Rules For Inclusion In The IMS List

Interstate milk shippers who have been certified by State Milk sanitation authorities as having attained the milk sanitation compliance ratings are indicated in the following list. These ratings are based on compliance with the requirements of the USPHS/FDA Grade A Pasteurized Milk Ordinance and Grade A Condensed and Dry Milk Products and Condensed and Dry Whey and were made in accordance with the procedures set forth in Methods of Making Sanitation Rating of Milk Supplies.

***Proposal 301 that was passed at 2001 NCIMS conference held May 5-10, 2001, in Wichita, Kansas and concurred with by FDA states: "Transfer Stations, Receiving Stations and Dairy Plants must achieve a sanitation compliance rating of 90 or better in order to be eligible for a listing in the IMS List. Sanitation compliance rating scores for Transfer and Receiving Stations and Dairy Plants will not be printed in the IMS List". Therefore, the publication of a sanitation compliance rating score for Transfer and Receiving Stations and Dairy Plants will not be printed in this edition of the IMS List.**

THIS LIST SUPERSEDES ALL LISTS WHICH HAVE BEEN ISSUED HERETOFORE ALL PRECEDING LISTS AND SUPPLEMENTS THERETO ARE VOID. The rules for inclusion in the list were formulated by the official representatives of those State milk sanitation agencies who have participated in the meetings of the National Conference of Interstate Milk Shipments.

These rules are as follows:

1. **The interstate milk shipper's milk supply must be under the routine supervision of an official agency-State or local. Supervision shall be based on the procedures and standards of the USPHS/FDA Grade A Pasteurized Milk Ordinance, Grade A Condensed and Dry Milk Products and Condensed and Dry Whey and Methods of Making Sanitation Ratings of Milk Supplies.**
2. **Ratings of interstate milk shipper's supplies must be made by State Milk Sanitation Rating Officers who have been certified by a USPHS/FDA representative. Ratings to be listed shall include the sanitation compliance ratings of the producing farms, receiving stations, transfer stations, and pasteurization plants and the enforcement rating of the supervising agency.**
3. **Ratings must be made on individual shipper's supplies, unless the supply is part of an area milkshed which has been awarded a rating of 90% or more on the basis of an official rating. Individual ratings and area milkshed ratings shall be made at a frequency of not less than once every 24 months, but not more often than 15 days. All ratings shall be reported and listed to the nearest whole number.**
4. **The interstate milk shipper's supply must be under a program of routine laboratory control which has been checked by the State laboratory approval agency as complying substantially with Standard Methods for the Examination of DairyProducts, published by the American Public Health Assocation, and with provisions of the Grade A Pasteurized Milk Ordinance, officially designated laboratories periodically checked by the State may perform this routine laboratory control.**
5. **USPHS/FDA shall periodically make check ratings of the sanitation compliance status of listed shippers, and shall certify the rating, and laboratory procedures of the reporting State.**

USPHS/FDA will not include on this list the ratings of any shipper's supply unless the written permission of the shipper concerned has been obtained by the State milk sanitation rating agency.

The use of the list is entirely optional, and that its sole purpose is to assist those States who wish to utilize this information in the furtherance of their own milk sanitation program.

We are limiting the company name to the name of the parent organization or its subsidiary, but not both. If the preferred listings is not indicated in the Interstate Milk Shippers Report, FD 2359l, the editor will select the listing he/she considers appropriate.

National Uniform Coding System For Packaging Identification of Milk and Milk Product Processing Plants

The voluntary national uniform coding system, developed by the National Labeling Committee and recommended for utilization by the Ninth National Conference on Interstate Milk Shipments, is a system for the identification of pasteurization plants at which milk and milk products are packaged by means of nationally recognized State and plant code numbers on the package. It is exclusively applicable to products pasteurized in a plant other than shown under the trade name, distributor's names, or private label. If this voluntary national uniform code system is not used, the name and address of the plant at which pasteurization took place will be identified on the cartons or containers. (See Section 4, Grade "A" Pasteurized Milk Ordinance).

Since the start of this program, we have utilized the IBM numerical code for State identification. Public Law 89-306, October 30, 1965, authorized the Secretary of Commerce" to make appropriate recommendations to the President relating to the establishment of uniform Federal automatic data processing standard." The new numerical code for the States developed under this Public Law is known as FIPS (Federal Information Processing Standards).

The Executive Board of the National Conference on Interstate Milk Shipments requested that the change from the IBM code system to the FIPS code system coincide with the effective date of FDA's nutritional labeling. Nutritional labeling is now in effect and States will be identified by the FIPS code in this and subsequent lists of the IMS List Sanitation Compliance and Enforcement of Interstate Milk Shippers.

