

Supporting Literature Bibliography

Frangoul H, Nemecek ER, Billheimer D, et al. A prospective study of G-CSF–primed bone marrow as a stem-cell source for allogeneic bone marrow transplantation in children: a Pediatric Blood and Marrow Transplant Consortium (PBMTTC) study. *Blood*. 2007;110:4584-4587.

Grupp SA, Frangoul H, Wall D, et al. Use of G-CSF in Matched Sibling Donor Pediatric Allogeneic Transplantation: A Consensus Statement from the Children’s Oncology Group (COG) Transplant Discipline Committee and Pediatric Blood and Marrow Transplant Consortium (PBMTTC) Executive Committee. *Pediatr Blood Cancer*. 2006;46:414–421.

Nagler A, Korenstein-Ilanb A, Amielc A, and Avivib L. Granulocyte colony-stimulating factor generates epigenetic and genetic alterations in lymphocytes of normal volunteer donors of stem cells. *Experimental Hematology*. 2004;32:122–130.

Peerzada JM and Wendler W. Hematopoietic Stem Cell Transplant Research with Pediatric Donors: When Can Institutional Review Boards Approve It? *Transplantation*. 2006;81:1616–1620.

Pentz RD. Healthy Sibling Donation of G-CSF Primed Stem Cells: A Call for Research. *Pediatr Blood Cancer*. 2006;46:407–408.

Pulsipher MA, Levine JE, Hayashi RJ, et al. Safety and efficacy of allogeneic PBSC collection in normal pediatric donors: The Pediatric Blood and Marrow Transplant Consortium Experience (PBMTTC)1996–2003. *Bone Marrow Transplantation*. 2005;35:361–367.

Pulsipher MA, Nagler A, Iannone R, and Nelson RM. Weighing the Risks of G-CSF Administration, Leukopheresis, and Standard Marrow Harvest: Ethical and Safety Considerations for Normal Pediatric Hematopoietic Cell Donors. *Pediatr Blood Cancer*. 2006;46:422–433.
