Dear Commissioner Henney:

We urge your support to prohibit livestock producers from routinely adding medically important antibiotics to animal feed to promote growth. After all more and more antibiotics are failing --likely because the bacteria are immune through overuse in one way or another. This irresponsible and stupid feeding habit can make bacteria resistant. PEOPLE need all the help they can get.

Thank you for your concern.

Sincerely,

*Betty + Paul Rondell*  
Betty and Paul Rondell (B&P)