Each State, in cooperation with local jurisdictions, may assign individual identification numbers to processing plants within the State. When a State assigned number is indicated on the Interstate Milk Shipper Report, it is published in this list following the name of the shipper. If the name and address of the plant at which pasteurization took place it not imprinted on the container, proper identification of a container may include the name and main address of manufacturer, processor, or distributor plus the code number that identifies the State and plant in which the product was pasteurized.

FIPS Numerical Code for States

State	FIPS Code Number	State	FIPS Code Number	State	FIPS Code Number
Alabama	01	Kentucky	21	North Dakota	38
Alaska	02	Louisiana	22	Ohio	39
Arizona	04	Maine	23	Oklahoma	40

				Wyoming	56

Example: 37-275, 37 indicates processing plant is located in North Carolina. 275 identifies a plant within the State.

It is recommended that the part of the code indicating the State or origin always consist of two digits followed by a hypen; for example, 05- or 48.

The following is a list of Sanitation Compliance and Enforcement Ratings of Interstate Milk Shippers located outside the United States of America and Puerto Rico. These interstate milk shippers have been rated by the state rating agency of the state under which the listing is shown in the same manner as the state rating agency lists their domestic interstate milk shippers or the interstate milk shipper has been rated and listed by a Third Party Certifier (TPC) operating under the NCIMS International Certification Pilot Program (ICPP). A new field has been provided for the country in which the foreign firm is located and the identification of the TPC has been added under the rating agency.

NOTE: PRODUCT CODES ARE THE SAME AS FOR DOMESTIC INTERSTATE MILK SHIPPERS.

CERTIFIED MANUFACTURERS OF SINGLE-SERVICE CONTAINERS AND RELATED PRODUCTS

The names of manufacturers of single-service containers for milk and milk products who have been certified by State Milk Sanitation Rating Authorities as being in satisfactory compliance with the requirements found in Fabrication of Single-Service Containers and Closures for Milk and Milk Products are listed on the following pages.

This listing of certified single-service manufacturing plants includes only the names of those plants reported to this office as having been certified by State Milk Sanitation Rating Officers. If furnished to FDA, the coding or identification system used by the manufacturer will be found following the name of the plant and city where it is located.

Space limitations compel us to limit the company name to the name of the parent organization or the name of the division, but not both. If the preferred listing is not indicated on FDA Form 2359d, the editor will select the listing he/she feels is appropriate.

Expiration Date

This date is 15 or 24 months following the survey date. Certifications of single-service manufacturing plants may be valid for 1 or 2 years. In case of a 1 year certification a 90 day grace period was inserted in this list to provide time for transmission of the completed Report of Certification, FDA Form 2359d from states to the Regional Offices, to Headquarters. In order to list firms for 24 months one of two criteria must be met. If one of these criteria are not met the listing will be for 15 months.

The criteria for 24 month listing are:

1. Single Service Manufacturers that operate in conjunction with an IMS listed milk processing plant may be listed for 24 months if the single service plant is inspected at least quarterly using form 2359c (Manufacturing Plant Inspection Report) and records of such inspections and all required tests are maintained by the regulatory agency. The permit for the milk processing plant shall also include inspection of the single service manufacturing areas.
2. Single Service Manufacturers that operate as a separate entity may be listed for 24 months if the regulatory agency has a permit system and inspects the plants, using the FDA form 2359c, at least quarterly. All testing of containers and individual water supplies shall be under the direction of the regulatory agency and kept on file.

Milk laboratories, and the laboratory procedures performed, which have been found to be in substantial compliance with Evaluation of Milk Laboratories, Standard Methods for the Examination of Dairy Products (most recent edition) and Official Methods of Analysis of the Association of Official Analytical Chemists are listed on the following pages. State central laboratories(Cen.) and procedures are approved by Milk Laboratory Evaluation Officers of the Food and Drug Administration (FDA). Official (Off.), commercial (Com.), dairy industry (Ind.) and certified industry supervisor (Sup.) laboratories and procedures are approved by State Milk Laboratory Evaluation Officers. The list includes the laboratory names, locations, numbers assigned by the FDA, expiration dates, the dates of the last two split samples participated in, and the procedures for which the laboratories are approved.

Laboratory Number Code

Five (5) digit numbers are assigned to each laboratory by the FDA. The first two digits identify the state in which the laboratory is located according to the FIPS Numerical Code for States.

The following three digits are assigned according to the laboratory type as shown below:

-- 001--099	Central and Officials Laboratories
-- 100--299	Commercial Laboratories
-- 300--499	Industrial Laboratories
-- 600--799*	Certified Industry Supervisors
-- 800--899	Certified Vitamin Laboratories
-- 900--999	Federal Laboratories

*** The names of Certified Industry Supervisors are listed at the end of the State listings.**

Laboratory Classifications

F = Approved, this laboratory may perform the indicated procedures for IMS purposes.

C = Conditionally approved, this laboratory does not have full status, but may perform the indicated procedures for IMS purposes.

N = Not approved, this laboratory has recently had its approval removed and may no longer be used for official IMS testing.
