To whom it may concern,

It is my understanding that there is a proposition currently before the FDA(docket # 94P-0036) which would require the listing of trans-fat content on food labels in addition to the listings already required. As a nurse, a mother of teen-agers and a woman in mid-life I am very concerned about the health of all people. Accurate food labeling allows consumers to make informed choices about their health and is essential if we are to improve the health of all citizens. I very much favor this proposition and urge the FDA to adopt it. Thank you for the opportunity to provide my opinion.
