosty Paws. They were peanut butter flavor with vanilla bean coating. We also gave her some water. A half an hour later she became nauseous and was uncomfortable. Within several hours she had died of canine bloat. I found out the form of these Froxy Paws (bite-size pieces) have only been out several months.	13		Retriever - Golden	Dog	65	
<a href="#">EON-71965</a>	8/25/2011 14:45	kaytee	Ivd owned my parakeet for 5 years and he was in great health and I took very good care of him...I purchased a new bird seed from walmart in (b) (6) and one week after feeding this to my bird he became ill and lethargic and died. I took the left over seed and put it in a feeder and found two birds dead under the feeder that looked healthy but appeared to have died suddenly. I still have seed left.	9	Years		Parakeet

<a href="#">EON-71610</a>	8/15/2011 19:00	Ol'Roy Dog Treats Multi-Flavored biscuits	I purchased Ol'Roy Dog Treats Multi-Flavored Biscuits from Walmart on 07/25/2011 at 17:46:01 PDT for the first time. Upon arriving home that evening I gave (b) (6) one of the biscuits. He got one biscuit daily for about two weeks and then I noticed he was losing interest in eating them anymore. He also showed little interest in his regular Pedigree dry food but still ate two tablespoons of Pedigree canned food that I offered to him each morning. On (b) (6) refused even the two tablespoons of Pedigree canned food but still drank water. By the next day, (b) (6) was acting lethargic and listless and would only take water sparingly. I immediately took Lucky to my veterinarian, (b) (6) DMV of the (b) (6). He did a blood spectrum analysis on (b) (6) and took x-rays of (b) (6) abdomen and thoracic areas. He also did an ultrasound examination of (b) (6) abdomen and found the liver to be compromised and swollen. (b) (6) white blood cell count was elevated indicating inflammation and/or infection. We then decided to put (b) (6) on a regimen of antibiotics with the hope that if it were an infection, we could beat it. I brought (b) (6) home and started him on his antibiotics/injectable and noticed he would not take food or water. I had to give him water orally with a syringe. In the early morning hours of (b) (6) spent a restless night and was so weak by morning that he couldn't lift his head. (b) (6) died at 10:35 PDT.	15	Years	Shepherd Dog - Australian	Dog	46	Pound
<a href="#">EON-71609</a>	8/15/2011 17:15	Chicken Breast Tenders	Patient became ill depressed poor appetite within a short time of introduction of new treat. Labwork showed elevated kidney levels with protein glucose and ketones in the urine. This may be a seasonal problem with this product; I had a client with 2 small dogs that developed identical probmels in August of 2010 eating the same treat purchased fromthe same retailer. The pet is better and eating with fluid therapy, the other dogs recovered after discontinuing the treats. Both clients fed these treats excessively.	6	Years	Terrier - Yorkshire	Dog	4	Pound

<a href="#">EON-71185</a>	8/8/2011 14:00	Purina 1Vibrant Maturity +7	Cat had been vomiting and showed behavior change. I wanted the senior food for him, but also noticed he was vomiting and purchased hairball formula to mix with it. I personally have been very ill throughout summer battling bronchitis, another chronic illness, and work exhaustion. I unfortunately did not access (b) (6) situation to be a food poisoning issue. He was inside outside pet and became more urgent in his need to go outside. He was vomiting outside as well as inside, but wanted out possibly due to need to vomit. I observed him numerous times but due to my own health just did not give this 100% full attention. I made sure he had plenty of water, food, I brushed him very often, since I thought it was hairball issue. Kept him in from heat. Front porch has signs of vomit and walkway as well. (b) (6) disappeared two weeks ago when he wanted out once again that evening around 10pm. I feel fast asleep from illness, and woke at 5am around my usual time and (b) (6) schedule. He was not on the front porch which I immediately knew something was wrong. I have not been able to locate him or his body at this time. Thursday before he went missing I took him to son's who has two cats and my cat generally enjoys playing and socializing, he turned his back to everyone and just sort of squatted.Did not explore, or look around which is unusual for him. When I picked him up to leave he was trembling. I later discovered he had thrown up in backcar as well as bm. I DO not HAVE THE bag of the cat food, because I pour it into a container. Generally I buy from PETCO but due to illness bought at a discount store across from my vet's office. The store is mom and pop and owner said she fed same food to her 15 year old cat and he also was vomiting and she stopped feeding it to her cat.This store has food goods and the food comes from many places.This bag had been previously opened and was not damaged when I purchased it.So I do not know the lot # on bag since I pour it into a container. Usually i keep bag so I'll know what to repurchase if he doesn't like. I don't know if my cat ate tainted food but my heart says he did. I would like to have his food tested for salmonella. Can you help? I have checked with Humane Society etc. for pickup of live or dead cat and they have not seen one like mine. I have advertised extensively, walked neighborhood, driven neighborhood,knocked on doors, stopped passerbys, bike riders, walkers, mail man, I sent out a find toto alert. No sign of my cat anywhere. He HAS NEVER gone missing and very bonded to me.I feel this food may have killed him and I need the actual food tested please.Reported to Purina, and store owner.He had been eating this probably beginning late May.He would lay onporch and not come in when I opened door even though it was very hot outside. I would have to carry him inside.He had vomited several areas insidehouse and outside.He was a member of our family. I thought I was giving him best food since marketed for older cat.	13	Years	Domestic (unspecified)	Cat	11	Pound

