

Local Posting 75F40124Q124651

07/10/2024

The FDA has a requirement for a one-year Preventive Maintenance (PM) and unlimited repair service contract for a NanoTemper Monolith Micro Scale Thermophoresis (SN: 201804-BR-N024).

The Monolith MST system supports multiple projects within the Laboratory of Bacterial Polysaccharides (LBP) and multiple projects within the Division of Bacterial Parasitic & allergenic Products (DBPAP) and is used daily to quantify biological binding affinity. The technology is used to study proteins involved with the biosynthesis of polysaccharide capsules. The instrument is currently under a service contract through 09/04/2024 so a new contract will need to begin 09/05/2024 so there is no lapse in service on this extremely high precision MST instrument.

Period of Performance: One-year service agreement with period of performance (PoP) from 09/05/2024 – 09/04/2025.

Place of Performance: Instrument is located and shall be serviced at:

US FDA/CBER
10903 New Hampshire Ave.
WO 52/72 Room G362
Silver Spring MD 20993

For more information regarding this requirement (RFQ 75F40124Q123651) please contact Suzanne Martella at 870-543-7540 or email at suzanne.martella@fda.hhs.gov.

All responsible sources may submit a response which, if timely received, must be considered by the agency. Responses are due by 12:00 PM Central Time on 7/15/2024.
