---

I am writing on behalf of Dr. Joseph Scherzer. I am a patient of the doctor and feel the restrictions put on doctors who are currently compounding and prescribing ingredients or a combination of ingredients they feel meet their patients needs are taking away why they treat us in the first place. They can better prescribe the medicine at a better cost and give us specifically what we need. I am against these restrictions to no longer make it available to provide us this service.

Thank you,