			<p>kept her head and neck in a position where she could get some air and realized her throat had swollen ..this was some kind of allergic or toxic reaction. She was now breathing on her own, but grimacing in pain. I rushed her to the vet who examined, did X rays and lab work.. the Lab work indicated possible toxicity. She vomited a total of 3 times..twice after getting to the veterinarian and once on Friday, indicating she is still not quite over this..she doesn't want me out of her sight since then. I am going to have to take her back to the veterinarian as soon as I can.</p> <p>If she hadn't been able to get to my feet and drop in my foot like that she would have died..if I hadn't been home..I would have never had a clue what happened. One thing I think is a VERY strong possibility is a toxic reaction to a rawhide bone from Wal-Mart she'd just been given an hour or so before this happened. I'd always bought the Exerhide rawhide sticks (and the package says made in China) this time I bought a package of the smaller knotted bones and the package said made in Brazil or Mexico. I did not send the rawhide in for toxicity testing..can't afford it now..but I did notify Wal Mart of the possibility since her symptoms were also those reported online from other instances of toxic substances sometimes/though rare that contaminate cattle hides in processing of rawhides. THEN I discovered from numerous reports from other pet owners that Wal Mart has been aware of this for months AND others claim they've reported it to the FDA . I should ask Wal Mart to pay the quite substantial vet bill that I can not easily afford, though I doubt they'd do it. The assistant manager (b) (6) at the Wal-Mart on (b) (6) where I purchased and got a refund on the hides yesterday..</p> <p>working when I complained said he was going to discuss it with his manager and see if they could pull all the Exerhides off their shelves. I still have most of the ONE rawhide out of the package that she chewed on. I returned with a strong caution not to give any of them to other dogs..the rest of the bag and a portion of the knot part she'd chewed on one..while I saved the rest of the rawhide in case I ever find</p>						
<a href="#">EON-70608</a>	7/25/2011 7:15	Artificially Chicken Flavored EXER-HIDES Rawhide Bone	My dog was given a large chicken flavored Exer-Hide knotted rawhide chew at approx 10:00PM. Within 10 hours the dog would not eat and was experiencing very runny diarrhea. The dog had only eaten one of the knotted ends. The chew was taken away from the dog and I contacted our veterenarian. This item was purchased from a local Wal-Mart.			Mixed (Dog)	Dog	90	Pound

<a href="#">EON-70510</a>	7/21/2011 18:45	Pedigree dog food	I live in [REDACTED], own two pound dogs and have recently noticed a marked difference between the recent US ads and [REDACTED] ads for Pedigree dog food. They are identical (besides the language), but here in [REDACTED], a chart is included comparing Pedigree to two other brands with a chart that favors Pedigree. Though I speak a little Spanish, I cannot figure out the claims stated in the ad. These ads are on billboards, print media, in stores and on telly. I would not have refered this to your agency, but my requests for more information from Pedigree have been ignored. Is there a separate agency here? <a href="#">EON-70431</a>	7/20/2011 15:00	Castor and Pollux Organix Adult Dry Dog Food	I have been using Castor and Pollux Organix Adult Dry Dog Food for approximately 2 years or longer and have been very satisfied. However, a few months back (submitted date is approximate) they changed their formula and packaging (lied about changing the formula until I told them my dog had been to the vet twice with bloody diarrhea for no apparent reason and is normally healthy and then they confessed to changes). After this change, I started noticing my dog clawing at her face and mouth and also noticed that there are very large, sharp objects imbedded in the food bits, as well as loose in the bag. The first thing I noticed was a large piece of a chicken feather skeleton (not sure what the proper term is) that was about half an inch long and extremely sharp. I called the company and complained and I sent the food back to them along with the piece of feather and they sent out 2 more bags of the OLD food. The next time I went to the store and bought a new bag I began checking it thoroughly and found that throughout the entire bag there were very large, white, sharp pieces of something that looks like bone or dried rice all through the kibble. I have taken photos of these pieces and sent them to the company via their facebook page after several attempts at calling the company were unsuccessful. I kept speaking to "Vivian" at Castor and Pollux and she continued to simply ask me to return my bags of food to them via UPS and they sent more out and they would check into the problem. However, after opening about 5 different bags of food and the problem was the same with EVERY bag, I finally posted this and the photos on their facebook page. They sent out more food then, their compliments, but they have NEVER followed up with me or actually tried to resolve this. They did say that they think it may be grain that is not ground up well, and that they will check into this and correct the problem, but it has not been fixed yet. In fact, I just bought another bag and can tell you that the problem is still the same and I have chunks of this food with sharp objects in it to show as proof. The company deleted my photos from their facebook wall and apparently will do the same to anyone who speaks out against the new food, as many have.  My main concern is that the sharp pieces are cutting my dog's mouth and I don't trust this at all. In addition, I have also seen some strange turquoise colored specks in the

<a href="#">EON-70419</a>	7/20/2011 9:45	Milo's Homestyle Dog Treats	Dog was seen for lethargy and anorexia on 7/8/11. She had vomited a few times and was licking at vulva. Bloodwork showed elevated BUN(39.6) and high normal Creatinine(1.4). Orbax and Cerenia was prescribed by the other vet. I saw the dog a week later because the owner reported polyuria with a decrease in drinking. Dog was still lethargic and didn't want to eat much. Repeat bloodwork showed normal BUN, Creatinine higher at 1.5 and low potassium(3.1). Urinalysis showed a very dilute urine with a USpG of 1.006, glucosuria >1000, proteinuria 30, with a quiet sediment. Blood Glucose was normal at 104. These findings were suggestive of Fanconi's Syndrome so I asked the owner if they have been giving Chicken Jerky Treats. Owner in fact had been giving Milo's Homestyle Dog Treats(chicken jerky) made in China. They have since stopped giving them and I have discontinued the Orbax. We have not rechecked the dog's labs yet, but owner reports an improvement in the dog's clinical signs.	5	Years	Chihuahua	Dog	7	Pound

