Includes three categories of bulk drug substances:

- [Category 1: Bulk Drug Substances Under Evaluation](#)
- [Category 2: Bulk Drug Substances that Raise Significant Safety Concerns](#)
- [Category 3: Bulk Drug Substances Nominated Without Adequate Support](#)

Notice of Updates to Section 503A Categories

- Removals from Category 2 – Consistent with the interim policy guidance, FDA is providing notice to the public before removing the following bulk drug substances from category 2:
 - “AOD-9604” will be removed from Category 2 after 7 calendar days because the nominations were withdrawn by the nominators. However, please note that FDA has [announced](#) that it will consult the Pharmacy Compounding Advisory Committee (PCAC) on December 4, 2024 regarding the potential inclusion of AOD-9604-related bulk drug substances (AOD-9406 acetate and AOD-9604 (free base)) on the 503A bulks list.
 - “CJC-1295” will be removed from Category 2 after 7 calendar days because the nominations were withdrawn by the nominators. However, please note that FDA has [announced](#) that it will consult the PCAC on December 4, 2024 regarding the potential inclusion of CJC-1295-related bulk drug substances (CJC-1295 (free base), CJC-1295 acetate, CJC-1295 with drug affinity complex (DAC) (free base), CJC-1295 DAC acetate, and CJC-1295 DAC trifluoroacetate)) on the 503A bulks list.
 - “Ipamorelin acetate” will be removed from Category 2 after 7 calendar days because the nominations were withdrawn by the nominators. However, please note that FDA has [announced](#) that it will consult the PCAC on October 29, 2024 regarding the potential inclusion of Ipamorelin-related bulk drug substances (Ipamorelin acetate and Ipamorelin (free base)) on the 503A bulks list.
 - “Thymosin alpha-1 (Ta1)” will be removed from Category 2 after 7 calendar days because the nomination was withdrawn by the nominator. However, please note that FDA has [announced](#) that it will consult the PCAC on December 4, 2024 regarding the potential inclusion of Thymosin alpha-1-related bulk drug substances (Thymosin alpha-1 acetate and Thymosin alpha-1 (free base)) on the 503A bulks list.
 - “Selank acetate (TP-7)” will be removed from Category 2 after 7 days because this bulk drug substance was nominated in error. FDA received additional information from the nominator indicating that it intended to nominate a different bulk drug substance.
- Visit [Interim Policy on Compounding Using Bulk Drug Substances Under Section 503A¹](#) and the [final rule](#) on bulk drug substances that can be used for compounding under section 503A.

¹ The draft guidance for industry “Interim Policy on Compounding Using Bulk Drug Substances Under Section 503A of the Federal Food, Drug, and Cosmetic Act – Revision 2,” was published on December 7, 2023. The guidance, if finalized as written, would end the categorization of bulk drug substances into Categories 1, 2, or 3 for those bulk drug substances nominated on or after the date of publication of the final guidance.
