

## Elemental Analysis Manual: Table of Contents for 1984 Hard-copy Version

- I Introduction**
- II Quality Assurance**
- III Contamination Control**
- IV Analytical Standards**
- V Preanalysis Sample Preparation**
- VI Sample Mineralization**
- VII Separation, Preconcentration, and Speciation**
- VIII Instrumentation**
- IX Data Treatment**
- X Methods**

EAM-1: Sequential Determination of Arsenic, Selenium, Antimony, and Tellurium in Foods via Rapid Hydride Evolution and Atomic Absorption Spectrometry, J.A. Fiorino, J.W. Jones, and S.G. Capar, Anal. Chem. (1976) 48, 120-126.

EAM-2: Determination of Trace Amounts of Selenium in Corn, Lettuce, Potatoes, Soybeans, and Wheat by Hydride Generation/Condensation and Flame Atomic Adsorption Spectrometry, M.H. Hahn, R.W. Kuennen, J.A. Caruso and F.L. Fricke, J. Agric. Food Chem. (1981) 29, 792-796.

EAM-3: Analysis of Foods for Lead, Cadmium, Copper, Zinc, Arsenic, and Selenium Using Closed System Sample Digestion: Collaborative Study, W. Holak, J. Assoc. Off. Anal. Chem. (1980) 63, 485-495.

EAM-4: Determination of Lead and Cadmium in Foods by Anodic Stripping Voltammetry: Collaborative Study, S.G. Capar, R.J. Gajan, E. Madsar, R.H. Albert, M. Sanders, and J. Zyren, J. Assoc. Off. Anal. Chem. (1982) 65, 978-986.

EAM-5: Quantitative Determination of Lead and Cadmium in Total Diet Market Baskets by Flameless Atomic Absorption, B.E. Young and K.C. Faul, FDA LIB 2403 (1981) 13 pp.

EAM-6: Dry Ash-Voltammetric Determination of Cadmium, Copper, Lead, and Zinc in Foods, J.W. Jones, R.J. Gajan, K.W. Boyer, and J.A. Fiorino, J. Assoc. Off. Anal. Chem. (1977) 60, 826-832.

EAM-7: Rapid Heated Block Digestion of Total Diet Samples for the Determination of Na, K, P, Ca, Cu, Fe, Mg, Mn, and Zn by ICP Emission Spectrometry, R. Marts, FDA LIB (to be issued)

EAM-8: The method which previously occupied this space has been deleted from the EAM. This space is reserved for a future method.

EAM-9: Semi-Automated Method for the Determination of Iodine in Total Diet Market Baskets, R.G. Luchtefeld, FDA LIB 1678 (1974) 8 pp.

EAM-10: Mercury-Flameless Atomic Absorption Method - Official Final Action, Official Methods of Analysis (1980) 13th Ed., AOAC, Arlington, VA 25.110-25.114.

EAM-11: MERCURY - ALTERNATE DIGESTION METHOD FOR SEAFOOD, Official Methods of Analysis (1980) 13th Ed., AOAC, Arlington, VA 25.115, 25.116, 25.110-25.112.

EAM-12: Electron Capture Gas-Liquid Chromatographic Determination of Methyl Mercury in Fish and Shellfish: Collaborative Study, S.C. Hight and S.G. Capar, JAOAC (1983) 66, 1121-1128.

EAM-13: Cadmium and Lead in Earthenware - Official Final Action - AOAC - ASTM Method, Official Methods of Analysis (1980) 13th Ed., AOAC, Arlington, VA 25.031-25.034.

EAM-14: Determination of Toxic and nutritional Elements in Raw Agricultural Crops Using ICAP Spectroscopy, K.A. Wolnik, R.W. Kuennen and F.F. Fricke, Dev. At. Plasma Spectrochem. Anal., Barnes, Ed., Hyden & Sons, Inc., Philadelphia, PA (1982) 685-696.

EAM-15: Critical Evaluation of a Multi-Element Scheme Using Plasma Emission and Hydride Evolution Atomic Absorption Spectrometry for Analysis of Plant and Animal Tissues, J.W. Jones, S.G. Capar and T.C. O'Haver, Analyst (1982) 107, 353-377.

EAM-16: The method which previously occupied this space has been deleted from the EAM. This space is reserved for a future method.

EAM-17: Sample Homogenization Procedure for Determination of Lead in Canned Foods, J.W. Jones and K.W. Boyer, J. Assoc. Off. Anal. Chem. (1979) 62, 122-128.

EAM-18: Lead, Fluoride, and Other Elements in Bonemeal Supplements, S.G. Capar and J.H. Gould, J. Assoc. Off. Anal. Chem. (1979) 62, 1054-1061.

EAM-19: Determination of Lead Extracted from Electric Tea Kettles, FDA LIB 2170 (1978)  
3 pp.

EAM-20: The method which previously occupied this space has been deleted from the EAM.  
This space is reserved for a future method.

## for Food and Related Products

### Table of Contents

#### Introduction to EAM

#### Chapter 1 Regulatory Considerations

##### 1.1 Regulatory Authority

- Food
- Food Labeling
- Food Additives
- Foodware
- Food Packaging
- Special Nutritional Foods

##### 1.2 Regulatory Operations

- Regulatory Procedures Manual
- Compliance Policy Guides
- Compliance Program Guidance manual
- Investigations Operation Manual
- Laboratory Procedures Manual

##### 1.3 Analytical Methods for Regulatory Analysis

- Choice of Method
- Documentation

#### Chapter 2 Preparation of Analytical Samples

##### 2.1 Portion of Laboratory Sample to be Analyzed

- Food
- Foodware
- Packaging
- Special Nutritional Foods

##### 2.2 Test Sample Preparation

- Compositing
- Comminuting Equipment
- Comminuting Procedures
- Test Sample Decomposition

## Chapter 3 General Analytical Operations and Information

- 3.1 Basic Analytical Techniques
  - Contamination Control
  - Special Calculations
  - Analytical Limits
- 3.2 Sources of Calibration Standards
  - Elements
  - Organometallics
- 3.3 Sources of Reference Materials
  - Certifying Organizations
  - In-House Reference Materials
- 3.4 Equipment Performance Checks
  - General Laboratory Equipment
  - Special Laboratory Equipment
  - Analytical Instruments
- 3.5 Components of an Analysis SOP
- 3.6 Analytical Method Validation
- 3.7 Equipment Information
  - Analytical Instruments
  - General Laboratory Equipment
- 3.8 Typical Element Concentrations
  - Food
  - Dietary Supplements
  - Herbal Supplements
  - Medical Foods
  - Foodware

## Chapter 4 Analytical Methods

### Introduction

Performance Based Methods

Addition of New Methods

Extension of EAM Methods

4.1 Flame Atomic Absorption Spectrometric Determination of Lead and Cadmium  
Extracted from Ceramic Foodware

4.2 Graphite Furnace Atomic Absorption Spectrometric Determination of Lead and  
Cadmium Extracted from Ceramic Foodware

### Index