<a href="#">EON-70383</a>	7/18/2011 7:15	Boots & Barkley Rawhide retriver rolls, Boots & Barkley Rawhide Retriever Roll	I have given my dog rawhides on a routine basis and understand the risks. It normally takes her a minimum of 16 hours and more like 28 hours to consume a large size rawhide. I gave her a large (10 inches long) "rawhide retriver roll" by Boots and bakley purchased at Target (product of China distributed by Target). Sometime between two and three hours later (around 10 PM) she had consumed the entire rawhide (except a tiny end pieceless than 1 inch long). (I want to emphasize that when I had given her other rawhides, no matter how determined or how hard she worked at it, she was incapable of consuming such a huge amount in 2-3 hours). At 4:30 AM, her vomiting woke me up. There were small piles of rawhide vomitus throughout throughout my apartment and bloody diarrhea everywhere. I took her to the emergency medical center. She was 7% dehydrated with low blood pressure. She was admitted to the ICU, required initial IV pushes of fluids and then IV fluids. She was discharged home 30 hours later. The initial x-ray showed a foreign body in her stomach consistent with her history of having consumed a rawhide. I called target and asked them to remove this product from their shelves. Two weeks later, to my dismay, the product is still there. Fortunately, I was in a position where I could have afforded the \$1500 hospital charge. Someone in a less fortunate position would have lost their dog.	2	Years	Pinscher - Miniature	Dog	11	Pound

<a href="#">EON-70281</a>	7/15/2011 12:15	Best Buddy Bites by Pet Inc, Dried Chicken Jerky Treats by Smokehouse www.smokehousepet.com	<p>6/13/11 (b) (6) is a middle aged dog with a relatively unremarkable health history. He was adopted from a breeder. He is in a protected enviroment. (b) (6) has never been a big eater. At the beginning of May he developed symptoms of lethargy and decreased appetite. He was evaluted on 5/25 for this problem. AT that time he was licking his lips a lot and not eating well. He had some string material removed from his incisors. He had routine lab work (chemistry, CBC, 4DX test) and the only remarkable change on that lab work was a slightly low white blood cellc outn. (b) (6) was treated with doxycyclien and pepcid. In the last two weeks, (b) (6) has been reevaluated several times. He has had xrays, abdominal ultrasound, fecal tests, recheck CBC, and urinalysis and urine culture. The only remarkable findnig is that his last urine had some glucose and bilirubin present.</p> <p>(b) (6) has been treated with SQ fluids and mirtazapine. He only eats a small amount when given the mirtazapine, and he will only eat if hand-fed.</p> <p>(b) (6) is very quiet at home and listelss. He is slightly constipated. No vomiting or regurgitating has been noticed.</p> <p>6/14/11 Diagnostic findings and information: (b) (6) cPL and resting cortisol results returned, values do not fit with either Addison's disease nor pancreatitis. However, (b) (6) urinalysis recheck was abnormal. He has a large amount of glucose and some protein in his urine. We discussed that the most common cause of glucose in the urine is diabetes. (b) (6) is scheduled to come in tomorrow to check a chemistry panel to evaluate his blood glucose and electrolytes and kidney values. A less common cause of glucose in the urine is a kidney disease called Fanconi's syndrome. We will screen for this disease also with a urine test if the blood glucose is normal.</p> <p>6/15/11Diagnostic findings and information: (b) (6) came in for a recheck today to evaluate his blood glucose. (b) (6) had an in-house blood glucose a serum chemistry panel and a blood gas done</p>	6	Years	Schnauzer - Miniature	Dog	13	Pound

Key	Created	Product Name	Description	Age	Age UOM	Breed	Species	Weight	Weight UOM
			<p>(b) (6) had an in-house blood glucose, a serum chemistry panel and a urinalysis done today. Those results showed only very mild changes. These include a low potassium level. Blood glucose and venous pH were normal.</p> <p>A urine sample was submitted to the (b) (6). They will be doing a screening test for Fanconi syndrome on the urine. This test can take up to a few weeks to return. In the interim, we will be sending (b) (6) home on a potassium supplement.</p> <p>Fanconi syndrome can be hereditary (reported in a few Schnauzers also), and also acquired (concerned about exposure to toxins, particularly with chicken jerky treats with possible Asian source of the protein). Therefore, all chicken jerky treats should be discontinued.</p> <p>One dilemma that I do not have an answer for is whether the possible Fanconi syndrome is responsible for the symptoms (decreased appetite, lethargy). Most cases that I have seen do not feel bad if they are not in kidney failure. Therefore, it is possible that (b) (6) still has a separate issue going on aside from his kidney problem.</p> <p>Because (b) (6) had protein in his urine also yesterday, I did ask the lab do a urine protein ratio on the urine also, as that can indicate disease in a different area of the kidneys (glomerular disease rather than tubular disease) and may help guide therapy decisions for him.</p> <p>-----</p> <p>Plans and/or communications: Finish doxycycline. Can continue mirtazapine</p> <p>Pepcid AC - 5mg once daily (generic famotidine is fine)</p> <p>Tumil K - give 1 teaspoon of the Renal K gel (equivalent to 4 mEq) twice daily. We also have tablets if that is easier to administer</p> <p>I will call you as soon as the results from the urine tests return.</p>						
			<p>6/17/11 Diagnostic findings and information:</p> <p>(b) (6) urine protein to creatinine ratio returned, and the result was 0.3, with is only a borderline value and does not suggest overt protein loss from the kidneys.</p> <p>Therefore, we are still pending the Fanconi scree</p>

<a href="#">EON-70043</a>	7/7/2011 16:15	Canidae All Life Stages Formula	On July 2nd I bought two 44 lb bags of Canidae ALS from (b) (6) on (b) (6) The bags looked kind of ragged but I was out of food so had no choice. When I got them home and opened one bag, the food was not fresh and I looked at the Sell-By date; it was June 29 2012. Canidae used to have a 12 month shelf life so I assumed they had extended it because there was no way this food (or bag) was 3 days old! So I contacted Canidae and they said their shelf life is still 12 months. I told them I had two bags that were stamped 29/June/2012, and there was no way the bags got from MO to (b) (6) in 3 days, and in their stale condition. The rep said she didn't have an explanation and I could get another bag free. My concern is that, as a breeder, I feed approximately 400 lbs. ever 6 weeks. How accurate have the other date stamps been? How did this happen? I am very concerned.						
<a href="#">EON-69992</a>	7/7/2011 11:00	Nutri-Source Weight Management	I has to bring my dog to Emergency Hospital due to severe vomits with undigest his food. After finish the treatment that was order by the Vet, i realize that his food contain small worms. I went to the store with the remain food with worms in the oroginal bag to report the problem,they gave the credit for the cost of the food and another brand was recomended. They told me that they going to report this problem to the manufactury but when i call the manufactury not body from the retail store report the situation, so i talk to the person incharge of costumer service but, no body want take responsibilities for this problem.	3	Years	Terrier - Yorkshire	Dog	8	Pound

