1. **DISCUSSION:** Please discuss whether there are sufficient data to support a finding that Vantrela ER (hydrocodone bitartrate extended-release tablets) has properties that can be expected to deter abuse, commenting on support for abuse-deterrent effects for each of the three possible routes of abuse:

   a. Oral
   b. Nasal
   c. Intravenous

2. **VOTE:** Should Vantrela ER be approved for the proposed indication, management of pain severe enough to require daily, around-the-clock, long-term opioid treatment and for which alternative treatment options are inadequate?

3. **VOTE:** If approved, should Vantrela ER be labeled as an abuse-deterrent product by the oral route of abuse?

4. **VOTE:** If approved, should Vantrela ER be labeled as an abuse-deterrent product by the nasal route of abuse?

5. **VOTE:** If approved, should Vantrela ER be labeled as an abuse-deterrent product by the intravenous route of abuse?
