Cyclospora spp./Unknown/Jun2026-CARA ID 1384 [OH1.1]

On 6/5/2026, CDC notified CORE Signals of a cyclosporiasis outbreak being investigated by (b)(5) ) associated with a catered lunch from (b)(4) ((b)(5) ). The leading items of interest identified by CDC and (b)(5) were (b)(5) . CORE conducted a traceback investigation through the single point of service, (b)(4) , to their reported sole produce distributor, (b)(4) (b)(5) was sourced from multiple (b)(4) (b)(5) were sourced from (b)(4) , and (b)(5) sourced from (b)(4) ). CORE issued one assignment to FDA's Office of Human Food Inspectorate East II for traceback record collection from (b)(4) . No FDA laboratory samples were collected, and no product or firm actions were taken. No single produce item could be named as the suspect ingredient based on the epidemiologic information collected; no apparent supplier connection to other Cyclospora clusters in the 2026 season was identified. As of 9/3/2026, this outbreak involved a total of 18 confirmed cases across (b)(5) states: (b)(5) with two hospitalizations and no deaths.
