Subject: Confirmation to Drop Alcoholoc Beverages From The List Of Ingredient Uses: MgT GRN 499
Date: Wednesday, August 06, 2014 2:28:15 PM

Dear Mr. Fasano,

Please read below my clients official agreement to drop "alcoholic beverages" from the list of products to which they would possibly add magnesium threonate.

I trust this provides the requested clarification. If anything more is required please let me know.

Warm regards,

Dave

Hi Dave,

Good to hear from you.
Yes, we are willing to drop alcoholic beverage from the list of potential uses.

Regards,

Guosong

Subject: Call from FDA About MgT GRAS Letter

Greetings,

I received a call from FDA stating that they are about to send out their favorable letter but need to hold it to clarify one last point.

It seems that use in alcoholic beverages is included in the list of possible uses for MgT. FDA says that alcoholic beverages are not usually permitted to have added supplement substances and asked if you would be willing to drop this from the list of potential uses. If so, I would simply send them an email confirming such and they would issue their letter. I recommend dropping alcoholic beverages from the list.

I will await your decision.

Dave
