OXYTETRACYCLINE HCl
SOLUBLE POWDER-343

A broad spectrum
ANTIBIOTIC
For control and treatment of specific diseases in poultry, cattle, sheep, swine and bees.

This packet contains 102.4 grams of oxytetracycline HCl
This packet will make:
512 gallons (1,938 L) containing 200 mg oxytetracycline HCl per gallon
256 gallons (969 L) containing 400 mg oxytetracycline HCl per gallon
128 gallons (484.5 L) containing 800 mg oxytetracycline HCl per gallon

For oral use only in poultry, cattle, sheep, swine and bees.

FOR ANIMAL USE ONLY
KEEP OUT OF REACH OF CHILDREN

NET WEIGHT: 135.5 g (4.78 oz)
ANADA 200-247, APPROVED BY FDA
INDICATIONS AND DIRECTIONS FOR USE

For the control of the following poultry diseases caused by organisms susceptible to oxytetracycline: Add the following amount to two gallons of stock solution when proportioner is set to meter at the rate of one ounce per gallon.

CHICKENS

<table>
<thead>
<tr>
<th>Disease</th>
<th>Dosage</th>
<th>Packets/2 Gallons</th>
</tr>
</thead>
<tbody>
<tr>
<td>Infectious synovitis caused by Mycoplasma synoviae</td>
<td>200-400 mg/gal</td>
<td>½ - ⅓</td>
</tr>
<tr>
<td>Chronic respiratory disease (CRD) and air sac infection caused by Mycoplasma gallisepticum and Escherichia coli</td>
<td>400-800 mg/gal</td>
<td>⅔ - ⅔</td>

<tr>
<td>Growing Turkeys—Complicating bacterial organisms associated with blue comb (transmissible encephalitis, body weight daily coronaviral encephalitis)</td>
<td>25 mg/lb varies with age &amp; water consumption (1 packet will treat 8,192 pounds of turkeys)</td>
<td></td>
</tr>
</tbody>
</table>

Medicate continuously at the first clinical signs of disease and continue for 7 to 14 consecutive days. If improvement is not noted within 24-48 hours, consult a poultry diagnostic laboratory or poultry pathologist to determine diagnosis and advice on dosage.

For the control and treatment of the following diseases caused by organisms susceptible to oxytetracycline:

SWINE

<table>
<thead>
<tr>
<th>Disease</th>
<th>Dosage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bacterial enteritis caused by Escherichia coli and Salmonella choleraesuis</td>
<td>Administer in the drinking water at a level of 10 mg oxytetracycline HCl per pound of body weight daily. Administer up to 14 days.</td>
</tr>
<tr>
<td>Bacterial pneumonia caused by Pasteurella multocida</td>
<td></td>
</tr>
</tbody>
</table>

For Breeding Swine: Leptospirosis (reducing the incidence of abortions and shedding of leptospira) caused by Leptospira pomona.

CALVES, BEEF CATTLE AND NON-LACTATING DAIRY CATTLE

</thead>
<tbody>
<tr>
<td>American and European foulbrood caused by Bacillus larvae susceptible to oxytetracycline.</td>
<td>Remove at least 6 weeks prior to main honey flow. 200 mg/kiloxy</td>
</tr>
</tbody>
</table>

CAUTION: Use as sole source of oxytetracycline. Prepare fresh solutions every 24 hours.

Special Note: The concentration of drug required in medicated water must be adequate to compensate for variation in the age of the animal, feed consumption rate and the environmental temperature and humidity, each of which affects water consumption.

WARNING: Do not administer to turkeys, cattle or sheep within 5 days of slaughter. Zero-day slaughter withdrawal in swine. Do not administer to chickens or turkeys producing eggs for human consumption. Do not administer this product with milk or milk replacers. Administer 1 hour before or 2 hours after feeding milk or milk replacers.

A withdrawal period has not been established for this product in prernating calves. Do not use in calves to be processed for veal.