<a href="#">EON-69943</a>	7/4/2011 12:15	Pet Pride or Kroger dry Dog Food	I bought the pet pride dry dog food at Kroger last week for the first time ever, and fed it to my dog for about three days. My husband noticed he threw up a few times but we thought maybe he just ate too fast then Yesterday evening (after eating) he suffered a major seizure and then another one less than five minutes after the first. Each lasted about two minutes long and were very scarey. He's never had a seizure before and has always been a very healthy dog. We called the vets emergency number and they saw us right away. His bloodwork came back normal so they sent us home with phenobarbital. Luckily he hasnt suffered another seizure since. The only thing different is the food. The vet told us she cant say for sure what caused it but to stop feeding him the new food. I looked up the brand and saw they had a recall back in december because the food contained an aflatoxin which was causing animals to have seizures. Maybe this is happening again, I dont know but just wanted to make sure I reported what happened.	2	Years	Retriever - Labrador	Dog	48	Pound

<a href="#">EON-69864</a>	6/30/2011 11:15	9 Lives Daily Essentials cat food --REAL flaked tuna and egg bits in sauce (I said it came in a 2 pack/it's 4 cans stacked on top of ea.other in 2's & are tightly bound by plastic).	<p>A few days ago, I bought a few cans of 9 Lives cat food because it was on sale at the Meier Store. Last night, I opened one of the cans of tuna, which come in a dual packet tightly secured with plastic. Not only were the cans dented on their sides, but there were two large, very sharp bones inside the can. These are not the same bones that one would find in a can of salmon for human consumption that are soft enough to chew. I remember that, back in the 90's I found a fish spine in a packet of Sheba but I did nothing about it because I thought that it was a one-time occurrence. But now I see it's happened again. I tried to buy name-brand cans of food because I thought that the quality would be higher. I would never expect this in a can of food for human consumption. My cousin's dog died from eating table scraps containing bones that punctured his stomach. You should realize that, perhaps wild cats can deal with sharp bones but my cats have been raised as house cats since they were kittens. I am very disturbed by this occurrence. I intend to receive a refund from the store but I will wait to hear from you. I still have the bones in the food and thank Christ that I saw them!</p>

<a href="#">EON-69722</a>	6/27/2011 7:15	Science Diet; Adult; Hairball Control Savory Chicken Entree minced	<p>Cat "freaked out" (this has happened 3 times after latest case and bag of cat food was purchased). For no apparent reason, cat leaps into the air and races at breakneck speed into other rooms. Animal then hides under table, chair, plant (anything he can hide under) and quivers for hours--like he is scared to death. This state continues for hours and the cat won't come out. This happened 3 times in two weeks. Cat took to hiding in a corner under a large plant and would not come out to eat, to drink or go to the litter box.</p> <p>Took cat to the vet specializing in internal medicine who did a full blood work-up and found nothing abnormal in regular blood work-up. Determined we had just started a new bag of science diet hairball control lite cat food and a new case of science diet savory chicken entree (minced) Adult hairball control.</p> <p>Took cat off both science diet dry and soft food. Put him on Hills Z/D both dry and wet with a touch of the wet listed above (so it smells right--otherwise he won't touch it). He seems to be recovering slowly--he still hides under things and is reluctant to come out. He's doing better and isn't quivering any more.</p> <p>Refilled prescription at about the same time as new packages of cat good. Checked with pharmacist on dosage and lot of pills; dosage was correct; lot seemed to be the same.</p>	14	Years	American Shorthair	Cat	16	Pound
<a href="#">EON-69686</a>	6/23/2011 19:00	methimazole 10 mg tablet	<p>(b) (6) died lying down, mouth closed, no trauma, no vomiting, no insects visible around his body.</p> <p>He was found (indoor/outdoor cat) 100 meters from home, in the shade, under a neighbor's 3' high deck.</p> <p>Coincidentally, (b) (6) changed med manufacturers from PAR to CARACO just 4-5 days before his death.</p> <p>Did the meds cause the death? Can the pills (180+ left out of 200) be examined to determine if his high-dose Rx was replaced by meds that were ineffective in support of his thyroid condition.</p> <p>A forensic exam of the meds is suggested, and from a reliable, no-vested-interest source.</p>	14	Years	Unknown	Cat	12	Pound

<a href="#">EON-69502</a>	6/20/2011 19:45	Canyon Creek Ranch Brand Chicken Tenders	We recently moved to the area in Dec of last year and could not find her usual treats so we bought a package of the Canyon Creek Ranch chicken tenders at the local Petsmart. She was taken in for her yearly heartworm exam on 12/28/10 to the (b) (6) and was in good health. We continued to give the treats as labeled on the bag and did return to get another bag once that one was empty. Then on 2/1/11 we had to take her in to a local vet, the (b) (6) vets could not get her in so she was taken to the (b) (6) due to her vomiting all day. Once there they took blood for a chem panel which showed elevated AST, ALT, Alkaline Phosphates, GGTP and Bilirubin. The vet at this point gave her an ultrasound and found an enlarged pancreas, they asked us at that point if she was on any new treats, food, etc and the only thing that had changed was the treats everything else she had eaten for her whole adult life. The vet then gave her medication to try to help the inflamed pancreas (amoxicillin, metoclopramide and metronidazole) and medicine to help with the vomiting. She started to turn yellow in color, would not eat, would not drink, could not walk, vomited daily sometimes hourly and also began to lose control of her bodily functions as the weeks passed. We had to take her to the emergency vet on two occasions for fluids to try to help. The second time she was taken to the emergency vet on 2/21/11 she was admitted for more bloodwork, ultrasound and fluids. We were told that they could not definitely say what was causing everything so the vets defaulted to the pancreas as a starting point for everything. Then on (b) (6) she passed away at the (b) (6) of what the vets called multiple organs and systems not working. I do not know if the treats caused all this or not but I do think it is worth reporting our story in case so that if it was it can help someone else and they will not have to go through the loss that we have had to. I was unaware of any problems with the chicken jerky treats until a few days ago when I found a Canadian VMA report on the possibility of it causing problems. If I had known then what I know now there is no way I would have given my dog these treats.	12	Years	Akita	Dog	82	Pound

