Jane Henney, MD., Commissioner
Food and Drug Administration
5600 Fishers Lane, Room 1471
Rockville, Md 20857

Dear Dr. Henney,

I am deeply concerned by the widespread use of antibiotics used to induce animals to reach slaughter weight sooner. In particular, it is frightening to know that antibiotics important to curing human disease are put to this kind of use. It seems absurd that some human disease might become untreatable so that agribusiness can make more profits. You are in a position to do something about this. Please act before it is too late.

Sincerely,

Kenny Lerner
