

CDRH Mission

- The mission of the Center for Devices and Radiological Health (CDRH) is to protect and promote the public health.
- We assure that patients and providers have timely and continued access to safe, effective, and high-quality medical devices and safe radiation-emitting products. We provide consumers, patients, their caregivers, and providers with understandable and accessible science-based information about the products we oversee
- We facilitate medical device innovation by advancing regulatory science, providing industry with predictable, consistent, transparent, and efficient regulatory pathways, and assuring consumer confidence in devices marketed in the U.S.

Today's Workshop

- 10 complex questions posed
- Outstanding presentations
- Thoughtful comments/input from attendees
- Many questions partially answered
 - » Some may require further consensus development among the glaucoma community

Next Steps

- Availability of today's proceedings
 - » <http://www.fda.gov/MedicalDevices/NewsEvents/WorkshopsConferences/ucm318305.htm>
- Manuscript publication
- Continued collaborative work with the American Glaucoma Society to address remaining questions

Thank you
