

## **FINDING OF NO SIGNIFICANT IMPACT**

### **Marketing Orders for**

**Vuse Vibe Power Unit, Vuse Vibe Power Unit, Vuse Vibe Tank Original 3.0%, Vuse Ciro Power Unit,  
Vuse Ciro Power Unit, Vuse Ciro Cartridge Original 1.5%**

### **Marketed by R.J. Reynolds Vapor Company**

The Center for Tobacco Products of the Food and Drug Administration (FDA) has carefully considered the potential environmental impact of these actions and has concluded that these actions will not have significant effects on the quality of the human environment. Therefore, environmental impact statements are not required.

R.J. Reynolds Vapor Company wishes to market four ENDS components and two closed e-liquids into interstate commerce for commercial distribution in the United States and submitted to FDA premarket tobacco product applications to obtain marketing orders under the provisions of section 910(c) of the Federal Food, Drug, and Cosmetic Act.

The Agency prepared the programmatic environmental assessment (PEA), dated May 5, 2022, for the six ENDS tobacco products in accordance with the Council on Environmental Quality's regulations (40 CFR 1500-1508) implementing the National Environmental Policy Act (NEPA) and FDA's NEPA regulations (21 CFR 25.40) to support the finding of no significant impact. The EAs concluded that the marketing orders would have no significant impact. The evidence supporting this finding is contained in the attached PEA, which is available to the public upon request.

The PEA evaluates potential environmental effects due to manufacturing, use, and disposal of the new products. No increased or new types of environmental impacts due to manufacturing the new products are anticipated. FDA does not foresee that use of the new products would result in new or different environmental impacts. FDA believes that the disposal of the new products is the same as the disposal conditions of other ENDS components and closed e-liquids that are currently marketed in the United States. Therefore, FDA does not foresee significant adverse impacts to the environment due to the proposed actions from manufacturing, use, and disposal of the new products.