<a href="#">EON-69382</a>	6/16/2011 20:45	Happy Hips Chicken Breast Glicosamine & Chondroitin Chicken Jerky Strips made by Dogswell	(b) (6) is an 11 year old Standard Poodle with food allergies. So we can give him food with chicken, turkey, and rice to eat. We started feeding him Happy Hips Chicken Breast with Glucosamine and Chondroitin jerky strips to help his aging hips. We got our first sack of these from Petco In (b) (6) in April 2011. I ordered a larger quantity on May 30, 2011 from Amazon.com. My mom also was feeding her doberman chicken jerky of a different brand. Her dog got sick and she took her to the vet and the vet said to stop feding her chicken jerky it is making her dog sick, it is containinated. He also told her the chicken jerky made in China was being recalled in Canada. She called me right away. My (b) (6) has just starting showing strange symptoms that were exactly like my moms dog. So I quit giving him chicken jerky. (By the way, our brand was made in China too, just like hers was.) I called my vet and told her what happened. She said if he is drinking good, he should flush any toxin out of his system, but to watch him closely. With in a day (b) (6) continued to get worse: vomiting up food that he ate 24 hours previous that was undigested, straining to have a bowel movement, bloody bowel movements, weak, tired, drinking heavey amounts of water, having "accidents" around the house, leaking urine, panting, lack of appetite, and uncomfortable so I took him to the vet on June 15, 2011. The vet checked his urine. It was brown, foul smelling. It contained high amounts of protien, but showed no signs of infection or glucose. That worried her so she took blood. The results came in today and they do not look good. (b) (6) has high cholesterol and high amounts of billirubin in his urine. Put all of it together and my dog has severly damaged liver and kidneys...just like my moms dog has. I know both of our dogs are aged, but I find it a strange occurance that both dogs ate chicken jerky, both dogs had same symptoms, both dogs have same lab results. My moms dog is pulling through, my (b) (6) may not. The damage is pretty severe. The only thing the vet can come up with is contamination on his food of some sort....possible melamine. Last fall all his labs were normal and now they are definately off. This all started after giving him chicken jerky.	11	Years	Poodle - Standard	Dog	67	Pound

<a href="#">EON-69135</a>	6/9/2011 13:30	California Natural Chicken and Brown Rice Cat	We are breeders of Turkish Angoras and have worked with them for over a decade. They are an extraordinarily healthy breed. We moved to California Natural on the recommendation of others when all the pet food recalls were occurring, as well as Royal Canin admitting to QC problems that were causing digestive upset. We fed exclusively California Natural, Chicken and Brown Rice kibble for years with no trouble. Procter and Gamble then bought the product. We called and were assured there would be no formula or other changes. However, within six months of the purchase, we began to see completely healthy cats, age 2-7, begin to have urinary symptoms. They were treated with multiple antibiotics, including long term, and then were found to have urinary crystals in the bladder. These cats all required extensive veterinary treatment, ultrasounds, medication, special food, and in one case surgery. We lost two cats and brought one back from the brink of death last month from kidney failure; she wil now have to be spayed even though she has a very valuable pedigree for breeding. We are now hearing from pet buyers, to whom we recommended California Natural, one of whom had her pet at an emergency vet yesterday and after testing, ultrasounds and fluids now has to have her cat on antibiotics as well as monitoring for crystal formation. We complained multiple times to the company with no result and continued insistence that nothing was wrong. We are out thousands of dollars, have had cats die, and now face having pet purchasers have their beloved pets go through medical procedures and risk kidney failure. This was the ONLY food they were eating - NOTHING in their housing, routine or care changed other than P&G buying California Natural. The pet buyers reporting problems also have had NO changes in any aspect of the cat's life other than P&G buying California Natural.	5	Years	Turkish Angora	Cat	7	Pound
<a href="#">EON-69129</a>	6/9/2011 11:45	California Natural Cat & Kitten Food -- Chicken & Brown Rice Formula	I realized that my cat was having bathroom issues. After rushing him to the vet it was found that he has a bladder infection (ecoli) and stuvite crystals in his urine. After peaking to his breeders I found they have had the same issue recently. Also a friend who was feeding the same food is having issues with urination in her cat.  I called the company and they seemed very uninterested that this was happening. I feed soley California Natural Pet food and upon speaking with my vet, she let me know this issue is based 10% upon his food.	2	Years	Turkish Angora	Cat	10	Pound
<a href="#">EON-69100</a>	6/8/2011 15:45	Wellness Chicken Formula Natural Food for Cats	Fed cat Wellness Chicken Formula canned cat food (Saturday, June 4, 2011; AM).  Upon opening can, food "smelled funny" to me, (although this is common with Wellness canned foods). Within an hour, cat vomited entirety of the meal consumed. He then stopped eating or drinking. Ordinarily, this is a VERY active cat and persistently interested in food, and very "vocal," always "talking." He became lethargic, and "hid" for much of the day, behind furniture, would not interact with anyone and did not "talk" at all. He did not eat or drink anything for 2 days (Saturday & Sunday June 4 & 5). Went to veterinarian on Monday, June 6, 2011 (9.30AM). Vet kept cat for blood tests and IV rehydration.  Cat took some small food on Monday, June 6, 2011, 9,30PM. Blood tests returned on Tuesday, June 7, 2011 (11.00AM), vet tells me cat's liver was "insulted" by a "toxin."	5	Years	Domestic Shorthair	Cat	11	Pound

