### **Availability Update for Select Sterile Injectable Controlled Substance Products**

Dear Customer,

Pfizer remains committed to providing timely supply information so that you can plan for patient care. Previously, customers were notified of potential interruptions in the supply of sterile injectable controlled substance products. This was following changes to the U.S. Drug Enforcement Administration's (DEA) 2024 Annual Aggregate Quotas and Assessment of Annual Needs Final Order, which impacted Pfizer and our API suppliers' ability to secure necessary quotas to support historical production levels of our controlled substance sterile injectable products. As of May 2024, after reviewing input from Pfizer and other key stakeholders, the DEA made the decision to restore the quota allotment process back to an annual basis for sterile injectable products containing Schedule-II controlled substances, effective immediately.

While we are pleased with this decision, supply interruptions and potential stock outs are anticipated for select Pfizer Hospital Schedule-II controlled substance injectable products, which will persist for the remainder of 2024 and into Q1 2025. This is a result of prior guidance impacting manufacturing timelines and our ability to procure API from suppliers. Pfizer expects these interruptions to resolve as the supply chain readjusts to the annual quota allotment process.

We understand the importance of these products to customers and patients and are actively working to return to healthy inventory levels. Estimated next delivery and recovery dates are noted in the Appendix of this letter. To help ensure equitable distribution of inventory, our current allocation strategy will be maintained.

Please recognize that this is a dynamic situation, and estimated delivery dates and product status may change. We recommend that you check our [Availability Report](#), updated weekly and accessible on the [PfizerHospitalUS.com](#) homepage, for the latest information.

For product availability questions, please reach out to your Pfizer Hospital sales representative or account executive. Alternatively, the Supply Continuity Team can be contacted between 7am and 5pm CT at 1-844-646-4398 (select option 1 [Customer], then option 3 [Supply Continuity Team]).

Thank you,
