Cmax 110v Surgical Table Hand Control. The Cmax Surgical Table is a mobile, electro-hydraulically operated surgical table designed to support all general surgical procedures, with the addition of STERIS table accessories. Tabletop positioning and articulations are controlled via the hand control. Model # 2182625, Recall # Z-1599-2009

Serial #'s: AC0001 to AC0221

**RECALLING FIRM/MANUFACTURER**

Recalling Firm: Steris Corp., Mentor, OH, by letter dated May 12, 2009.

Manufacturer: Steris Corp., Montgomery, AL. Firm initiated recall is ongoing.

**REASON**

A limited quantity of the Cmax Hand Controls, P150832-500, were manufactured without Loctite thread locker on the screws that attach the mounting clip to the hand control case. This clip provides a means of storing the hand control on the table side rails. It is possible that screws without Loctite can work loose and the clip can become separated from the hand control. If both screws back out completely, the internal components of the hand control and/or the table control board may become damaged. This would cause a loss of hand control functionality.
