Bulk Drug Substances Nominated for Use in Compounding Under Section 503B of the Federal Food, Drug, and Cosmetic Act

Three categories of bulk drug substances:

- [Category 1: Bulk Drug Substances Under Evaluation](#)
- [Category 2: Bulk Drug Substances that Raise Significant Safety Risks](#)
- [Category 3: Bulk Drug Substances Nominated Without Adequate Support](#)

Updates to Categories of Substances Nominated for the 503B Bulk Drug Substances List

Additions to Category 3:

- Formaldehyde will be moved from Category 1 to Category 3 because the Agency determined that it was nominated with insufficient information to evaluate it for inclusion on the 503B Bulks List.

503B Category 1: Bulk Drug Substances Under Evaluation

** Designates bulk drug substances that are components of FDA approved drugs¹

Bulk drug substances used in compounding under section 503B of the Federal Food, Drug, and Cosmetic Act must meet certain other requirements, including, if an applicable monograph exists under the United States Pharmacopeia (USP), National Formulary (NF), or another compendium or pharmacopeia recognized by the Secretary, the bulk drug substance complies with the monograph.

Although for the purposes of the substance names in the categories, hydrated forms of the substance described in the applicable USP-NF drug substance monograph are included in the scope of the substance name when a hydrate form is not specified, the differences in physical and chemical properties (e.g., solubility, stability) of different hydrated forms of the bulk drug substance on the performance of the compounded drug product should be evaluated by the outsourcing facility. For aqueous solutions, the differences in physical and chemical properties mentioned above may not be relevant. However, such differences can impact the product performance for solid dosage forms.

- 5-Methyltetrahydrofolate Calcium
- 17-alpha-Hydroxyprogesterone
- Acetaminophen**
- Acetylcysteine**
- Acyclovir**
- Adapalene**
- Adenosine**
- Allantoin
- Alpha Lipoic Acid
- Alprostadil**
- Aluminum Chloride Hexahydrate
- Aluminum potassium sulfate
- Amantadine Hydrochloride**
- Aminophylline**
- Amiodarone Hydrochloride**
- Amitriptyline Hydrochloride**
- Amphotericin B**
- Anastrozole**
- Arginine Hydrochloride/L-arginine Hydrochloride**
- Ascorbic acid**
- Ascorbyl Palmitate
- Aspartic Acid
- Atenolol**
- Atropine sulfate**
- Azelaic Acid**
- Azithromycin**
- Baclofen**
- Benzocaine
- Benzoyl Peroxide**
- Betahistine Hydrochloride
- Betamethasone Acetate**
- Betamethasone Dipropionate**
- Betamethasone Sodium Phosphate**
- Betamethasone Valerate**
- Bethanechol Chloride**
- Bimatoprost**
- Biotin**
- Bismuth Nitrate Oxide
- Boric Acid

¹ A condition of section 503B of the FD&C Act is that the compounded drug product is not essentially a copy of one or more approved drug products. For more information about the “essentially a copy” provision in section 503B, see FDA’s guidance for industry [“Compounded Drug Products That Are Essentially Copies of Approved Drug Products Under Section 503B of the Federal Food, Drug, and Cosmetic Act.”](#) In addition, FDA does not intend to take action against an outsourcing facility for failing to compound in accordance with section 503B(a)(5) if it fills orders for a compounded drug that is essentially a copy of an approved drug that has been discontinued and is no longer marketed. Bulk drug substances in Category 1 that are components of FDA-approved drugs are designated with two asterisks (**) below.

- Brilliant Blue G**
- Brimonidine Tartrate**
