Dear Akshata Prakash:

We have approved your request received November 1, 2023, to supplement your Biologics License Applications (BLA) submitted under section 351(a) of the Public Health Service Act for the West Nile Virus (WNV/Nucleic acid Pooled testing/Synthetic) to update the hazard information on the product labeling for cobas® TaqScreen WNV Test on the cobas® s201 System.

We hereby approve the draft package insert labeling submitted under amendment #1, dated November 30, 2023. This is a reminder that as of September 24, 2014, medical devices that are licensed under the PHS Act are subject to certain provisions of the final Unique Device Identifier (UDI) rule. These provisions include the requirement to provide a UDI on the device label and packages (21 CFR 801.20), format dates on the device label in accordance with 21 CFR 801.18, and submit data to the Global Unique Device Identification Database (GUDID) (21 CFR 830 Subpart E). Additionally, please identify each device identifier implemented for the subject device, and the device identifiers that have been discontinued for the subject device as a labeling change in an annual report consistent with 21 CFR 601.12(f)(3). For more information on these requirements, please see the UDI website at <http://www.fda.gov/udi>.

Please submit all final printed labeling as PDF electronic copy (eCopy) at the time of use and include implementation information on Form FDA 356h as appropriate.

Two draft copies of the proposed introductory advertising or promotional labeling may be voluntarily submitted for advisory comment with a completed Form FDA 2253 to the Advertising and Promotional Labeling Branch at the following address, unless otherwise specified:
