

# FINDING OF NO SIGNIFICANT IMPACT

## Marketing Orders for

**Exacta Filtered Cigars Menthol, Bogar Filtered Cigars Cherry, No Limit Filtered Cigars Grape, No Limit Filtered Cigars Ultra Smooth, No Limit Filtered Cigars Full Flavor, No Limit Filtered Cigars Vanilla, Bogar Filtered Cigar Smooth**

## Manufactured by Joseph Anderson dba Smokin Joes

The Center for Tobacco Products of the Food and Drug Administration (FDA) has carefully considered the potential environmental impacts of these actions and has concluded that these actions will not have significant effects on the quality of the human environment. Therefore, environmental impact statements are not required.

Joseph Anderson dba Smokin Joes wishes to introduce seven new filtered, sheet-wrapped cigars into interstate commerce for commercial distribution in the United States and submitted to FDA seven requests for exemption from substantial equivalence to obtain marketing orders under the provisions of section 905(j)(3) of the Federal Food, Drug, and Cosmetic Act.

The FDA prepared the programmatic environmental assessment (PEA), dated October 11, 2022, in accordance with the Council on Environmental Quality's regulations (40 CFR 1500-1508) implementing the National Environmental Policy Act (NEPA) and FDA's NEPA regulations (21 CFR 25.40) to support the finding of no significant impact. The evidence supporting this finding is contained in the attached PEA, which is available to the public upon request.

The PEA evaluates potential environmental effects due to manufacturing, use, and disposal of the new products. No increased or new types of environmental impacts due to manufacturing are anticipated. The FDA does not foresee that use of the new products will result in new or different environmental impacts. The FDA believes that the disposal of the new products is the same as the disposal conditions of other cigars that are currently marketed in the United States. Therefore, the FDA does not foresee adverse impacts to the environment due to the proposed actions as a result of the manufacturing, use, and disposal of the new products.
