DRAFT

1

Unanswered Problems

- Diagnosis of rupture
- Solutions for:
 - High re-operation rate
 - Capsular contracture
 - Stretch deformities
 - Infection / seroma
 - Surveillance for “odd-diseases”

Augmentation Mammoplasty: Outcomes Not Improved In 20 Years

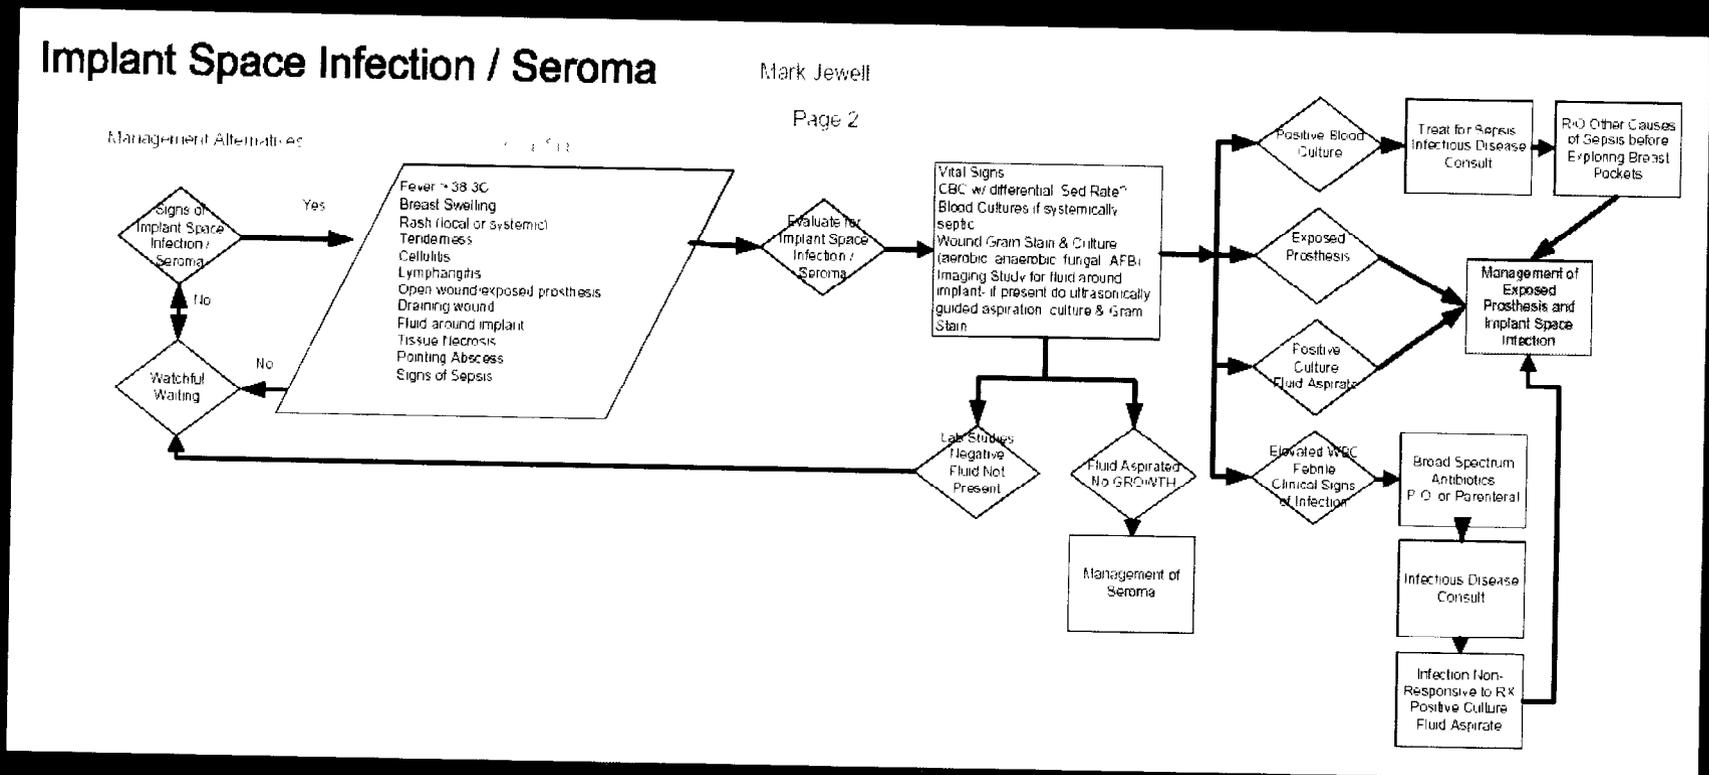

- **Insert complications table from CK.**

Quality And Outcome Improvement Strategies: "Expert Practices"

- Strategy to improve
 - Long-term quality of outcome
 - Correct sizing
 - Reduce frequency of re-operation
 - Surgical risk
 - Technical factors
 - Improvement in patient satisfaction
 - Education process ; surveys
 - Problem situations in pre / post operative management
 - Staff and surgeon need to identify potential problems
 - Economics: professional liability claims, cost of re-do's

- John Tebbetts, M.D. sponsors work group to develop treatment algorithms to provide solutions for FDA

Evaluation Of Seroma / Infection