<a href="#">EON-69033</a>	6/7/2011 11:00	Pounce Cat Treats Crunchy with Tartar & Plaque Control Catnip Flavor	<p>On June 6, 2011 at around 11:00pm, I set out a package of Pounce Catnip flavored treats in the cat treat bowl and proceeded to get ready for bed. (b) (6) my male #2 cat ate some followed by (b) (6) , my #1 cat and #3 cat (b) (6) did not consume any treat - she was not around. I layed down in bed with the room light still on and (b) (6) was frantically circling around on the pillow next to my bed. First I thought she was just making herself comfortable before laying down to sleep. This frantic circling continued and continued for an unusually extended time, when I realized that this behavior was not normal. I tried to calm (b) (6) down by holding her close to me and stroking her; she would stay a few minutes, but eventually squirm out of my arms and return to the frantic circling. Both (b) (6) and I went back and forth with calming her and her returning to the circling. After a hour (b) (6) was breathing heavy and panting, which was a concern to me. At this time of night, I could not call a vet or go to an emerency animal hosipital, they were all closed. So I continued trying to calm the cat down. I went to the kitchen an notice (b) (6) drinking water. (b) (6) had shown signs of catnip high, but not to an extreme, but still unusual for this product. After watching (b) (6) Drink water, I decided to get some water down (b) (6) to try to start flushing the toxin out of her. So I got a dish of water and two cotton balls and soaked the balls with water and put it to (b) (6) mouth and on her fur where she was licking and her paw. I offered her water several times. At about 1:46am, (b) (6) appeared to be alittle less agitated, but still circling with periods ahe would lay down and be calm. About this time, (b) (6) wanted to be on the floor versus my bed, so I let her go and checked on her in 5 minutes and she seemed okay - I turned the lights off and went to bed. I heard (b) (6) work her way under my bed - this is the cat save haven. Next morning at 6:00am, (b) (6) was on the livingroom chair, very tired and is sleeping comfortable.</p> <p>This behavior is very extreme for this product and my cats. Earlier Pounce Catnip flavored treats only made both cats lazy and sleepy, never extreme agitation to effect breathing.</p> <p>Pounce Catnip Flavored Treats is made by Del Monte Pet Foods Code:0209TP130718; Best Used By: Jan 28, 2012</p>	14	Years	American Shorthair	Cat	13	Pound

<a href="#">EON-68942</a>	6/6/2011 7:30	KE Rush and Son's	<p>for past 1 1/2-2yrs have been buying raw food diet from Rush's Healty Pet Foods. Seemed never to have the same consistenisy, with sometimes various ingredients. I (we) raise, breed and show our dogs. We have within the past year and half lost over 27 puppies. Although the mother and other dogs don't appear ill. The thought has crossed our minds that it may be the food and different levels and kinds of bacteria that eventually come out in bitch's milk. Adult immune systems can better fight off bacteria, however, if it's in bitch's milk the the battle is lost. This in turn kills puppies as they can't fight off the bacteria. Three different breeders are affected with this problem since using this food. I have many different samples saved that were purchased over the past year (I just saved frozen meat for this reason). My concern is, the company using safe guidelines to make this food, correct temperature, testing and so forth.</p> <p>On serveral occasions we had to return product; smell, ransid chicken and most recently large larva maggot on top of container. Can this company be check out?? USDA needs to certify conditions perhaps. What tpye of meat are they using and is it safe.</p> <p>How can I go about having multiabie food tested from many different purchases. I am also affraid they are not using and cleaning veggie properly. Supplier says he is just making different batches and new mixes all the time...never the same.</p> <p>I need advice on how to go about testing this food, getting inspections for this company and safety of product.</p> <p>Due to upcoming breeding season, Mon June 6, 2011, 2 bitches will be seen by my vet for cultures, white blood cell counts etc. Dogs do not appear sick in any way however, 3 breeders cannot lose as many puppies as we have in past, born healthy and collapse within a day and eventually die. Trying to find out if this food over a period of time has been healthy for adults. One puppy autopsied came back with bacteria infection. As I said, I probably have at least 10 samples saved unopened, never thawed out, from different batches of food purchased that can be tested. One that had veggie mix, that could be contaminated (food returned, but I saved some) in case I needed it for this reason.</p>	23456	Years	Poodle - Miniature	Dog	10	Pound

I sold expired dog food. 1 was expired on May 2011 and the other one was June 2, 2011. I am really upset because I thought your service was improving but I guess not. I will try to file a complaint against an agency regarding Petco selling expired items.</p> <p>these are the transaction info:</p> <p>06/03/11 11:08 am 309 03 3 05718 15.42</p> <p>06/03/11 11:12 am 309 03 3 05721 20.94</p> <p>Hope you can resolve my complaint as soon as possible</p>						
<a href="#">EON-68836</a>	6/2/2011 15:15	Fancy Feast Chicken Feast in Gravy Grilled	i have been feeding my cats fancy feast for years but lately after (b) (6) eats either the grilled chicken or the grilled turkey, he throws up - yesterday, wednesday, june 1st he had grilled chicken and threw it all up = now he is very sick and wont even come out and drink water - i have no funds for the vet - think it was fancy feast that made him sick and went online and read how thousands of people's pets, cats, got sick on fancy feast and many have died	10		Maine Coon	Cat	20	
<a href="#">EON-68831</a>	6/2/2011 15:15	Pet Chewz 100% Porkhide Twists 42 ct	(b) (6) came in on 5/26/11 with the complaint of acute onset of vomiting that began 5/25/11. He had vomited approx. 7 times overnight. Only new thing was that owner gave him new treats from Costco - Pet Chewz 100% Porkhide Twists on 5/26/11. Owner was worried he may have swallowed a piece big enough to obstruct. No obstruction on xrays. Bloodwork revealed liver enzyme elevation. (ALT 3432 (normal 10-120), bili 2.3). Supportive care with IV fluids, denamarin, metronidazole, ampicillin and cerenia were instituted. Dog improved clinically (no further vomiting and appetite returned) but values continued to increase. On 5/27 ALT 3330 and bili 4.4. Since he was keeping food down he was discharged with meds on 5/28. Recheck of values on 5/31/11 ALT 1931 and bili 9.8. We have not confirmed there is anything wrong with the treats but this was the only thing that was different before he showed signs of illness. This dog had a reaction to mushrooms in 2009 that resulted in a temporary liver reaction as well. Owner reports they have been diligent about keeping mushrooms out of the yard and could not find any with this most recent illness.	10	Years	Poodle - Miniature	Dog	19	Pound

