

# **FINDING OF NO SIGNIFICANT IMPACT**

## **Marketing Order for**

**Starbuzz Exotic Christmas Mix - 50g**

**Manufactured by Starbuzz Tobacco, Inc.**

The Center for Tobacco Products of the Food and Drug Administration (FDA) has carefully considered the potential environmental impacts of this action and has concluded that it will not have significant effects on the quality of the human environment. Therefore, an environmental impact statement is not required.

Starbuzz Tobacco, Inc. wishes to introduce a waterpipe tobacco product into interstate commerce for commercial distribution in the United States and a substantial equivalence report to FDA to obtain marketing order under the provisions of sections 910 and 905(j) of the Federal Food, Drug, and Cosmetic Act.

The Agency prepared the environmental assessment (EA), dated April 19, 2022, in accordance with the Council on Environmental Quality's regulations (40 CFR 1500-1508) implementing the National Environmental Policy Act (NEPA) and FDA's NEPA regulations (21 CFR 25.40) to support the finding of no significant impact. The evidence supporting this finding is provided in the attached EA, which is available to the public upon request.

The EA evaluates potential environmental effects due to manufacturing, use, and disposal of the new product. No increased or new types of environmental impacts due to manufacturing are anticipated. The Agency does not foresee that use of the new product will result in new or different environmental impacts. The Agency believes that the disposal of the new product is the same as the disposal conditions of other waterpipe tobacco products that are currently marketed in the United States. Therefore, the Agency does not foresee adverse impacts to the environment due to the proposed action as a result of the manufacturing, use, and disposal of the new product.
