

To Dockets Management Branch

2000-01-04, France
Mouans Sartoux

Dear Sirs,

I have read about the cruel practice that throws the hens systems into collapse by forced molting.

There is a great interest in all animals and their wellbeing in the world today and there are new scientific results revealed about animal behaviour and their needs everyday.

The animals are able to feel pain, distress and agony like humans and therefor demands proper care.

Animal status has improved enormous and in many countries there are animal protective laws, which prohibits unnecessary animal suffering (docket nos. 98N-1230, 96P-0418 and 97P-0197)

An animal is a living creature, nobody can deny that, and therefor must be respected .

I respectfully beg you to stop the practice of forced molting.

Sincerely

Agneta Riberth Toll
President of the Friends of the Animals Organisation.