<a href="#">EON-68668</a>	5/27/2011 16:45	Iams Smart Puppy PROACTIVE HEALTH	<p>Frequent stooling which progressed to loose stools then diarrhea. On day three incessant vomiting, dry heaving, diarrhea and loss of appetite, lethargy, dehydration. First day attributed frequent stooling to change in diet. Recently purchased and started feeding Iams Smart Puppy Proactive Health dry dogfood in the 4lb bag on May 24, 2011. Last fed this product on May 26, 2011 at 7pm. No other diet change or known ingestion of any other food items. I have never had a dog this ill in 30 years of dog ownership. Attempted to contact Iams but after being on hold for 14 minutes without speaking to a human, I hung up. This product does not appear to be involved in any recall, but in the interest of possible product contamination I am reporting my dog's illness. I hope this is not product related, but if it is I have done due diligence in reporting our experience. For any further questions please feel free to contact me.</p> <p>Product information stamped at the top of my dog food bag: 0 10812 01AUG12 10914 173 D3 U S30940</p>	2		Terrier (unspecified)	Dog	40	Pound
<a href="#">EON-68292</a>	5/23/2011 17:00	Healthy Holistic Blue The Blue Buffalo Co. Life Protection Formula with LifeSource Bits Natural Chicken and Brown Rice Recipe Small Breed Senior	<p>(b) (6) only health problems are allergies and sebaceous cysts (pimples) and she is not on medication for either. On May 17, 2011, I purchased a new 6 lb. bag of Blue Buffalo Life Protection Formula with LifeSource Bits for Small Breed, Senior dog in the flavor of Chicken and Brown Rice [Code on pkg shows: Best if used by June 10 12, B41 1738] from PetCo [located on (b) (6)]. (b) (6) gets 1/4 cup 2x daily, morning and evening. After first feeding on evening of May 17th, she threw up a little. Thought she had eaten too fast as she's prone to do. After next morning's [Wednesday] feeding, she again threw up a little. Wouldn't eat evening feeding so thought she was just not feeling well. Thursday she ate a little at both feedings but threw up a little during the night Thursday night. Friday she ate little but didn't throw up. Stools on this date were soft and yellow which is unusual for her. Saturday morning, 5/21/2011, she vomited a large amount of flem and bits of dog food. Stools on Saturday were nothing but liquid slime with blood. Stopped dog food completely on Saturday and went to a bland diet of boiled chicken bits with a little egg and fed small meals during the day. Threw up tiny bit on Sunday and still runny, bloody stool. Took to our vet, (b) (6) on Monday, May 23, 2011. He diagnosed her with Colitis and minor dehydration. Gave her Subcutaneous fluids, did a fecal float and physical exam, and injection. Sent us home with Metronidazole for 7 days. If not better by Wednesday, are to bring her back for re-examination.</p>	10	Years	Other Canine/dog	Dog	14	Pound

<a href="#">EON-67938</a>	5/18/2011 18:00	Wellness Duck and Sweet Potato Natural Food for Dogs, Wellness Duck and Sweet Potato Natural Food for Dogs, Wellnes Chicken and Sweet Potato Formula Natural Food for Dogs, Wellness Turkey Sweet Potato Formula Natural Food for Dogs, Wellness Duck and Sweet Potato Formula - Natural Food for Dogs	<p>My wife and I found some sharp, hard objects in several cans of Wellness Dog Food that we purchased at PetSmart in (b) (6) . The objects appear to be of a hard, sharp, bone like substance, or similar to broken oyster shell, etc, that does not crush into a paste when touched or moved as cooked bone can do. My wife noticed the sharp objects when testing the dog food for temperature after warming it up and placed her finger on one of the objects. We also found a black substance, about the size of a pea in a can of Wellness Chicken and Sweet Potato dog food. We screened several rounded tablespoons of the dog food from various flavors and lot numbers through a food sifter and found many pieces of the hard, sharp objects, with approximately 1/4 inch or larger, with sharp edges, and with some having points like a dart or arrow.</p> <p>Flavors, lot numbers, expiration dates and times that we checked were: Turkey, 7WTPSI, 14 Apr 13, 15:41; Duck (three cans), 7WDPSI, 20 Oct 13, 13:31; Duck, 7WDPSI, 20 Oct 13, 14:01, Duck, 7WBPSI, 29 Sep 13, 05:40; Chicken, 0068 93982, 29 Sep 13, 16:36. I notified the company, WellPet. At the request of the WellPet representative, I sent in samples and photos. I still have some samples and all of the photos available for FDA if needed. After almost 4 weeks, several e-mails and requesting the status from WellPet, the reply back from WellPet Quality Assurance through the Customer Service Representative was that the fragments are bone, that there is a screening process in place, and that the bone fragments will keep the shape but will crush into a paste when touched or moved. I contacted the WellPet customer service and spoke both with the rep I had been working with as well as her supervisor and let them know that the objects are not soft and will not crumble into a paste as cooked bone will, but are hard, sharp and pointed. I asked for WellPet QA or the supervisor that I was talking with to actually screen some of the dog food as I did to confirm that the hard, sharp bone like fragments are in the dog food and will not crumble as cooked bone could do. Both let me know that WellPet will do nothing more and offered me some coupons for the food that we were not satisfied with. I let them both know that I did not contact WellPet for personal gain, but only to ask that WellPet to determine what is causing the hard, sharp bone like pieces to get into the canned dogfood and for WellPet to take corrective action. The answer from the WellPet rep and her supervisor were still that WellPet will do nothing further.</p>						
<a href="#">EON-67660</a>	5/16/2011 22:00	Special Kitty Savory sliced Dinner in Gravy	The last month my cat has started having problems with Special Kitty 5.5 oz. canned cat food purchased at Walmart in (b) (6) ., store. Cat throws up food about 1 hour after injestion. Lot # is 0354BC B1WCB1527. But when fed other brands he does not have any problems.	3	Years	Domestic Shorthair	Cat	10	Pound
<a href="#">EON-67520</a>	5/13/2011 13:45	Veta-Lac	rescued kittens 4 in number.Bought Veta-Lac kitten supplement to replace mothers milk.After using for a few days got to noticing kittens were becoming unstable more than usual.Since I purchased product at the vet never thought of reading the ingrediants.After doing so I read an ingrediant of polyethylene glycol monoleath which is an ingrediant in antifreeze.None of the kittens survived.I don't know for sure if this killed them but I have seen cats and dogs killed by antifreeze before that acted exactly the same as these kittens did.

