NOTE TO TERESA FLORIDI, OS/ES

Subject: Correspondence from Mr. Steve Wallach, regarding the American Longevity health claim petition that is pending with the FDA that associates omega-3 fatty acids with a reduction in the risk of coronary heart disease. (OS #080220040091, FDA #04-4255) – CLOSE OUT

This letter comments on a qualified health claim for omega-3 fatty acids advanced notice of proposed rulemaking (ANPR) (FDA Docket 91N-0103). We have sent a copy of this letter to our Dockets Management Branch to log in as a comment to the ANPR. We do not intend to respond to his letter, since comments received on the qualified health claim will be addressed in the rulemaking process. Thank you.
