ID=identification; SKU=stock keeping unit; UPC= universal product code; SE= Kungälv Sweden; KY=Owensboro Ky.

- (a) Swedish Match unique ID numbers are specific to manufacturing location
- (b) The case SKU number is the same regardless of manufacturing location. The SM Unique ID No. in KY is identical to the case SKU#. When SM KY assigns a unique ID number for premarket applications, we use a SKU number related to sales. Furthermore, SM in KY uses internal work-in-process numbers and job numbers in our ERP system so as not to create process confusion in packaging.
