Re: GRAS Notice No. AGRN 000-002

Dear Ms. Marrapese:

The Food and Drug Administration (FDA) is responding to the notice, dated November 15, 2010, as amended November 17, 2010, and March 3, 2011, that you submitted under FDA's Center for Veterinary Medicine (CVM) Pilot Program for substances generally recognized as safe (GRAS) added to food for animals (See 75 FR 31800; June 4, 2010). CVM received the notice on November 17, 2010, filed it on December 23, 2010, and designated it as GRAS Notice No. 000-002.

The subject of your notice is Penicillin G Potassium. The notice informs the FDA of the view of Lallemand Specialties, Inc. that Penicillin G Potassium is GRAS, through scientific procedures, for use as an ingredient in animal feed for livestock animals (beef cattle, dairy cows, broiler chickens, egg-laying chickens, swine, and sheep) and pets (dogs, cats, rabbits, guinea pigs and horses) as a processing aid in the production of non-food grade and food grade ethanol at a level not to exceed 6 ppm dose of commercial product (2.7 ppm of Penicillin G in the fermentor).

In a letter dated August 12, 2011, you asked that FDA cease to evaluate your notice. Given your letter, we ceased to evaluate your GRAS notice for animal food, effective August 12, 2011, the date that we received your letter.

In accordance with Federal Register notice announcing the CVM Pilot Program, a copy of the text of this letter responding to **AGRN** 000-002, and a copy of the information in this notice that conforms to the information described in your GRAS exemption claim is available for public review and copying via the FDA home page at <http://www.fda.gov>. To view or obtain an electronic copy of this information, follow the hyperlinks from the "Animal & Veterinary" topic to the "Products" section to the "Animal Food & Feeds" to the "Generally Recognized as Safe (GRAS) Notifications" page where the Animal Food GRAS Inventory is listed.

If you have any questions about this letter, please contact Dr. M. Thomas Hendricks at 240-453-6869 or by email at thomas.hendricks@fda.hhs.gov. Please reference AGRN 000-002 in any future correspondence regarding this submission.

Sincerely,

/s/

Sharon A. Benz, Ph.D., PAS
