H.1.1.2.1 ZYN Liner, Container and Closure Composition

Introduction

Between production of ZYN powder and packaging of this powder into pouches, the bulk powder is held in an intermediate bulk storage container during analysis and through to packaging time.

Properties of the bulk container closure system

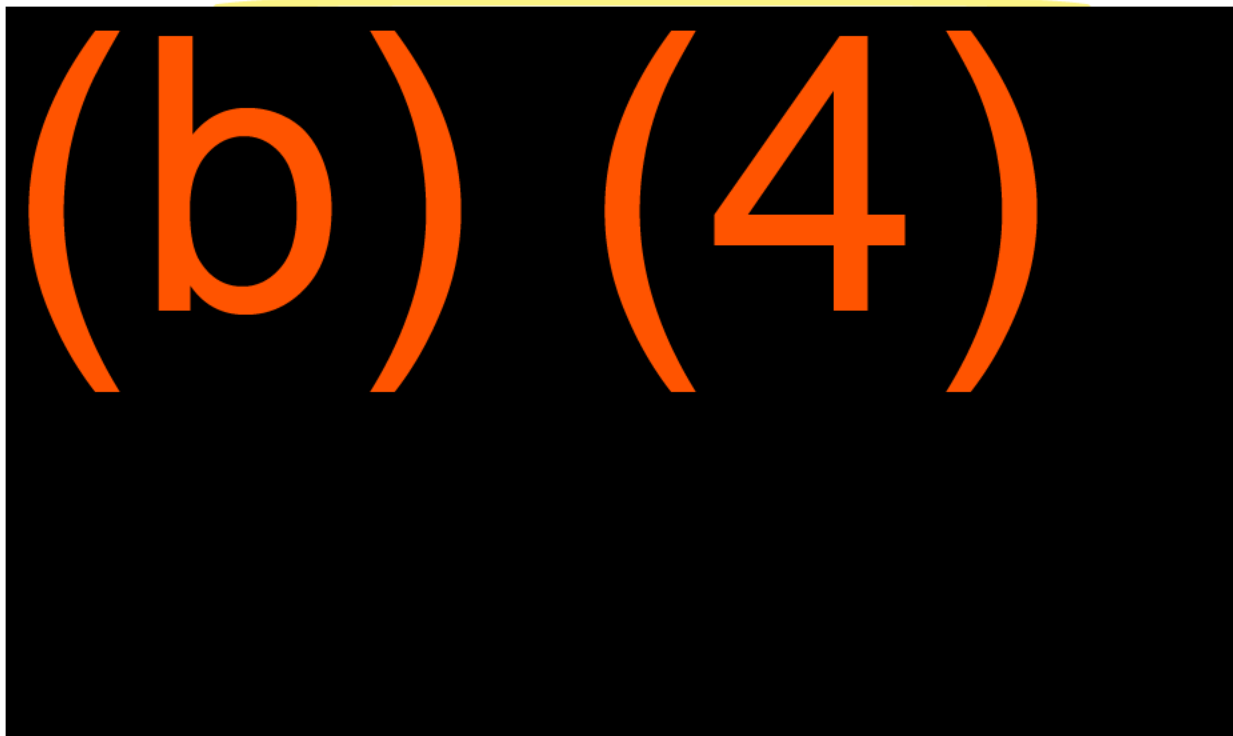

Current container at the Kungälv factory:

The primary bulk container is a closure system consisting of high performance raw materials, which also includes protection from air moisture, gas and UV light.

(b) (4)

The paper/aluminum/polyethylene bag used for bulk ZYN powder storage in the Kungälv, Sweden manufacturing facility is shown in [Figure 1](#).
