DURING AN INSPECTION OF YOUR FIRM (I) (WE) OBSERVED:

You did not have a written food safety plan.

Specifically, you must prepare, or have prepared, and implement a food safety plan. This must include but is not limited to a written hazard analysis evaluating each known or reasonably foreseeable hazard including an evaluation of animal food you process, pack, or hold in your facility. The hazard analysis must assess the severity of illness or injury to humans or animals if the hazard were to occur and the probability that the hazard will occur in the absence of a preventive control. Your hazard evaluation needs to consider all chemical, physical, and biological hazards associated with all ingredients and processing steps including but not limited to receiving, storage, packaging, labeling, and transportation.

The known and reasonably foreseeable hazards associated with this facility include but are not limited to foreign materials such as wood, metal, stones, and plastic; mycotoxins, botulism, pesticides, petroleum-based lubricants and any other contaminants.
