

Dear FDA,

I am writing to express my concern over the genetically engineered (GE) food, to ask that policies be changed, and to support all the policies, specifically:

- All GE foods should be labeled so I can make an informed choice.
- GE foods should not be assumed to be "safe" and should have mandatory pre-market safety testing.
- There should be a moratorium on GE foods and crops until long term studies show they are safe for human health and the environment.

Little Marais, MN 55614

Additional Personal Comments: I would add independent long term studies. The FDA should also initiate an  
campaign on TV to explain GE differences to general public.
