<sup>3</sup> Shall be guaranteed only when total sodium exceeds that furnished by the maximum salt guarantee.

<sup>4</sup> Other than precursors of Vitamin A.

**INGREDIENTS**

Each ingredient must be named in accordance with the names and definitions adopted by the Association of American Feed Control Officials.

---

\*Final printed label of Type C Medicated Feed must bear a single drug concentration of this drug.

## **FEEDING DIRECTIONS**

Must be top dressed or mixed with a Type C feed containing 6.8 to 24 g/ton zilpaterol (to provide 60 mg/head/day via component feed).

Feed at the rate of 0.5 to 2.0 lb/head/day (specify one level) to provide 0.25 to 0.5 mg melengestrol acetate/head/day (specify one level). Feed melengestrol acetate in this combination for the final 20 to 40 days on feed.

**CAUTION:** Melengestrol acetate is not effective in steers and spayed heifers. Withdrawal periods of three to five days or more should be avoided to prevent the possibility that the heifers may come into estrus (heat) at loading time.
