

Erratum

In VRBPAC Briefing Document Table 2 (page 23), “SARS-CoV-2 + Human rhinovirus/enterovirus co-infection” was reported during hospitalization for RSV Case #3. Updated information from the Sponsor indicates no co-infections during hospitalization for RSV Case #3. Table 2 revised to delete “SARS-CoV-2 + Human rhinovirus/enterovirus co-infection” for RSV Case #3 in “Additional Clinical Details” column.
