

**STATEMENT OF AUTHORITY
AND
CONFIDENTIALITY COMMITMENT FROM
MARINE PRODUCTS EXPORT DEVELOPMENT AUTHORITY
NOT TO PUBLICLY DISCLOSE NON-PUBLIC INFORMATION SHARED
BY
THE UNITED STATES FOOD AND DRUG ADMINISTRATION**

The United States Food and Drug Administration (FDA) is authorized under 21 C.F.R. § 20.89 to disclose non-public information to the Marine Products Export Development Authority of the Government of the Republic of India (MPEDA) regarding FDA-regulated human foods as part of cooperative law enforcement or cooperative regulatory activities. For purposes of this Statement of Authority and Confidentiality Commitment, non-public information references all written and unwritten information that is not publicly available.

MPEDA understands that some of the information it receives from FDA may include non-public information exempt from public disclosure under the laws and regulations of the United States of America, which is confidential commercial information; trade secrets; personal privacy information; law enforcement information; designated national security information; or internal, pre-decisional information. MPEDA understands that this non-public information is shared in confidence and that FDA considers it critical that MPEDA maintain the confidentiality of the information. Public disclosure of this information by MPEDA could seriously jeopardize any further scientific and regulatory interactions between FDA and MPEDA. FDA will advise MPEDA of the non-public status of the information at the time that the information is shared.

Therefore, MPEDA certifies that it:

1. has the authority to protect from public disclosure such non-public information provided to MPEDA in confidence by FDA;
2. will not publicly disclose such FDA-provided non-public information without the written authorization of the owner of the information, the written authorization from the individual who is the subject of the personal privacy information, or a written statement from FDA that the information no longer has non-public status;
3. will inform FDA promptly of any effort made by judicial or legislative mandate to obtain FDA-provided non-public information from MPEDA. If such judicial or legislative mandate orders disclosure of FDA-provided non-public information, MPEDA will take all appropriate legal measures in an effort to ensure that the information will be disclosed in a manner that protects the information from public disclosure;

4. will promptly inform FDA of any changes to India's laws, or to any relevant policies or procedures, that would affect MPEDA's ability to honor the commitments in this document;
5. has established and will maintain compliance with standards consistent with current United States federal government National Institute of Standards and Technology (NIST) Risk Management and Cybersecurity Frameworks¹ and/or International Organization for Standardization and International Electrotechnical Commission (ISO/IEC)² Information Technology security guidelines and standards that focus on protecting information systems and shared sensitive information;
6. will safeguard information systems that contain FDA-provided non-public information consistent with current NIST and/or ISO/IEC guidelines and standards to ensure confidentiality and integrity. Confidentiality means preventing unauthorized access to and disclosure of non-public information, and integrity means guarding against improper information modification or destruction. Integrity includes ensuring information non-repudiation and authenticity based on the security terms found in this Statement of Authority and Confidentiality Commitment, including means for protecting non-public information;
7. will destroy FDA-provided non-public information, whether in electronic form or hard copy form, once the information has been utilized and is no longer needed for official purposes;
8. will restrict access to FDA-provided non-public information to the employees, and officials of MPEDA who require access to such non-public information to perform their official duties in accordance with authorized uses of the non-public information unless otherwise authorized in writing by FDA. MPEDA will advise all such employees and officials (1) of the non-public nature of the information; and (2) the obligation to keep such information non-public; and

¹ The National Institute of Standards and Technology (NIST) Risk Management and Cybersecurity Frameworks provide a process that integrates security, privacy, and cyber supply chain risk management activities into the system development life cycle and provides guidance based on standards, guidelines, and practices for organizations to manage and reduce cybersecurity risk, respectively. These frameworks are primarily intended to manage and mitigate cybersecurity risk for critical infrastructure organizations based on standards, guidelines, and practices.

² The International Organization for Standardization and International Electrotechnical Commission (ISO/IEC) is an international standard that assists organizations in managing the security of their information assets. It provides a management framework for implementing an information security management system to ensure the confidentiality of all corporate data. Foreign counterparts are strongly encouraged to meet the ISO 27001 standard requirements, or the most recent standard, and to be certified by an accredited certification body.

9. will, in the event of a suspected or confirmed incident or breach³, including a cybersecurity⁴ incident, or any other type of breach, whether it is intentional or inadvertent:

- (a) protect all FDA-provided non-public information, including any non-public information created, stored, or transmitted to avoid a secondary information incident;
- (b) report all suspected and confirmed incidents or breaches involving FDA-provided non-public information in any medium or form, including paper, oral, or electronic, to FDA as soon as possible and without unreasonable delay, no later than one (1) day of discovery or detection; and
- (c) provide to FDA impact and severity assessments of incidents or breaches, upon occurrence, including a description of the actions taken, including preventative security measures employed to address and remediate the incident.

This text replaces the Statement of Authority and Confidentiality Commitment between the FDA and the Marine Products Export Development Authority of the Government of the Republic of India, signed by MPEDA on 27 December 2021. MPEDA acknowledges that non-public information shared under the 2021 Statement of Authority and Confidentiality Commitment will remain subject to the terms of that Statement of Authority and Confidentiality Commitment.

Signed on behalf of MPEDA:

³ An incident is defined as “an occurrence that (1) actually or imminently jeopardizes, without lawful authority, the confidentiality of information or an information system; or (2) constitutes a violation or imminent threat of violation of law, security policies, security procedures, or acceptable use policies.” Incidents can be events involving cybersecurity and privacy threats, such as viruses, malicious user activity, loss of confidentiality or integrity, unauthorized disclosure or destruction of information. For the purposes of this agreement, breach is defined as an actual compromise of security that results in the unauthorized disclosure of, loss, accidental or unlawful destruction, alteration, or access to protected data transmitted, stored, or otherwise processed. Breaches can be intentional or inadvertent.

⁴ Cybersecurity is the prevention of damage to, protection of, and restoration of computers, electronic communications systems, electronic communications services, wire communication, and electronic communication, including information contained therein, to ensure its availability, integrity, authentication, confidentiality, and nonrepudiation.
