RE: Notification of Nutritional Support Statements

To whom it may concern:

I hereby notify the Food and Drug Administration (FDA) of the use of statements of nutritional support in the labeling of Artichoke Extract 500™, a dietary supplement. Source Naturals® is the manufacturer of Artichoke Extract 500™.

Statements being made in the labeling of Artichoke Extract 500™

- 1) Artichoke extract stimulates bile production, promoting fat digestion and metabolism.
- 2) By stimulating bile, it supports liver and gallbladder function and may help relieve occasional indigestion.
- 3) Medical experts theorize that it may also inhibit activity of the cholesterol production enzyme HMG CoA Reductase to balance LDL cholesterol and triglyceride production in the liver for cardiovascular support.
- 4) Source Naturals Artichoke Extract 500™ is standardized to 5% cynarin and 15% chlorogenic acids for maximum potency.

To the best of my knowledge and belief, and based upon information available at the time of the execution of this notice, I certify that the above information is accurate and complete. Source Naturals® possesses substantiation that the statements are truthful and not misleading.
