Bulk Drug Substances Nominated for Use in Compounding Under Section 503B of the Federal Food, Drug, and Cosmetic Act

Three categories of bulk drug substances:

- **Category 1: Bulk Drug Substances Under Evaluation**
- **Category 2: Bulk Drug Substances that Raise Significant Safety Risks**
- **Category 3: Bulk Drug Substances Nominated Without Adequate Support**

Updates to Categories of Substances Nominated for the 503B Bulk Drug Substances List

- **Additions to Category 2:**
  
  - **Edetate Disodium** will be moved from Category 1 to Category 2 due to the significant safety risk of medical providers inadvertently interchanging edetate disodium with edetate calcium disodium.\(^1\) In the Federal Register notice published June 12, 2008, FDA withdrew “approval of one new drug application (NDA) and two abbreviated new drug applications (ANDAs) for edetate disodium injection.” The notice stated, “there have been cases where children and adults have died when they were mistakenly given edetate disodium instead of edetate calcium disodium (calcium disodium versenate) or when edetate disodium was used for indications other than those approved by FDA.”\(^2\)
  
  - **Neomycin Sulfate** will be moved from Category 1 to Category 2 due to the significant safety risk that “systemic exposure to neomycin sulfate, whether resulting from intravenous or IM administration, or resulting from absorption after instillation in or irrigation of body cavities, structures or spaces, or from use in wet dressings may cause nephrotoxicity, irreversible ototoxicity (both auditory and vestibular), and neuromuscular blockade which may result in muscular paralysis or respiratory failure.”\(^3\)
    
    - The entry will be listed as: Neomycin Sulfate (all parenteral drug products containing neomycin sulfate except when used for ophthalmic or otic use or in combination with polymyxin B sulfate for irrigation of the intact bladder)\(^4\)

---

\(^1\) FDA found that there is no clinical need for outsourcing facilities to compound using the bulk drug substance edetate calcium disodium and therefore made a final determination to not include this bulk drug substance on the 503B Bulks List. See the Federal Register notice of January 27, 2022 (87 FR 4240) available at [https://www.federalregister.gov/documents/2022/01/27/2022-01558/list-of-bulk-drug-substances-for-which-there-is-a-clinical-need-under-section-503b-of-the-federal](https://www.federalregister.gov/documents/2022/01/27/2022-01558/list-of-bulk-drug-substances-for-which-there-is-a-clinical-need-under-section-503b-of-the-federal), accessed April 1, 2022.

\(^3\) See page 1104 of FDA Briefing Document Pharmacy Compounding Advisory Committee (PCAC) Meeting (June 2021) available at [https://www.fda.gov/media/149084/download](https://www.fda.gov/media/149084/download), accessed April 1, 2022.

\(^4\) FDA has not received any nominations for neomycin sulfate for ophthalmic or otic use or in combination with polymyxin B sulfate for irrigation of the intact bladder, therefore the substance will be removed from Category 1 and listed only in Category 2.
503B Category 1: Bulk Drug Substances Under Evaluation

** Designates bulk drug substances that are components of FDA approved drugs

- 5-Methyltetrahydrofolate Calcium
- 17-alpha-Hydroxyprogesterone
- Acetylcysteine**
- Acyclovir**
- Adapalene**
- Adenosine**
- Allantoin
- Alpha Lipoic Acid
- Alprostadil**
- Aluminum Chloride Hexahydrate
- Aluminum potassium sulfate
- Amantadine Hydrochloride**
- Amiodarone Hydrochloride**
- Amitriptyline Hydrochloride**
- Amphotericin B**
- Anastrozole**
- Arginine Hydrochloride/L-arginine Hydrochloride**
- Ascorbic acid**
- Ascorbyl Palmitate
- Aspartic Acid
- Atenolol**
- Atropine sulfate**
- Azelaic Acid**
- Azithromycin**
- Baclofen**
- Benzocaine
- Betahistine Hydrochloride
- Betamethasone Acetate**
- Betamethasone Dipropionate**
- Betamethasone Sodium Phosphate**
- Betamethasone Valerate**
- Bethanechol Chloride**
- Bimatoprost**
- Biotin**
- Bismuth Nitrate Oxide
- Brilliant Blue
- Brimonidine Tartrate**
- Bromfenac sodium (for ophthalmic solutions only) **

Bulk drug substances used in compounding under section 503B of the Federal Food, Drug, and Cosmetic Act must meet certain other requirements, including, if an applicable monograph exists under the United States Pharmacopeia (USP), National Formulary (NF), or another compendium or pharmacopeia recognized by the Secretary, the bulk drug substance complies with the monograph.