A milk discard period has not been established for this product in lactating dairy cattle. Do not use in female dairy cattle 20 months of age or older.

RECOMMENDED STORAGE: STORE BELOW 77 F (25 C) FOR USE IN DRINKING WATER ONLY NOT FOR USE IN LIQUID FEED SUPPLEMENTS FOR ANIMAL USE ONLY. KEEP OUT OF REACH OF CHILDREN Restricted Drug(s) (California), Not For Human Use. Use Only As Directed.

Manufactured by Phoenix Scientific, Inc.
St. Joseph, MO 64503

Lot No. Exp. Date
OXYTETRACYCLINE HCl
SOLUBLE POWDER-343

A broad spectrum
ANTIBIOTIC

For control and treatment of specific diseases in poultry, cattle, sheep, swine and bees.

This packet contains 204.8 grams of oxytetracycline HCl

This packet will make:
1,024 gallons (3,876 L) containing 200 mg oxytetracycline HCl per gallon
512 gallons (1,938 L) containing 400 mg oxytetracycline HCl per gallon
256 gallons (969 L) containing 800 mg oxytetracycline HCl per gallon

For oral use only in poultry, cattle, sheep, swine and bees.

FOR ANIMAL USE ONLY
KEEP OUT OF REACH OF CHILDREN
NET WEIGHT: 272.2 g (9.6 oz)

ANADA 200-247, APPROVED BY FDA

AmTech Group, Inc.
INDICATIONS AND DIRECTIONS FOR USE

For the control of the following poultry diseases caused by organisms susceptible to oxytetracycline: Add the following amount to two gallons of stock solution when proportioner is set to meter at the rate of one ounce per gallon.

Medicate continuously at the first clinical signs of disease and continue for 7 to 14 consecutive days. If improvement is not noted within 24-48 hours, consult a poultry diagnostic laboratory or poultry pathologist to determine diagnosis and advice on dosage.

For the control and treatment of the following diseases caused by organisms susceptible to oxytetracycline:

### SWINE

- Bacterial enteritis caused by Escherichia coli and Salmonella choleraduis
- Bacterial pneumonia caused by Pasteurella multocida

Administer in the drinking water at a level of 10 mg oxytetracycline HCl per pound of body weight daily.

Administer up to 14 days.

### CALVES, BEEF CATTLE AND NON-LACTATING DAIRY CATTLE

- Bacterial enteritis caused by Escherichia coli
- Bacterial pneumonia (shipping fever complex) caused by Pasteurella multocida

Administer in the drinking water at a level of 10 mg oxytetracycline HCl per pound of body weight daily.

Administer up to 14 days.

### SHEEP

- American and European Foulbrood caused by Bacillus larvae susceptible to oxytetracycline

200 mg/colony

Remove at least 6 weeks prior to main honey flow.

This packet will treat 10,240 pounds of swine, cattle or sheep at 10 mg/pound.

### HONEY BEES

- American and European Foulbrood caused by Bacillus larvae susceptible to oxytetracycline

200 mg/colony

Remove at least 6 weeks prior to main honey flow.

CAUTION: Use as sole source of oxytetracycline. Prepare fresh solutions every 24 hours.

Special Note: The concentration of drug required in medicated water must be adequate to compensate for variation in the age of the animal, feed consumption rate and the environmental temperature and humidity, each of which affects water consumption.

WARNING: Do not administer to turkeys, cattle or sheep within 5 days of slaughter. Zero-day slaughter withdrawal in swine. Do not administer to animals or turkeys producing eggs for human consumption. Do not administer this product with milk or milk replacers. Administer 1 hour before or 2 hours after feeding milk or milk replacers.

A withdrawal period has not been established for this product in preceeding calves. Do not use in calves to be processed for veal.

A milk discard period has not been established for this product in lactating dairy cattle. Do not use in female dairy cattle 20 months of age or older.

RECOMMENDED STORAGE: STORE BELOW 77°F (25°C)
