December 2016

Page 50 of 50

Orange Book Approved Products Report Total: 1064

Current Edition Footnote Count: 1006

Annual Orange Book Preface 1.11 Discontinued Section

Those drug products in the Discontinued Section of the Orange Book in which a determination has already been made that the products were not withdrawn for safety or efficacy reasons have "***Federal Register determination that product was not discontinued or withdrawn for safety or efficacy reasons**" following the product strength. Those drug products are only reflective of citizen petitions determinations made since 1995. The identification of these drug products in the Discontinued Section of the Orange Book should avoid the submission of multiple citizen petitions for the same drug product. FR notices no longer applicable are removed from the Annual Edition (i.e., there is a currently marketed Reference Listed Drug and no applicable patent or exclusivity). <http://www.fda.gov/cder/ogd/OrangeBookFRSafetyorEffectivenessDeterminationsList.pdf> lists products that have current and removed notices. The list is updated quarterly. Notices issued during the year are added to the Electronic Orange Book Query in the month they become effective.

The report is sorted by Active Ingredient(s), Dosage Form;Route, Trade Name, Firm Name and Potency. Included are Type (Rx, OTC, Discn), Application Number, Product Number, Federal Register Notice Date and Yes/No denoting whether the Footnote is currently in the Annual Edition Orange Book or has been added to the Electronic Orange Book Query since the last edition was published.