Although for the purposes of the substance names in the categories, hydrated forms of the substance described in the applicable USP-NF drug substance monograph are included in the scope of the substance name when a hydrate form is not specified, the differences in physical and chemical properties (e.g., solubility, stability) of different hydrated forms of the bulk drug substance on the performance of the compounded drug product should be evaluated by the outsourcing facility. For aqueous solutions, the differences in physical and chemical properties mentioned above may not be relevant. However, such differences can impact the product performance for solid dosage forms.

---

5 A condition of section 503B of the FD&C Act is that the compounded drug product is not essentially a copy of one or more approved drug products. For more information about the “essentially a copy” provision in section 503B, see FDA’s guidance for industry “Compounded Drug Products That Are Essentially Copies of Approved Drug Products Under Section 503B of the Federal Food, Drug, and Cosmetic Act.” In addition, FDA does not intend to take action against an outsourcing facility for failing to compound in accordance with section 503B(a)(5) if it fills orders for a compounded drug that is essentially a copy of an approved drug that has been discontinued and is no longer marketed. Bulk drug substances in Category 1 that are components of FDA-approved drugs are designated with two asterisks (**) below.

503B Category 2: Bulk Drug Substances that Raise Significant Safety Risks

- Chloral Hydrate
- Edetate Disodium
- Germanium Sesquioxide
- Neomycin sulfate (all parenteral drug products containing neomycin sulfate except when used for ophthalmic or otic use or in combination with polymyxin B sulfate for irrigation of the intact bladder)
- Quinacrine Hydrochloride for intrauterine administration
503B Category 3: Bulk Drug Substances Nominated Without Adequate Support

- 4-Aminopyridine
- 7-Keto Dehydroepiandrosterone, Micronized
- Acacia Gum, Spray-Dried Powder
- Acacia Syrup
- Acesulfame Potassium
- Acetanilide
- Acetic acid
- Acetone
- Acetone Sodium Bisulfite
- Acetyl Hexapeptide-3
- Acidophilus Lactobacillus
- Adenosine-5-triphosphate disodium salt
- Agar
- Alcloxa
- Aldioxa
- Aldosterone
- Alfalfa
- Alfalfa leaves
- Alginic acid
- Aliphatic Polyesters
- Almadrate sulfate
- Aloin
- Alpha Ketoglutaric acid
- Alumina Powder, hydrated
- Aluminum acetate
- Aluminum chloride
- Aluminum phosphate
- Aluminum sulfate
- Aminacrine Hydrochloride
- Aminoacetic acid
- Ammonia solution, strong
- Ammonium Alginate
- Ammonium bromide
- Ammonium chloride
- Ammonium hydroxide
- Amylase
- Anise oil
- Anise seed
- Argentyn
- Arginine
- Aromatic powder
- Asafetida
- Asclepias tuberosa
- Asefetida Tincture
- Aspartame
- Aspergillus oryza enzymes
- Attapulgite
- Barosma
- Basic Fuchsin
- Beachwood creosote
- Bean
- Benzalkonium Chloride
- Betamechlamathasone
- Beta-Nicotinamide Adenine Dinucleotide
- Bethanechol
- Bichloroacetic Acid
- Bipeptide Biocosmetic
- Bronopol
- Buffer Solution, pH Buffer Acid
- Butylated Hydroxytoluene
- Butylene Glycol
- Calcium Alginate
- Calcium Folinate
- Calcium glycinate
- Capsules, Empty Gelatin Vegetable
- Carbamide
- Carbazochrome
- Carbimazole
- Carbolic Acid
- Carbomer 940
- Caustic Potash
- Caustic Soda (sodium hydroxide)
- Cedarwood Essential Oil
- Ceratonia
- Ceresin
- Cetrimide
- Chlorhexidine Diacetate Hydrate
- Choline Bitartrate
- Choline magnesium trisalicylate
- Chondroitin Sulfate
- Chromium glycinate
- Chrysin
- Cidofovir
- Cocoa butter
- Coconut Oil Edible

- Sulisobenzone
- Supposibase-F
- T3 Sodium Dilution
- Talc
- Tannic acid
- Tannic acid glycerite
- Taraxacum officinale
- Tartaric acid
• Tartrate
• Tea Tree Oil
• Teaberry Oil
• Terpin hydrate preparations
• Tetrafluoroethane
• Tetrahydrochloride
• Thaumatin
• Thenyldiamine Hydrochloride
• Theobromine Sodium Salicylate
• Theophylline calcium salicylate
• Theophylline sodium glycinate
• Theophylline, anhydrous
• Theophylline compound with ethylenediamine
• Thiamine mononitrate (vitamin B1)
• Thimerosal
• Thiocic acid
• Thiocyanatoacetate
• Thonzylamine Hydrochloride
• Threonine
• Thylene blue
• Thymol
• Titanium dioxide
• Tolindate
• Toltrazuril
• Tolu balsam
