

**Food Advisory Committee
Contaminants and Natural Toxicants Subcommittee
June 8, 2004 Furan Meeting**

Charge and Question

Charge:

The Food Advisory Committee and Contaminants and Natural Toxicants Subcommittee are being asked to provide input on data that would be helpful for further evaluation of potential risks posed by the presence of furan in food.

Question:

Taking into consideration the data needs already identified in the Federal Register notice requesting data on furan, and the presentations at this meeting, are there any additional data that are needed to fully assess the risk of furan in food?
