

Ulesfia - the #1 prescribed branded Rx treatment for head lice²

Patient Co-Pay Assistance Voucher

Please present this coupon to your pharmacist when you drop off your prescription

**PATIENT PAYS
ONLY \$10.00***

Cardholder ID:	1001001
Claims Processor:	RESTAT
BIN No.:	600471
Group No.:	X7720
Rx PCN No.:	7777
Person Code:	01

*On co-pays up to \$60.00 — please see below for program details

Patient/Parent Information: Present this coupon with a valid prescription for any strength / size of U

Pharmacist: Please dispense Ulesfia at up to \$50 off the customer's out-of-pocket expense after their initial co-pay of up to \$10. This claim may be submitted electronically through RESTAT using the information on the front of the card. Submit all claims in NCPDP Standard D.0. Secondary processing should follow NCPDP standards for Co-Pay Only billing (other coverage code 3, 4, or 8); or in some cases, using Coordination of Benefits processing, dependent on your pharmacy's software requirements. You will be reimbursed a fee of \$2.00 plus the discount offered to the customer directly from RESTAT. Pharmacy or customer mail-in claims may be sent to RESTAT, 11900 W Lake Park Drive Milwaukee, WI 53224 for prompt reimbursement. All mail-in claims should include a duplicate pharmacy label or receipt (cash register receipts not accepted) along with a copy of the front of the customer savings card.

Remember to restore patient to primary PBM after claim submission. Call the RESTAT help desk at 1-866-450-3277 for processing questions.

This card is not valid for prescriptions reimbursed under Medicare, Medicaid, or any other federal or state program, or where prohibited by law. **After the patient pays their third party co-pay of up to \$10, Zylera will pay a maximum rebate amount of up to \$50. If a patient's deductible / co-pay exceeds \$60, any and all costs above this \$50 maximum rebate benefit is the patient's responsibility.**

Offer valid only for prescriptions filled in the United States. Zylera Pharmaceuticals, LLC, reserves the right to terminate this program at its sole discretion any time without notice; and no expiration date. It is a violation of federal law to buy, sell, or counterfeit this certificate.

Dear Parent/Patient:

Head lice is very common and your physician has prescribed Ulesfia (benzyl alcohol) Lotion to treat your child. Ulesfia is benzyl alcohol 5%, this is a non-neurotoxic formulation, and is not a pesticide and is the #1 prescribed branded Rx product for the treatment of head lice¹. Your physician has indicated by way of your prescription the proper way to utilize this product for your child. Please follow the specific instructions provided by your physician and your pharmacist. For more information on Ulesfia, please visit: www.ulesfialotion.com.

Ulesfia should be used as part of an overall head lice management program. The following are steps that can be taken to help prevent and control the spread of head lice²:

- Avoid head-to-head (hair-to-hair) contact during play and other activities at home, school, and elsewhere (sports activities, playground, slumber parties, camp).
- Do not share clothing such as hats, scarves, coats, sports uniforms, hair ribbons, or barrettes.
- Do not share combs, brushes, or towels. Disinfect combs and brushes used by an infested person by soaking them in hot water (at least 130°F) for 5-10 minutes. Caution: do not bathe or shampoo in water this hot! This temperature is for laundry use only!
- Do not lie on beds, couches, pillows, carpets, or stuffed animals that have recently been in contact with an infested person.
- Machine wash and dry clothing, bed linens, and other items that an infested person wore or used during the 2 days before treatment using the hot water (130°F) laundry cycle and the high heat drying cycle. Clothing and items that are not washable can be dry-cleaned OR sealed in a plastic bag and stored for 2 weeks.
- Vacuum the floor and furniture, particularly where the infested person sat or lay. However, spending much time and money on housecleaning activities is not necessary to avoid reinfestation by lice or nits that may have fallen off the head or crawled onto furniture or clothing.
- A fine-toothed comb or special nit comb may be used to remove dead lice and nits
- Do not use fumigant sprays or fogs; they are not necessary to control head lice and can be toxic if inhaled or absorbed through the skin.

To help control a head lice outbreak in a community, school, or camp, children can be instructed to avoid activities that may spread head lice.

Dear Pharmacists:

Thank you for stocking and dispensing Ulesfia (benzyl alcohol) Lotion as prescribed by the physician. Ulesfia is the #1 prescribed branded Rx product for the treatment of head lice² and offers a formulation that is non-neurotoxic, non-pesticide, non-flammable and is indicated for patient 6 month of age and older. For more information, please refer to the package insert for full prescribing details or visit www.ulesfialotion.com.

Zylera Pharmaceuticals offers this co-pay assistance voucher of up to \$50 off of every prescription. The same voucher and codes can be used for all of your patients and all Ulesfia prescriptions. Please see the reverse side for complete program details
