

Orange Book Data File Download Instructions

A step-by-step guide to download the latest Orange Book monthly data to Microsoft Excel on Microsoft Windows*.

1. Go to the Orange Book website's additional resources and information page found here: Orange Book website	
2. Click on the link on this page titled, "Orange Book Data Files (compressed .zip file)," which appears halfway down the page under the heading "Additional Orange Book Resources."	Additional Orange Book Resources Frequently Asked Questions on The Orange Book Orange Book Data Files (compressed .zip file)  - For additional information, such as descriptions of data fields in the Orange Book Search, please see Orange Book Data Files. Additions/Deletions for Prescription and OTC Drug Product Lists Reference Listed Drugs by ANDA Reference Standard List (PDF - 115 KB) Pre-Hatch-Waxman Abbreviated New Drug Applications (PANDA) in the Orange Book (PDF - 1.76MB)
3. A "zipped" (compressed) file will download to your computer or configured download folder with the latest Orange Book monthly data file (the file name will reflect the year and month).	
4. Locate the folder and double-click to open.	
5. If you are interested in product information, such as marketing	

status, active ingredient, dosage form, route, strength or therapeutic equivalence code, locate the products.txt file to open. If you're interested in reviewing patent and exclusivity information, you can open the other two files.	
6. The file will open showing the Orange Book data in a text file format. After opening this, the next step will be to download and import this information into Excel for analysis.	
7. Save this file (products.txt) under "File" to your computer or OneDrive. You will need to remember where you saved this file.	

8. Next, open a new Blank workbook in Excel.

9. After Excel opens a new workbook, locate the “Data” tab at the top of the ribbon, and select “Get Data” from option on the left.

10. Select “From File”
and “From
Text/CSV”

11. Then locate the file
products.txt you
previously saved in
Step 7.

12. When the window opens, change the settings under “Delimiter” to “— Custom—” from the dropdown. When the second dropdown appears, enter in ~ or the tilde special character from your keyboard and press the “tab” button. You will now see a preview of the Orange Book data underneath the dropdowns. Click on “Load” in the bottom right corner of the screen.

products.txt

Load

Transform Data

The Orange Book data will now display in a structured excel workbook. The user may now filter any of the columns as needed to generate the specific information they are interested in.

*To filter the approval date column, you will need to change a certain setting, which is not covered in this guide.

Ingredient	Formulation	Trade Name	Applicant	Strength	Approval Type	Approval No.	Product No.	Te. Co. #	Approval Date
