 Rockville, Maryland 20857

Dear Commissioner;

*Please exercise your power to influence the decisions related to livestock producers routinely adding medically important antibiotics to animal feed to promote growth. I feel very strongly that anyway that we can protect the viability of developing antibiotics we must do it now! All too frequently over the past five or so years, antibiotics are failing to fight successfully the microorganisms we now can identify, and the emerging antibiotic-resistant germs. Therefore, please voice that this practice should be banned in all animals feed products.*

Sincerely,

Emily Garrett Sharp
