Commissioner Jane Henney  
Docket #00P-1211/CP1  
5630 Fishers Lane, Rm. 1061(HFA-305)  
Rockville, MD 20852

Dear Commissioner Henney,

I am extremely concerned with the use of generic engineering in the food chain - both with plants and with animals. I am very clear that I do not want my food manipulated in this way. I can see, however, it is inevitable that there will be experimenting in this area. As that is a fact I demand pre-market safety testing, environmental review, and labeling of all GMO products. It is the height of ignorance and arrogance that leads people to manipulate nature when they have so little understanding of the consequences to both the planet and all the living things on it.

Sincerely,

Tony Keppelman

00P-1211
