

Notification of Stolen Mead Johnson Products

February 1, 2010: Mead Johnson Nutrition is working with the U.S. Food and Drug Administration's Office of Criminal Investigations (FDA), and other law enforcement officials to recover cases of infant formula and other nutritional products that were stolen from a truck stop in Newton, Illinois, on January 28, 2010. The list of products stolen is attached.

Not all cases with the indicated batch numbers were in the stolen shipment, and some have been safely delivered from MJ to retailers, wholesalers or institutions.

Consumers should purchase Mead Johnson products only from well established and reputable retailers. Mead Johnson recommends that consumers always inspect the product and label for signs of tampering before opening. Mead Johnson infant formula products are packaged in "tamper-evident" cans, meaning that if the package has been opened, it will be evident to the consumers.

Retailers, wholesalers and institutions who receive their product directly from Mead Johnson are not affected by this notification.

Mead Johnson Nutrition and the FDA are asking for the public's help in reporting any information regarding the stolen Mead Johnson products to FDA's Office of Criminal Investigations (OCI) by calling (800) 551-3989 or by visiting the OCI website www.fda.gov/OCI.

Consumers who have any question regarding Mead Johnson products may contact us at 1-800-BABY-123.

How to Locate Product Batch Numbers

Product batch numbers can be found on both sides of each case, as well as on the can bottom of each powdered product, and on the can top of each liquid infant formula product.

Product batch numbers for Expecta® capsules can be found on both sides of each case, as well as on the bottom of the carton.

Product batch numbers for the liquid vitamin products can be found on both sides of each case, as well as on the bottom seal of the carton and printed on the label of the bottle.
