Re: GRAS Notice No. GRN 001103

Dear Ms. Pałasińska:

We are issuing a revised copy of the response letter for GRN 001103. The original response letter to this GRAS notice was signed on November 22, 2023. In an email dated July 31, 2024, the notifier noted an error in the original response letter. Specifically, page 3, line 2 of the original response letter discusses “spray drying” as an optional drying step. In an email dated August 2, 2024, we clarified with the notifier that our original response letter mischaracterized this optional drying step as “spray drying”. While this optional drying step may include “spray drying”, it is not limited to “spray drying” and may employ other methods of drying. In response to this information, we are revising the response letter to correct the error in our description of the optional drying step on page 3, line 8. The revised paragraph states that, optionally, the concentrate may be precipitated with ethanol and subjected to further washes prior to drying.

We regret any inconvenience that our error may have caused. If you have any questions, please contact me by email at stephen.difranco@fda.hhs.gov.

Sincerely,

Digitally signed by Stephen