<a href="#">EON-67436</a>	5/11/2011 21:45	Iams Proactive Health small and Toy breed.	Found what appears to be a small piece of metal attached to a piece of dog food. Did a email to the manufacturer. The food was purchased on 3-26-2011 at Walmart in (b) (6) We do not have any idea what to do about this. We do not want anyone to feed thier dog bad food. We are checking the rest of our food. We had put the food in another plastic container and do not have the old bag.						
<a href="#">EON-67354</a>	5/10/2011 17:30	Friskies Prime filets Meaty variety pack	I had tried to feed my cats and kittens the cans of Friskies Filets Variety Pack Meaty favorites which I had purchased from Wal-Mart . The outside cats have been sick and throwing up and will not eat anymore. The kittens are starving themselves cause they won't even try to eat it.						
<a href="#">EON-67339</a>	5/10/2011 14:30	Nutro Natural Choice Chicken Meal Rice and Oatmeal Formula Puppy Food	We changed to 'Nutro Natural Choice Chicken Meal, Rice and Oatmeal Formula Puppy Food' when our puppy was getting picky with his previous food. Immediately after the first meal he had diarrhea. We assumed he was adjusting to the food and continued for 4 days. His stools became progressively worse over that time until he was going to the bathroom multiple times an hour, stuggling to do so, and only passing liquids. On day 5 the diarrhea continued and blood began showing up in his stool. At this time I sought help and information online (as it was too late in the day to call my vet). This does not seem to be an isolated case by any means. Thousands of online reviews and form posts are reporting the exact same reaction to this and other foods offered by Nutro. We immediately stopped feeding this to our puppy on day 5 and are now needing to put him on a one day fast as recommended by our vet. Then we will need to start him on another food. Almost immediately after stopping this food his stools have become more regular and he is hopefully on his way back to normal health provided no permanent damage was done. These products are clearly questionable, and are very apparently affecting animals all over. Please address this issue and put this company's food manufacturing practices under severe scrutiny.	6	Months	Crossbred Canine/dog	Dog	11	Pound
<a href="#">EON-67248</a>	5/9/2011 7:16	Waggin Train wholesome chicken jerky tenders. Chicken dog treats	Took my dog to have blood work done so she could have her teeth cleaned and the blood work came back showing sings of kidney and liver failure. About six months ago my sister's dog was diagnosed with kidney failure and acute pancreatitis. The only thing different in their diets are the Waggin Train Chicken Jerky treats. After doing a web search I see that there are numerous other people who have the same or similar problems with their pets after feeding them the chicken jerky treats.	10	Years	Beagle	Dog	36	Pound

It lasted about 6 - 8hrs, they seemed to have recovered.	16	Years	Shepherd Dog - Belgian (unspecified)	Dog	72	Pound
<a href="#">EON-66971</a>	5/2/2011 7:14	Everpet Cat Food Gourmet Blend	With this cat she has been losing weight and vomiting. But with the others I am sorry to many to write separate reports that would take forever. The rest of my cats are short hair domesticated cats. I have a total of 11 my oldest daughter has four and they are all vomiting off and on. They are losing weight and some of them their stomachs are getting blown up. I have been using this cat food for some time and have had a few litters of kittens on it as well which most of the kittens died. I have had 2 adult cats die as well. One adult has had a personality problem wanting to start fights. And now i have one walking in circles as if he had a stroke. This catfood we have recently been finding clumps that are green on the bottom and mold on the top. The first time we found it was right after opening a bag it went right back to Dollar General where we bought it. I usually get 4 big bags at a time.	9	Years	Maine Coon	Cat	6	Pound

<a href="#">EON-66967</a>	5/2/2011 7:13	Feline Holistic Select Duck & Chicken Recipe	<p>When dishing out food into my cats bowls I noticed a piece of blue plastic in the food. It was in a Holistic Select brand Duck and Chicken Recipe can, with the code 12DNM2 1917. I emailed the company concerning this, and spoke to a representative who explained that it was likely to be a piece of packaging that had gotten frozen into a crevice in the meat, and then torn off. They requested a photo so I sent one over email. I accepted their explanation that it was a rare occurrence.</p> <p>To my dismay, on 04/21, again in a can of Duck and Chicken Recipe, I found another foreign object. This time a greenish piece of what looks to be a rubbery material. I emailed the company with attached photos of the object from both sides. The can it came from is dated 11SEP13 with the code 12DNM2 1916.</p> <p>I received an email today informing me that the company will be sending a bubble mailer as they would like to see the object.</p>						
<a href="#">EON-66965</a>	5/2/2011 7:13	Nature's Recipe Easy to Digest Fish Meal & Potato Recipe	Dog acutely began having inappropriate urination symptoms. A urinalysis revealed an abnormally high urinary pH with associated urinary crystals with no infection. The most likely cause is diet. A housemate is also having inexplicably high urinary pH. The only changes these two dogs experienced was diet change to Nature's Best Easy to Digest Fish Meal & Potato so vet recommended switching food.	10	Years	Siberian Husky	Dog	38.8	Pound
