^[a] Lead analyses were conducted using inductively coupled plasma mass spectrometry (ICP-MS) (<https://www.fda.gov/media/87509/download>).

Limits of Quantitation (LOQs) ranged from 2.6 to 13.0 ppb; Limits of Detection (LODs) ranged from 0.3 to 1.4 ppb.

Results below the LOD are reported as <LOD. Trace values (those greater than the LOD and less than the LOQ) are reported in italics.

^[b] The category single-ingredient meats includes one primary ingredient.

Samples in this table were collected as part of a FY2023 - FY2024 survey and are limited to those used to inform guidance documents for processed food intended for babies and young children.

For the full list of samples tested in this survey, please see: <https://www.tandfonline.com/eprint/RAZ83KYRDE9WCX6MIHPP/full?target=10.1080/19393210.2025.2591749#abstract>

Analytical Results for Arsenic in Processed Food Intended for Babies and Young Children (FY2023-2024)

The data in this table represent 386 samples of foods tested in FY2023-2024 that were analyzed by the FDA as part of surveys of processed food intended for babies and young children.

^[a] Arsenic analyses were conducted using inductively coupled plasma mass spectrometry (ICP-MS) (<https://www.fda.gov/media/87509/download>).

Limits of Quantitation (LOQs) ranged from 2.2 to 11.2 ppb; Limits of Detection (LODs) ranged from 0.3 to 1.3 ppb.

Results below the LOD are reported as <LOD. Trace values (those greater than the LOD and less than the LOQ) are reported in italics.

^[b] The category single-ingredient meats includes one primary ingredient.

Samples in this table were collected as part of a FY2023 - FY2024 survey and are limited to those used to inform guidance documents for processed food intended for babies and young children.

For the full list of samples tested in this survey, please see: <https://www.tandfonline.com/eprint/RAZ83KYRDE9WCX6MIHPP/full?target=10.1080/19393210.2025.2591749#abstract>

Analytical Results for Cadmium in Processed Food Intended for Babies and Young Children (FY2023-2024)

The data in this table represent 386 samples of foods tested in FY2023-2024 that were analyzed by the FDA as part of surveys of processed food intended for babies and young children.

^[a] Cadmium analyses were conducted using inductively coupled plasma mass spectrometry (ICP-MS) (<https://www.fda.gov/media/87509/download>).

Limits of Quantitation (LOQs) ranged from 2.5 to 12.7 ppb; Limits of Detection (LODs) ranged from 0.3 to 1.5 ppb.

Results below the LOD are reported as <LOD. Trace values (those greater than the LOD and less than the LOQ) are reported in italics.

^[b] The category single-ingredient meats includes one primary ingredient.

Samples in this table were collected as part of a FY2023 - FY2024 survey and are limited to those used to inform guidance documents for processed food intended for babies and young children.

For the full list of samples tested in this survey, please see: <https://www.tandfonline.com/eprint/RAZ83KYRDE9WCX6MIHPP/full?target=10.1080/19393210.2025.2591749#abstract>

Analytical Results for Mercury in Processed Food Intended for Babies and Young Children (FY2023-2024)

The data in this table represent 386 samples of foods tested in FY2023-2024 that were analyzed by the FDA as part of surveys of processed food intended for babies and young children.

^[a] Mercury analyses were conducted using inductively coupled plasma mass spectrometry (ICP-MS) (<https://www.fda.gov/media/87509/download>).

Limits of Quantitation (LOQs) ranged from 0.8 to 7.5 ppb; Limits of Detection (LODs) ranged from 0.1 to 0.9 ppb.

Results below the LOD are reported as <LOD. Trace values (those greater than the LOD and less than the LOQ) are reported in italics.

^[b] The category single-ingredient meats includes one primary ingredient.

Samples in this table were collected as part of a FY2023 - FY2024 survey and are limited to those used to inform guidance documents for processed food intended for babies and young children.

For the full list of samples tested in this survey, please see: <https://www.tandfonline.com/eprint/RAZ83KYRDE9WCX6MIHPP/full?target=10.1080/19393210.2025.2591749#abstract>
