

# Printing Characteristics and Parameters

- **For polymers, how do laser and material parameters (e.g., laser wavelength, optical scattering of polymer) affect the microstructure of samples generated by photopolymerization or thermosetting? Are these relationships well understood?**

<http://www.regulations.gov/#!documentDetail;D=FDA-2014-N-0432-0001>

- **What are the critical parameters in the AM space for a successful printing process? What needs to be considered?**

<http://www.regulations.gov/#!documentDetail;D=FDA-2014-N-0432-0001>

- **What parameters can you track to ensure a successful build process?**

<http://www.regulations.gov/#!documentDetail;D=FDA-2014-N-0432-0001>

- **Are there specific considerations for determining if a print job should be rejected?**
