E. Dean Brown
Chair, Denver Health Community Health Services
Board of Directors
12957 E. 48th Ave.
Denver, CO 80239

Dear Dean:

Thank you very much for allowing the Denver Health PolyHeme team to present our prehospital PolyHeme protocol at your last Board meeting. We hope we adequately informed your group on the possible upcoming blood substitute trial at Denver Health.

We would like to enlist your assistance in aiding us in disseminating information and educating the public about their potential inclusion in this possible study. Please forward us any community groups and their contact people you feel would benefit from participating in our presentation. Please contact Dee Martinez at 303-436-6615, or via e-mail at dee.martinez@dhha.org, and she will arrange for the presentation.

Again, thank you for allowing us the time on your agenda, and also for your assistance in helping us disseminate information about this potential life-saving study for the Denver community.

Sincerely,

Ernest E. "Gene" Moore, M.D.
Chief, Surgery and Trauma Services
Principal Investigator, PolyHeme Clinical Trial
