Dear Ms. Henney,

In the world we live in there is so much sickness. I'm sure your aware of the increasing diseases. I have but one question. "Why are we not banning the use of antibiotics used by humans from animal feed?"

Can't we prohibit livestock producers from using medically important antibiotics just to promote growth ?

I urge you to PLEASE see if we can't get this banned here in our country.

Sincerely,

*Violet J. Wiley*
